Lego 10252

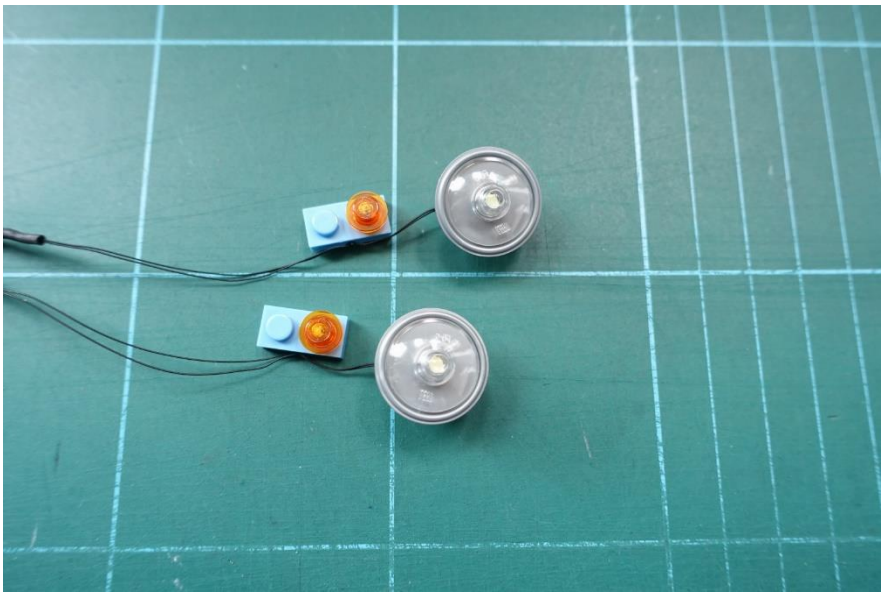
Volkswagen Beetle

LED Installation Guide

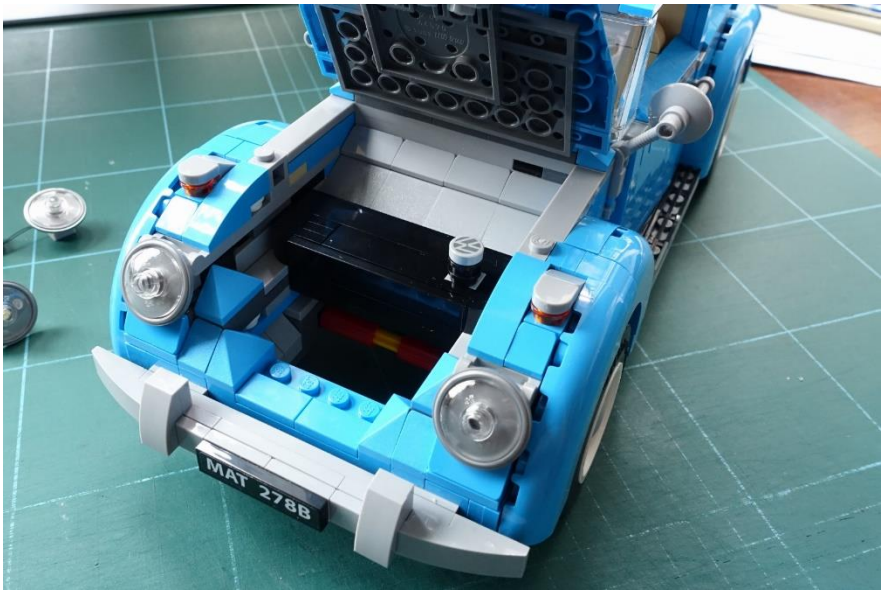
GLOW BRICKS

Test the light before installation

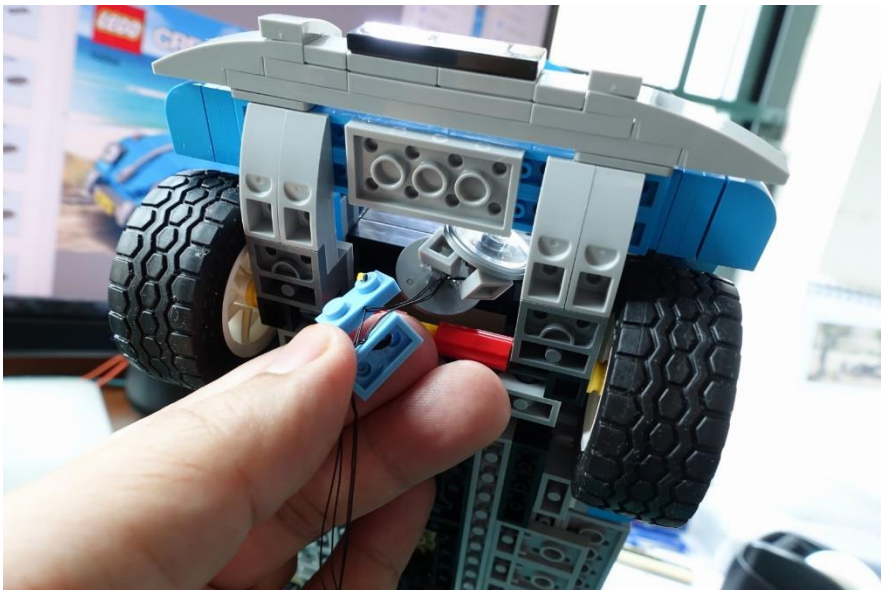
The front lights

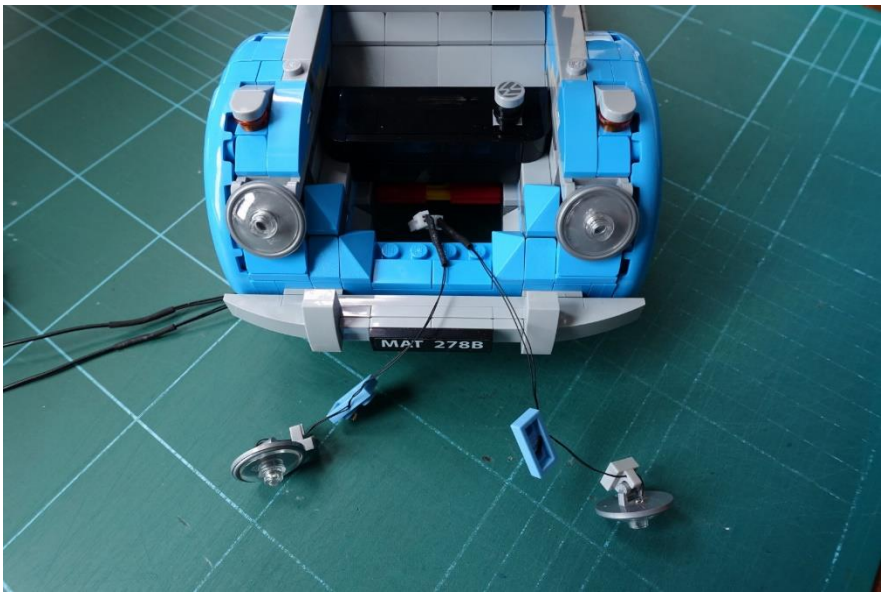


