# Roller Coaster

LED INSTALLATION GUIDE

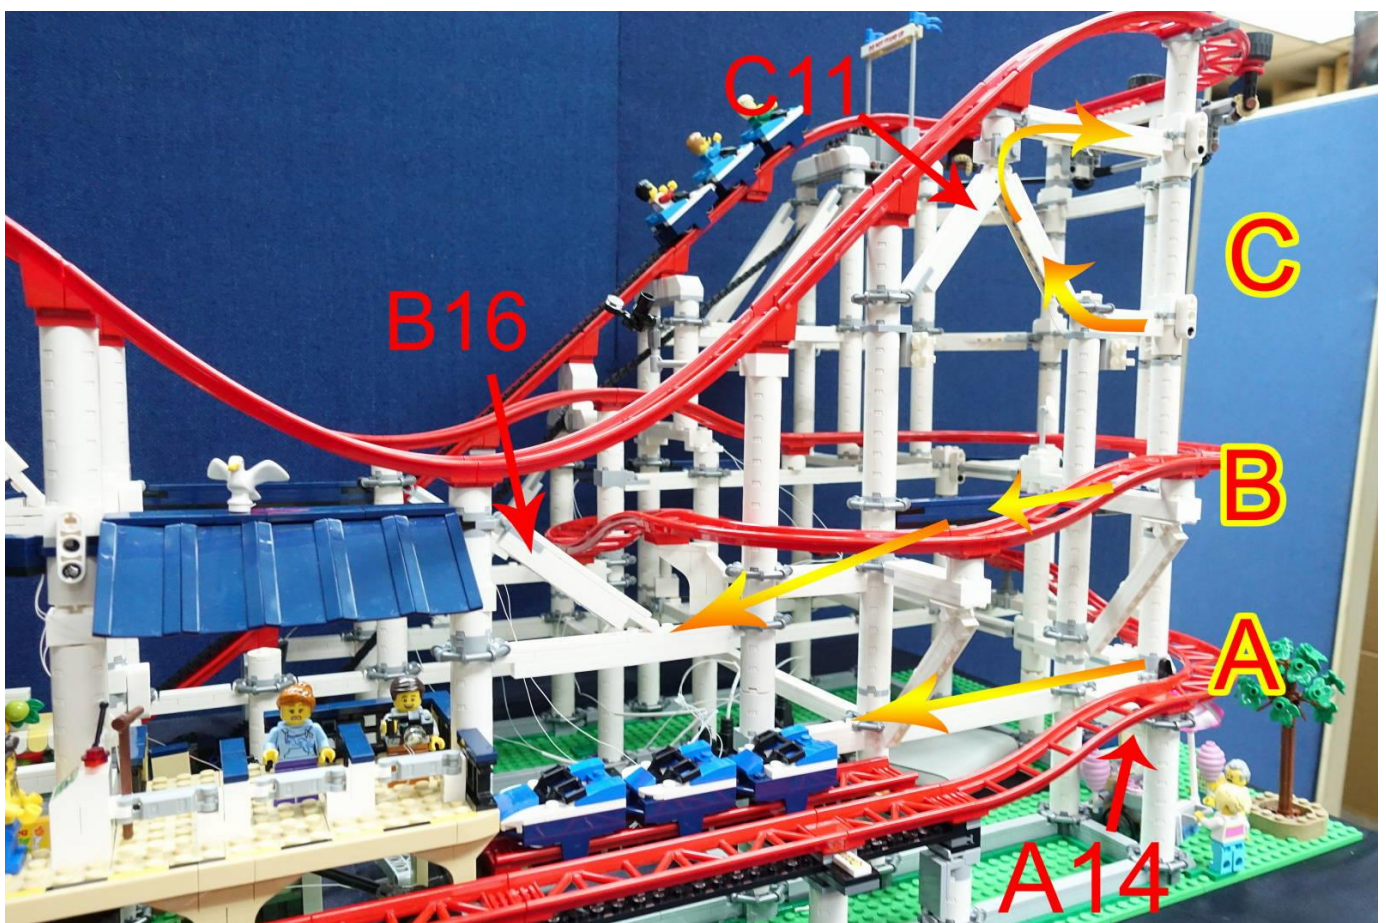

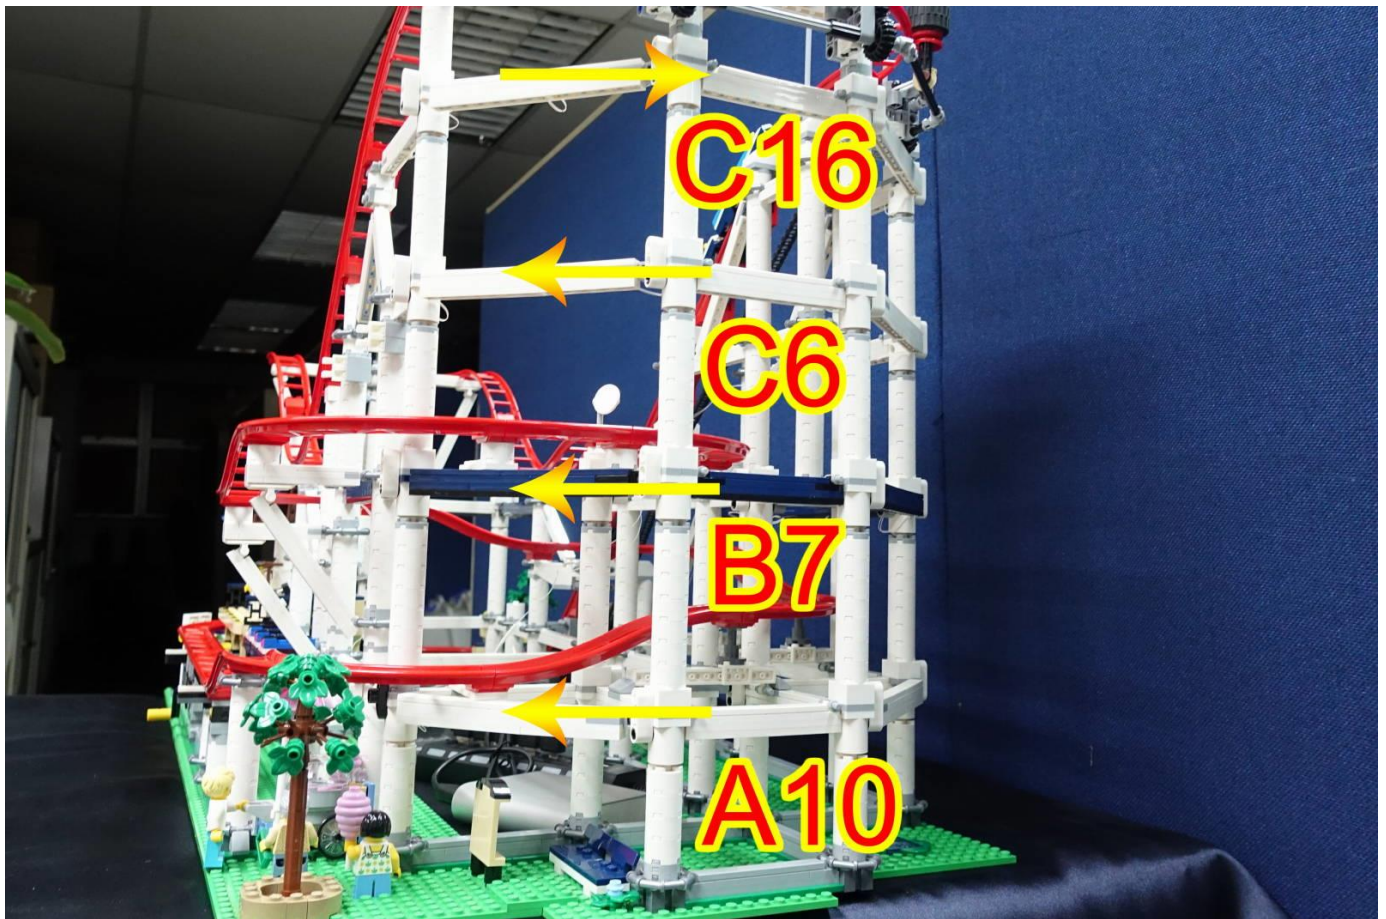

A, B & C lights install on the right-hand-side, start install from the back  
Yellow arrow is the light install direction. A1 is the first light plate of "A" light

