

Lego 21039

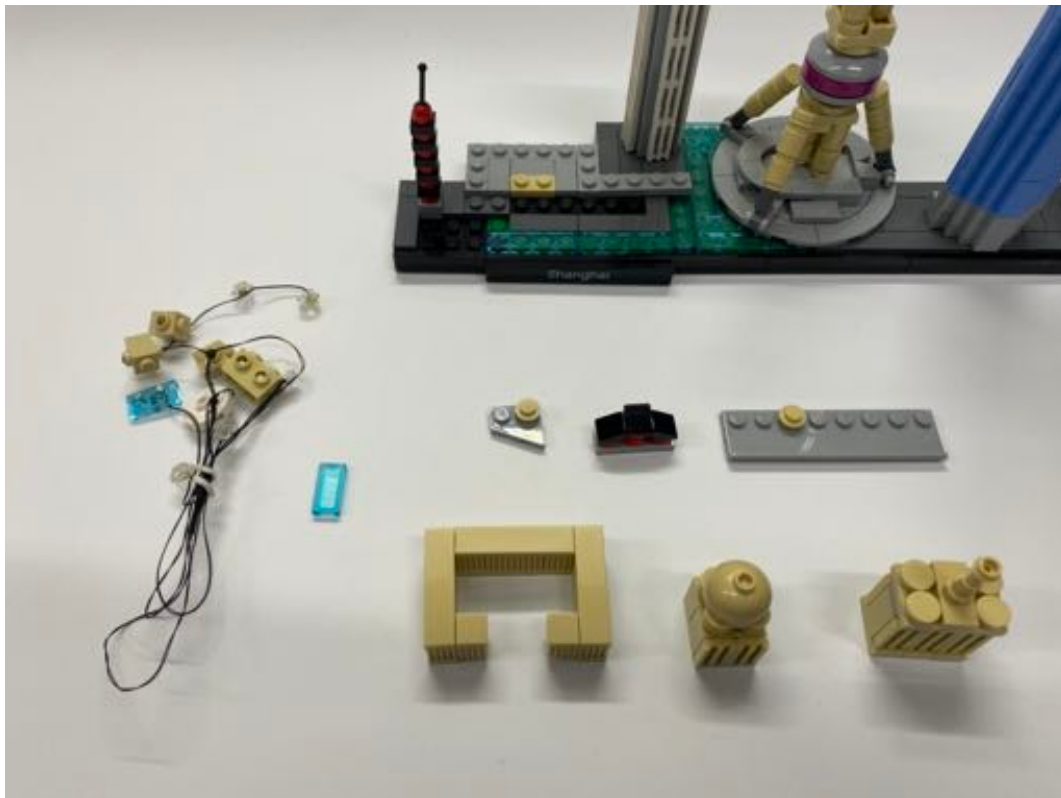

Shanghai

Installation Guide

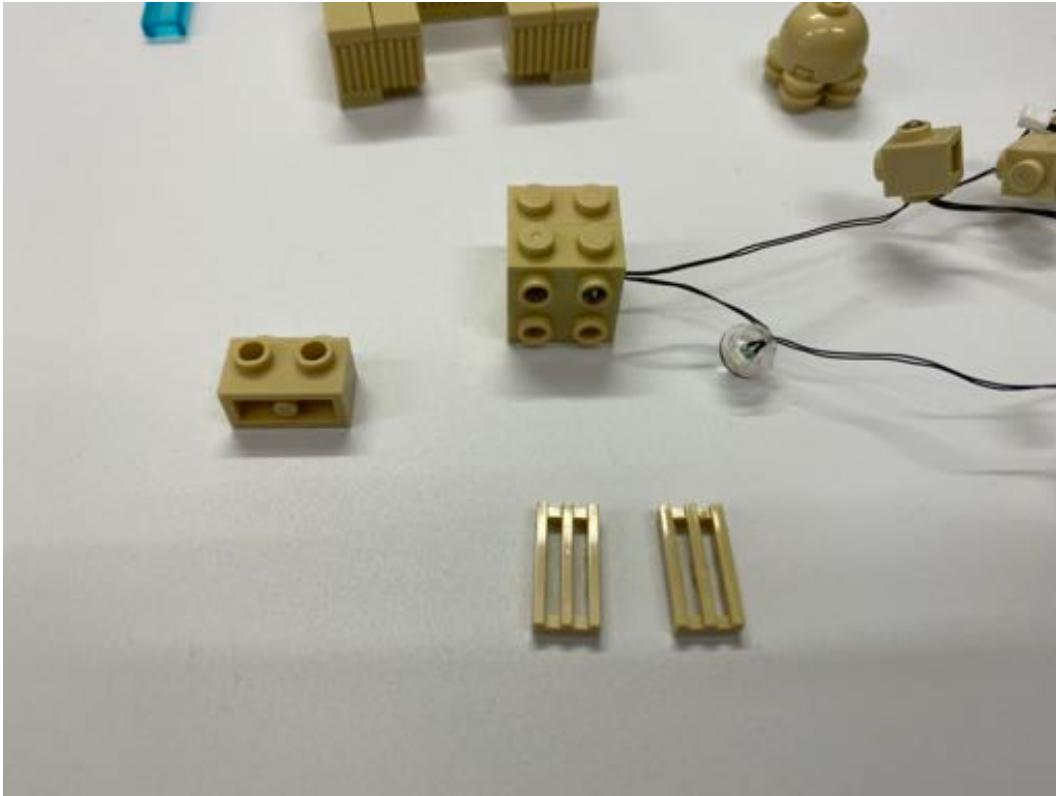

