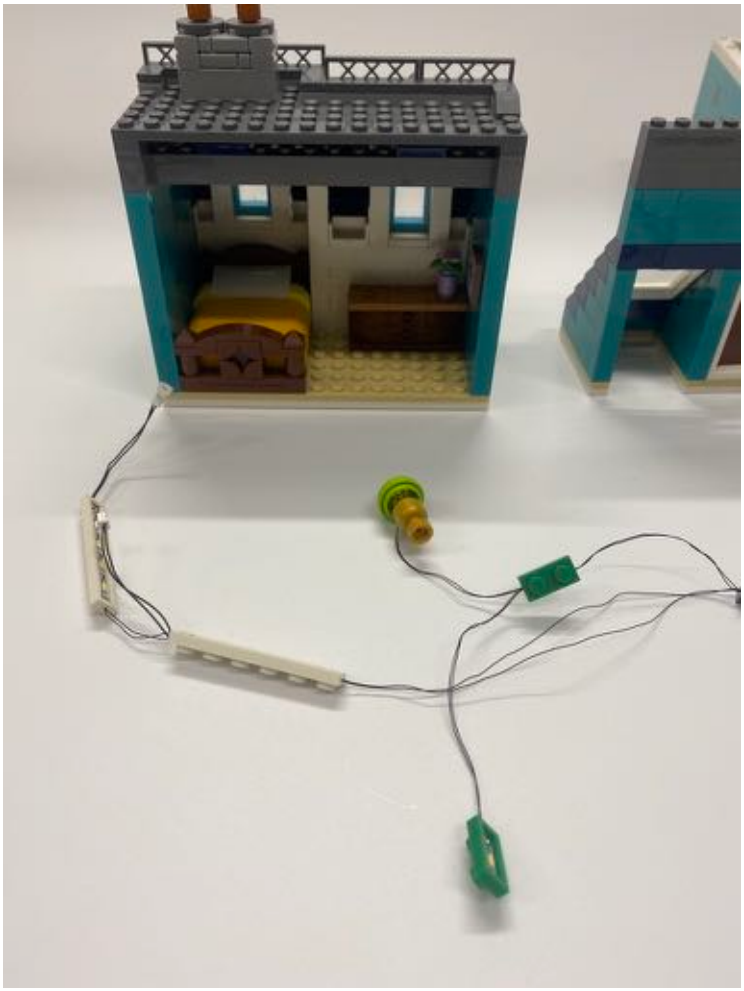
Installation Guide

GLOW BRICKS

These lighting parts are going to be used for the blue building

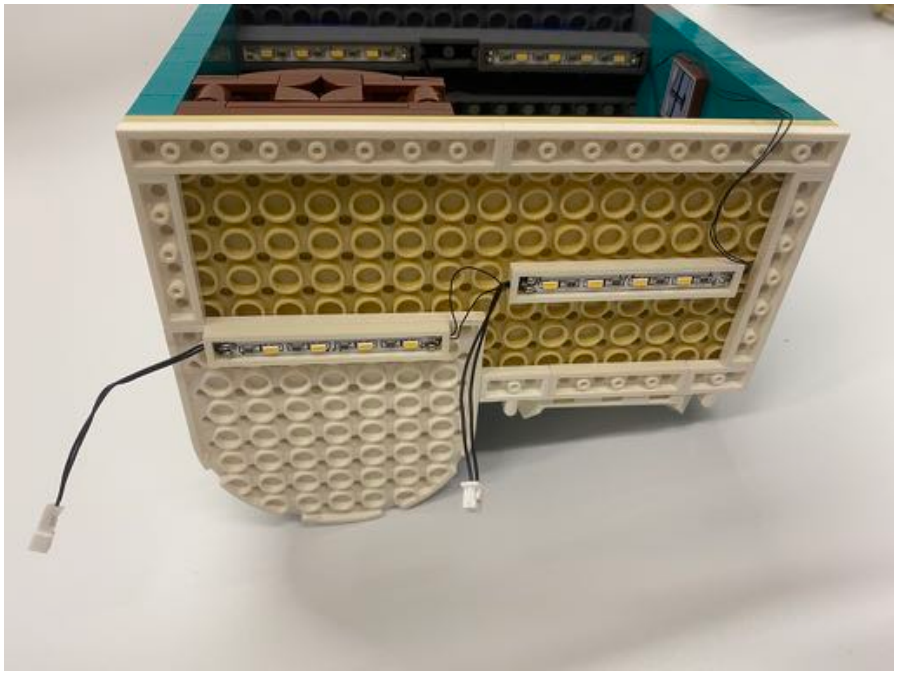
First we separate the blue building

Take the lamp of the top floor, replace the yellow cone to the lighting part shown

