

LEGO 21108

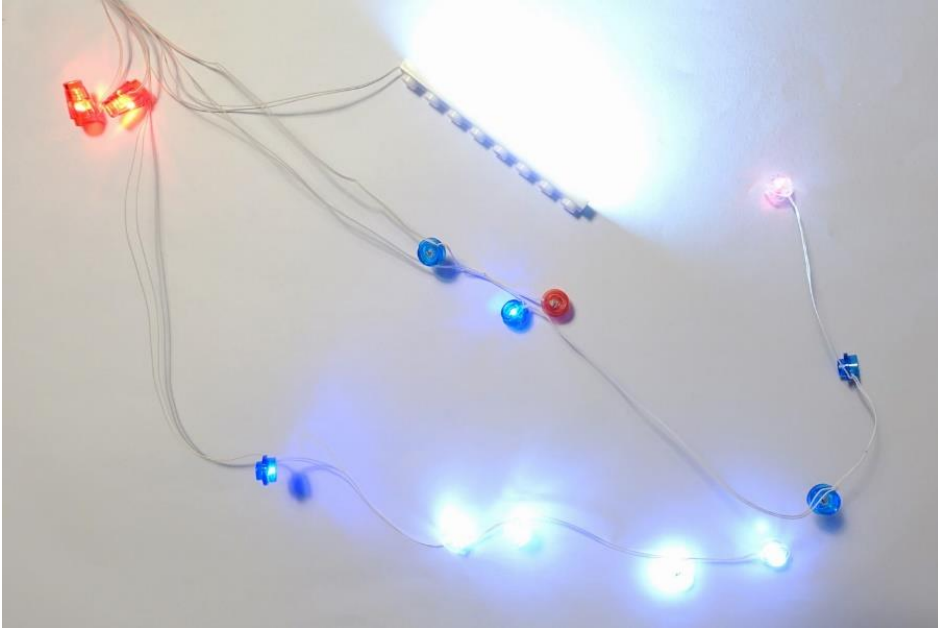

GH**OST**BUSTERS™ ECT-1

LED LIGHTING KIT INSTALLATION GUIDE

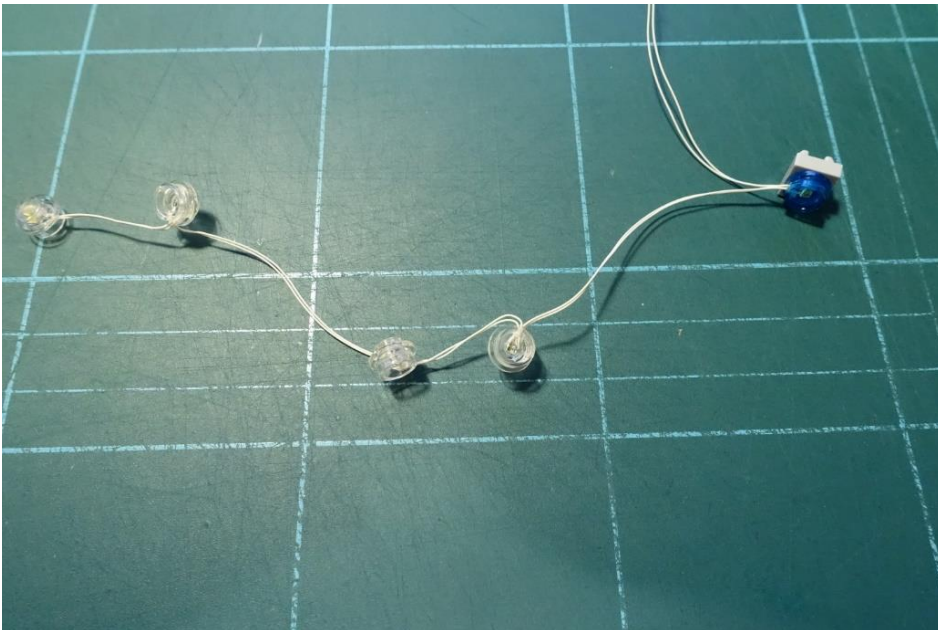

GB GLOW
BRICKS

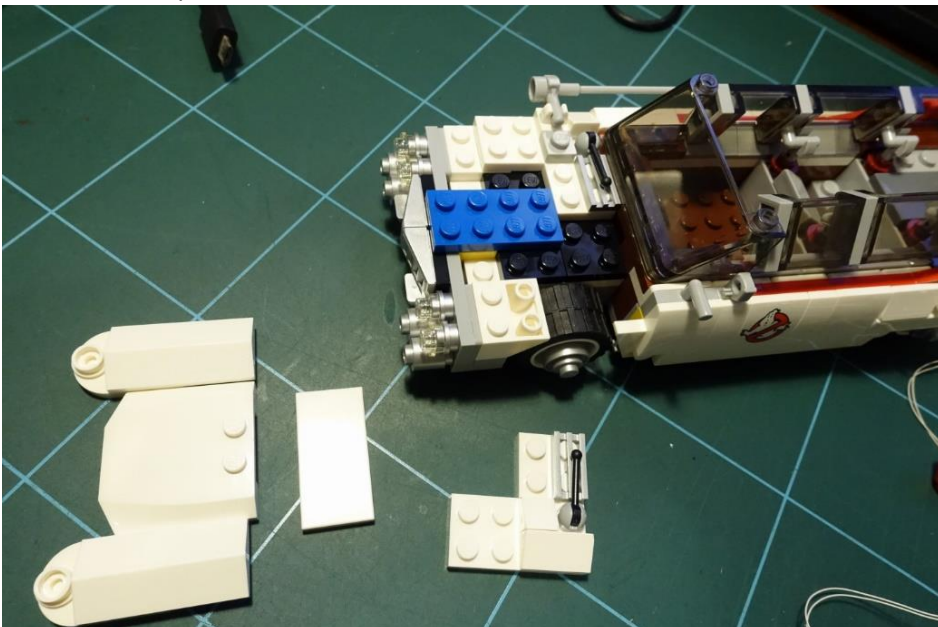

Before the installation, plug in and test all lights first

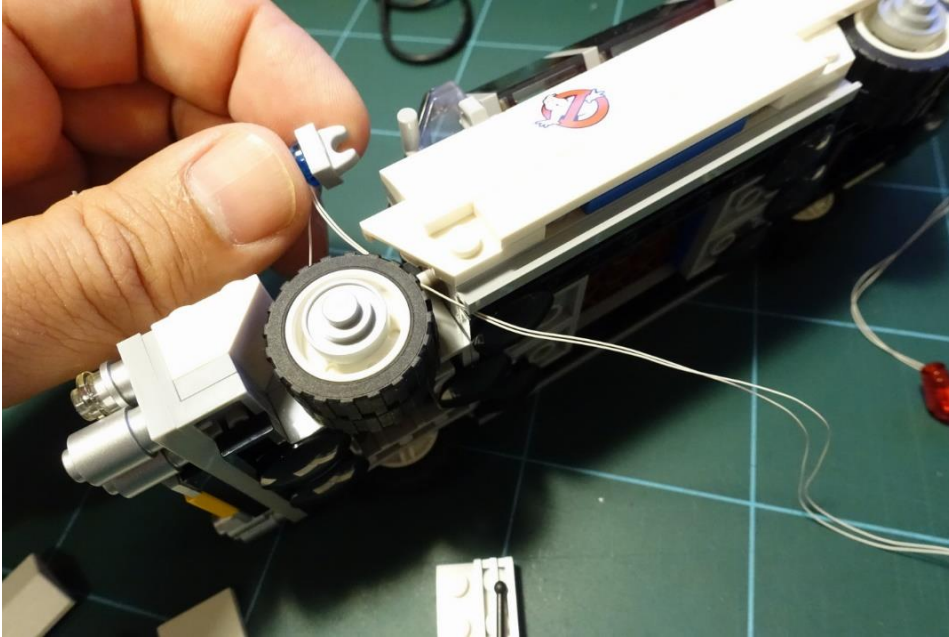