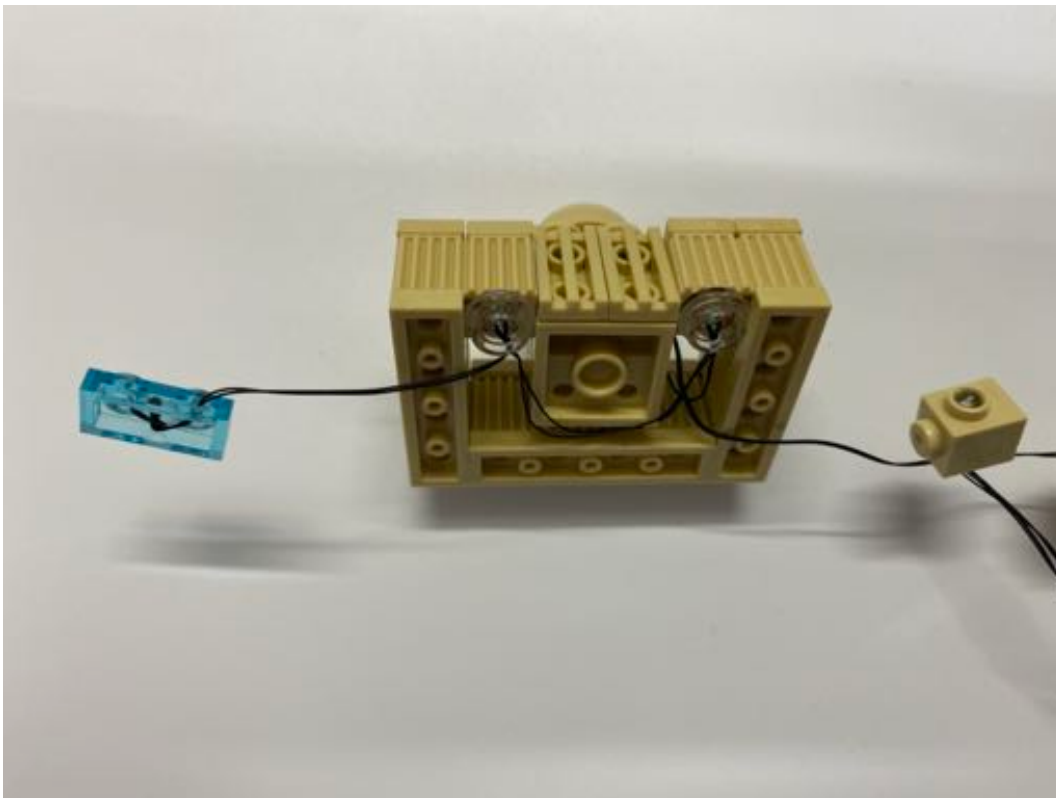

Start by taking off the parts shown (we don't need the 1x4 blue tile)
And prepare the lighting part and the 1x2 blue tile

