Lego 75948

Harry Potter Hogwarts Clock Tower

## Installation Guide

GB GLOW BRICKS

First of all serperate 2 buildings

The lighting part with clear parts is for this side

Remove the parts as shown and install the lighting parts, the clear parts will be taken away
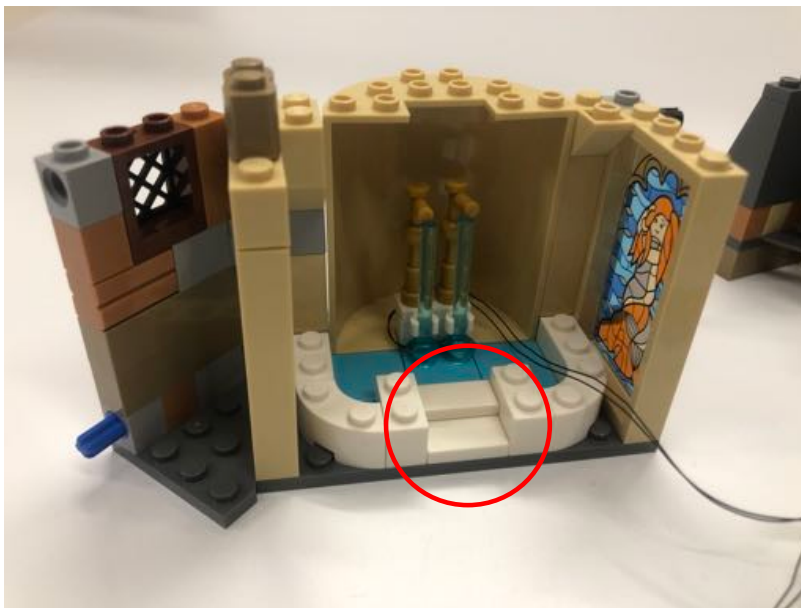

Install the part with fire

Separate the building as shown

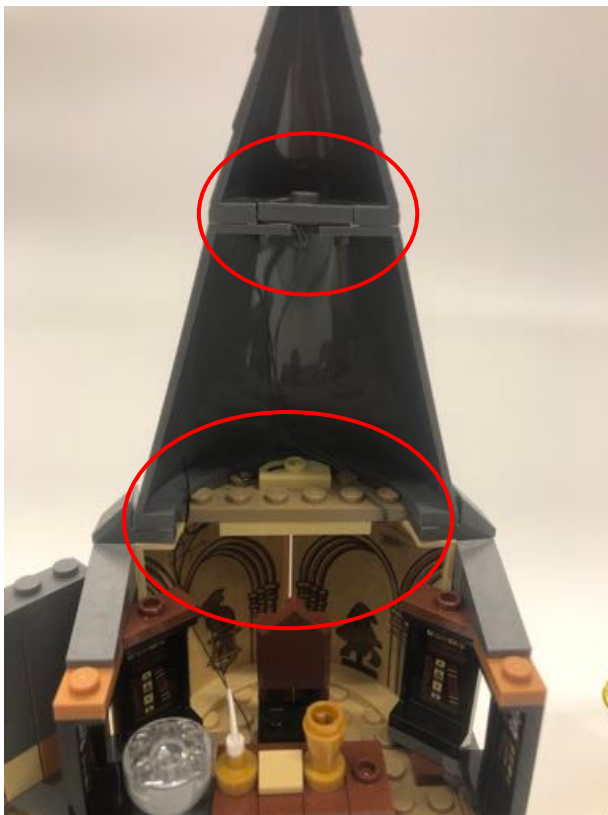

Install the blue round plates at bottom

Install the 1x6 plate on the ceiling and combine the building back on
(Separate the very top part before that

Pull the wires to upper level, put the top back and take the part with sword away