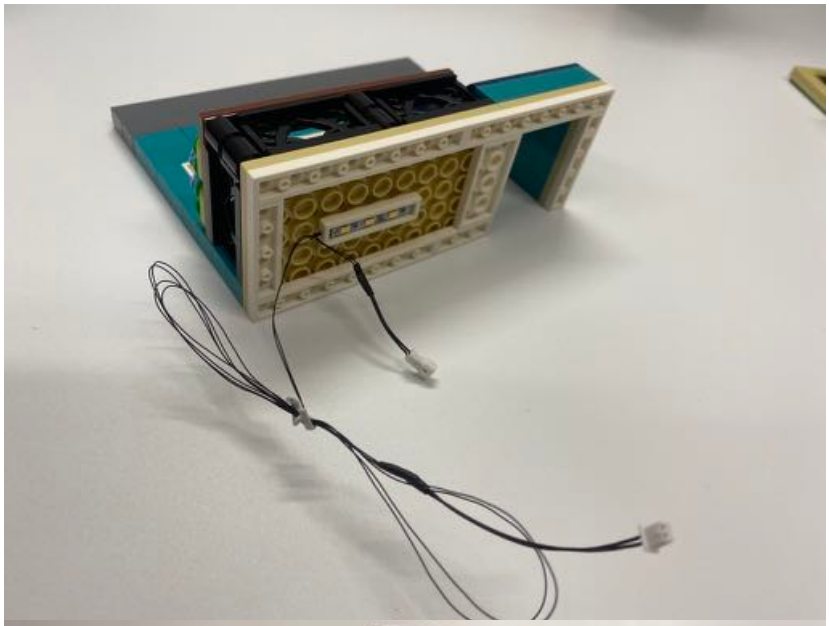


Then install the green and grey plates as shown

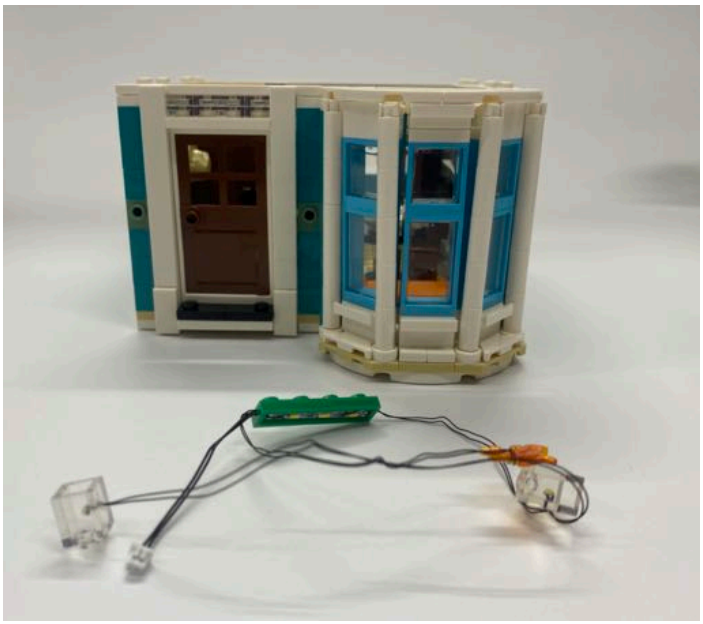
Then install the white plates to the bottom



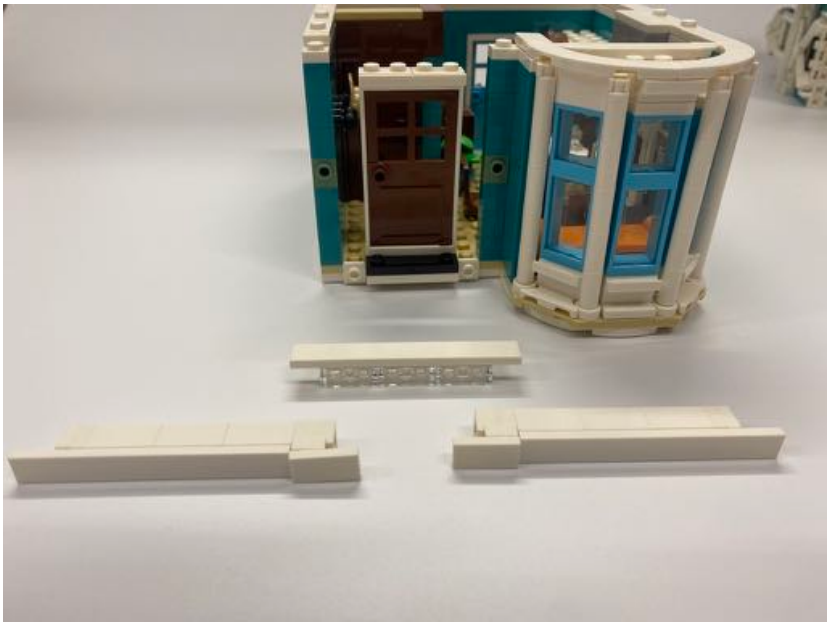
Take the lighting part of single 1x4 white plate to install on the other side then connect them



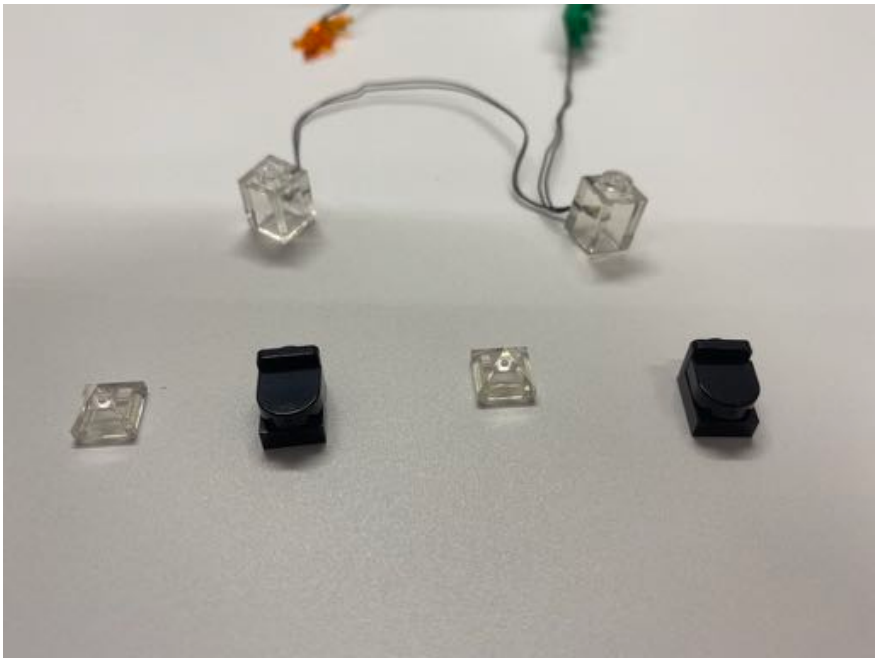
Take this lighting part for the 2nd floor



