

Lego 42093

Chevrolet Corvette ZR1

Installation Guide

For the rear side of the car, remove the rear lights and logo, replace with the lighting parts
Adjust the wire and put the logo back on it

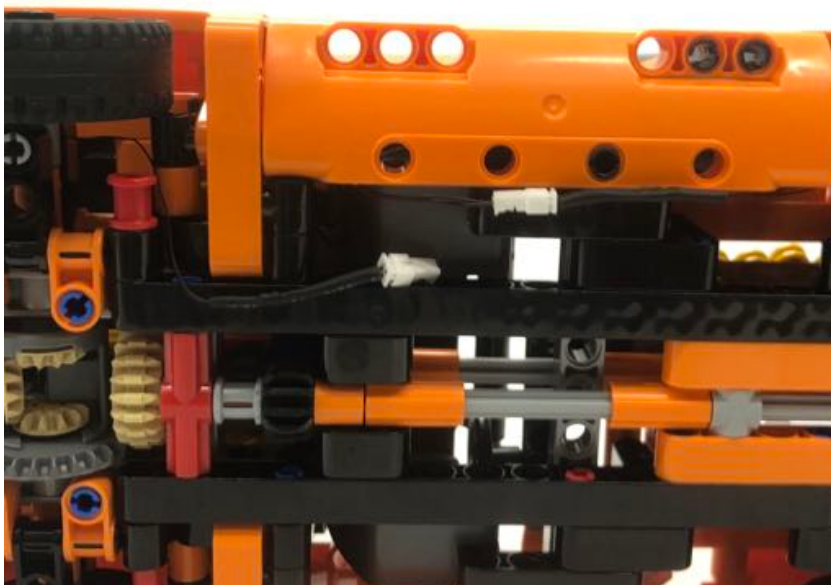

Stick the 1x2 lighting part on the top of the body as shown

Connect the wire with the battery case or the USB plug

Put the battery case inside the car and hide as shown, pull the rest 2 plugs underneath the car and connect with the plug from rear lights

Remove the orange part as below, take the clear parts away and replace with the lighting parts

Adjust the wire underneath the car and put the orange part back on it
Connect the wire with the plug from battery case and that's all~