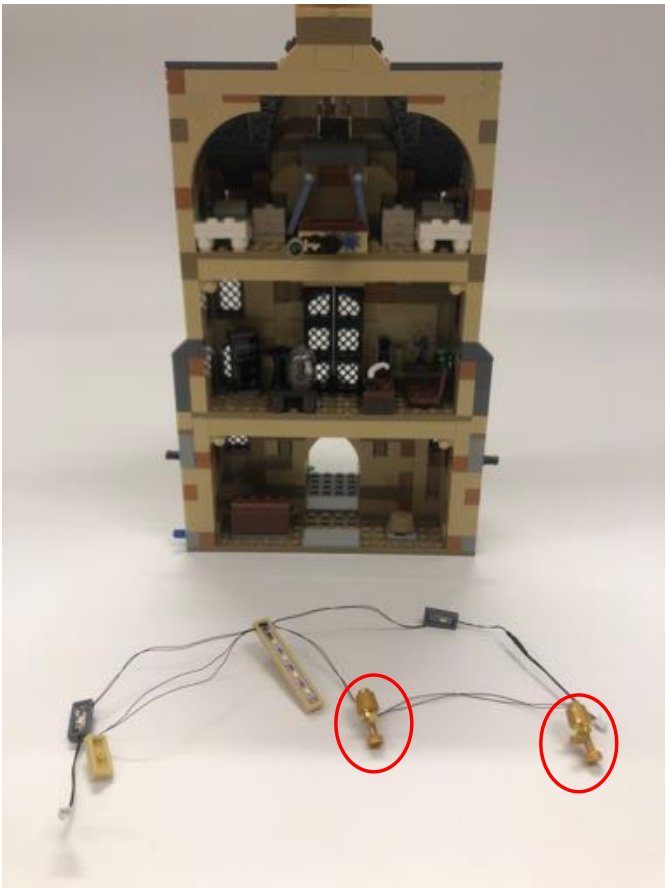

Install the lighting parts and put the sword part back
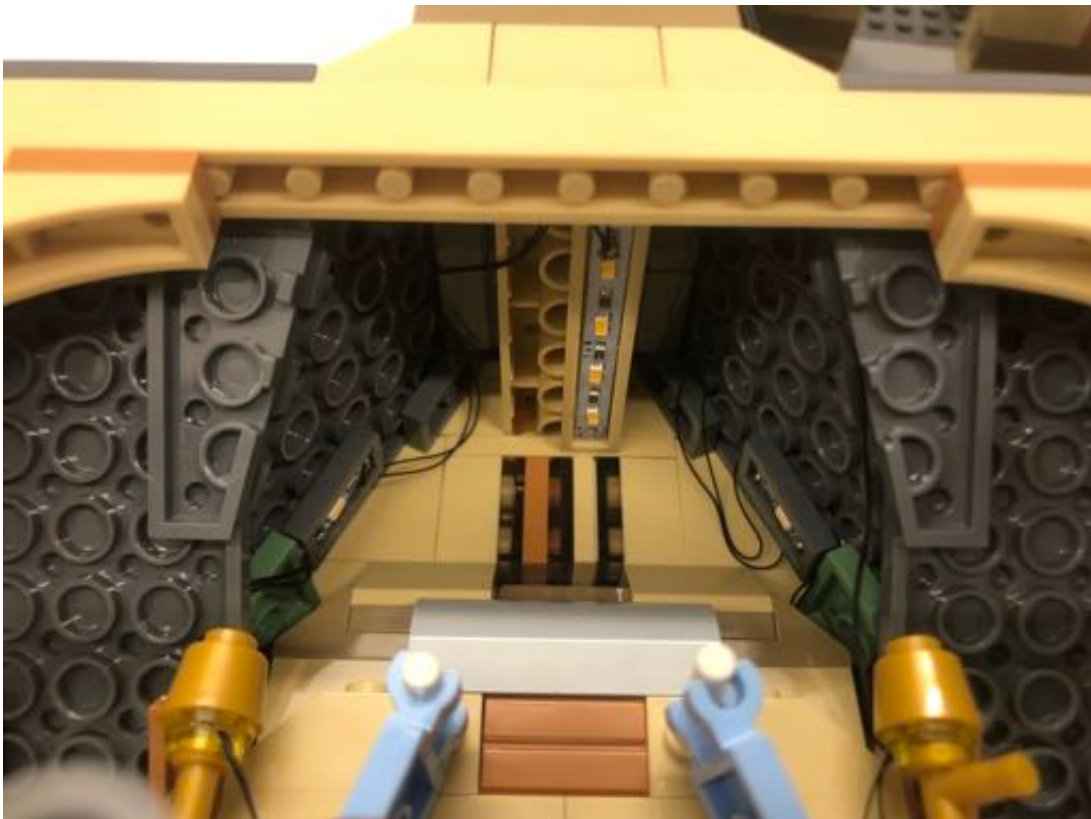