Before installing the lights, take the parts from the building as shown



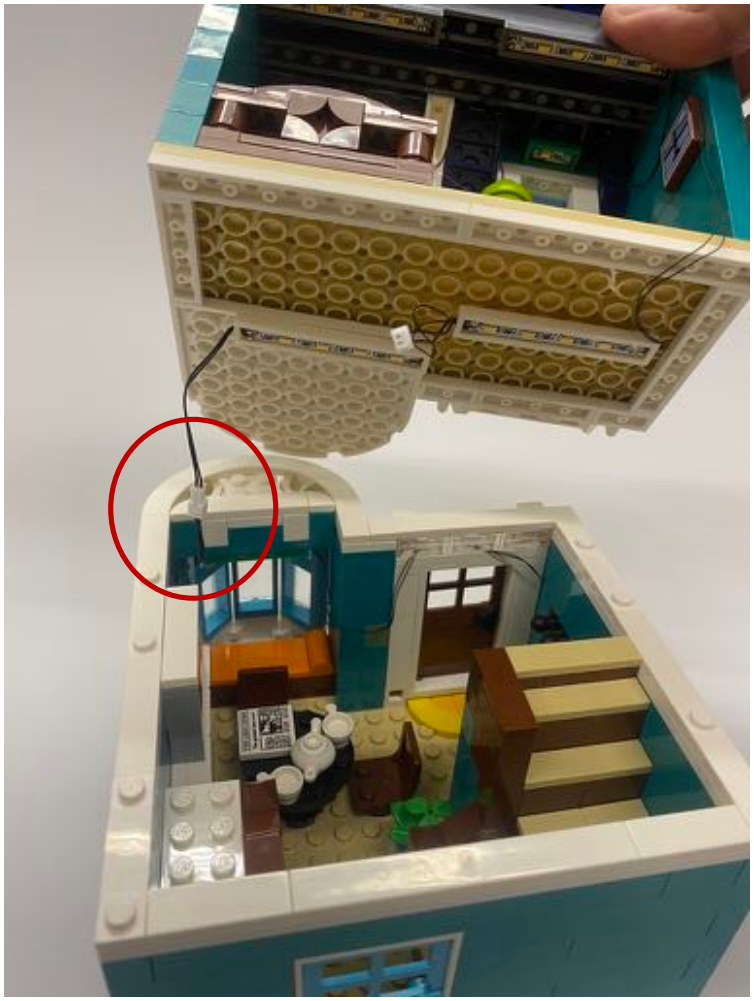
Take the clear bricks away from the lamp and replace with the lighting part



Put the lamps back and restore the building

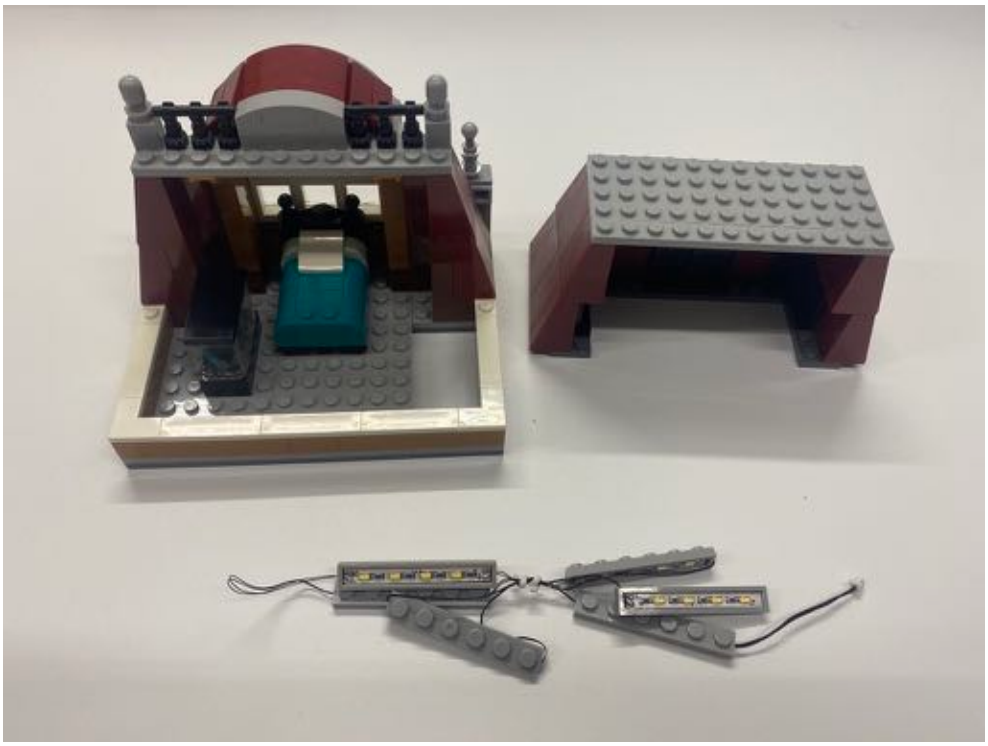
Then install the green 1x4 plate and the fire