Open the hood

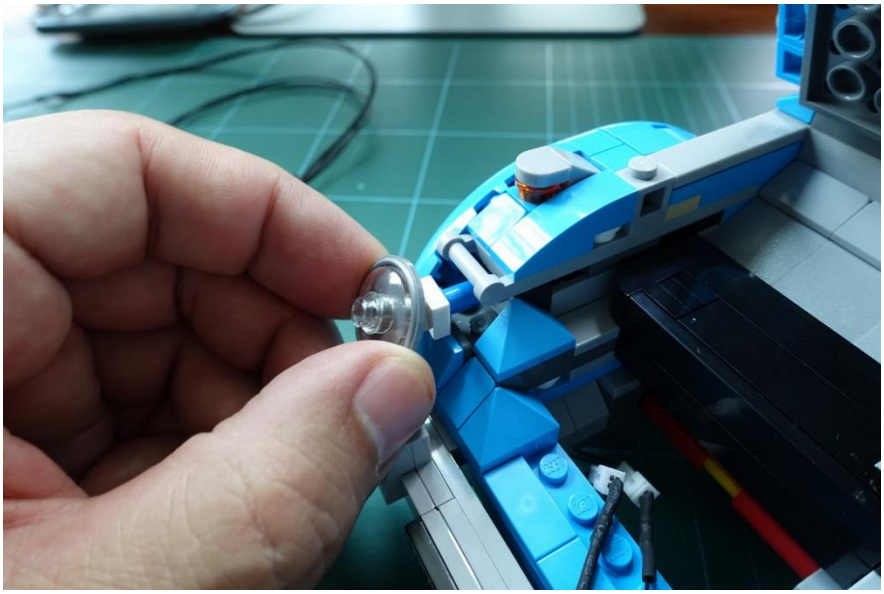


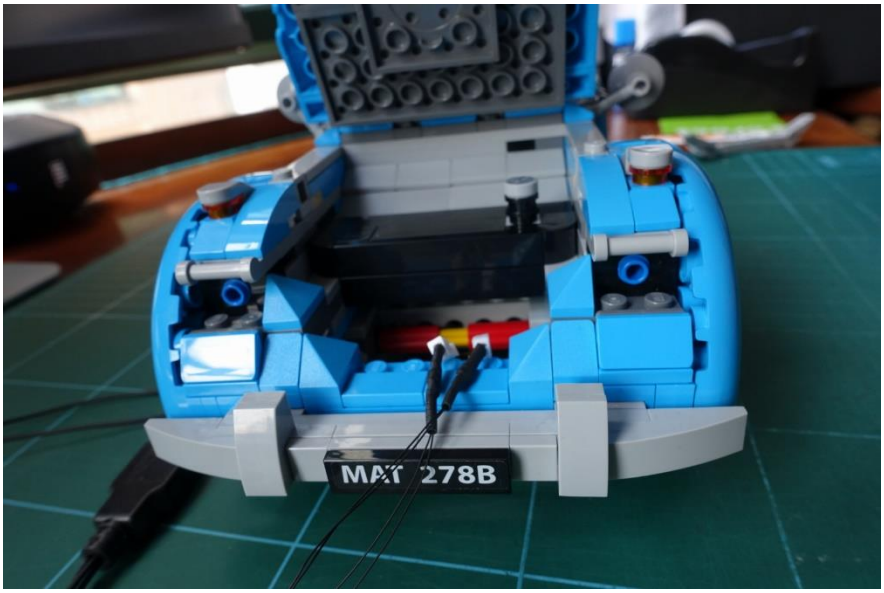
Pass the front lights from the bottom



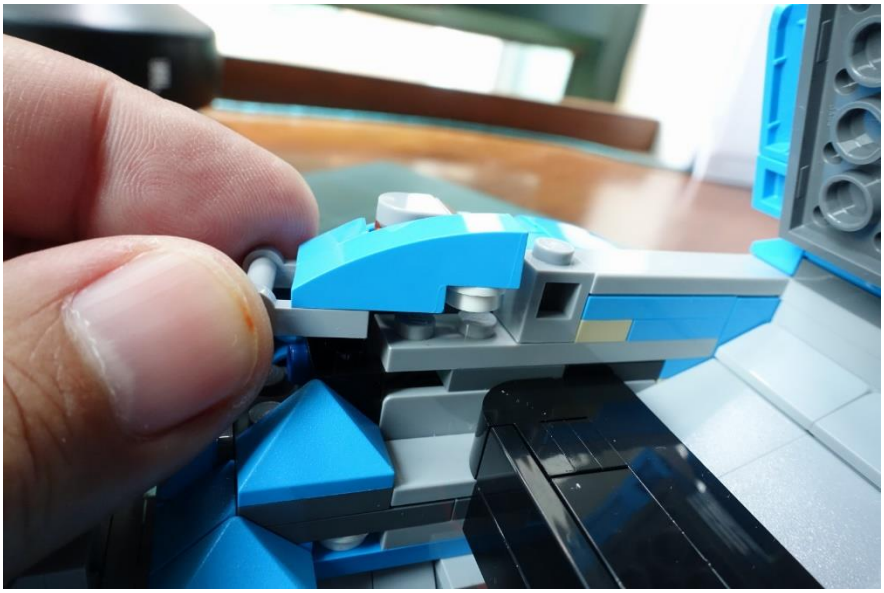


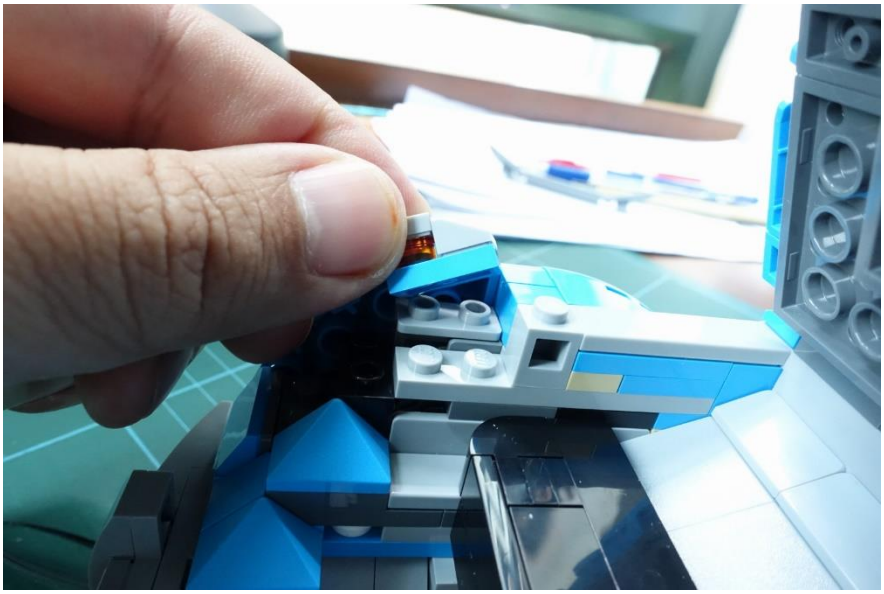
Pull out the headlights, leave the blue tubes in the car

