

Lego 21015

The Leaning Tower of Pisa

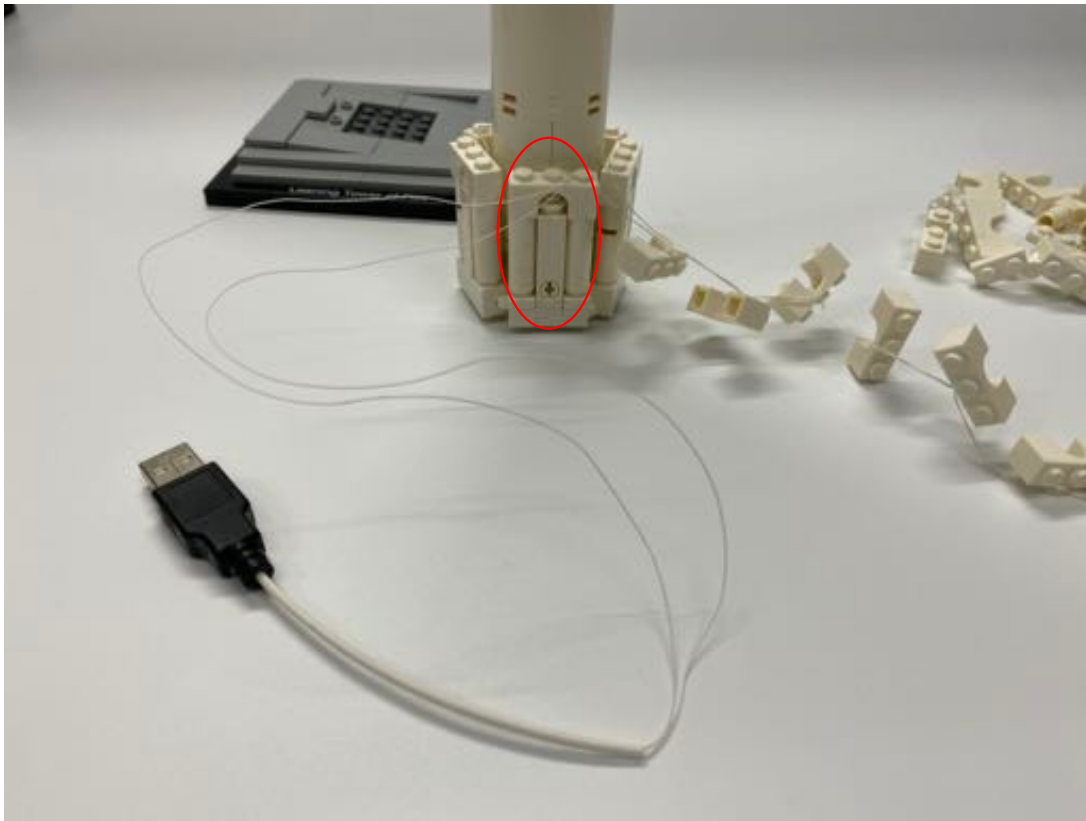

Installation Guide

This lighting set is very simple, just detach all the 1x3 arch from the model and replaced by the lighting set
First of all, detach the tower from the base and split it as shown