Connect to the top floor (the other plug connect with the other side of the top

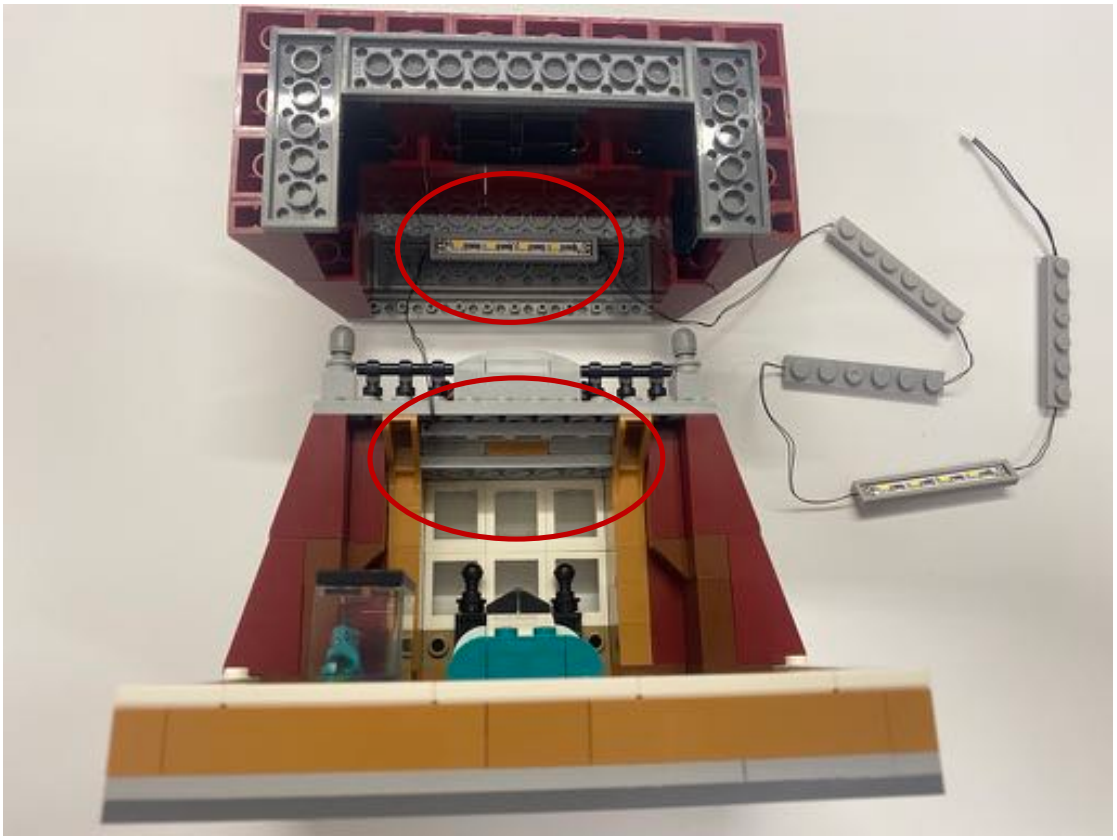


Connect the plug to the USB cable with the lighting lamp post

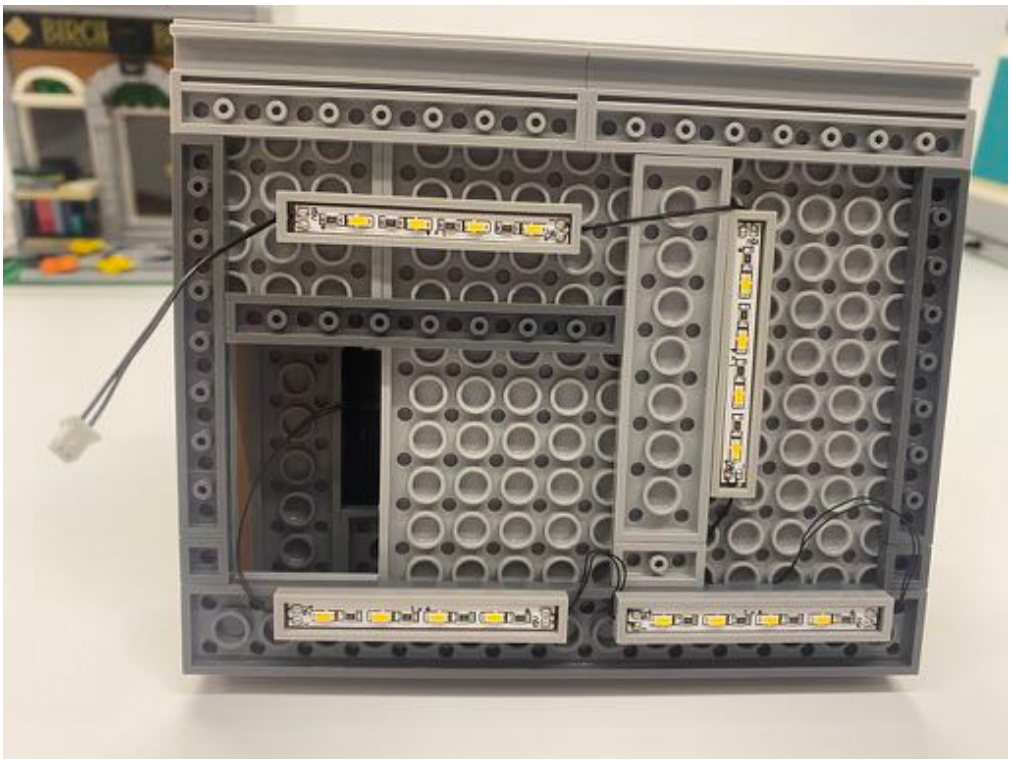
Now it’s turn for the red building, take the following part for the top floor