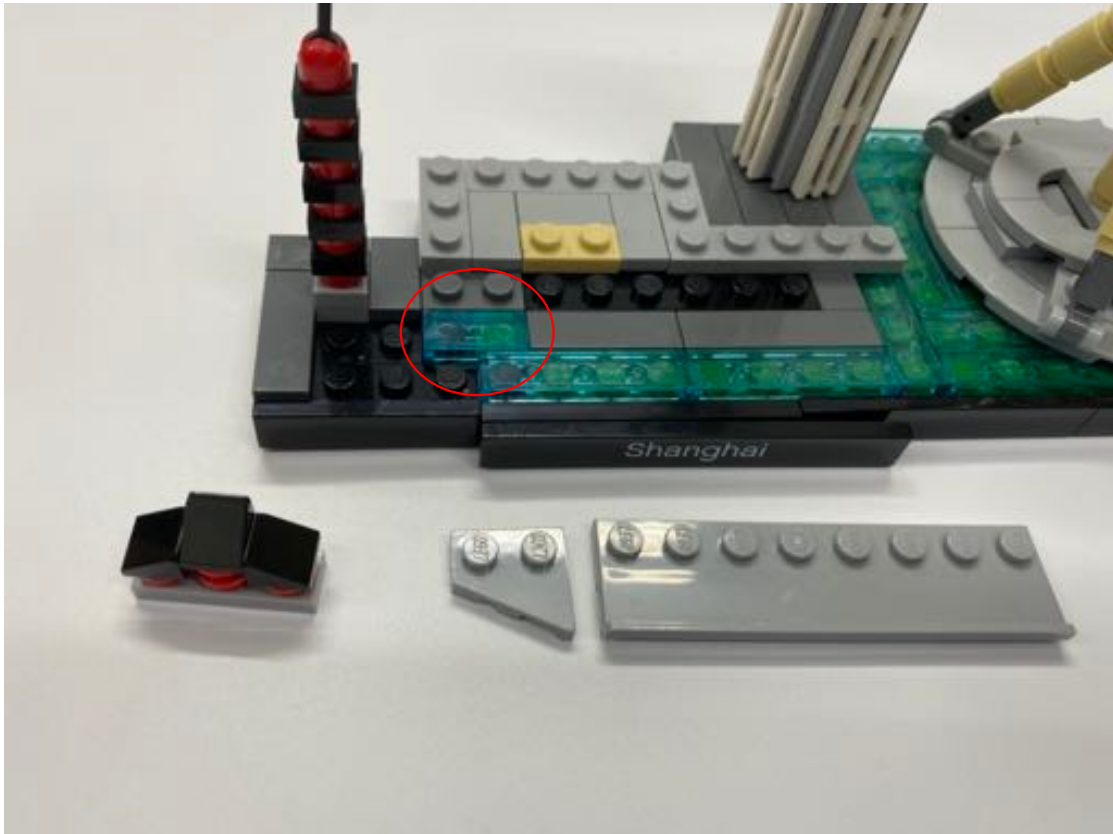

Remove the 1x2 brick and replaced by the lighting 1x2 brick

Remove the tan round plates and replaced by the lighting round plates and restore the building