Headlights and left side LED

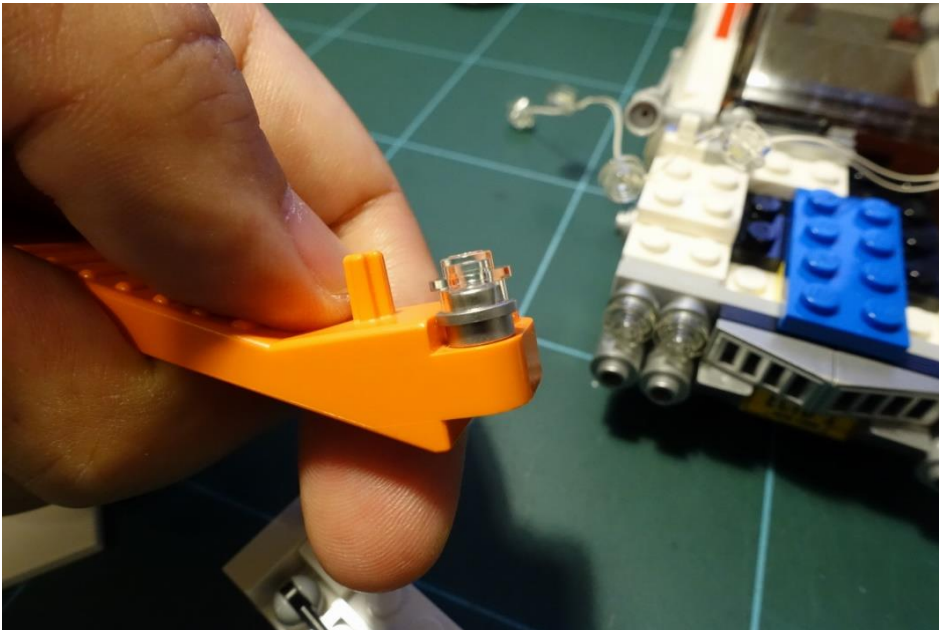

Remove some parts at the front

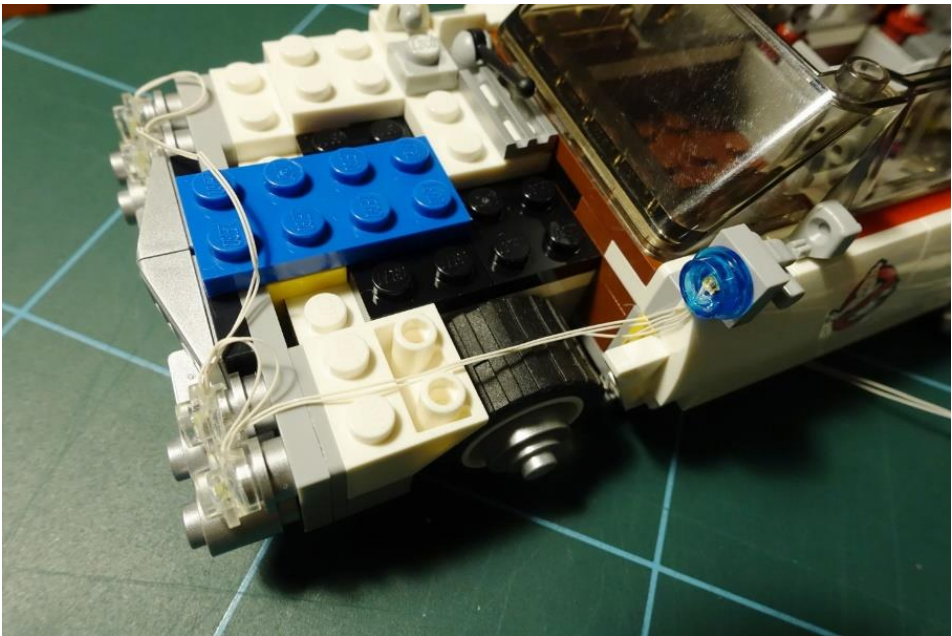

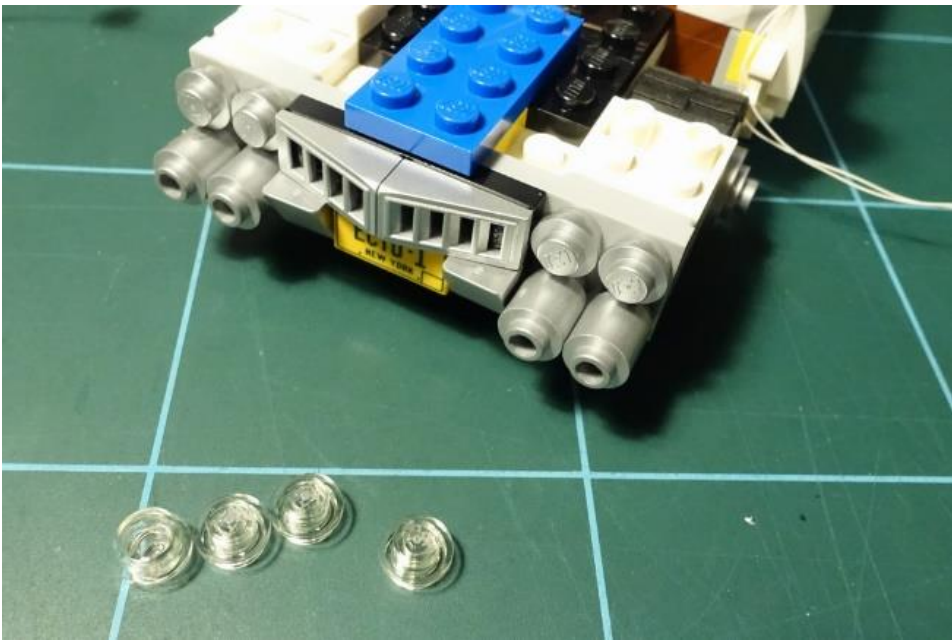

Move the wire from the bottom to the front through the gap behind the wheel and replace the blue light on left side