Install the lights as shown

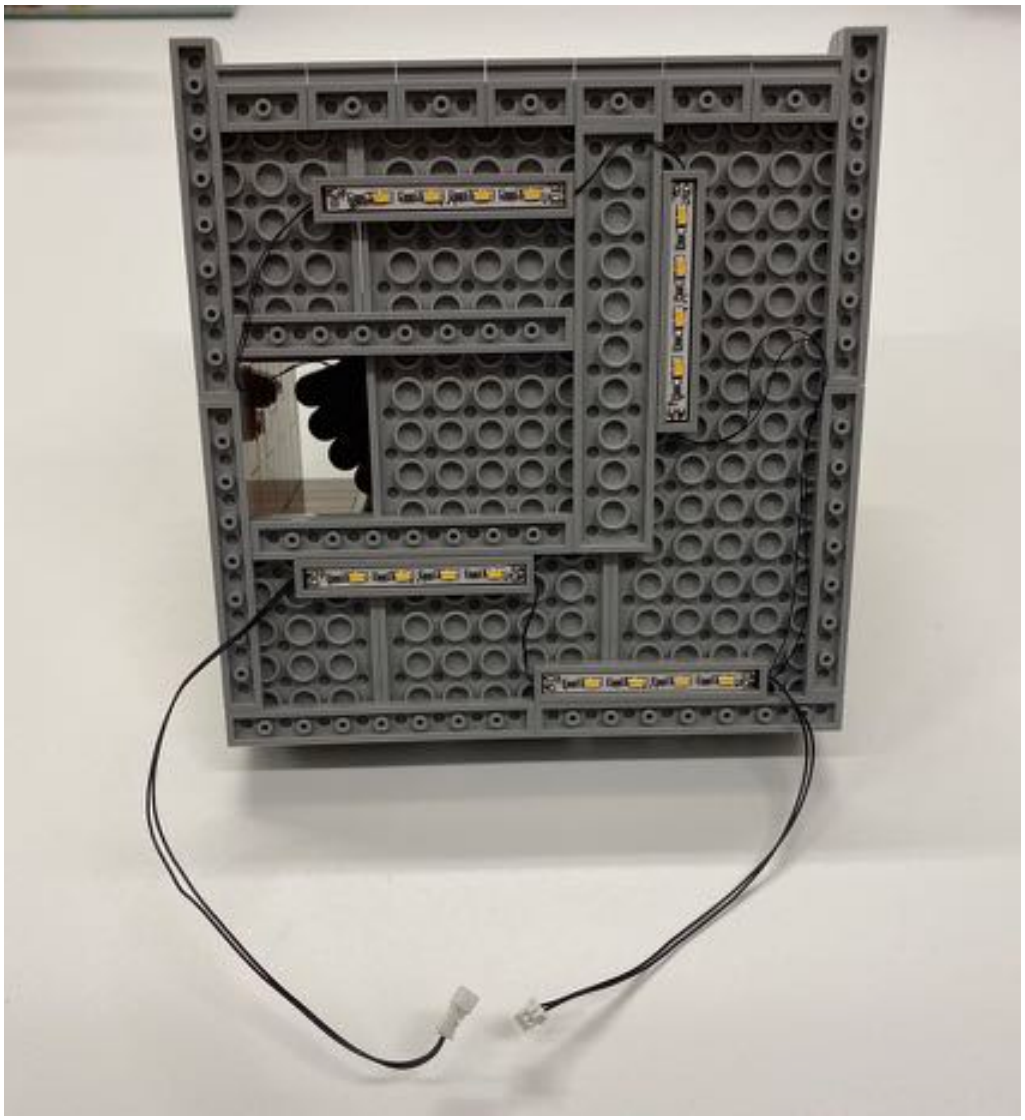


Pull the remain lights to the bottom then install as shown



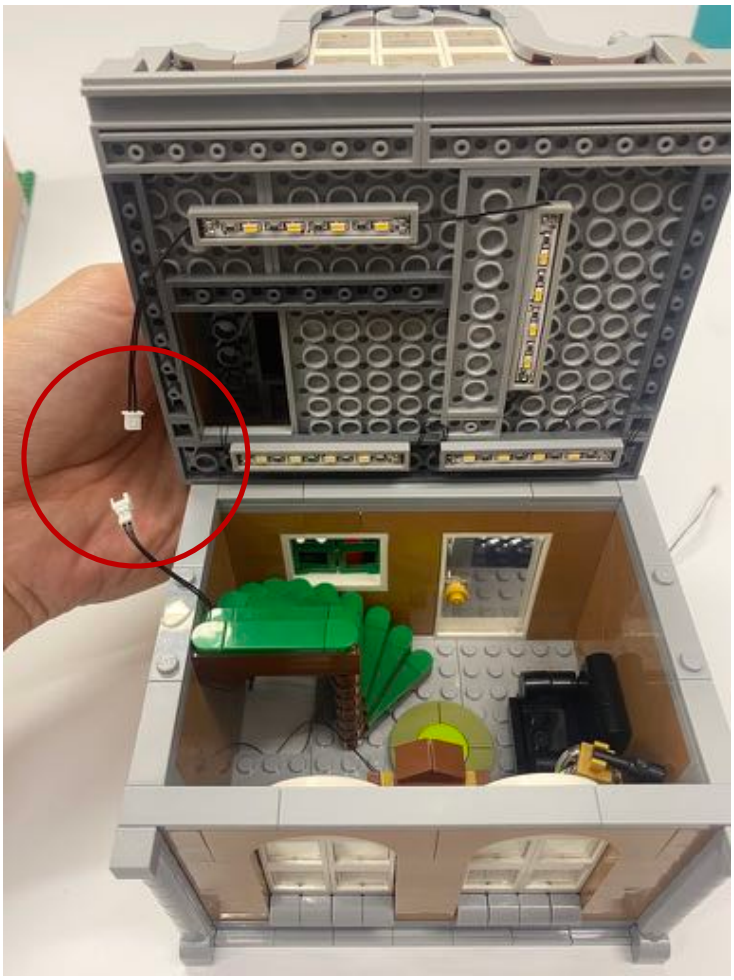
Take this lighting part for the 2nd floor