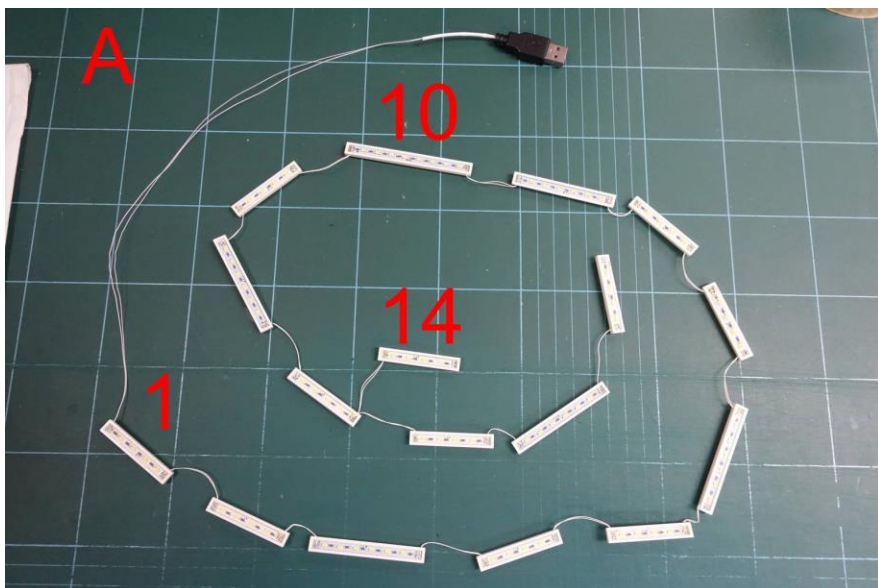

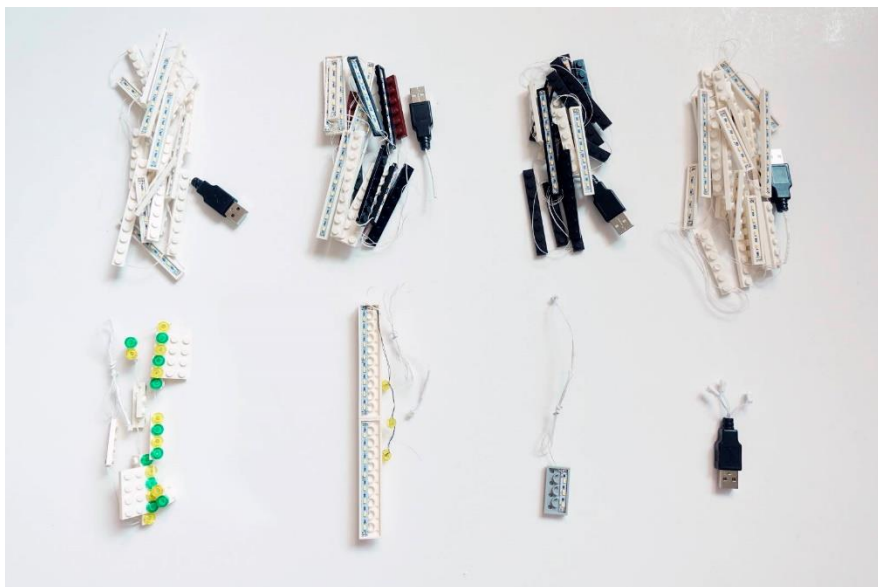

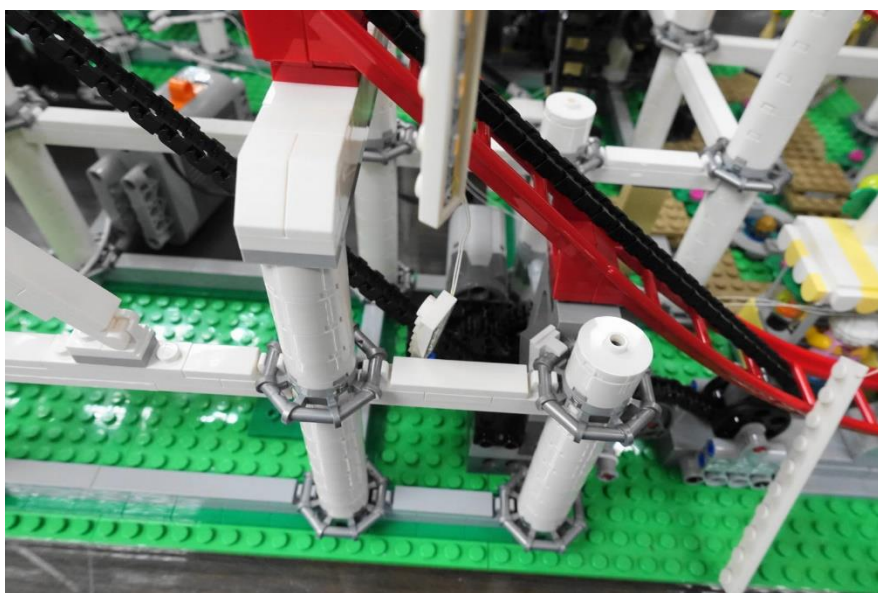

1x10 light plates install at rightmost structure

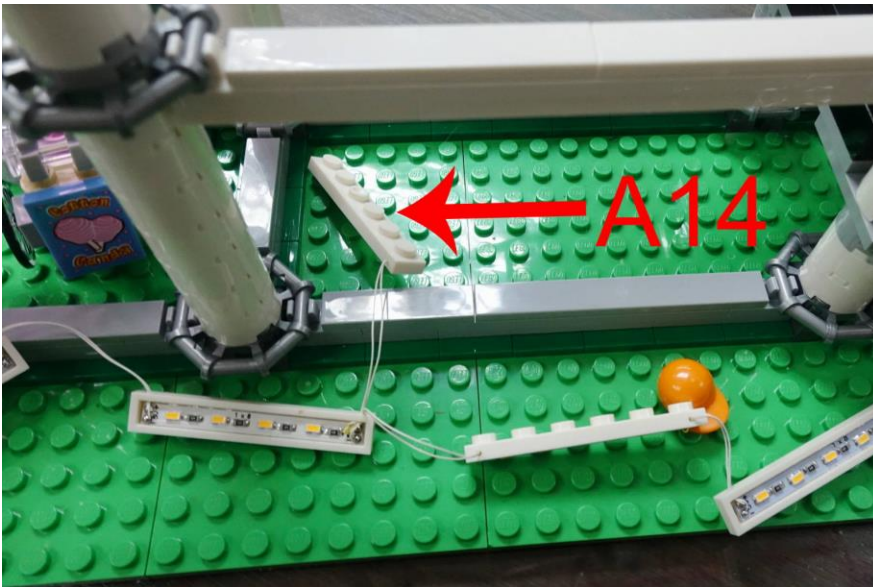

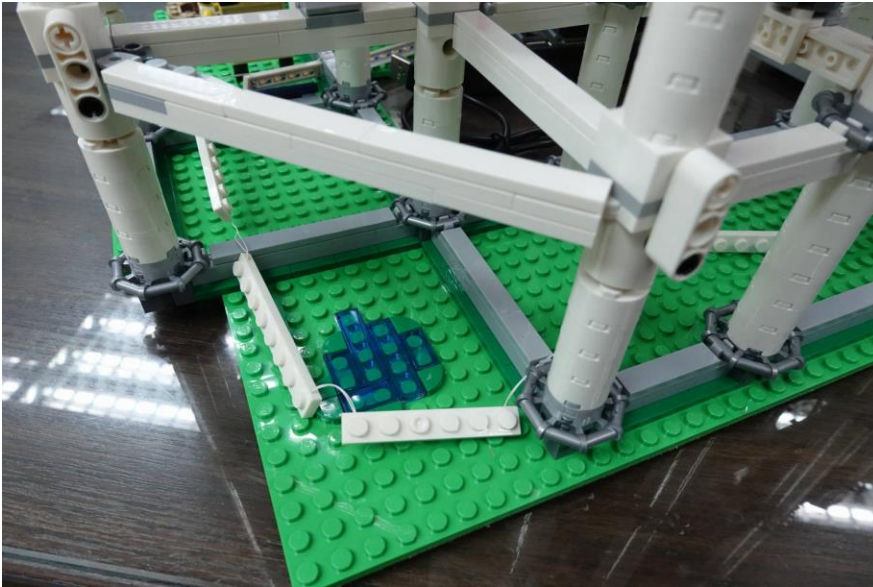

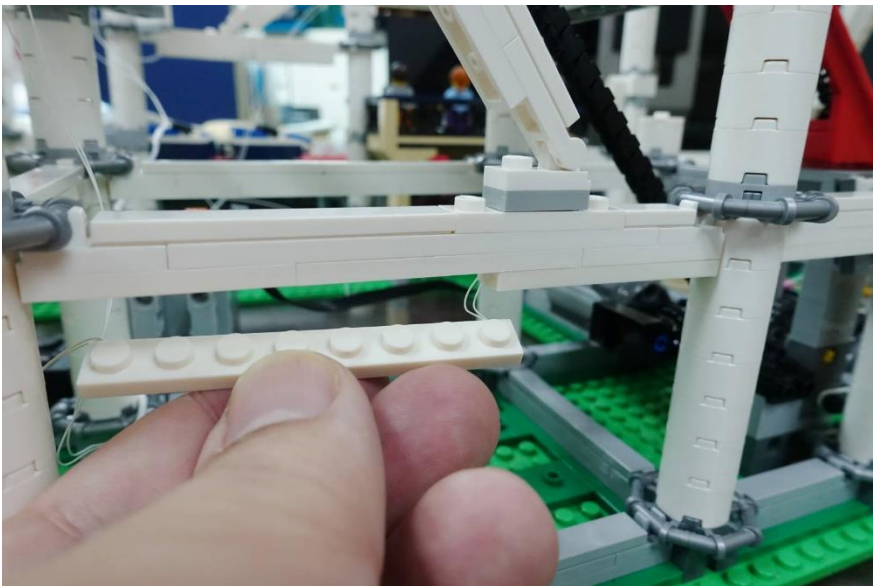

Put the last light plate of A inside the structure

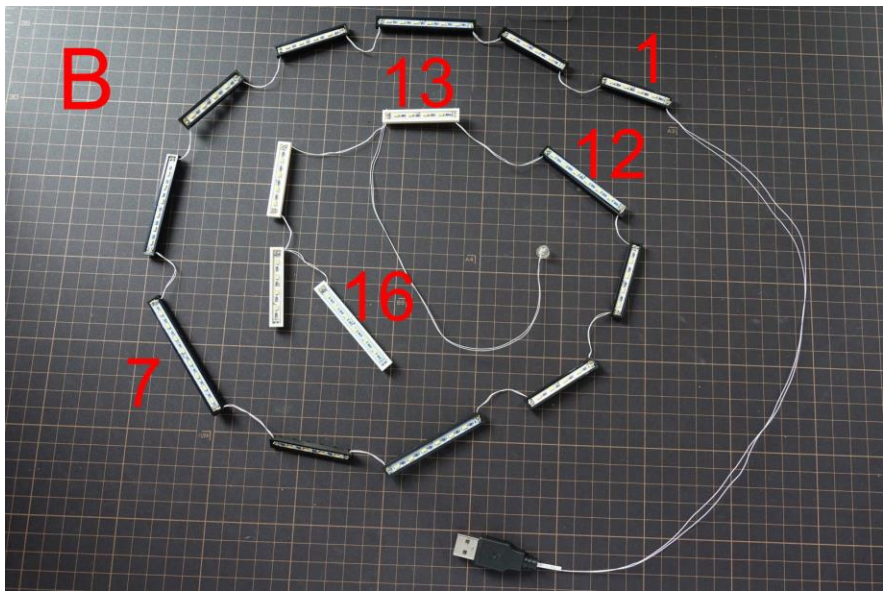

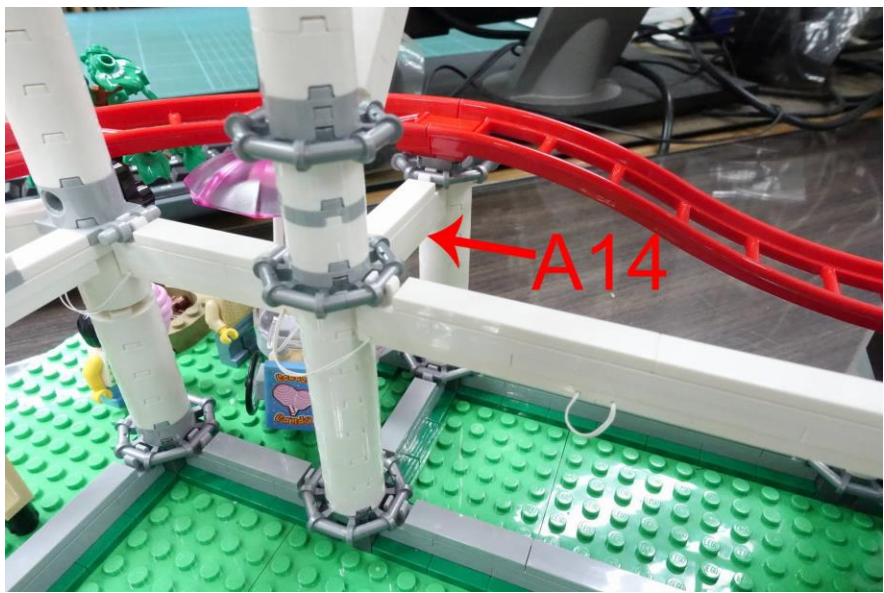