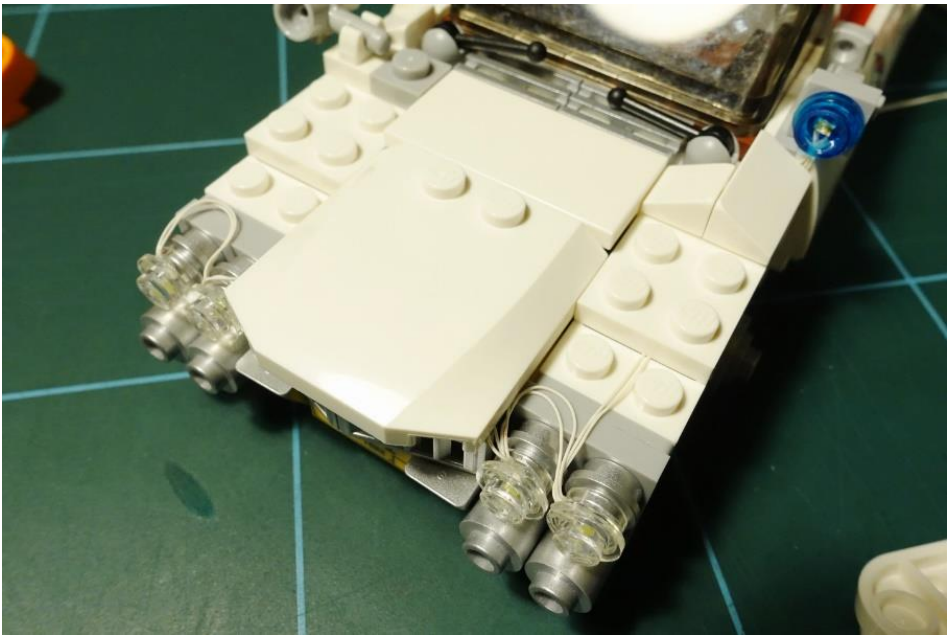

For 4 headlights, separate the clear plates and the silver plates by the brick separator