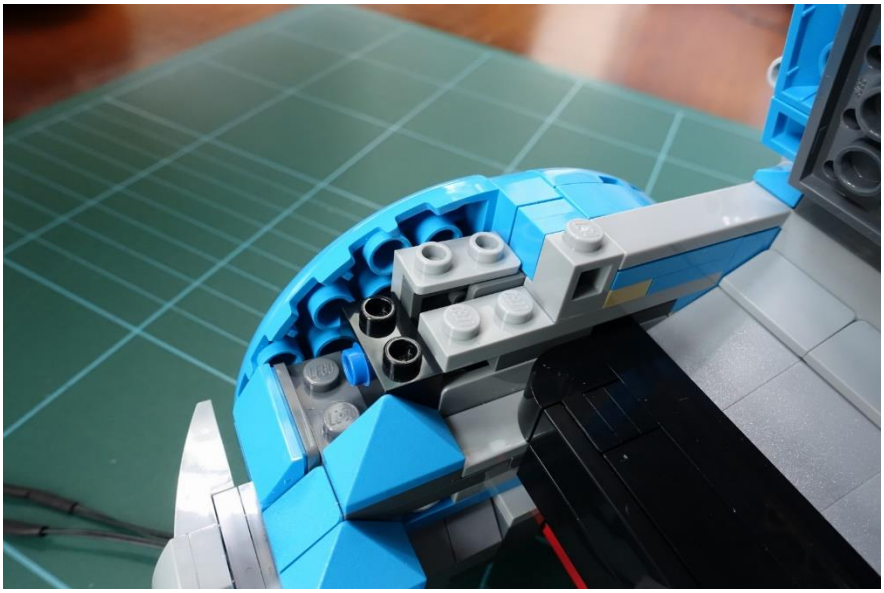


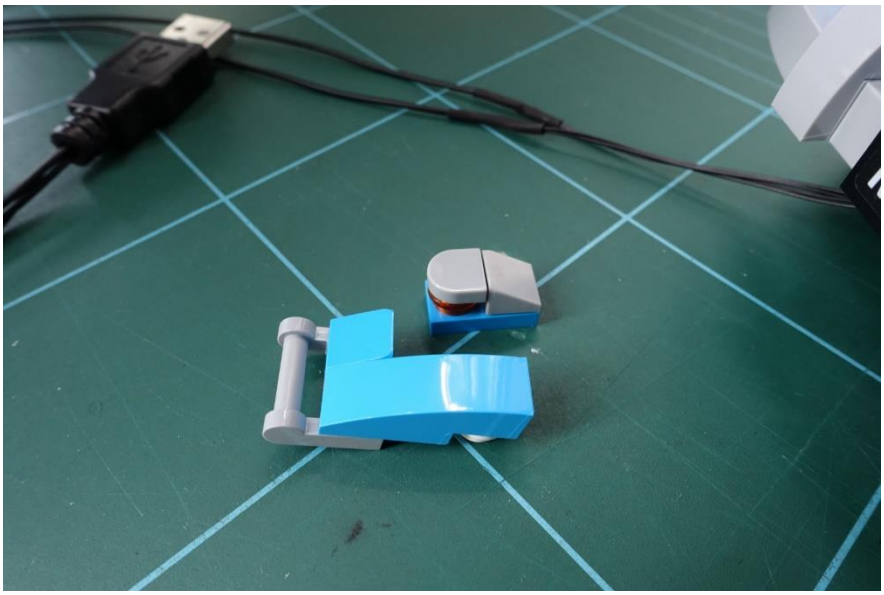


Remove some parts

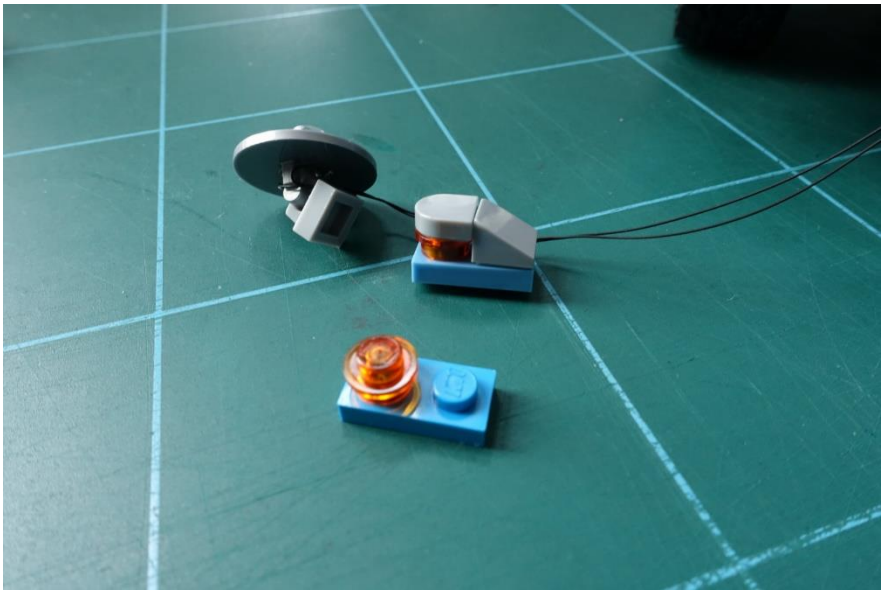




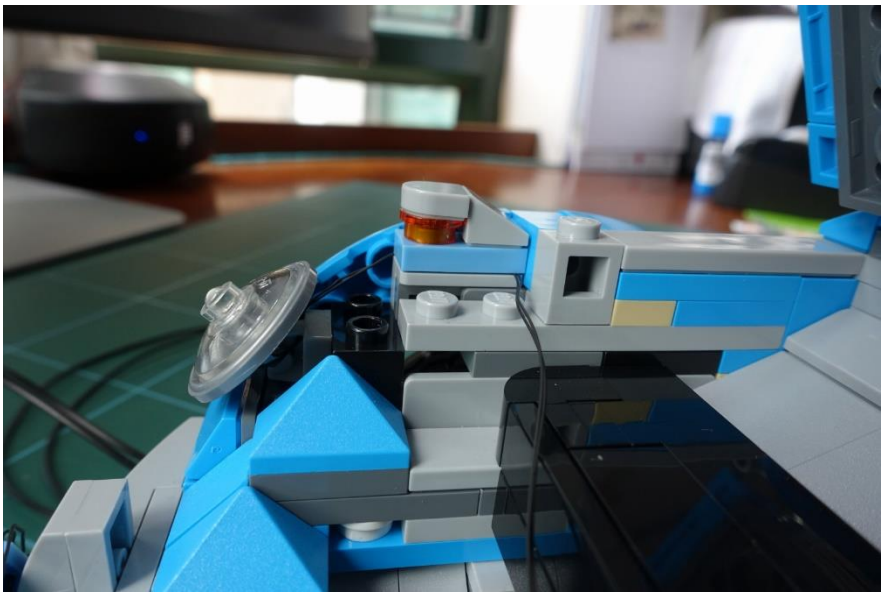


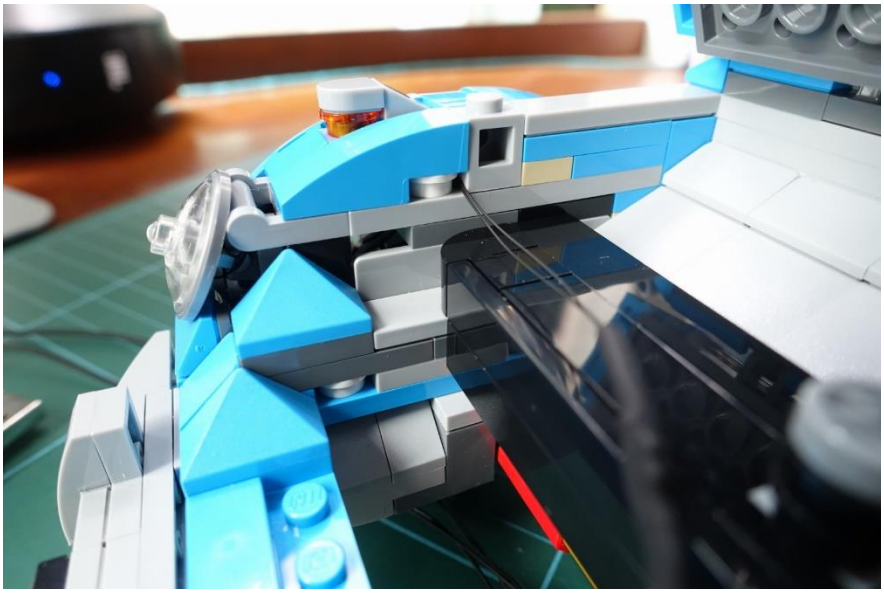


Move the grey parts to the blue light parts

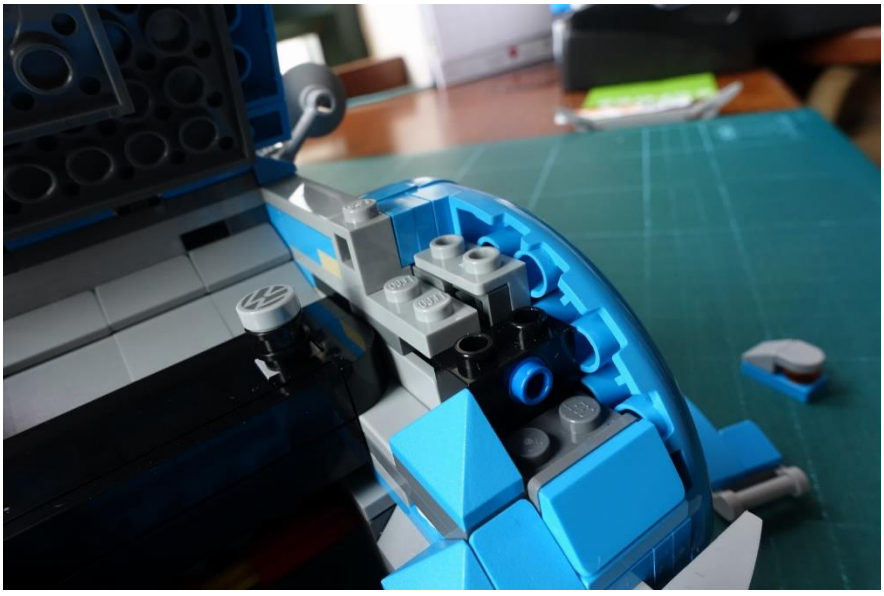