Move the lights inside the pillars

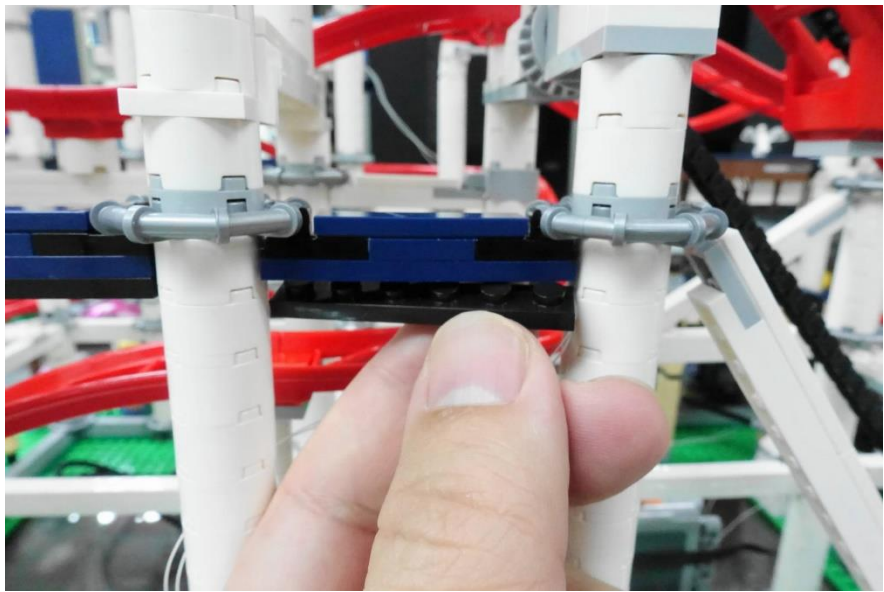

Install the light plates under the horizontal structure

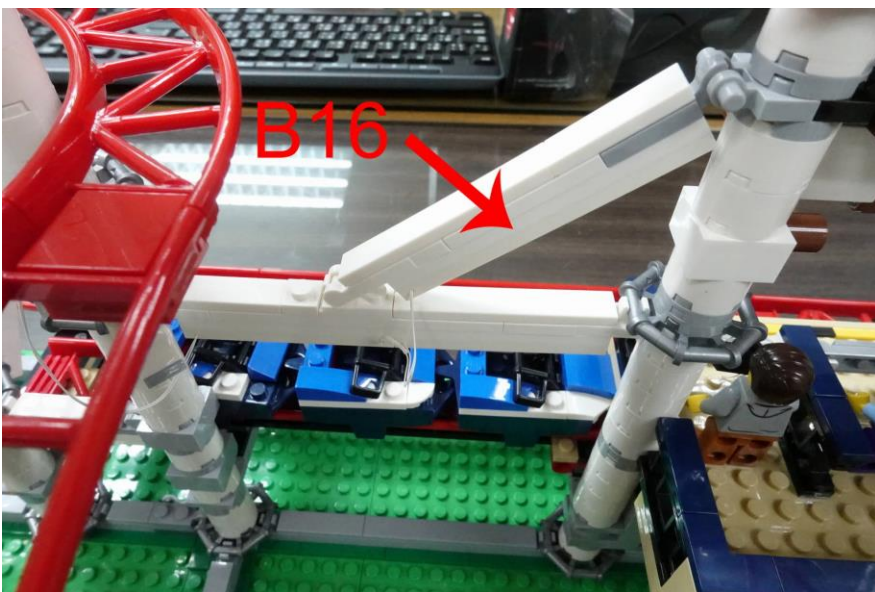

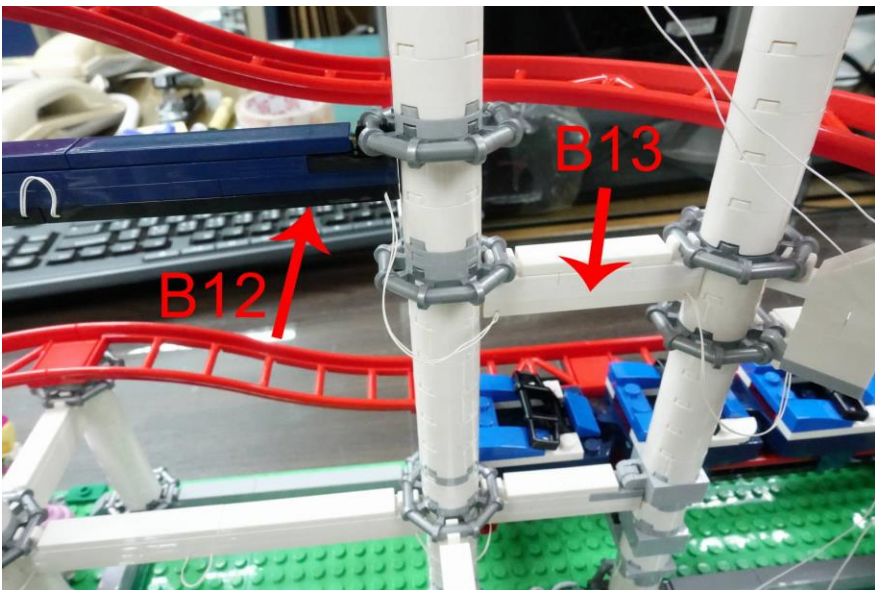

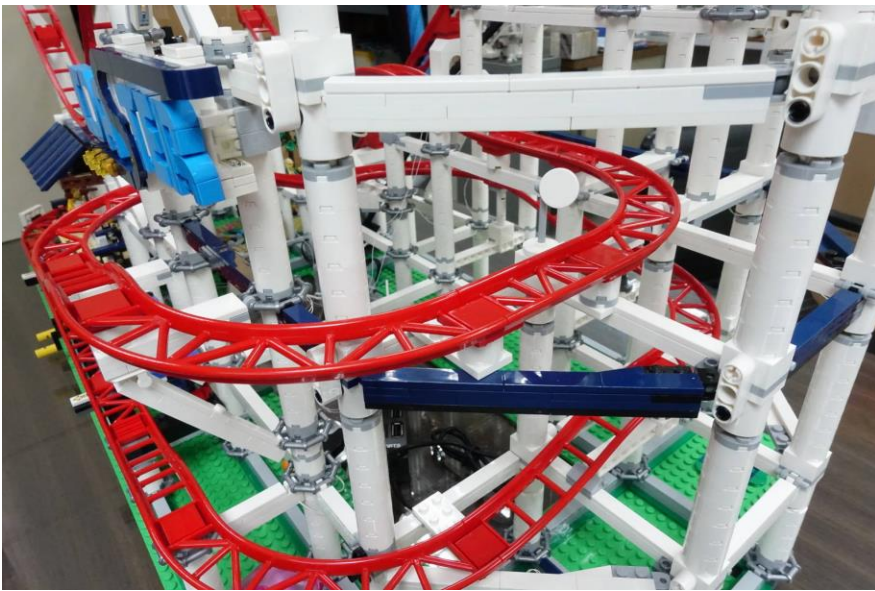

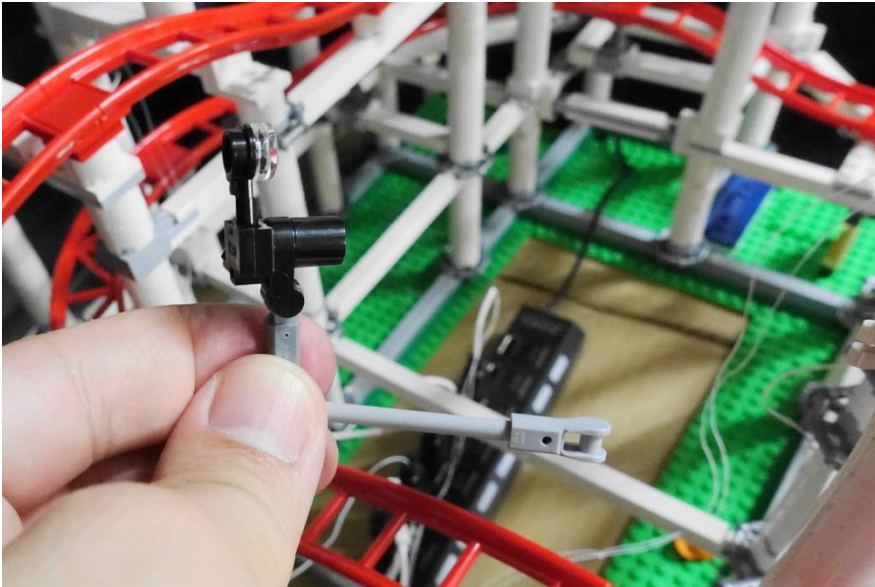

Install B lights in a similar way

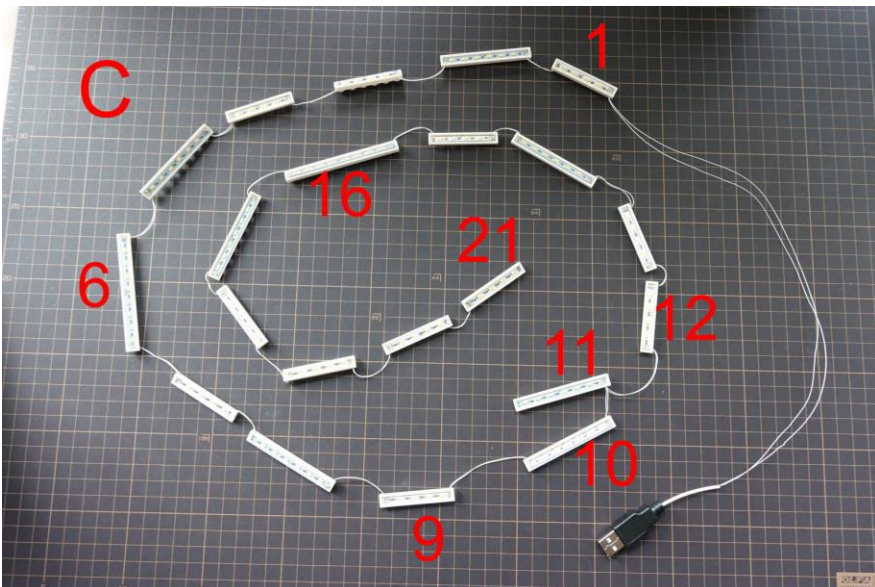

Remove the camera

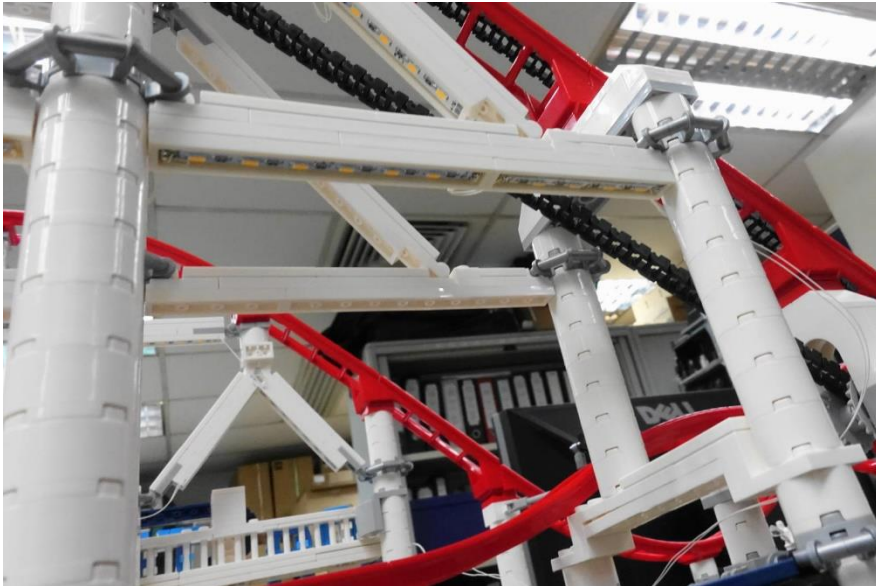