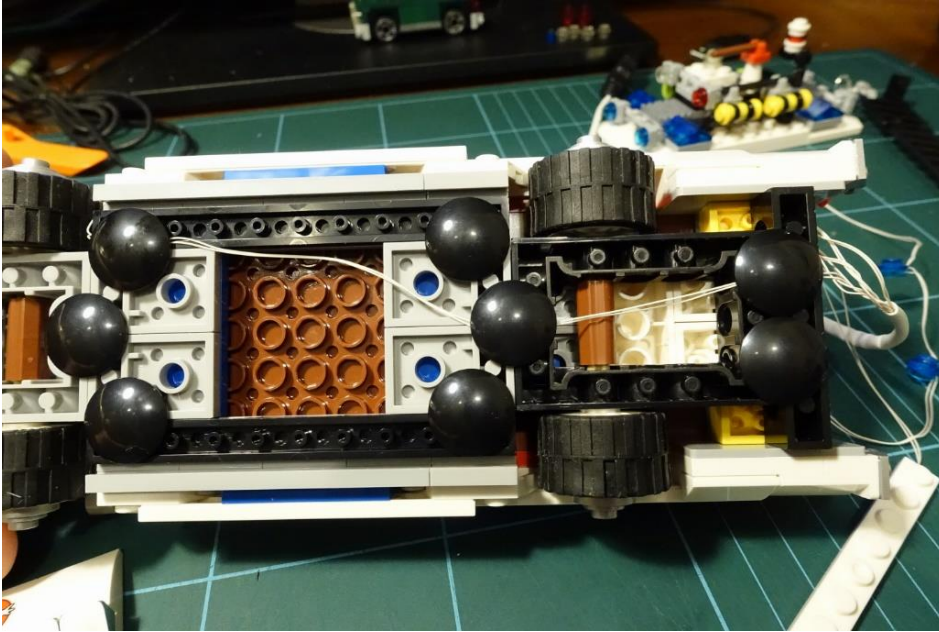

Put the parts back at the front

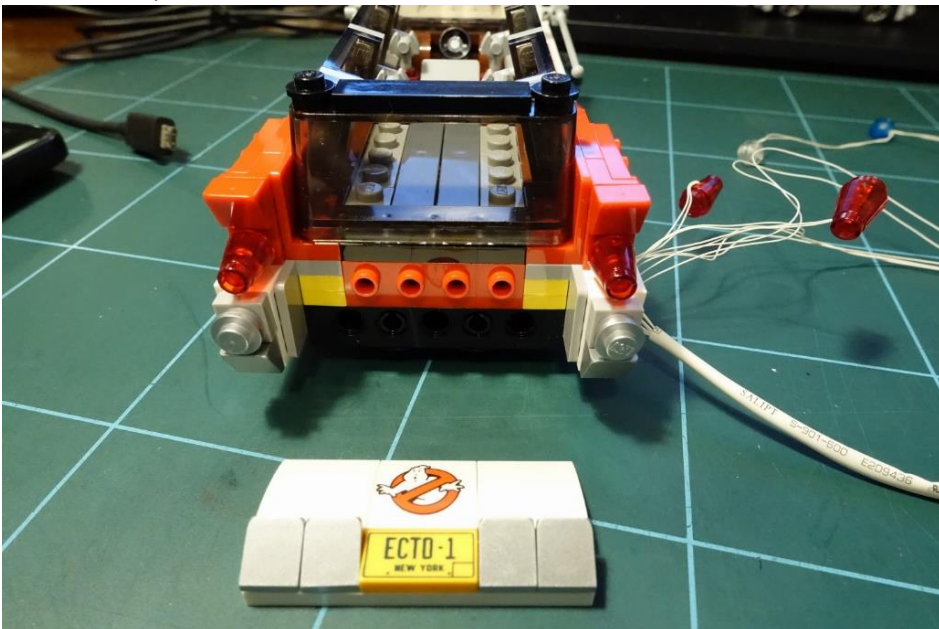

Fix the wire position by the black round plates at the bottom

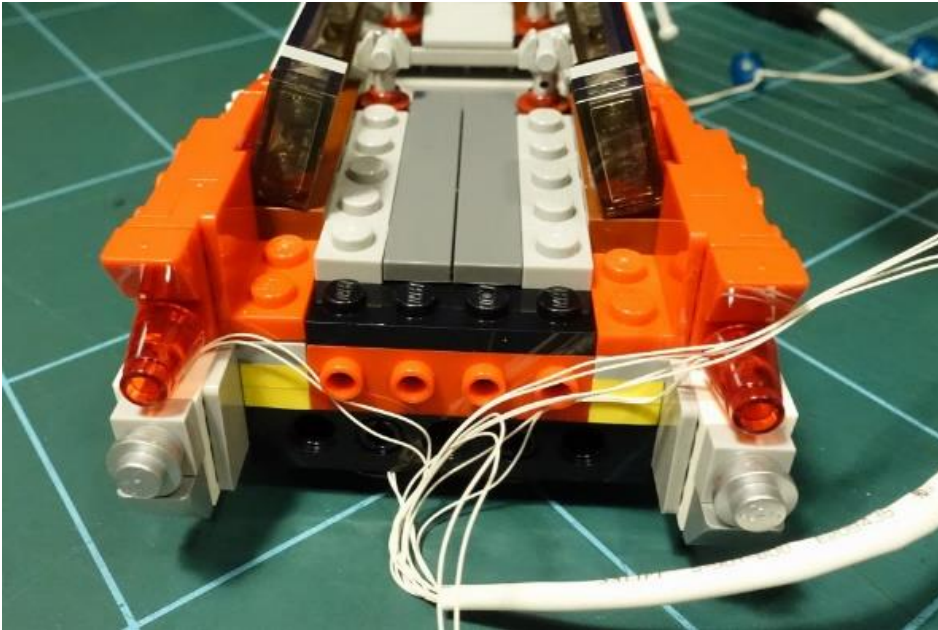

Rear lights

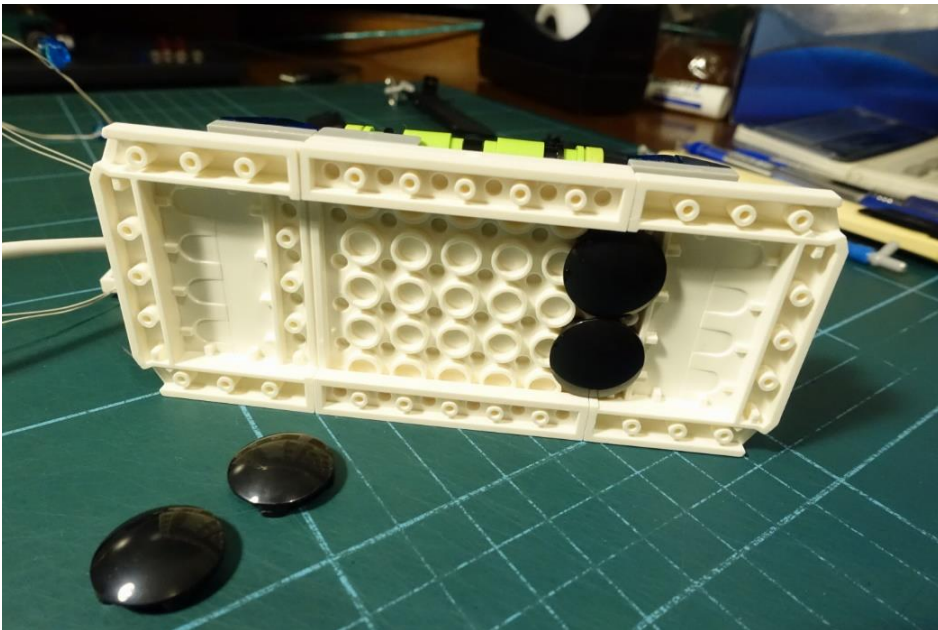

Remove the parts and the roof