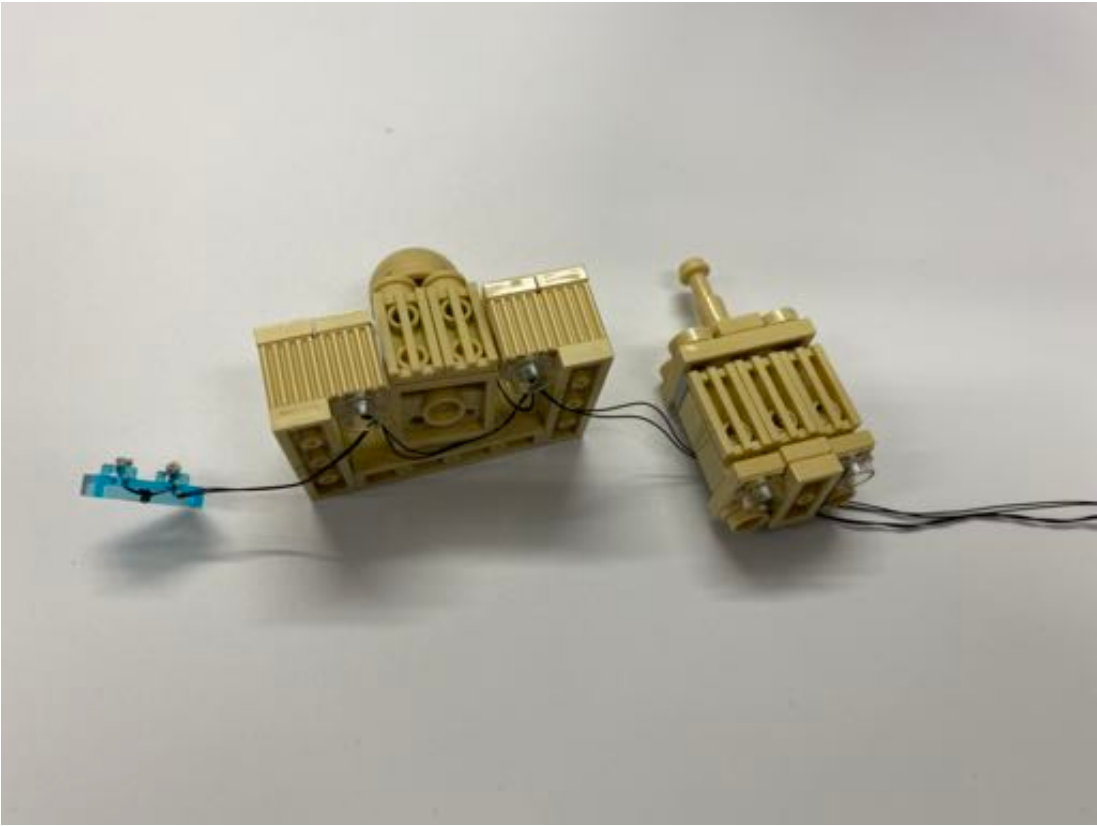

Install the blue 1x2 tile

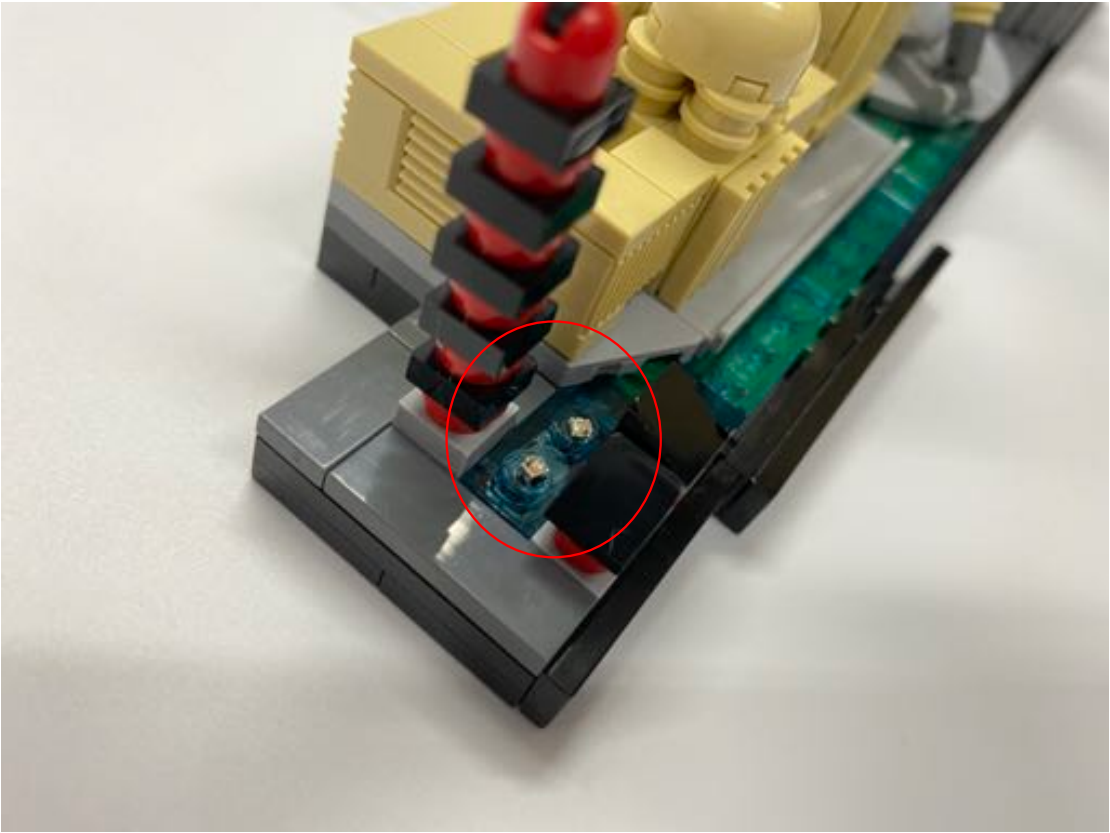