Replace the flash with light plate from B13 and wrap the wire around the pole

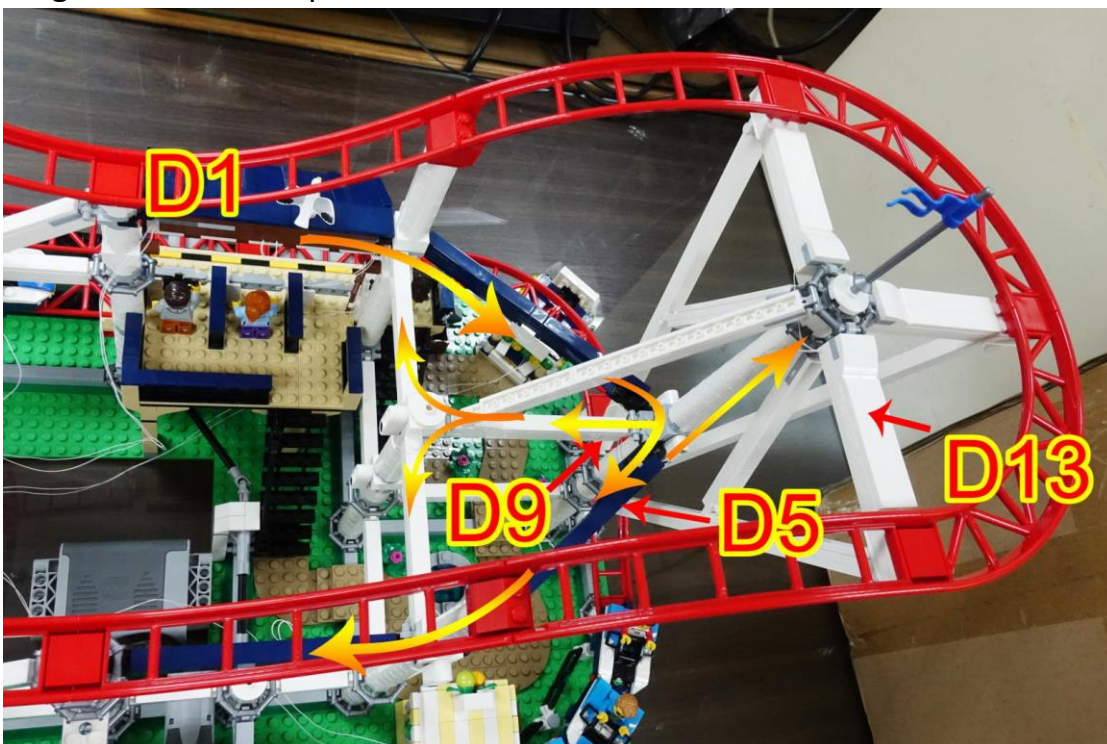

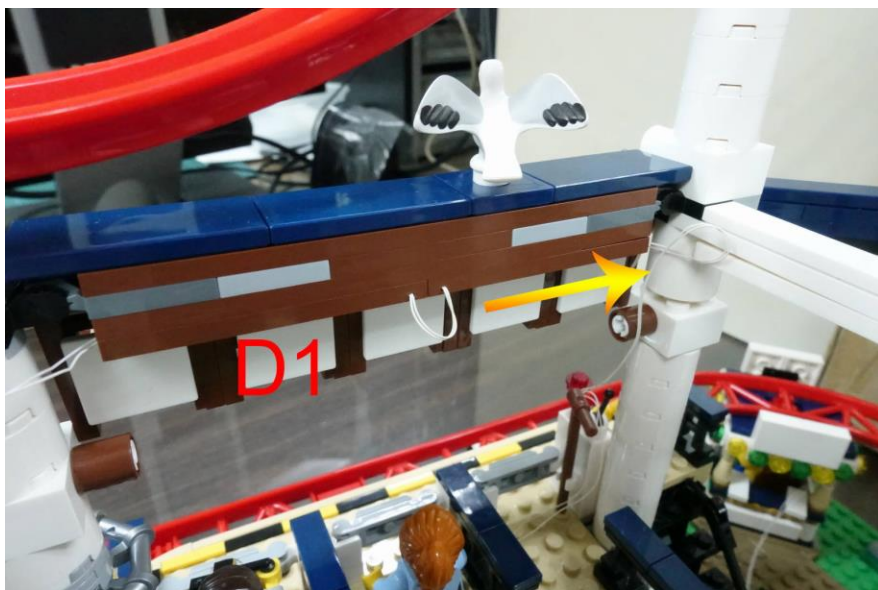

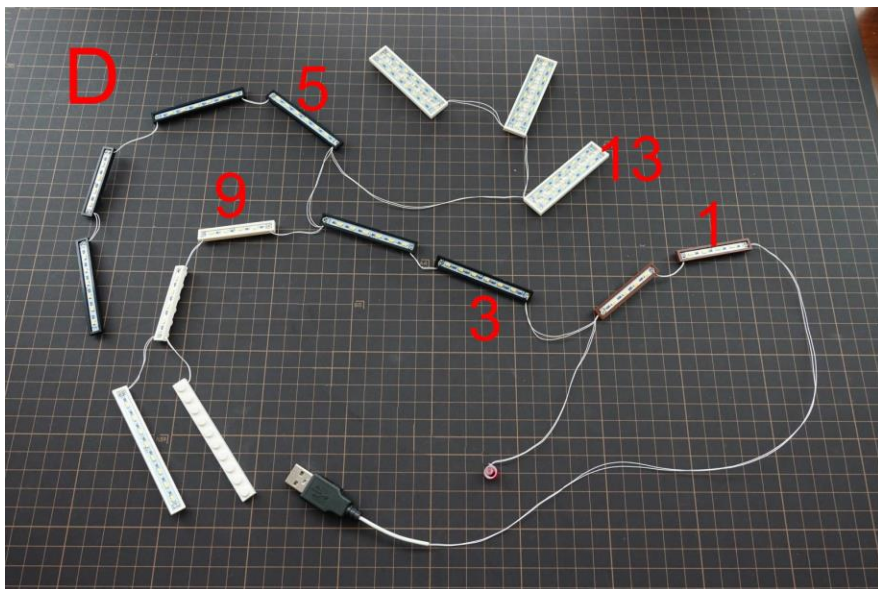

Install C lights to top 2 levels

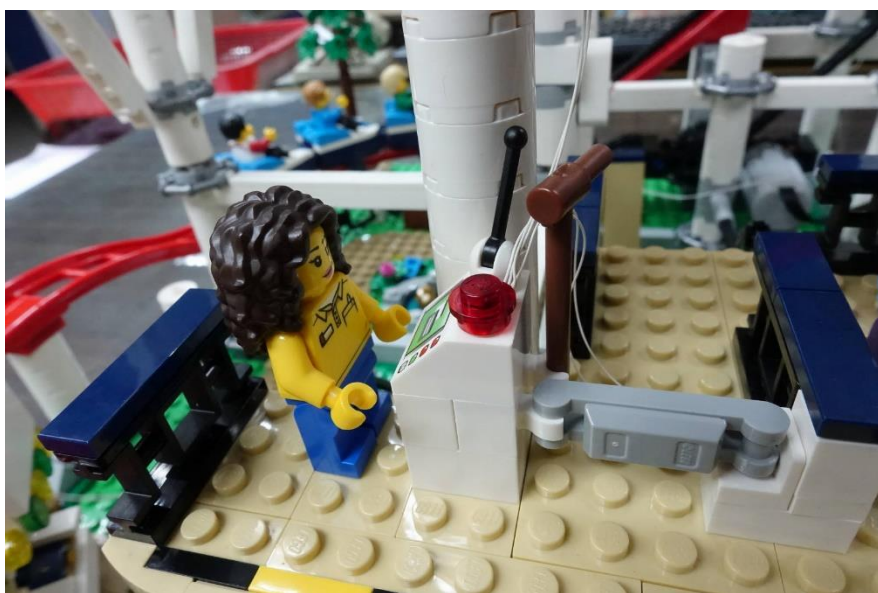

D light install to the platform and left-hand-side structure

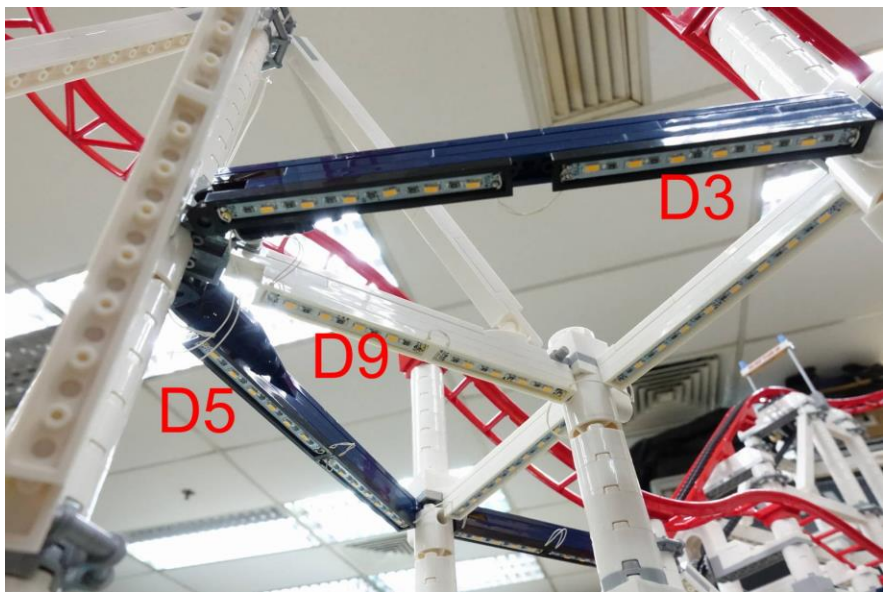

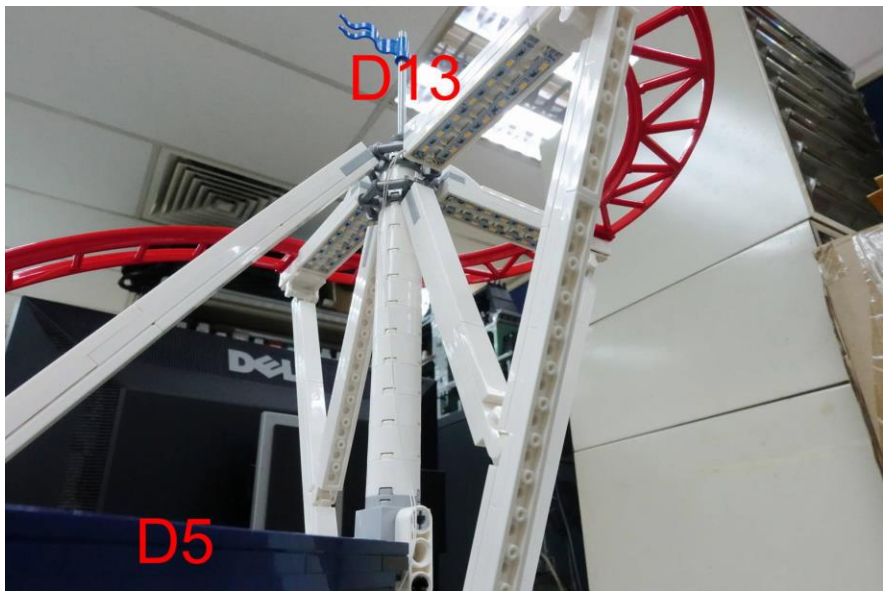