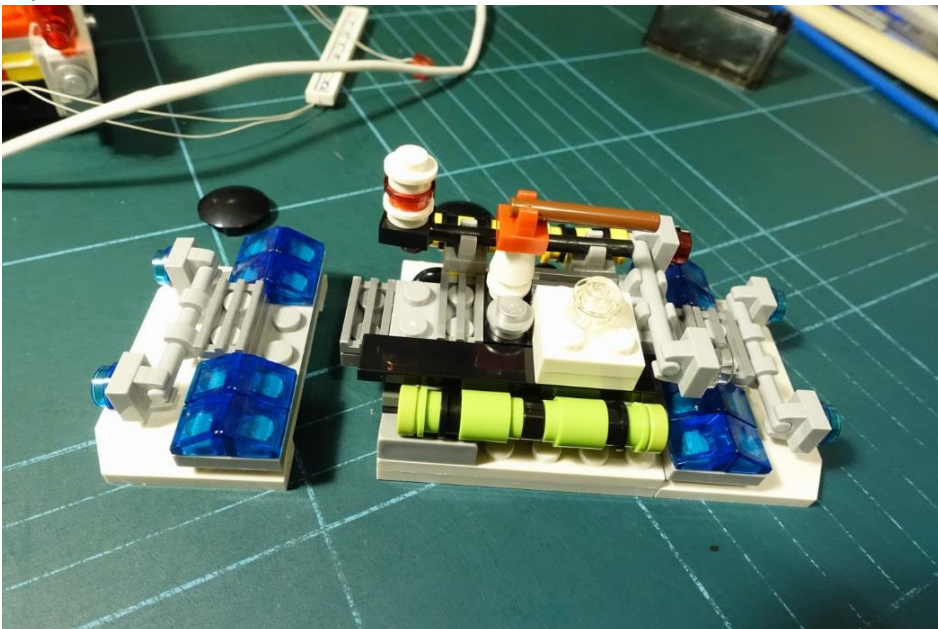

Replace the rear light, remove the rear window

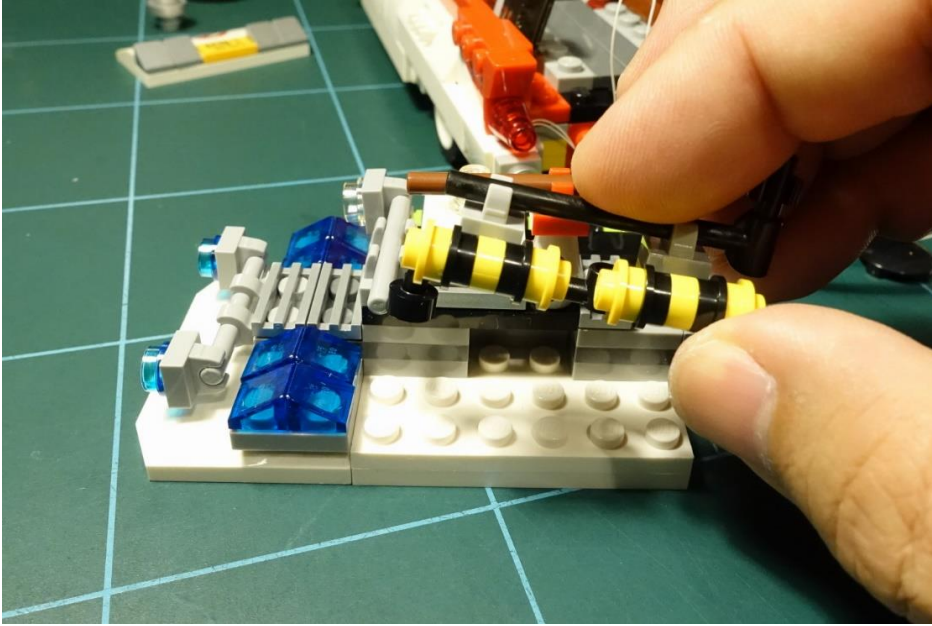

For the roof, remove 2 black round plates

Separate the rear roof

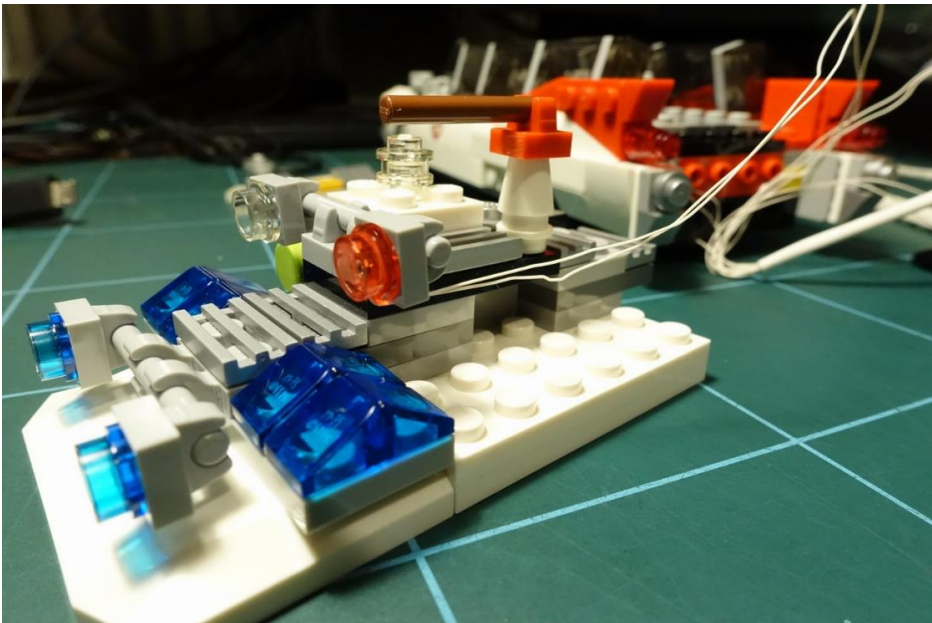

Remove the parts with yellow plates

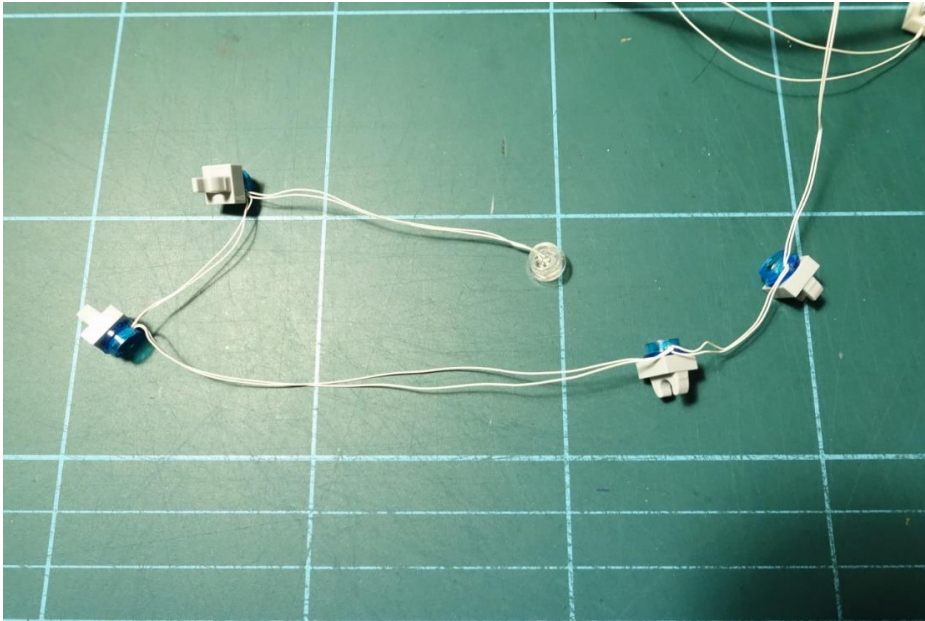