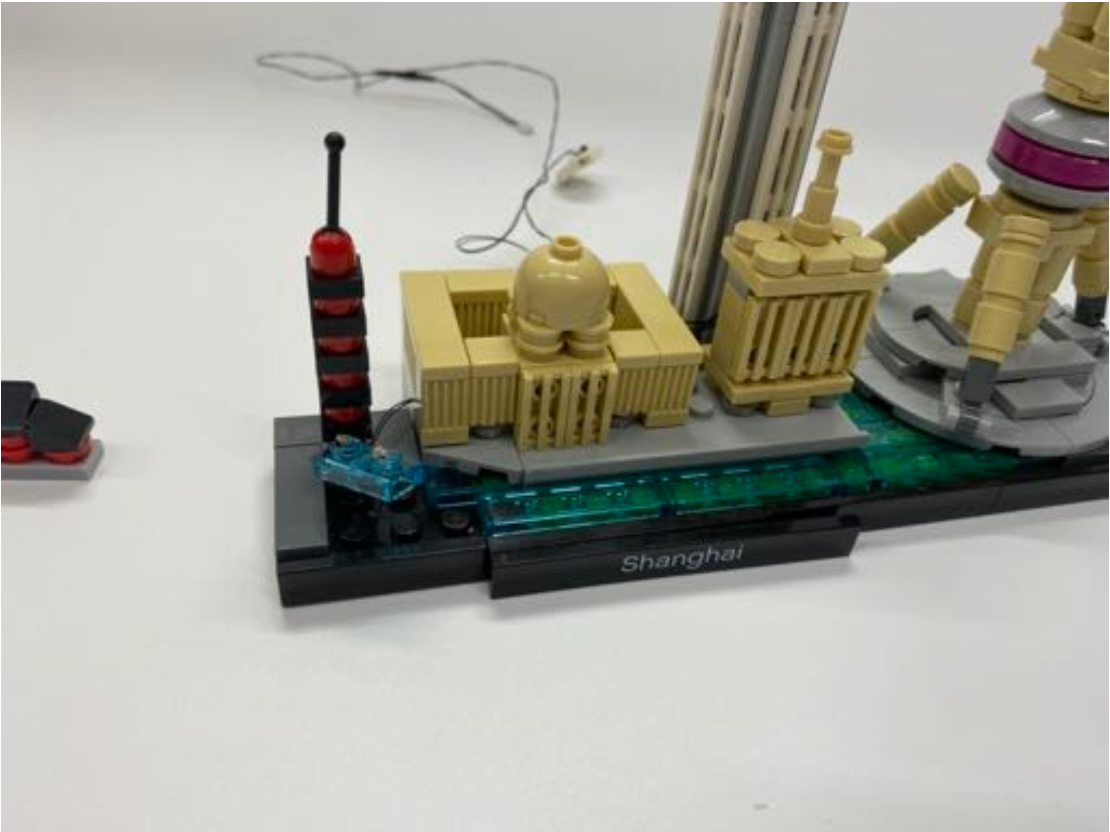

For the other tan building, split the building and the parts inside red circle will be disposed