Replace the red light on the control

Install 2x8 light plates on top

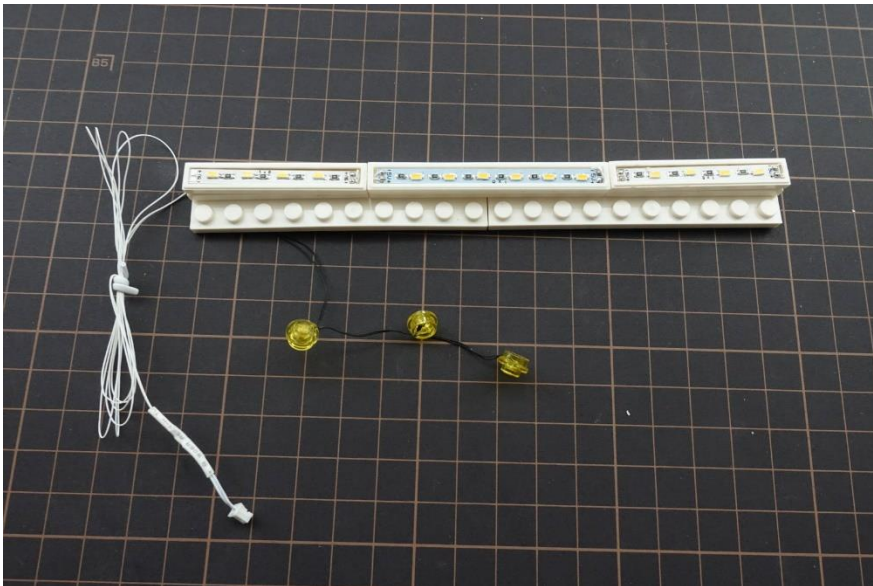

Coaster sign

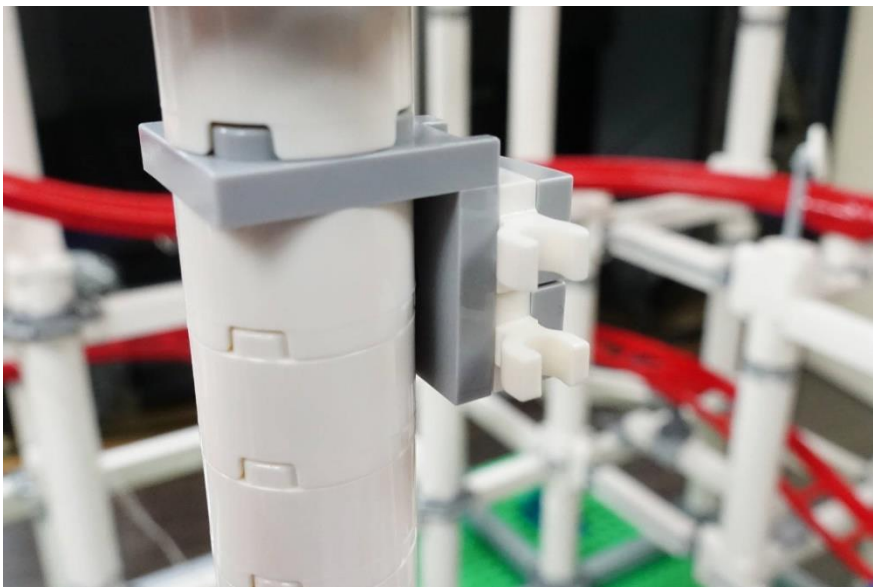

## Sign light

Remove the sign and the clips

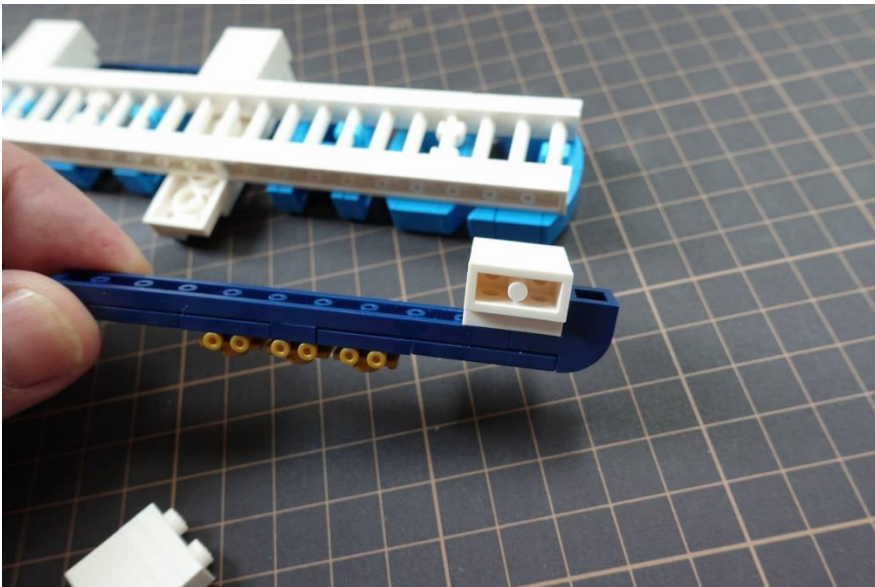

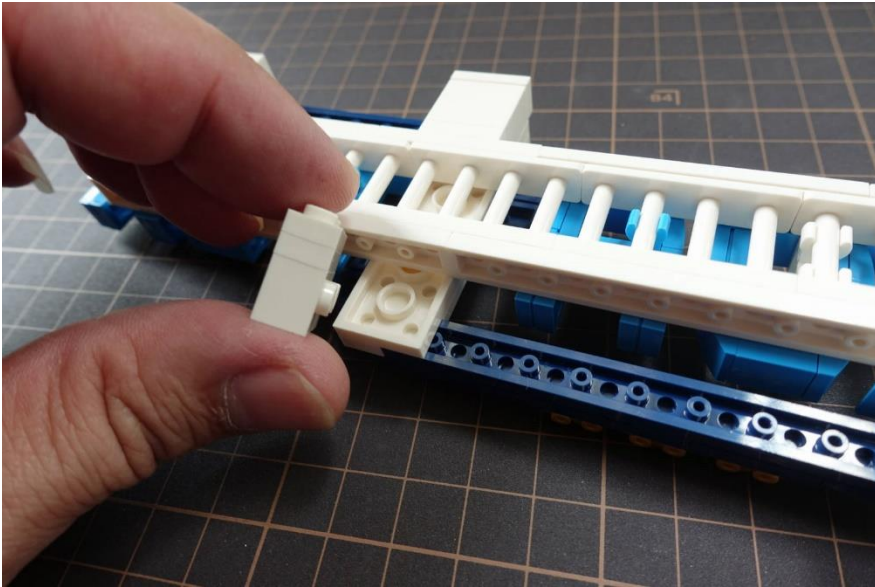

Replace the 1x1 clips with 1x2 clips

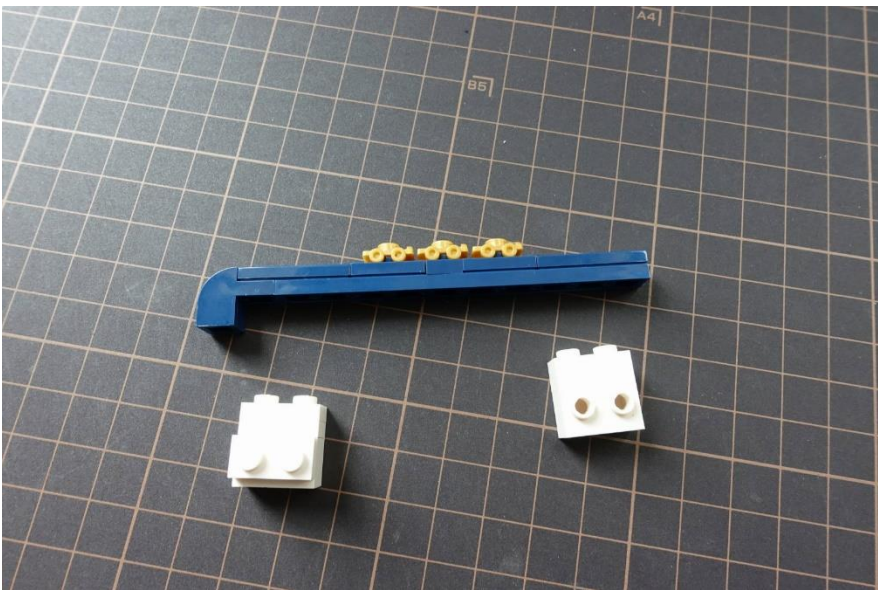

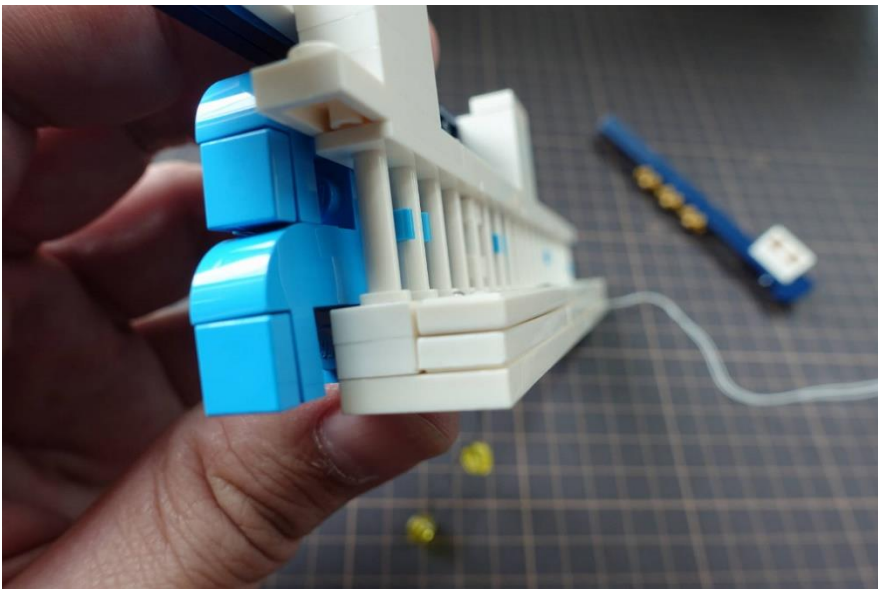

Remove some parts