Red blinking light at the roof

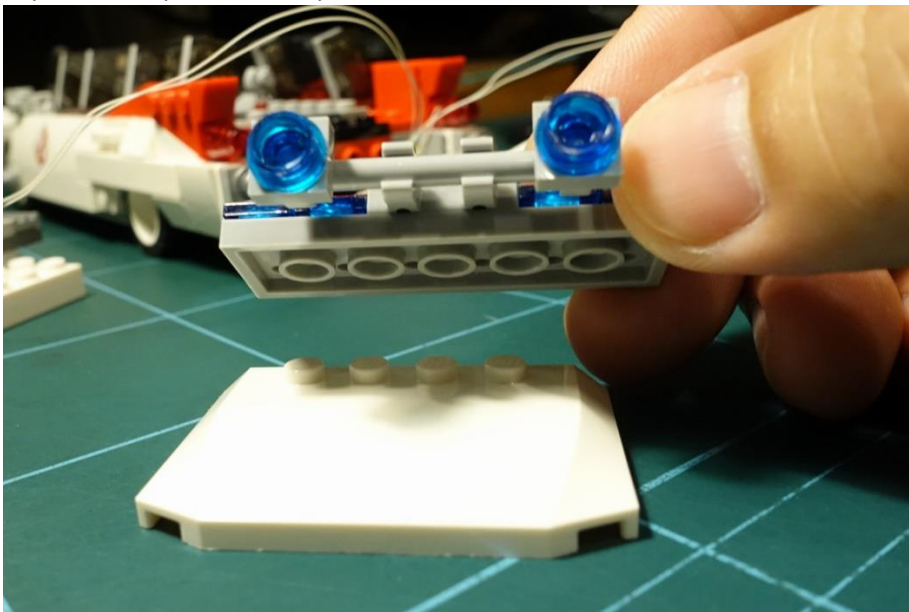

Replace the red light

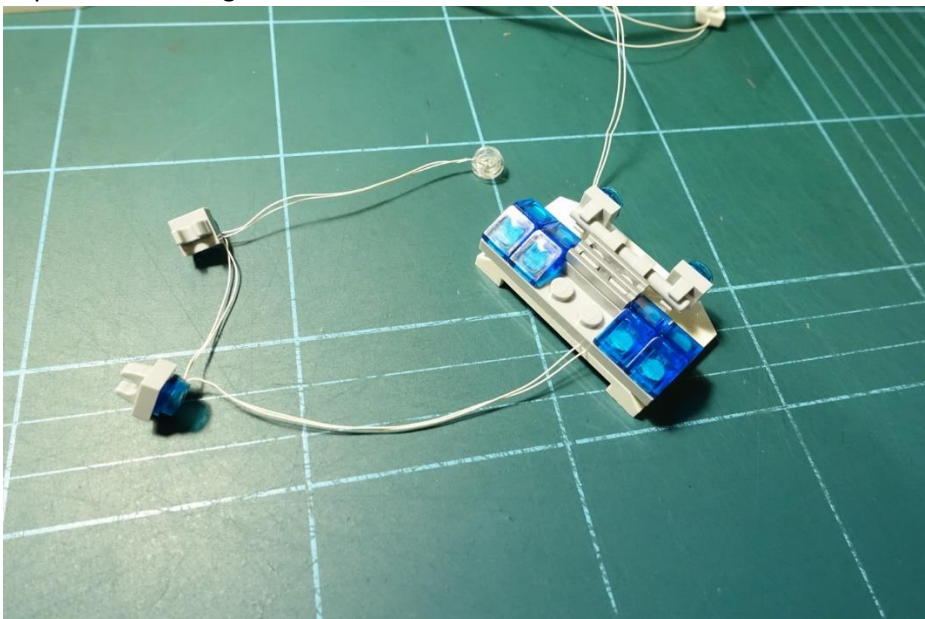

Other lights at the roof

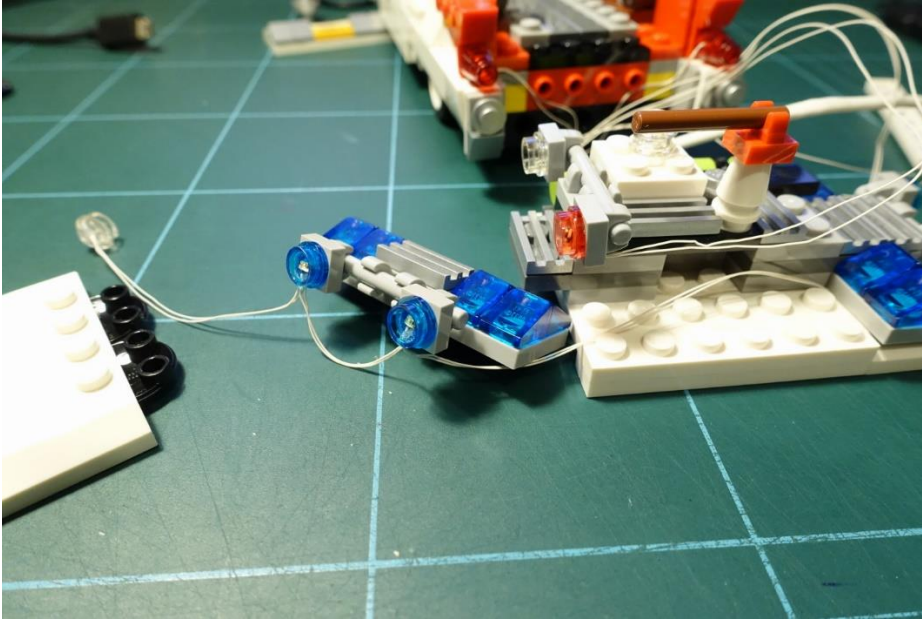

Separate the parts at rear part

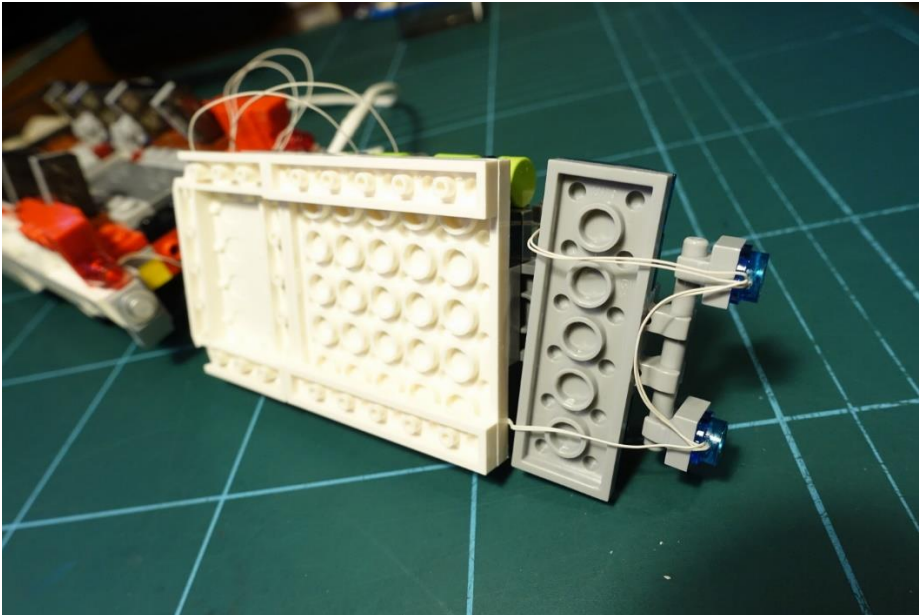

Replace the blue lights