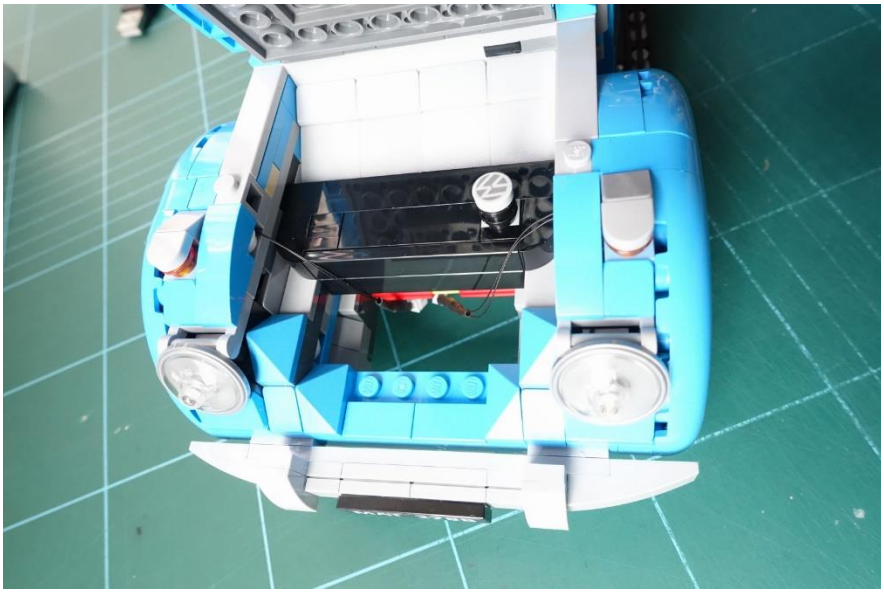
Install the light parts



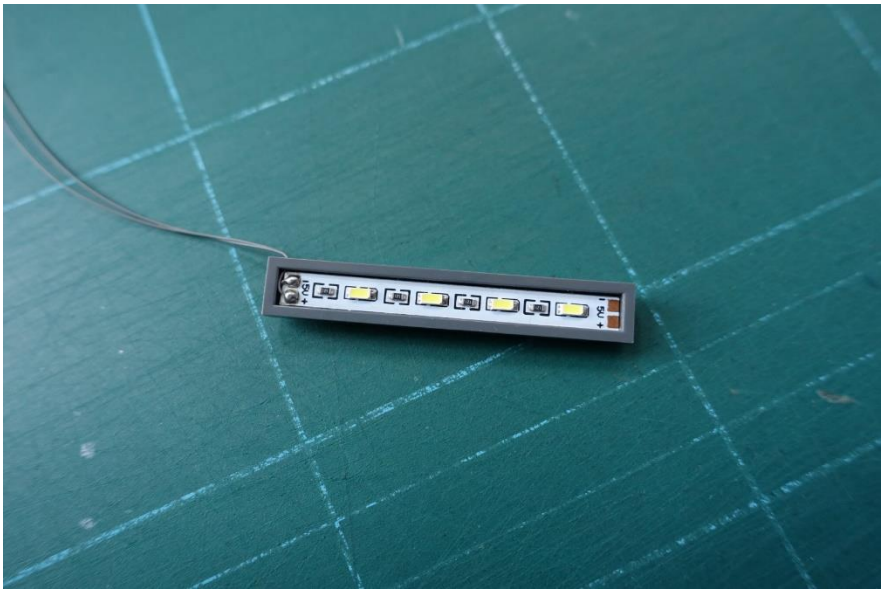


Do the same steps on the other side

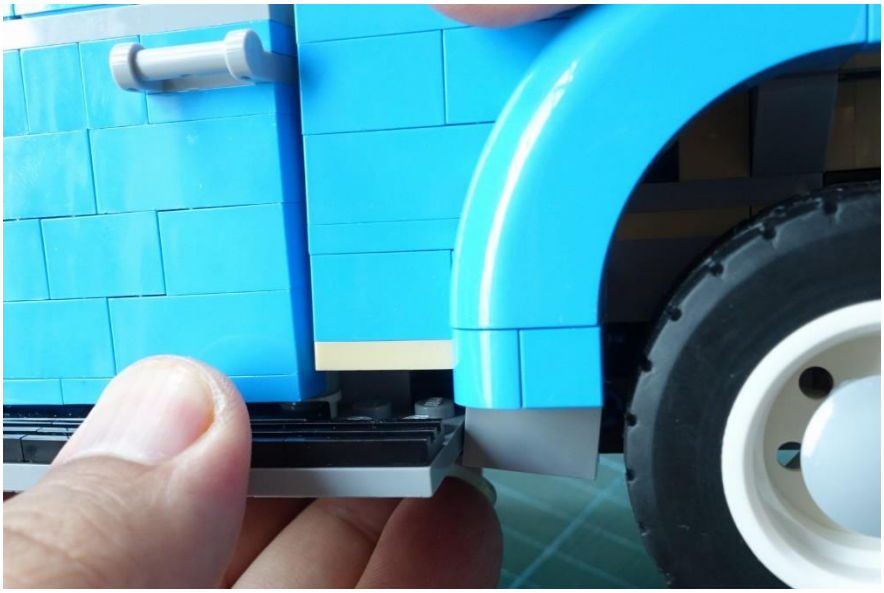




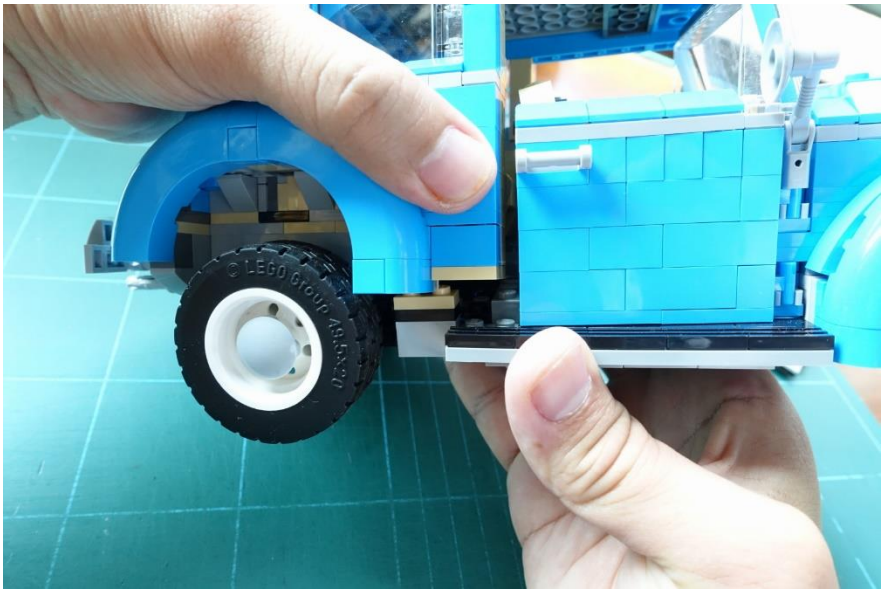
Room light



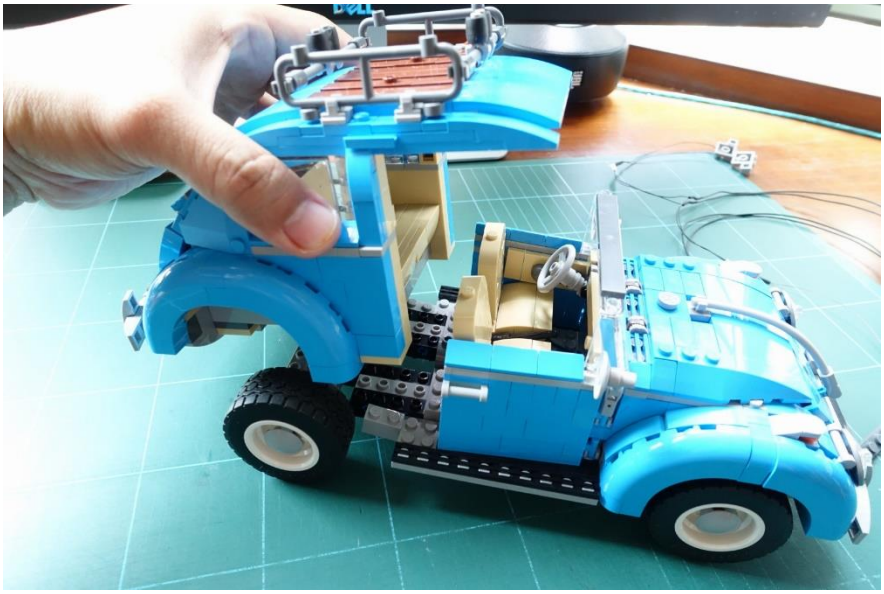