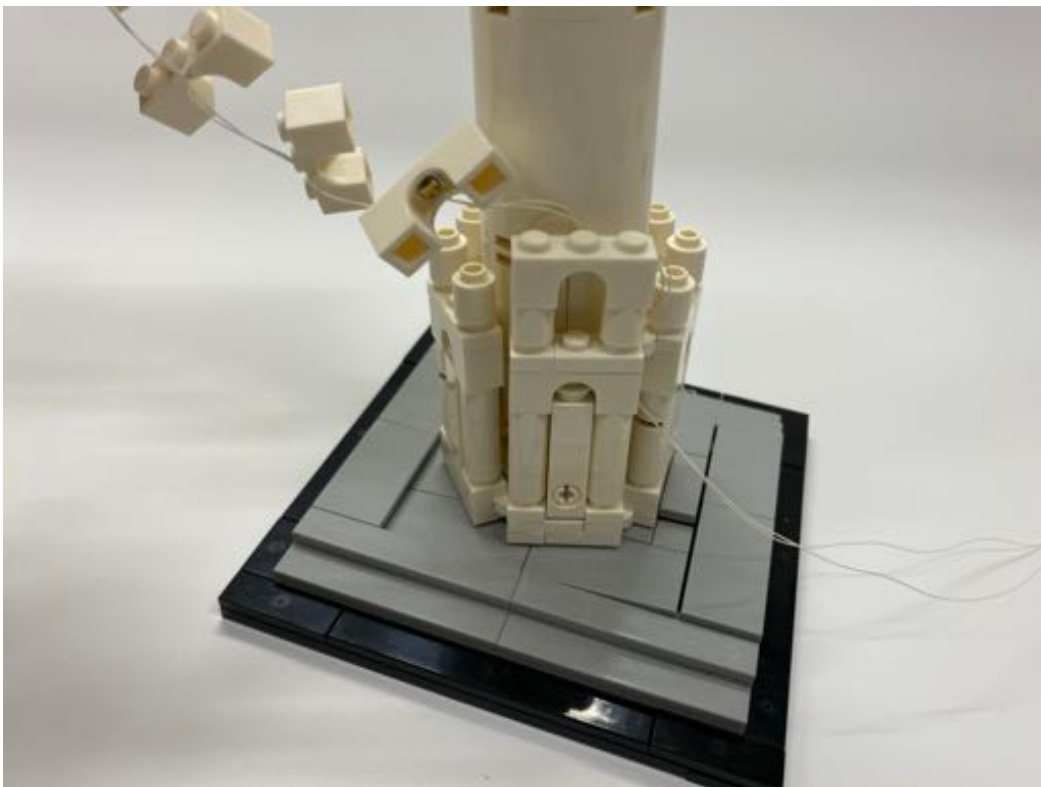

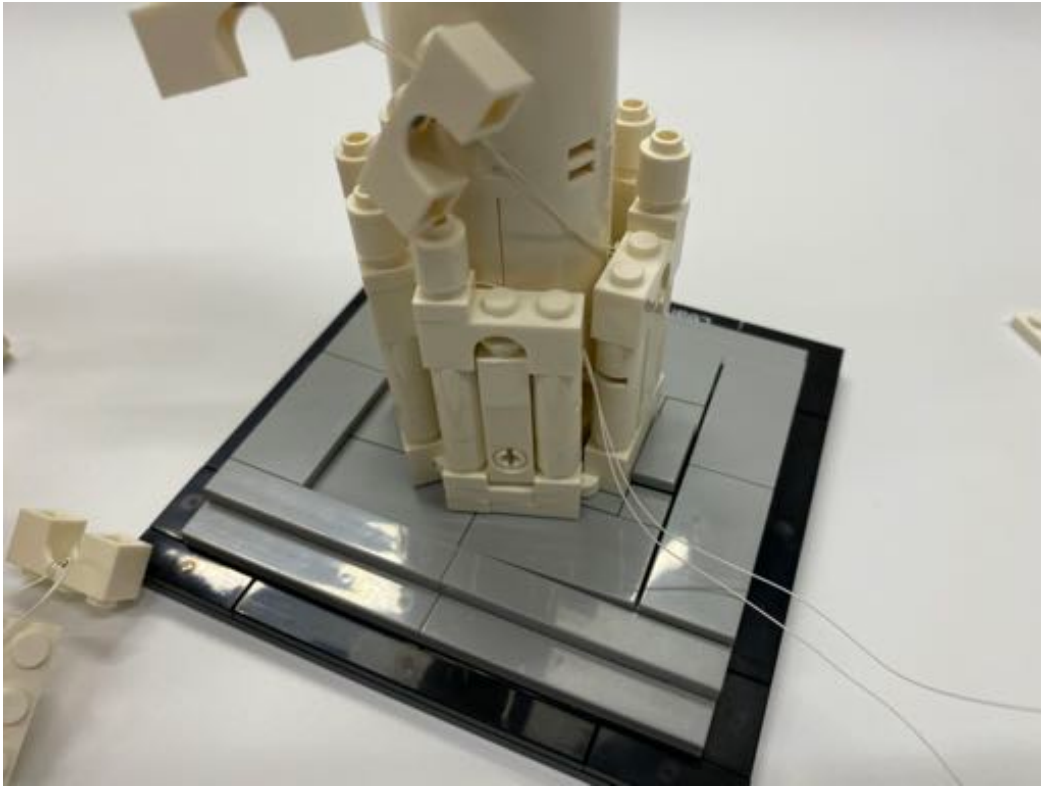

Then you can starting installing the light
(start installing the first arch at the connecting part as shown)
So that the wire will be shown behind the tower

After that restore the round bricks

Before installing the second layer of the light, beware the wires are all behind the round bricks

Keep repeating the previous steps

After installing the archs, take the 4x4 round plate off and replaced by the lighting plate

Then restore the flag and round plates then its done