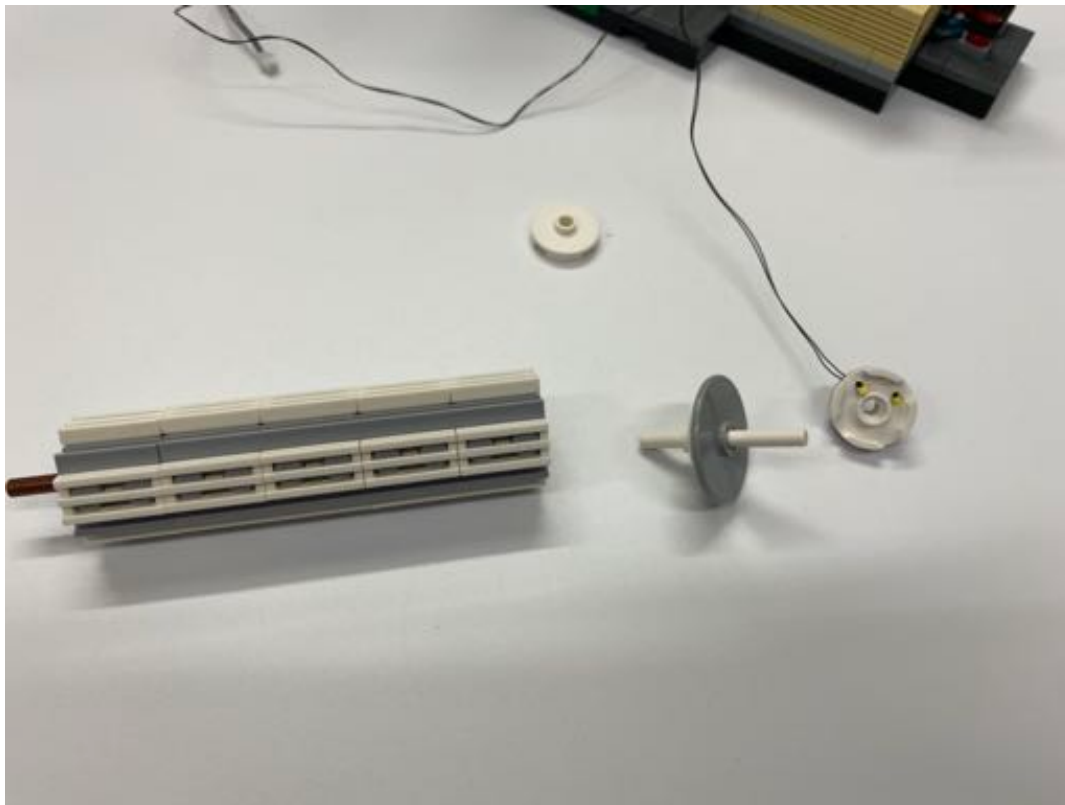

Then install the lighting parts
And restore the parts detached

Restore the buildings then install the 1x2 lighting plates

For the white tower, remove the white dish and replace by the lighting part

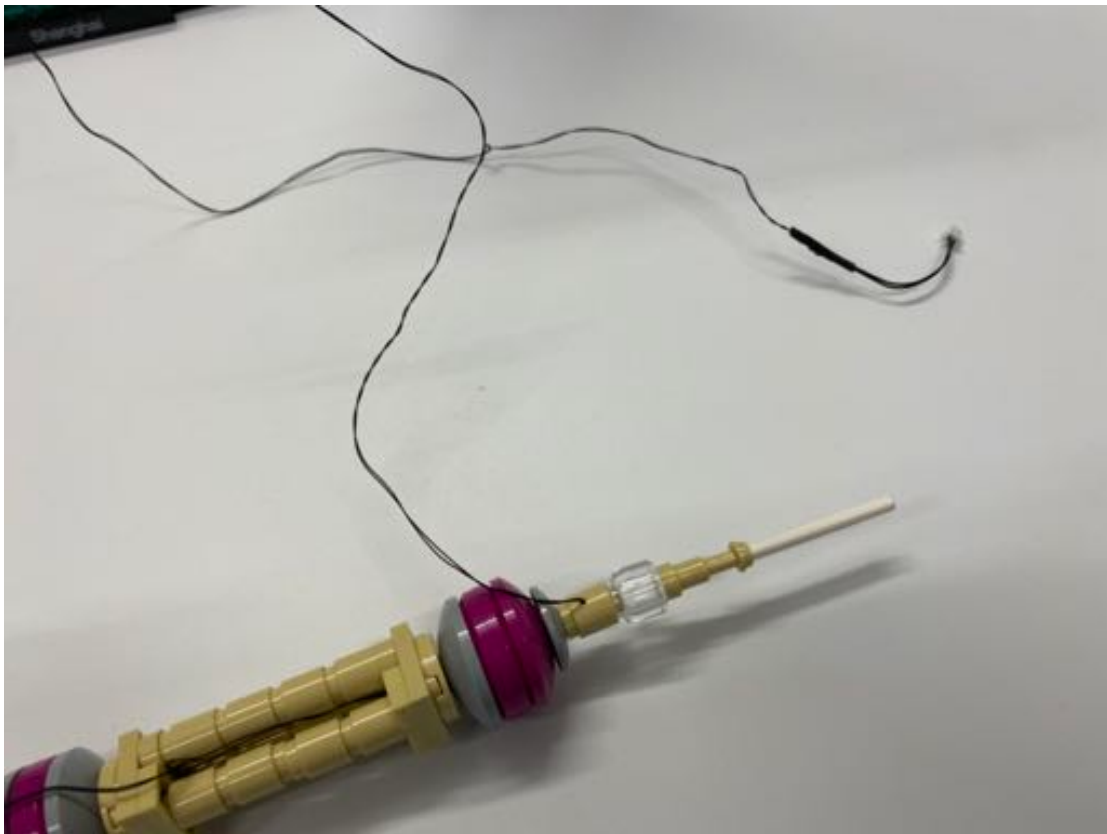

Then put the tower back (make sure the wire can't be seen from the front)