Loosen the body near the rear wheel

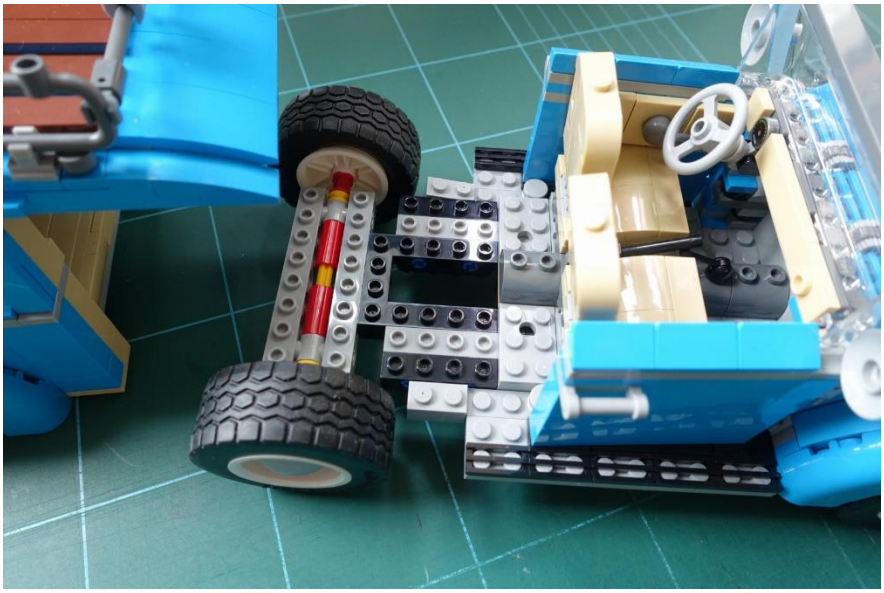


Loosen the other side

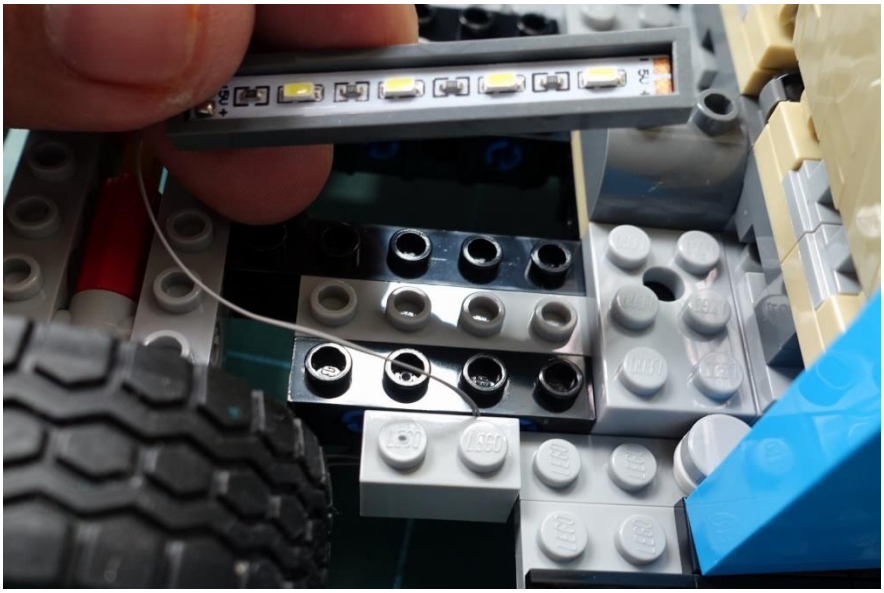


Take out the rear body

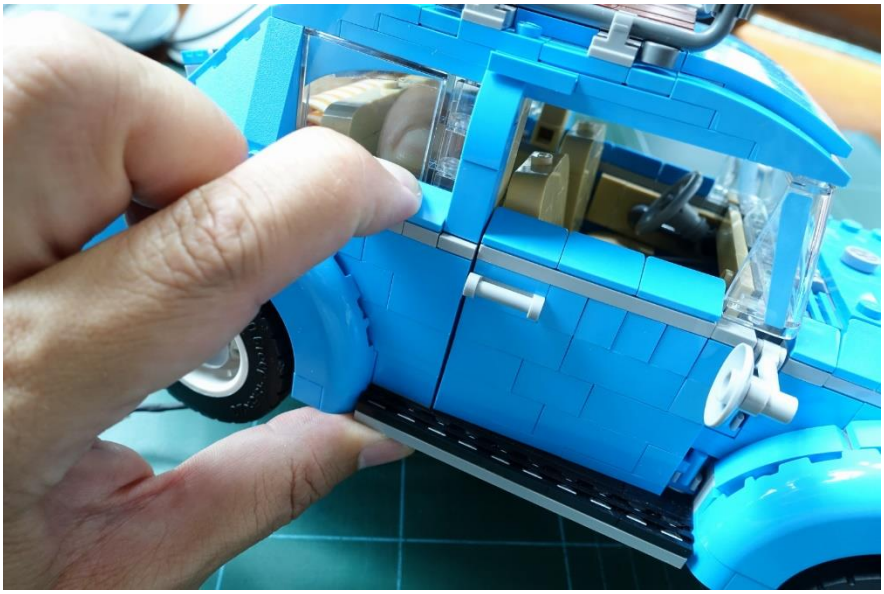




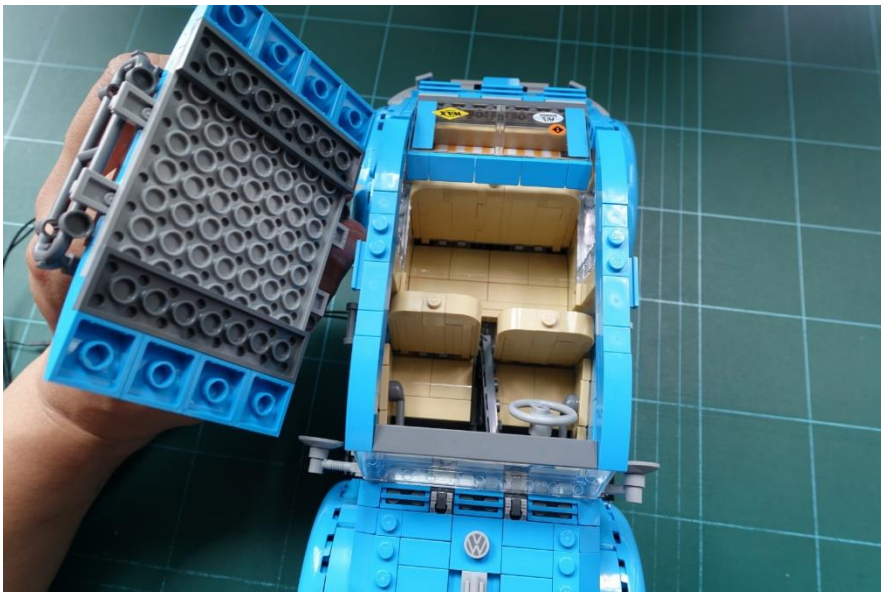
Move the room light wire behind the movable brick