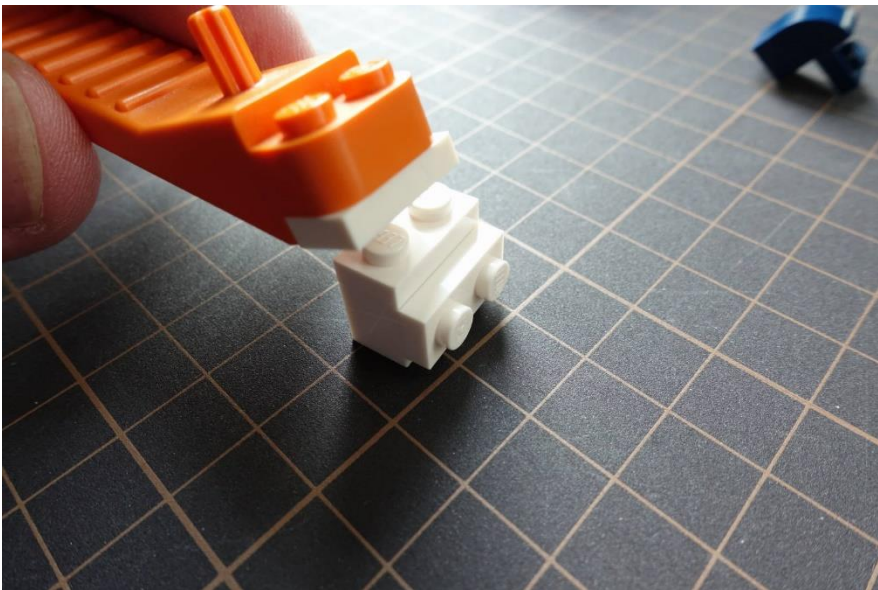

Install the light under the fence

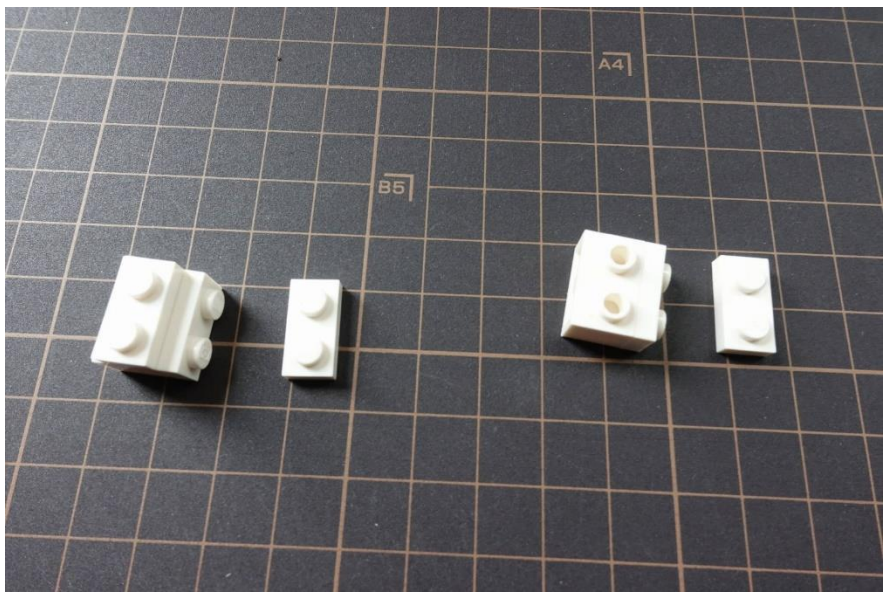

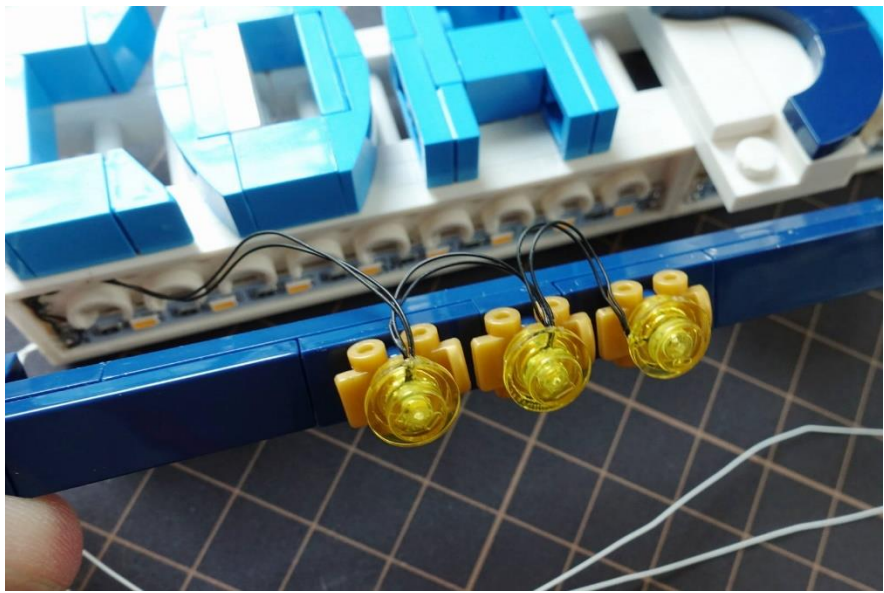

Remove a 1x2 plate from both white parts

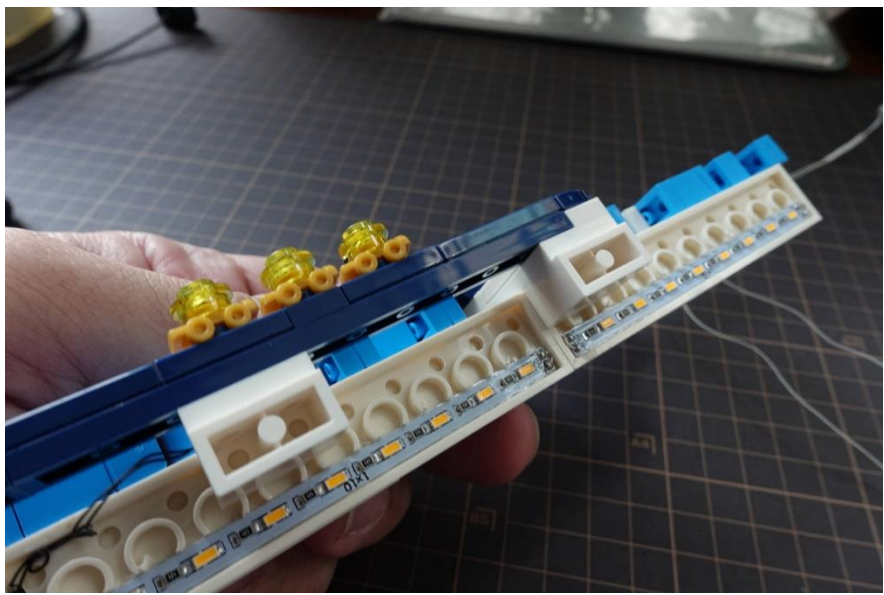

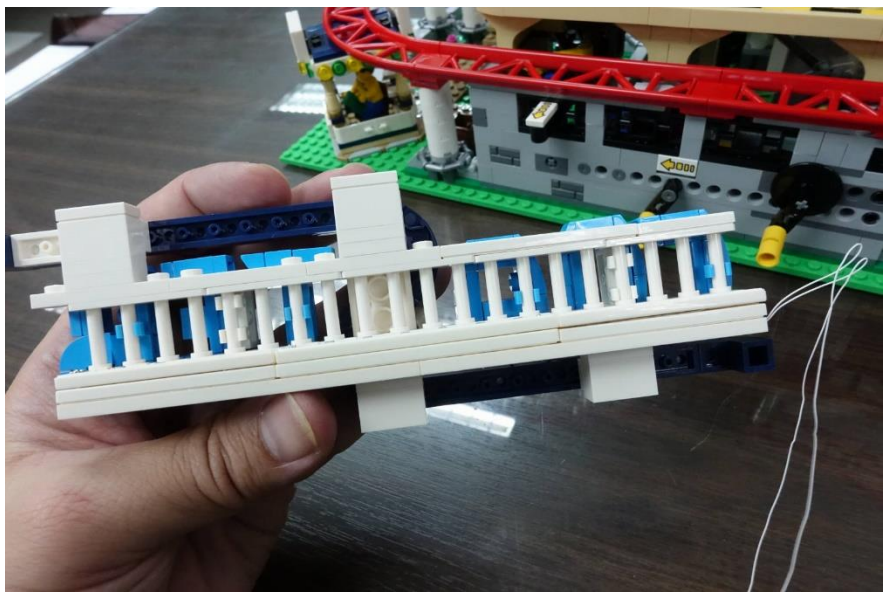

Install the yellow lights on the gold rollers

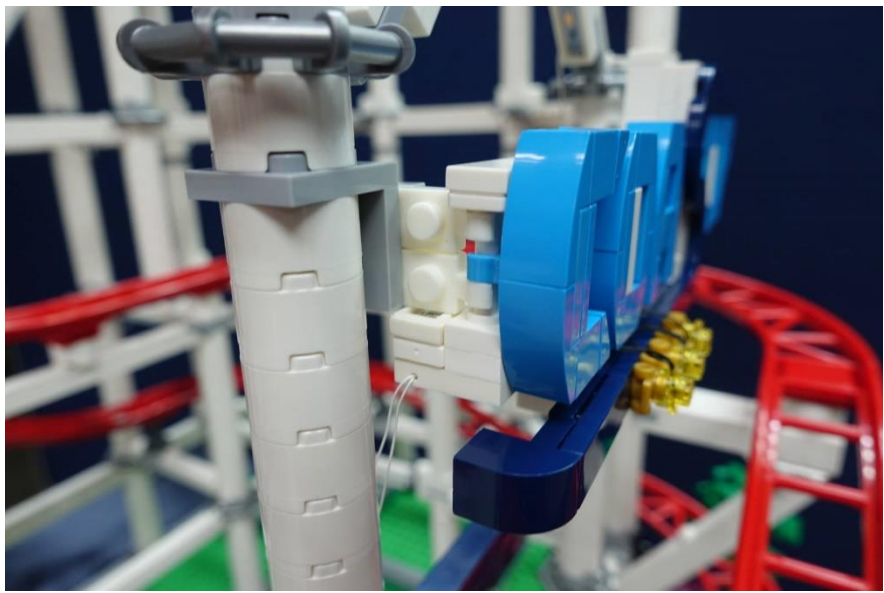

Put the parts back

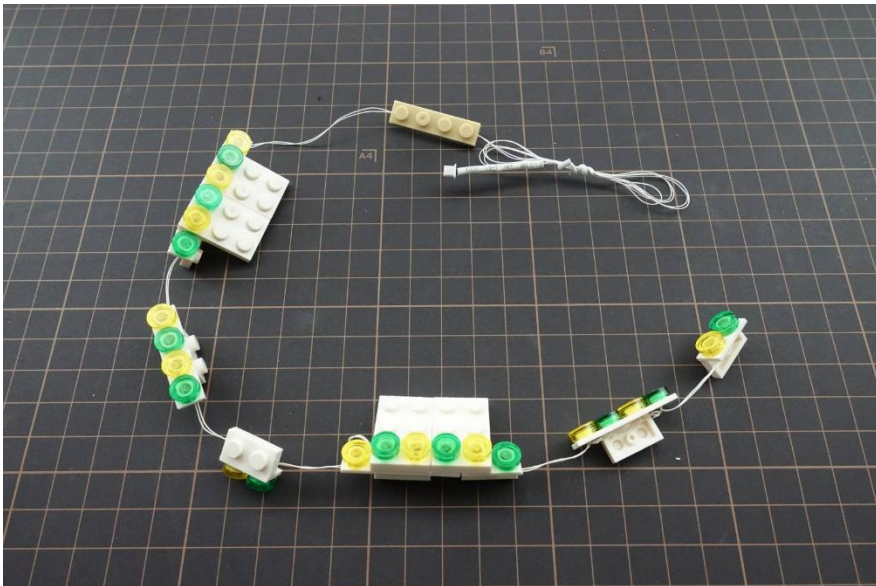