The first part is done

For the other side, we start from the top first, take the 2 lamps off and replace the gold parts to the yellow lighting parts

Take the top away pass the cable through the top and install the light

Next, install the 1x6 and 1x2's as shown

For the clock, replace to lighting part for the 2x6 plate with holes

Install the light and connect the cables as shown and put the clock back on it
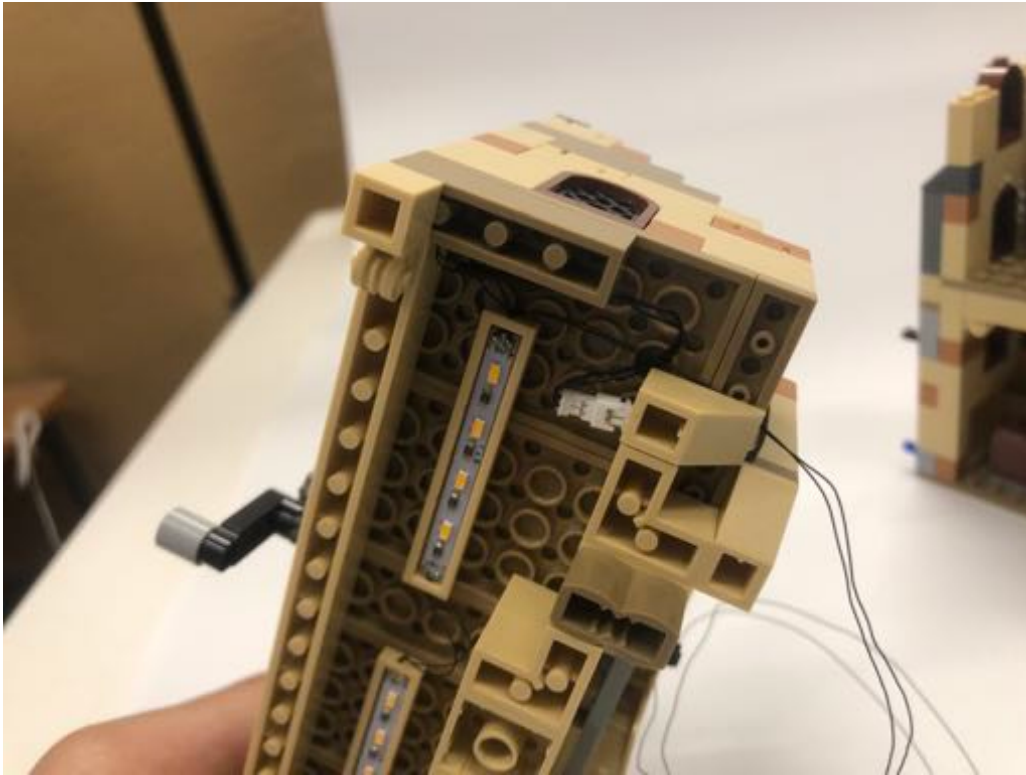

Install 2 lamps on

Split the building like this and pull the connector to the lower level

Connect the plug with 2 1x6 plates and install it

Put the bricks back to stabilze the connector and resemble the layer

The yellow round plate will be replaced to the lamp as shown

Split the layer of the building, pull the wire through as shown

Remove the part as shown to move it to the lowest level to install the ceiling lights

Install the light and adjust the wire

Combine the buildings, connect the USB cable and that's it