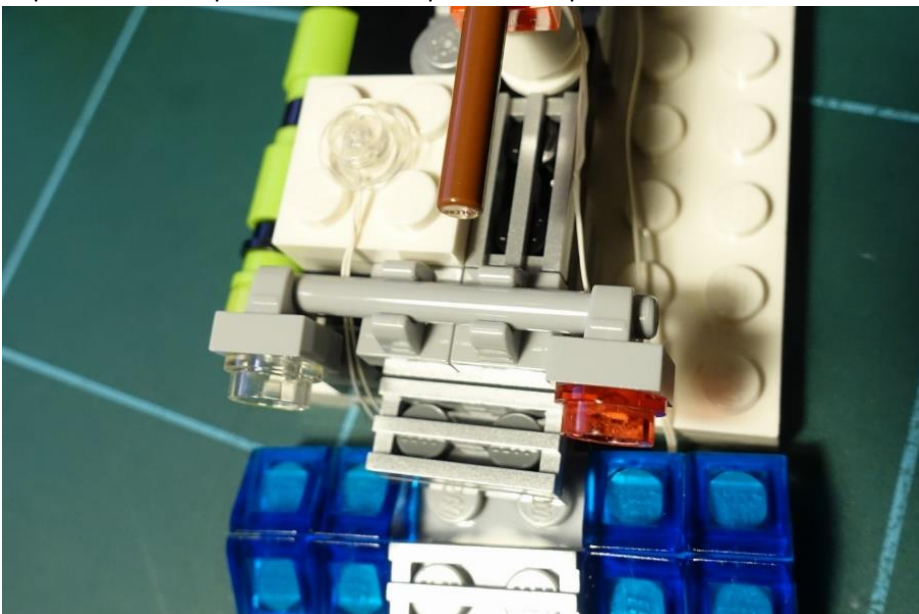

Replace the other 2 blue lights at the front

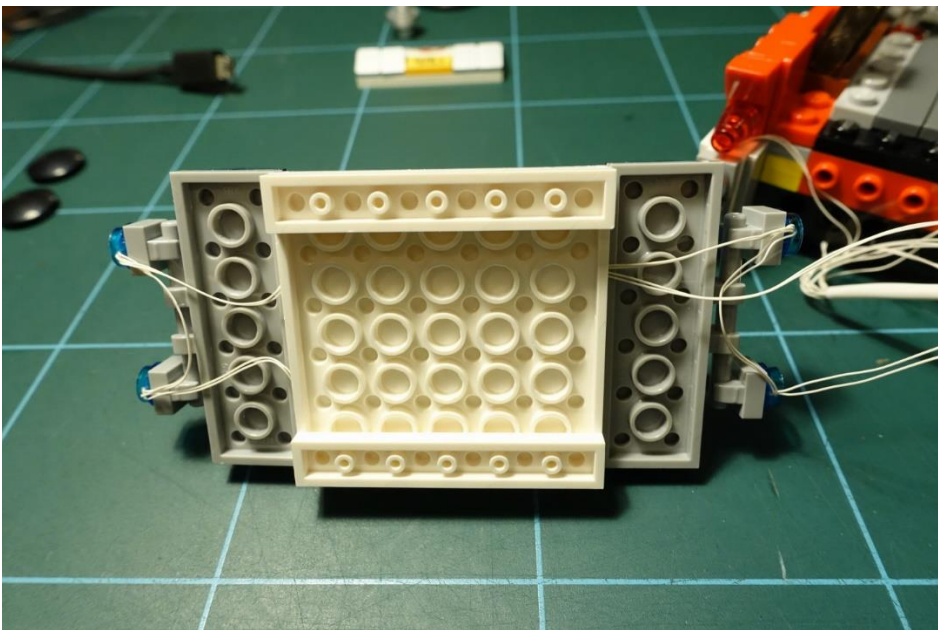

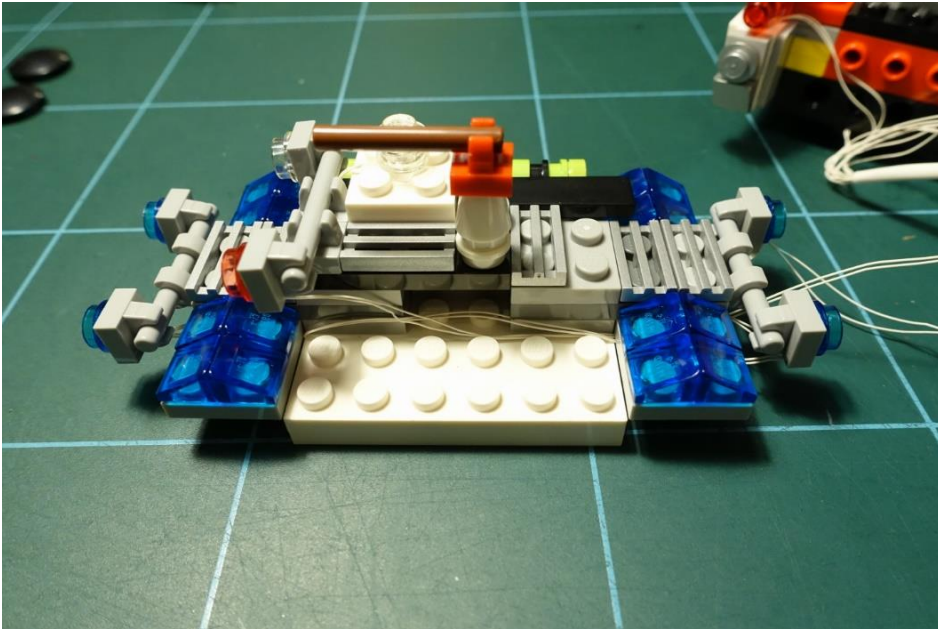

Put the clear plate to the top through the gap

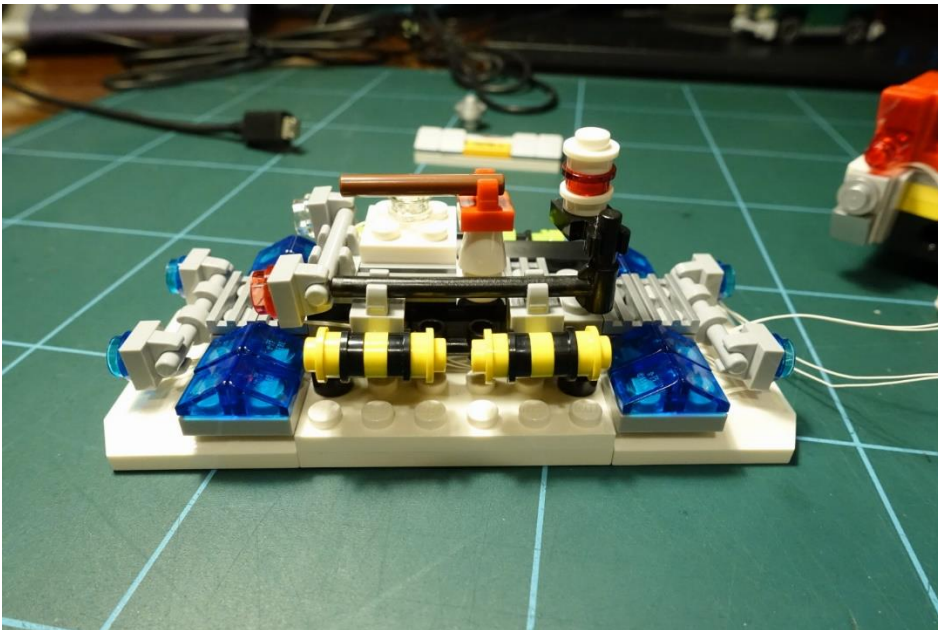

Replace the clear plate above the square white plate