Install the lights to the bottom first

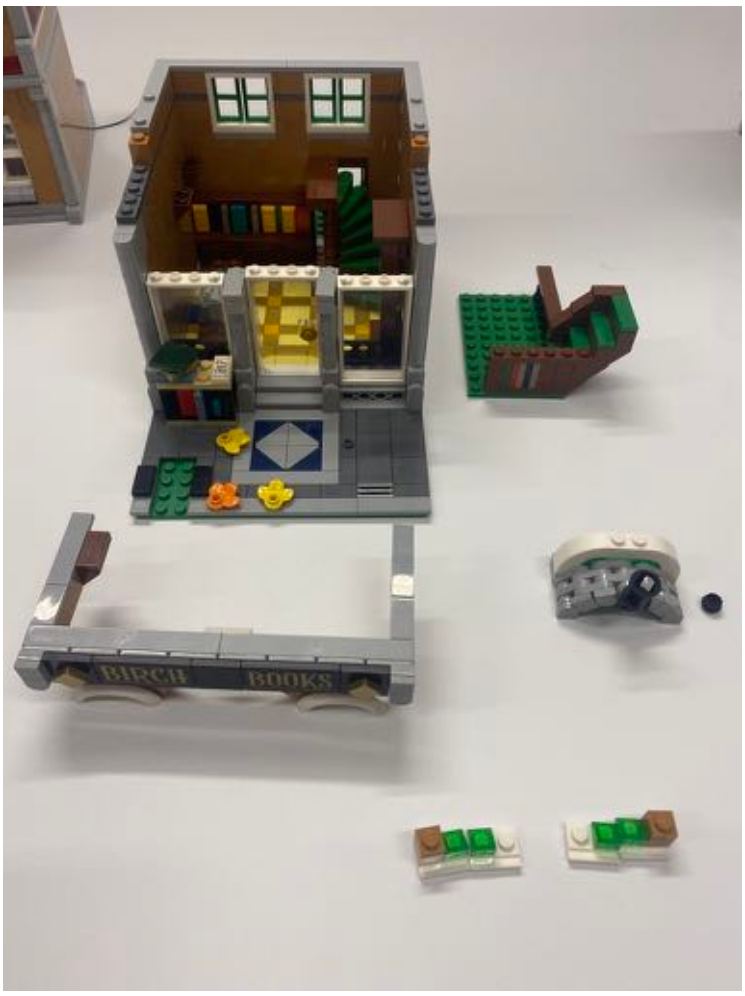


Put the remain clear lighting part to the lamp to install as shown

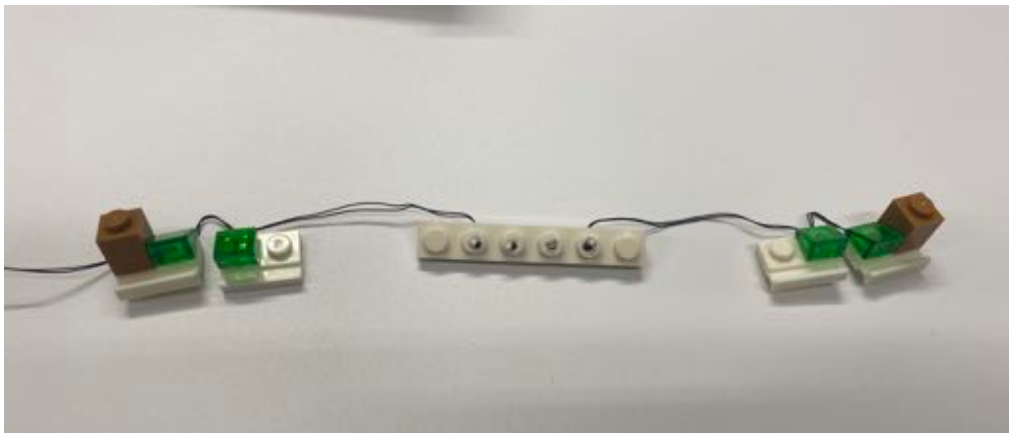
Pull the plug to the stairs to connect with the top floor