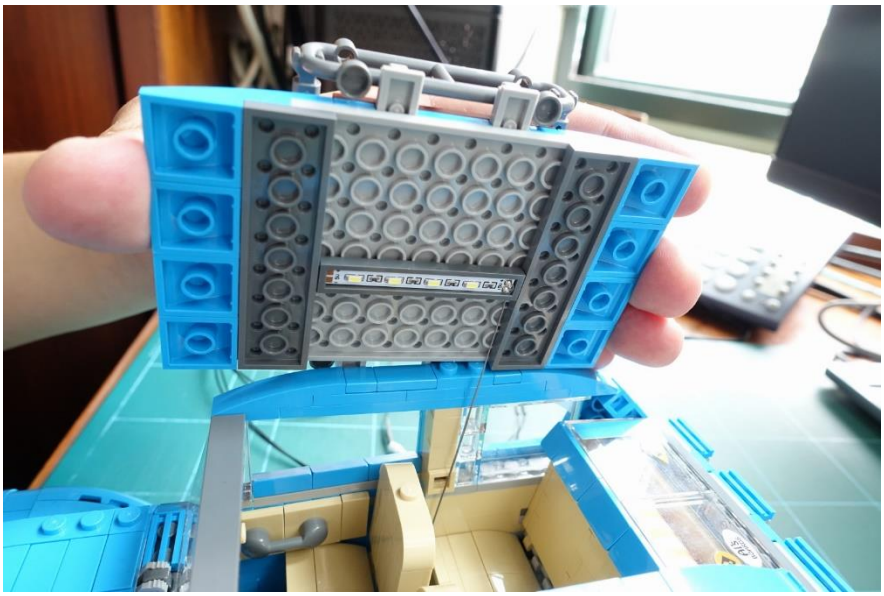
Put the body back



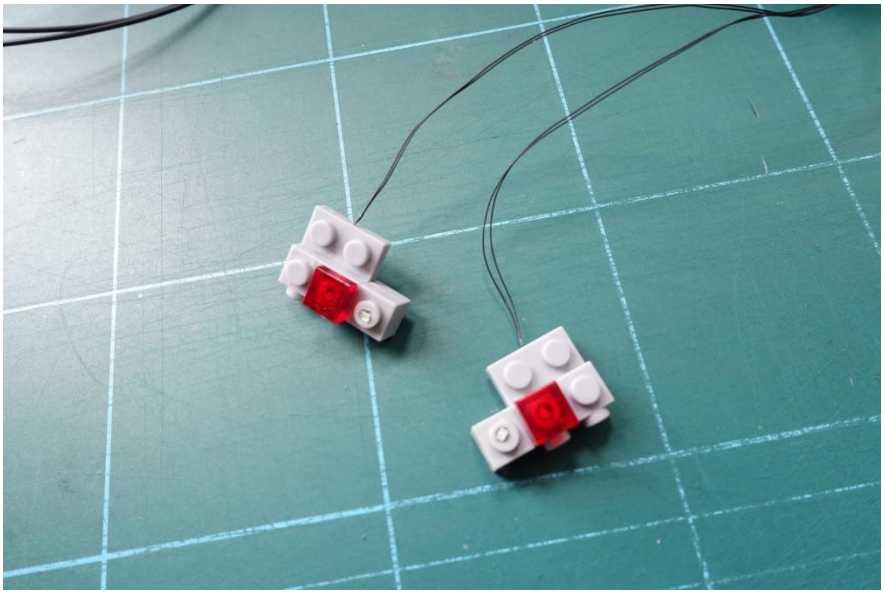
Open the roof



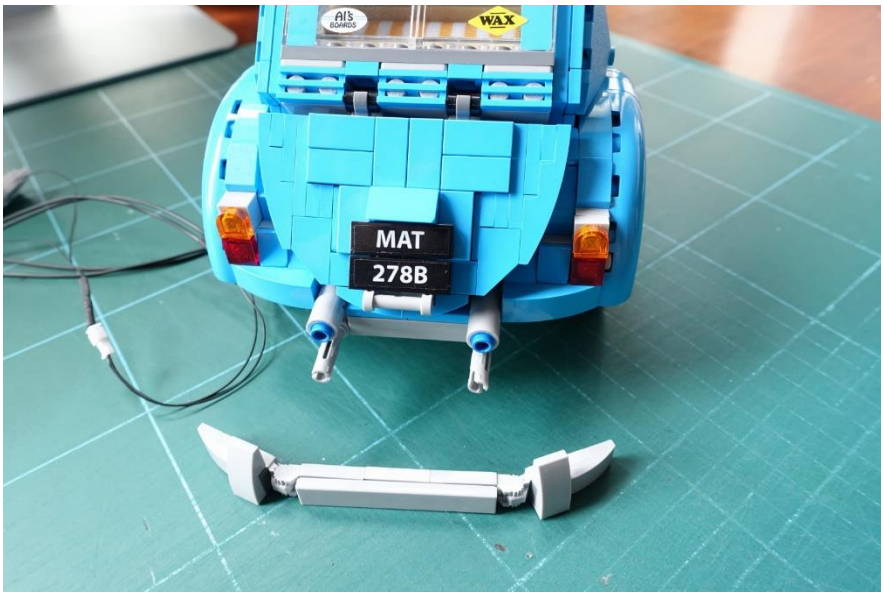
Install the room light



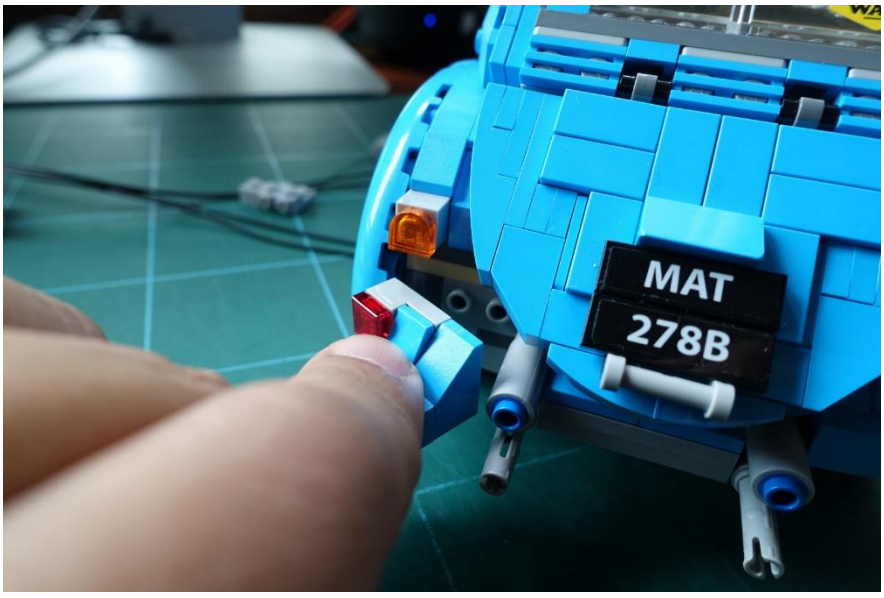
Rear lights

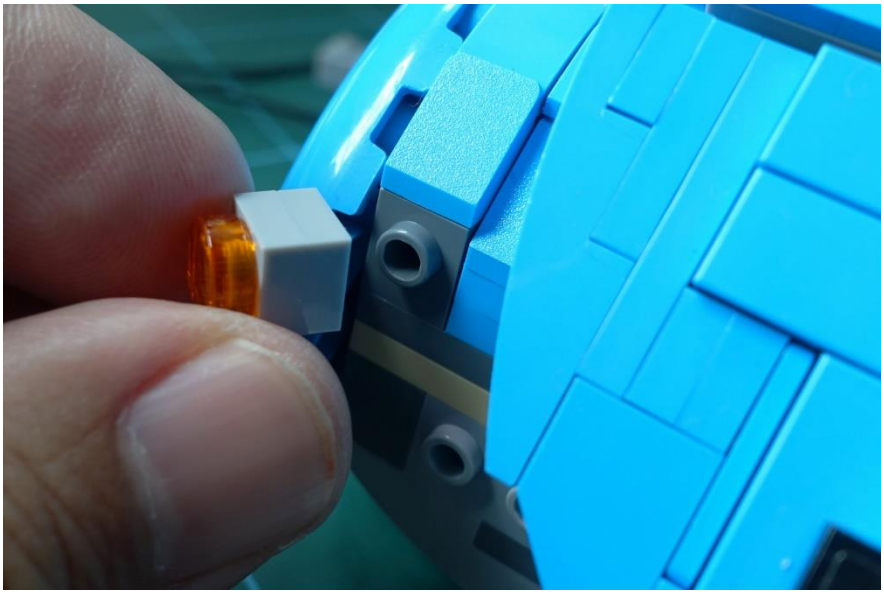


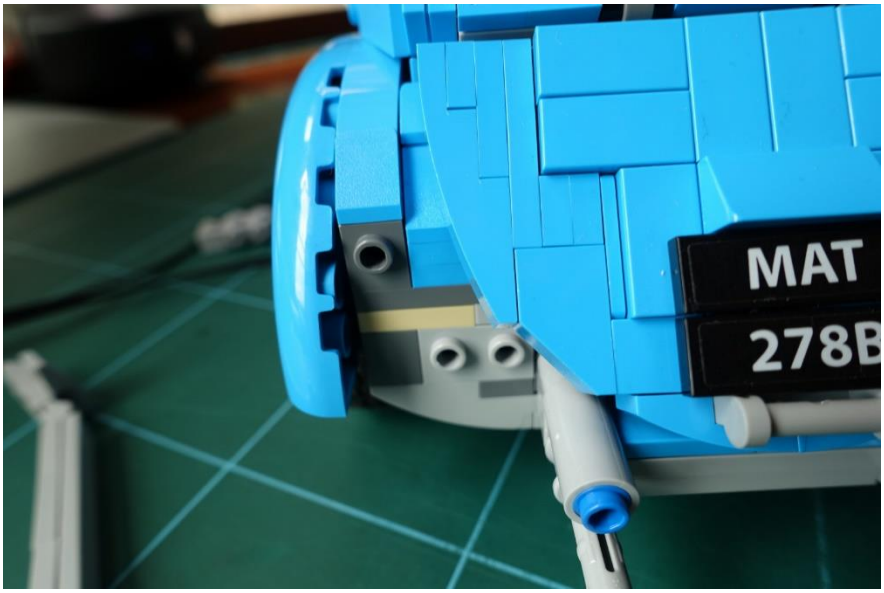