Put the sign back

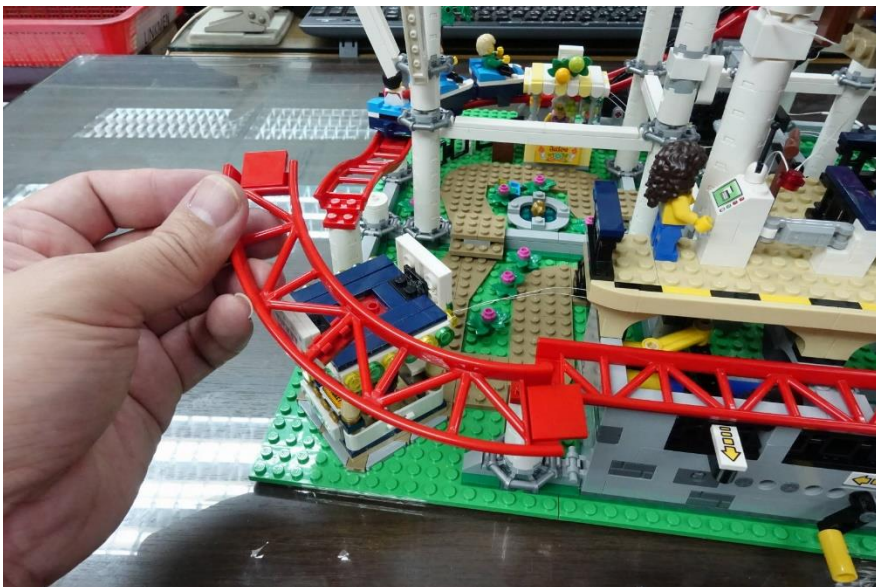

Ticket booth

Ticket booth lights

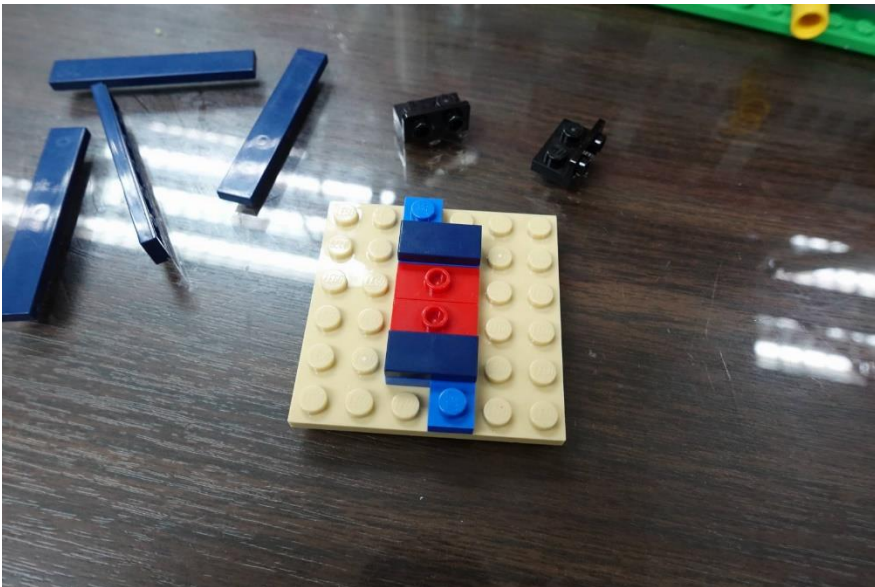

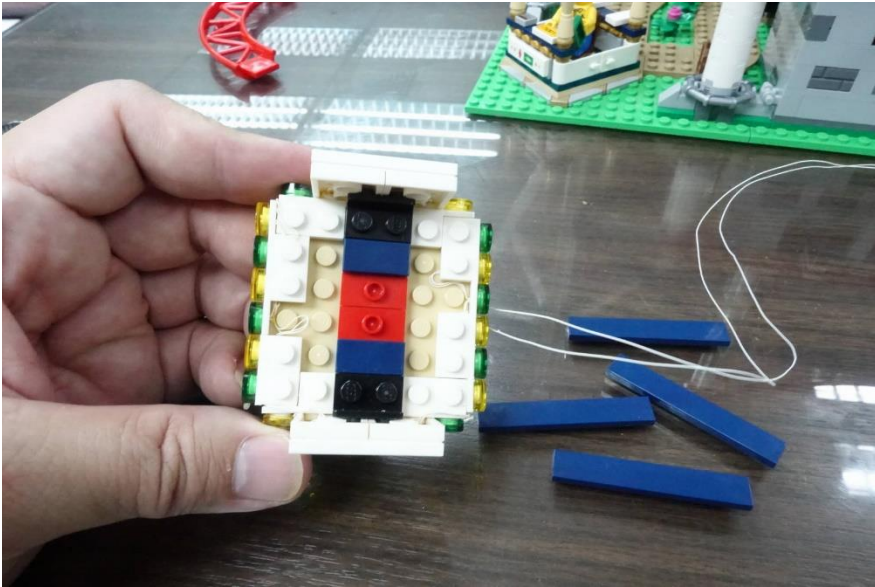

Remove some parts

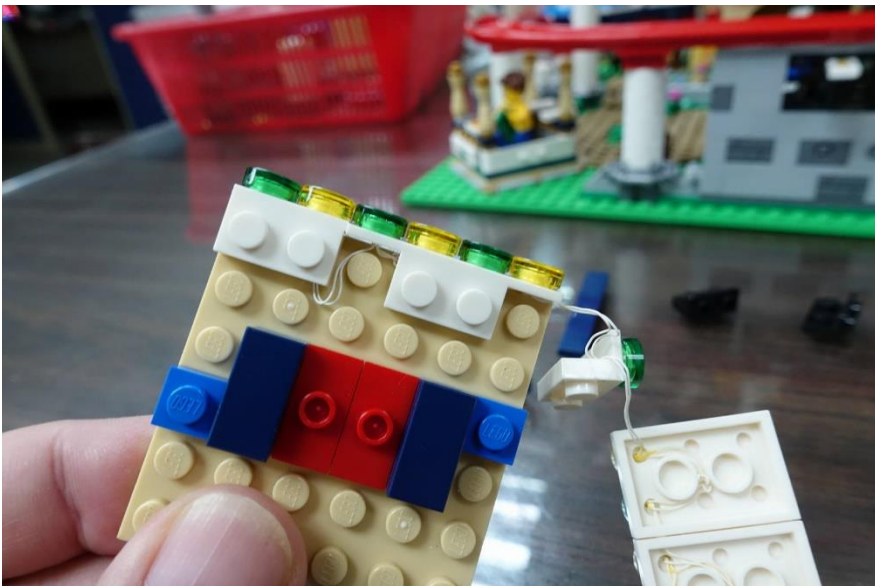

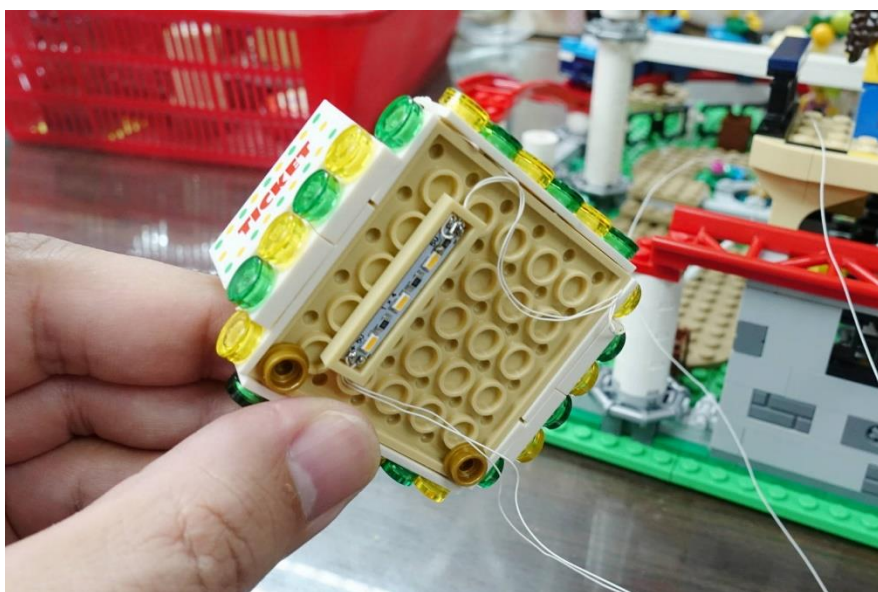

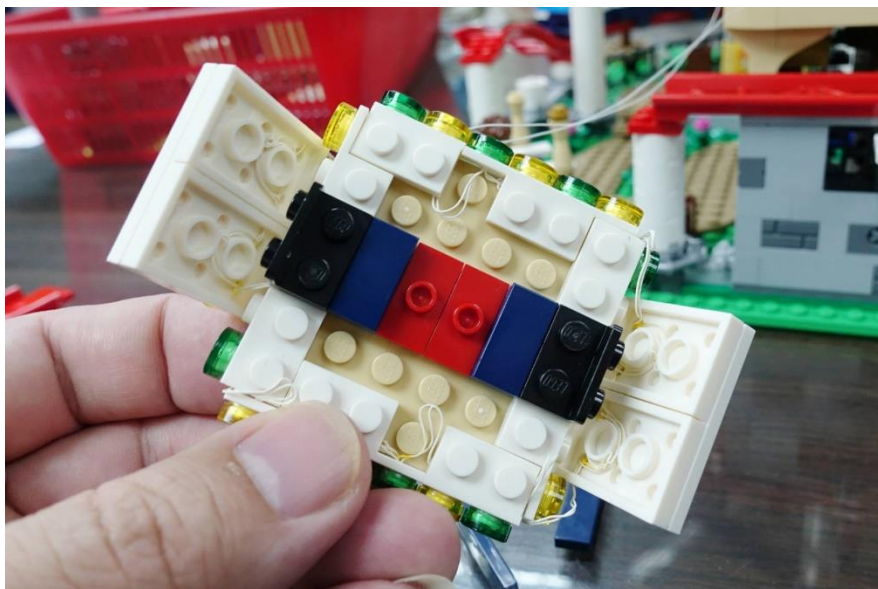

Remove the tiles and the white parts

Install the light round the plate

Put the parts back