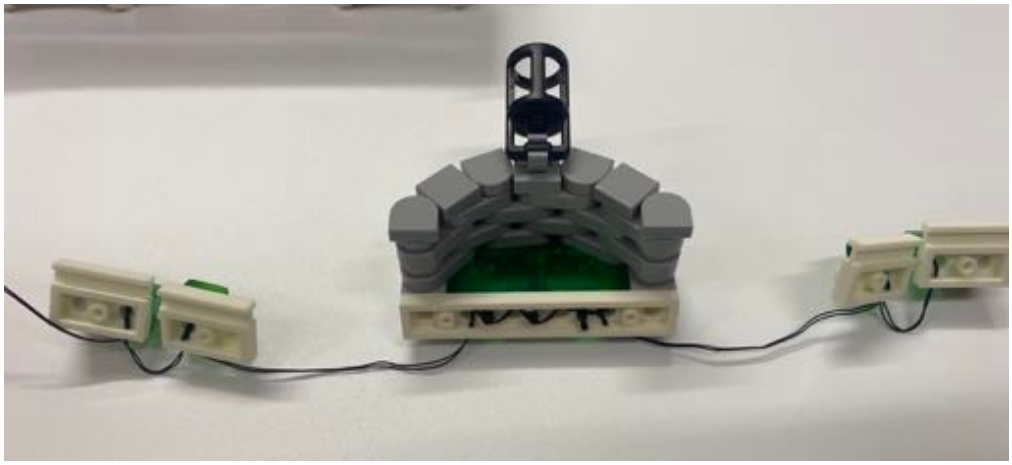


Split the parts away from the ground floor as shown



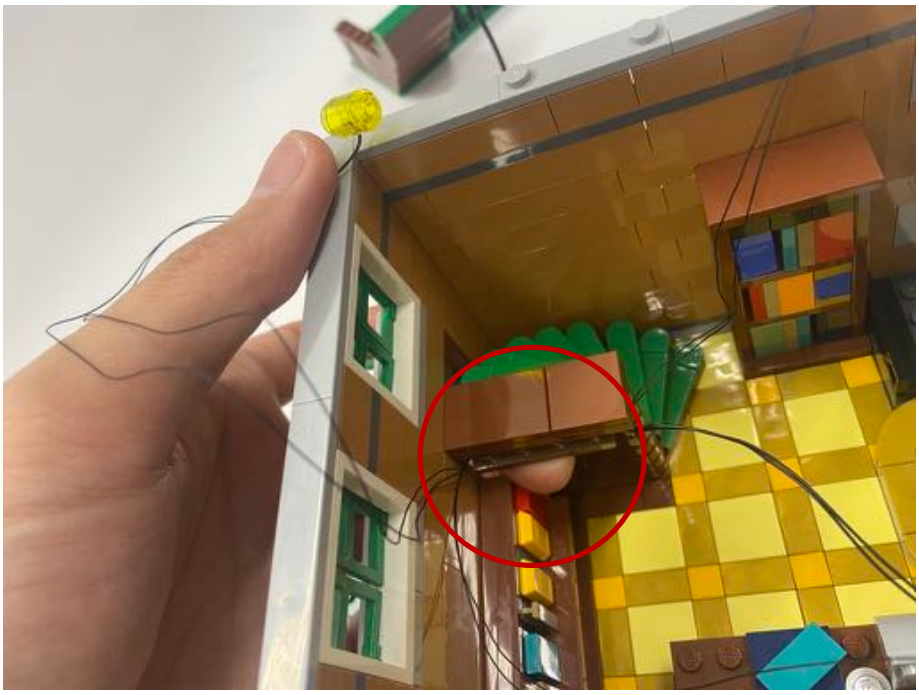
Remove 4 pieces of 1x2 white plates away and install the lighting parts





Then put them back to the building

Pull the 1x4 brown plate to the back and install it here



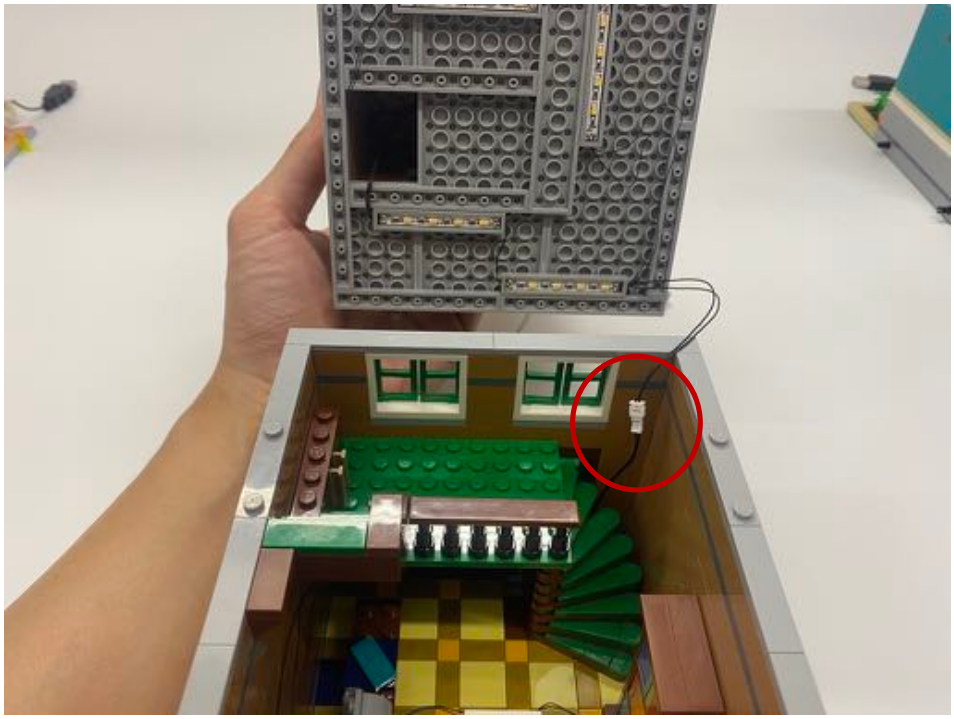
Then pull the USB port out of the building as shown

Stabilize the connector to the corner then restore the stairs

Pull the yellow lighting round brick to the front, remove some tiles from the front and install it