Remove the rear bumper

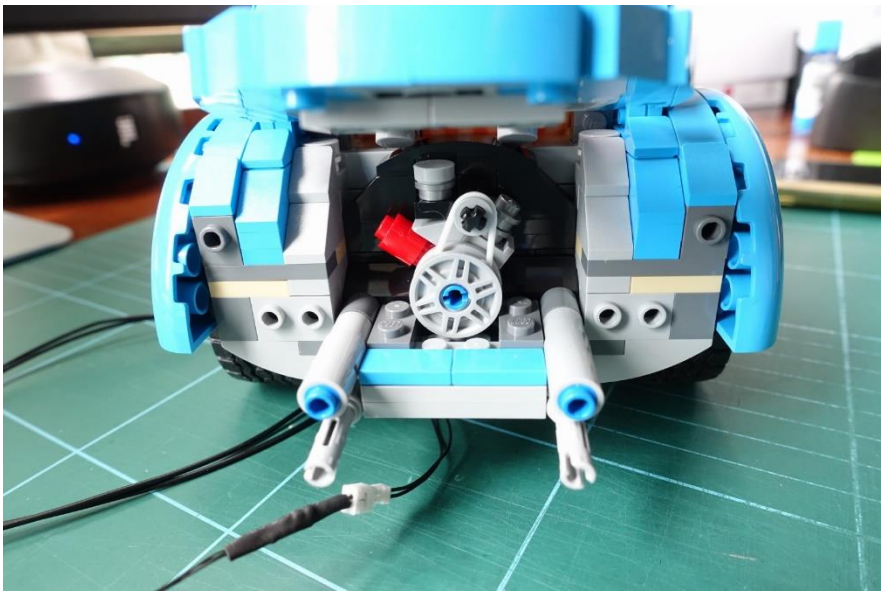


Remove the rear lights

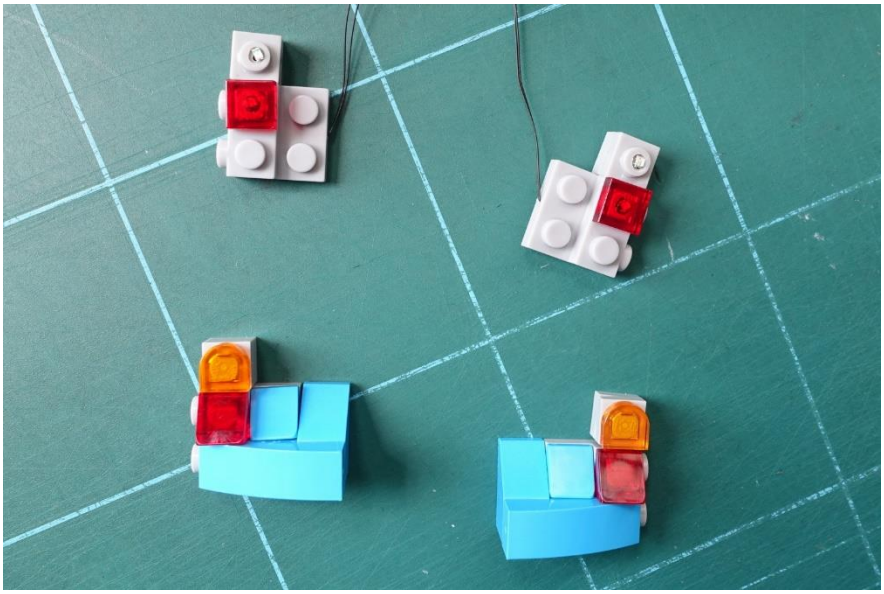




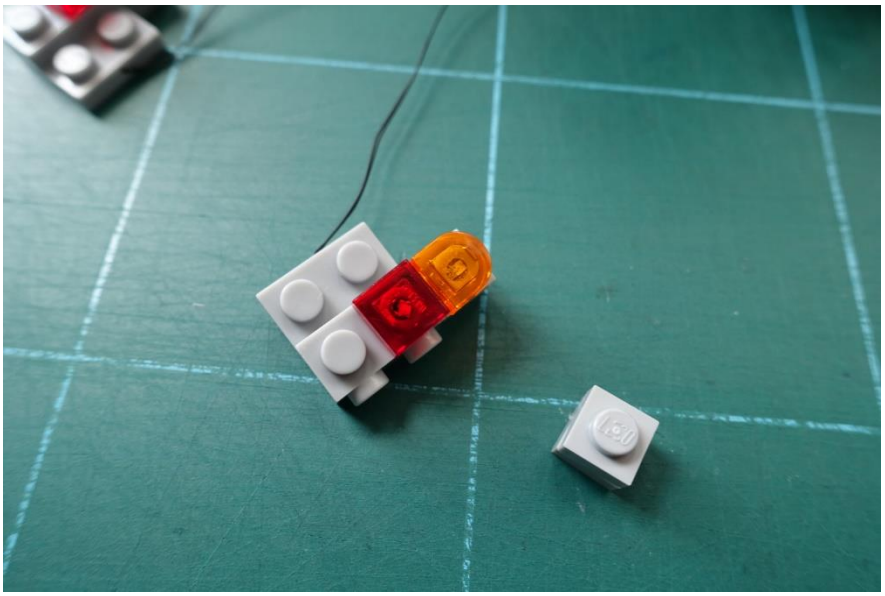




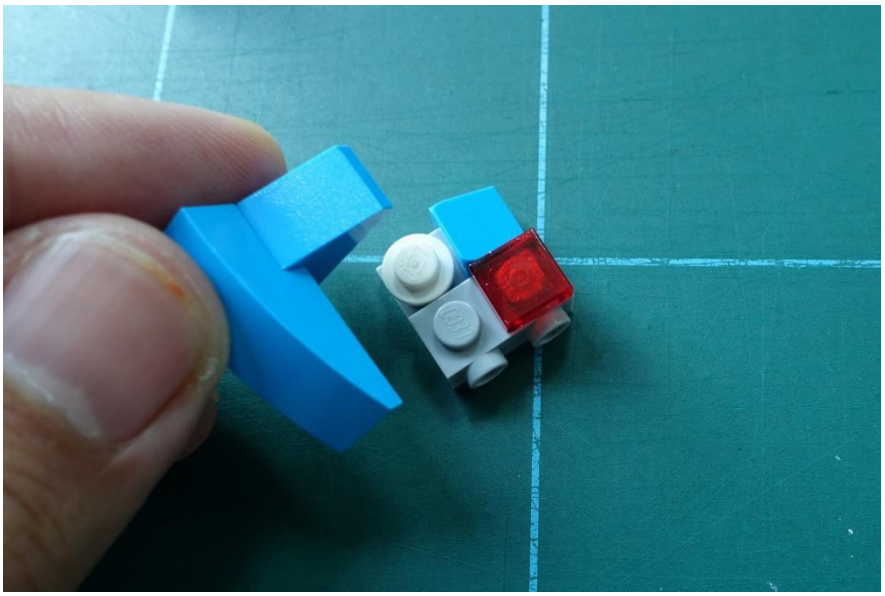
Left and right

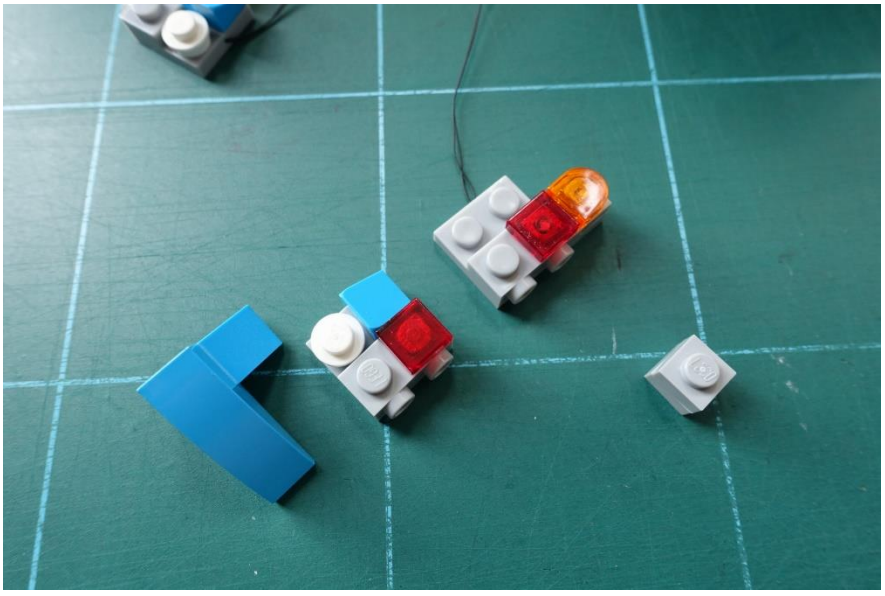