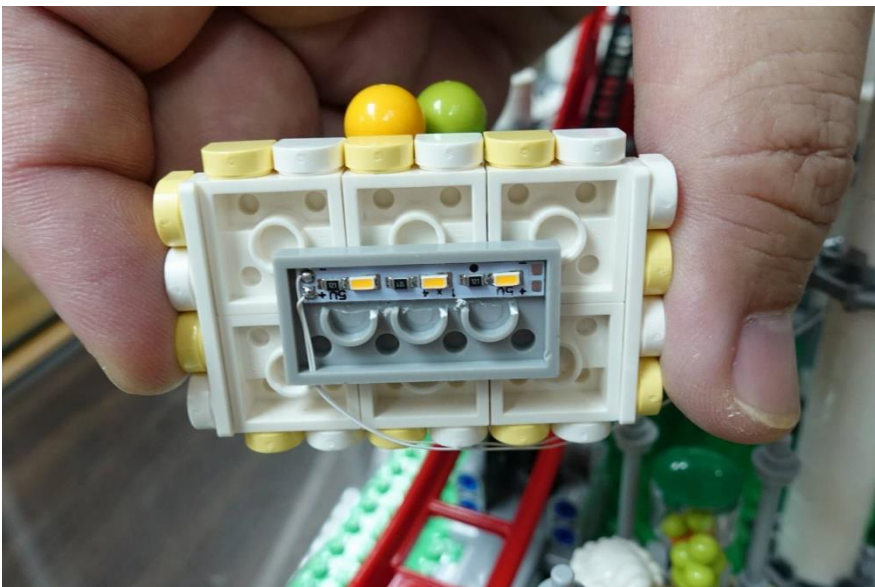

Juice bar

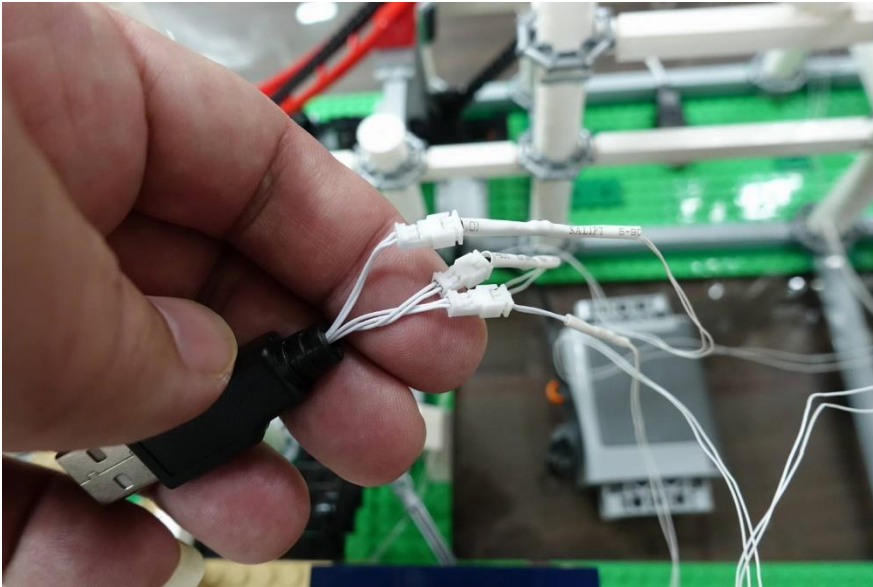

Juice bar light

Replace the plate with light part

Connect the coaster sign light, ticket booth light and juice bar light to USB

Due to the large number of lights. A & D require 1.5 Amp, B & C require 1.5 Amp. 5 USB total more than 3 Amp.  
**Must use 2 or more power supplies to connect 5 USB plugs. Never put all 5 USB in one power supply.**