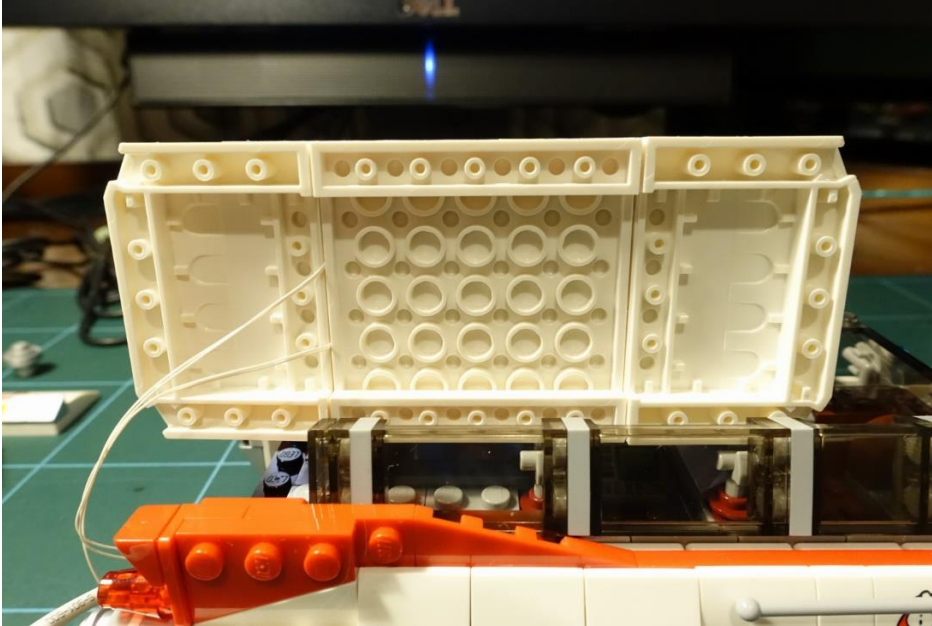

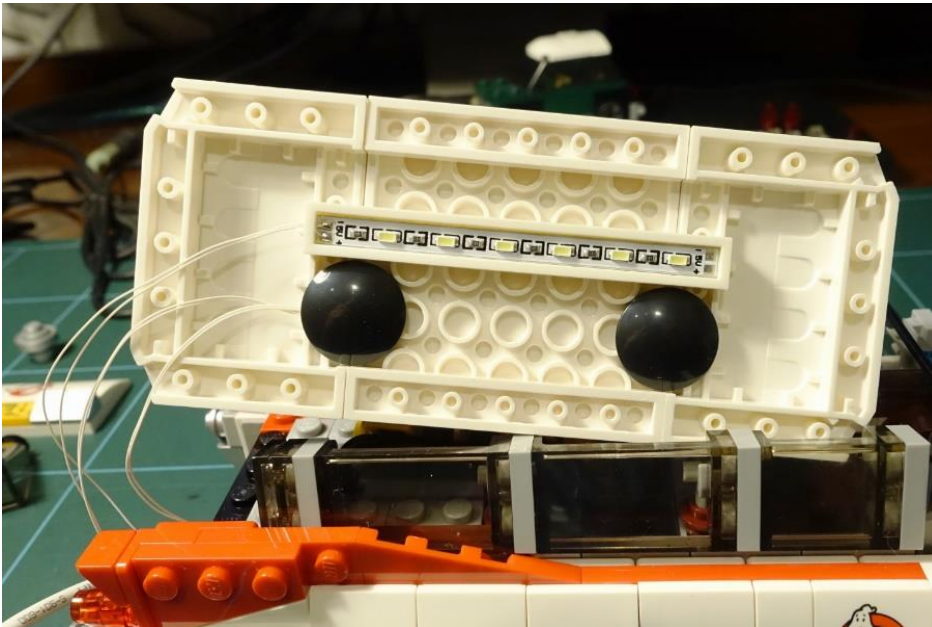

Put the yellow parts back

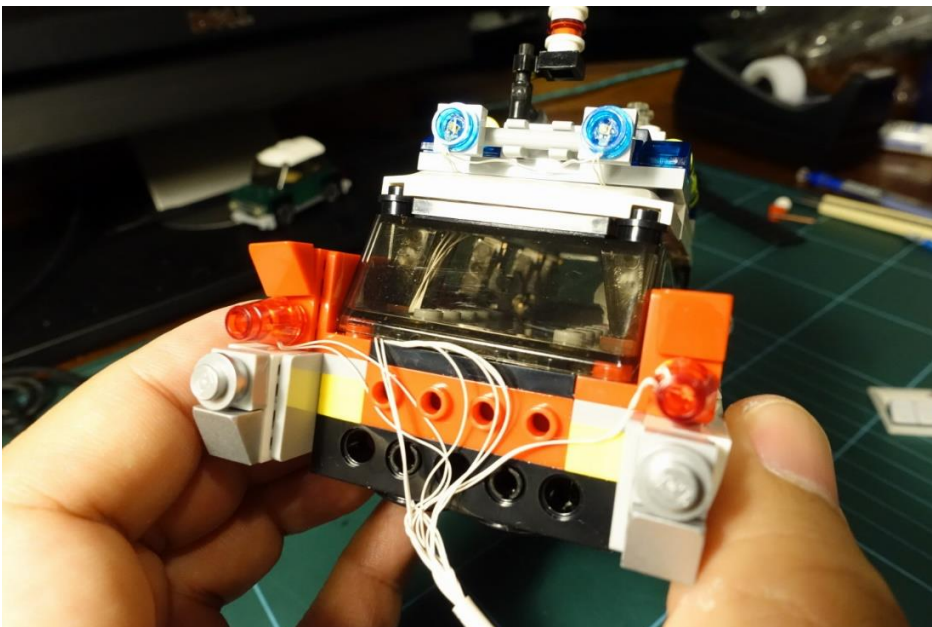

Place the wire between the gap

Install the room light

Put the roof and rear window back

Plug in the USB and it's ~~done~~^{all} done!