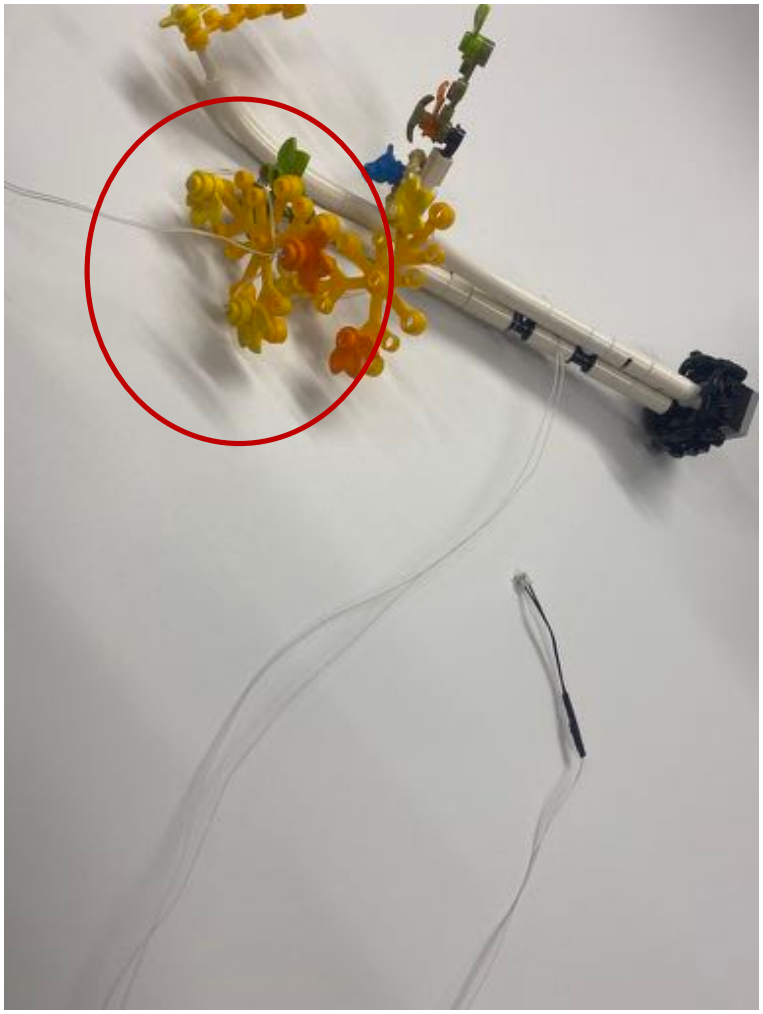
Then restore the tiles

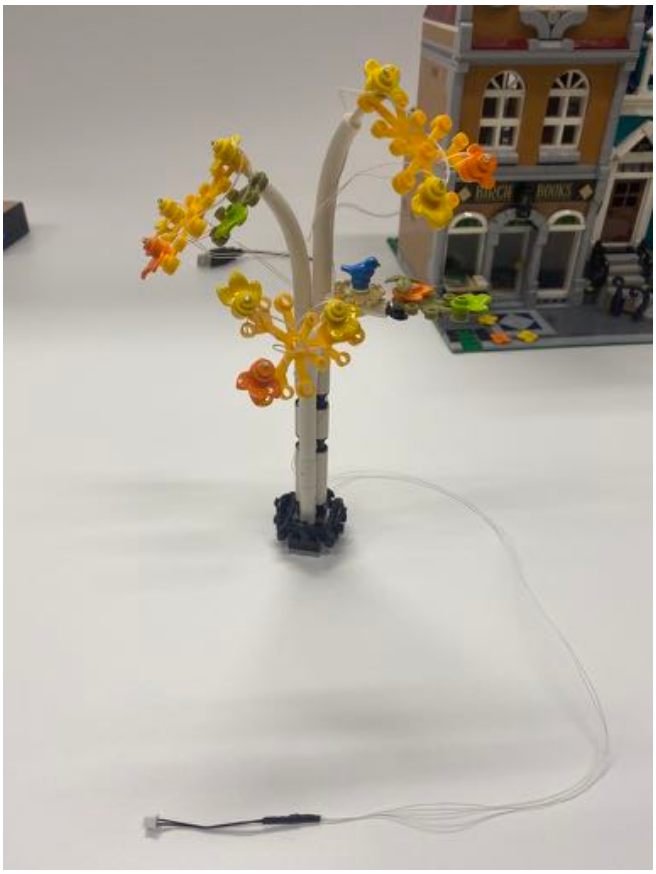
Connect the plug with the 2nd floor

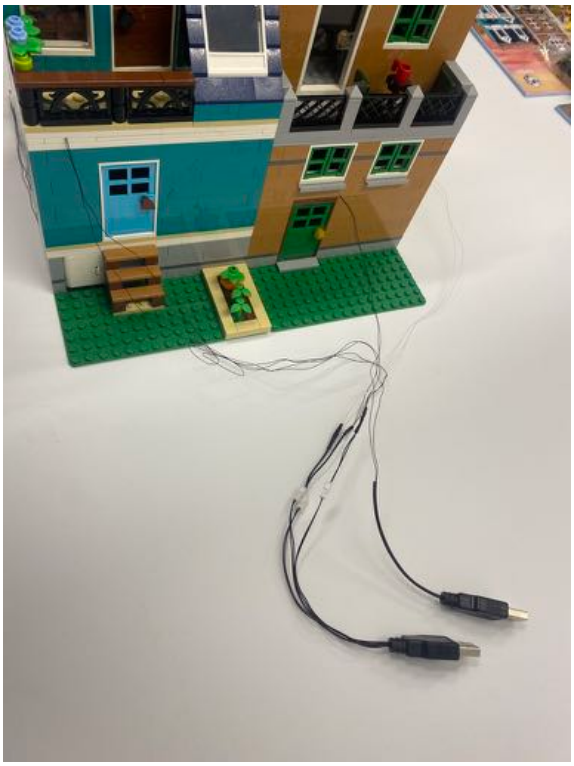


Then install the tree lights

The 3 lights which are next to the connector must be installed at the leaves facing outside







Then install the remain lights, put the tree on, connect to the USB port and the buildings and light it on~