Take the tan tower off for installing the lighting parts

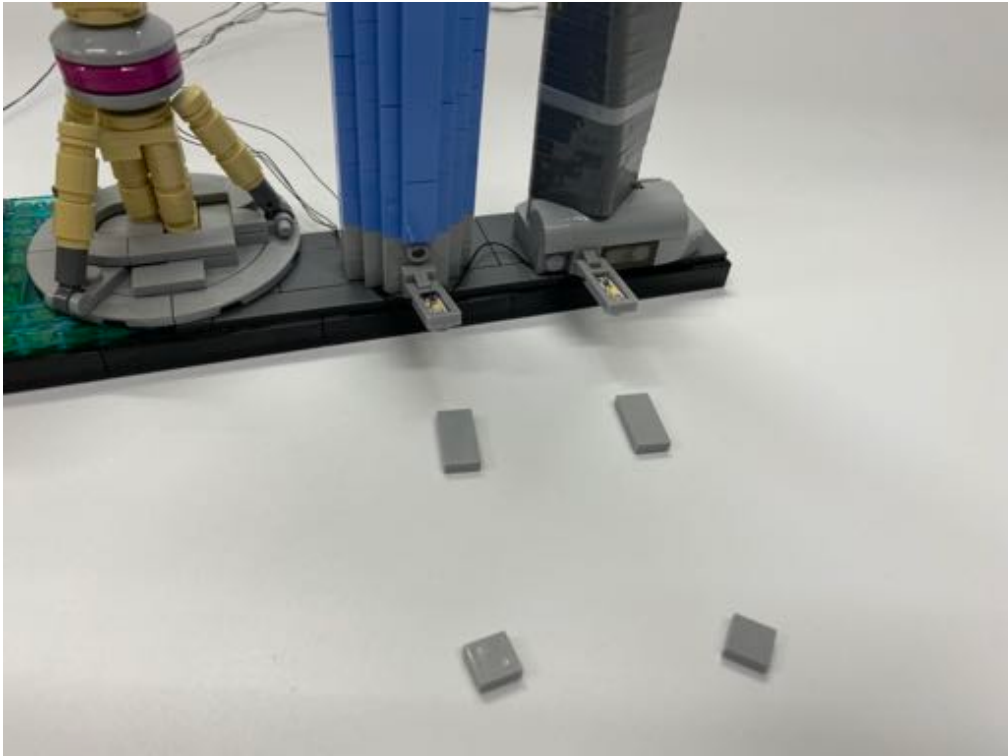

Remove the tan round brick and grey head and replaced by the lighting part as shown

Then put the tower back and pull the remain lighting parts to the front

Remove the 1x2 tiles from the model, install the lights, then put the 1x1 tiles provided on the blank

Connect the USB plug and that's done