Left side, move the clear orange plate to the light parts

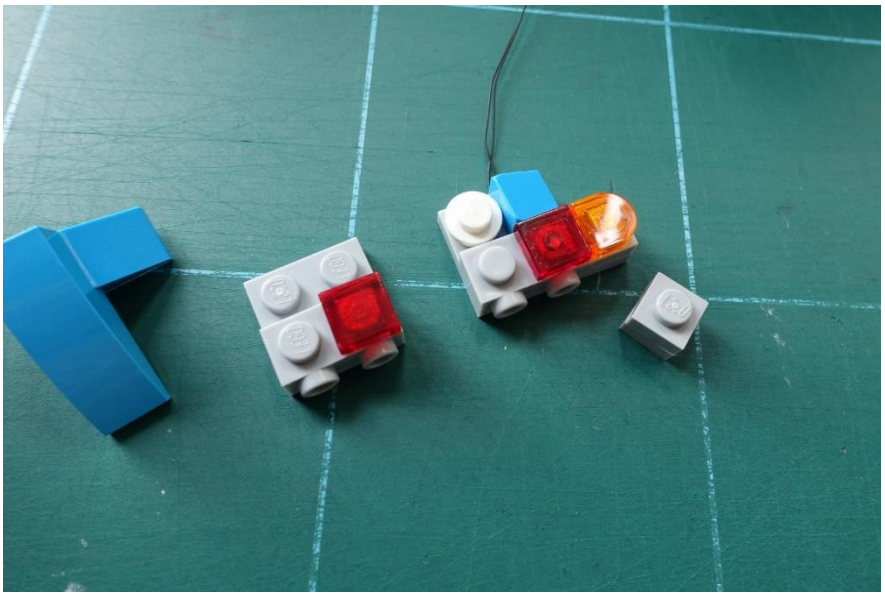


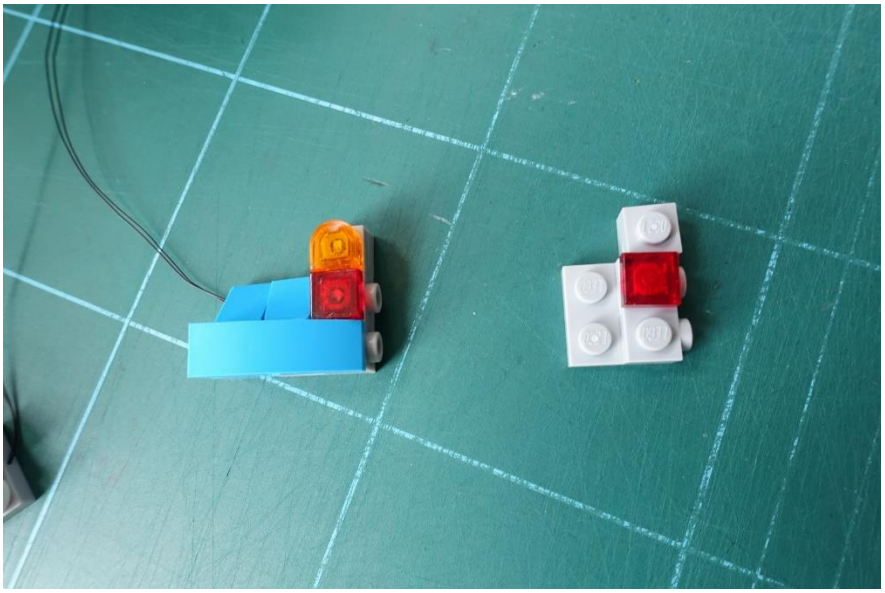
Separate the original parts



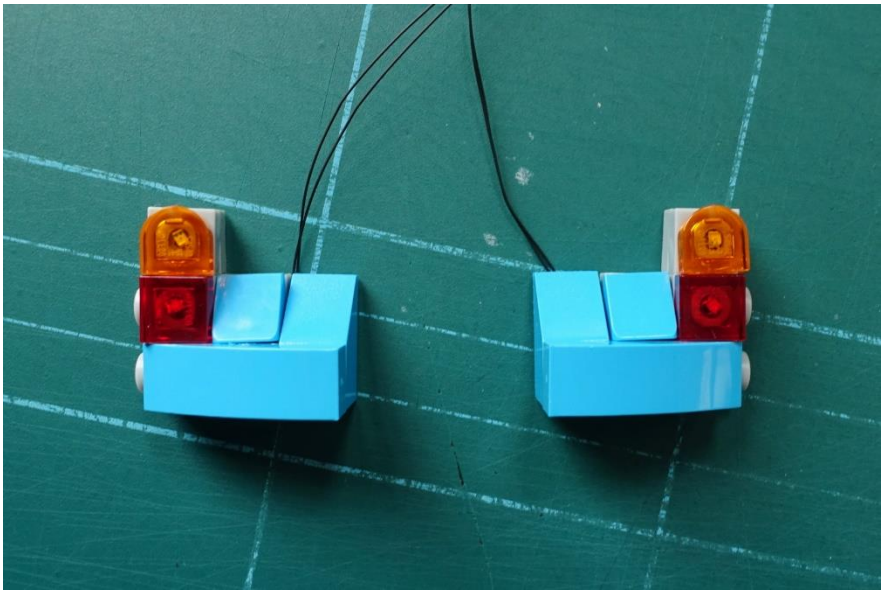


Move the white and blue bricks to the light parts

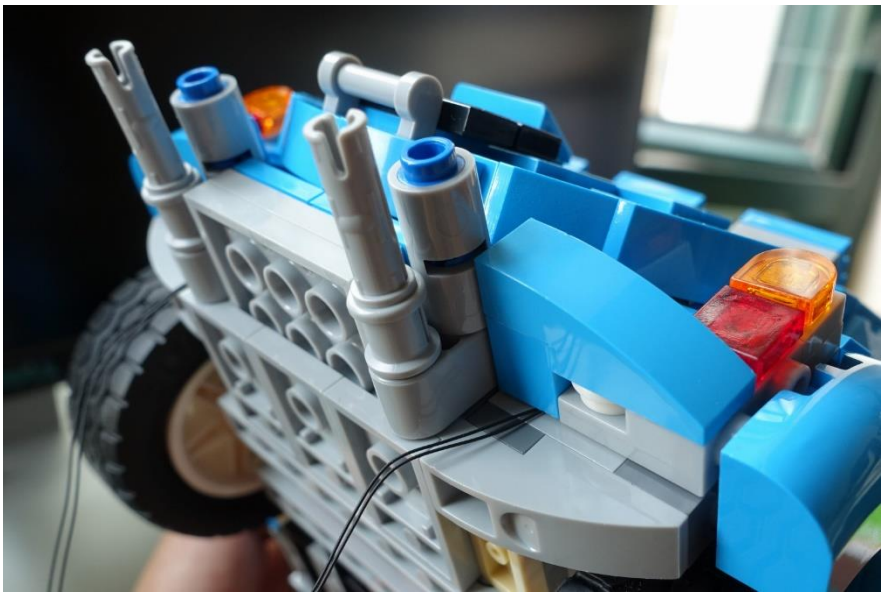


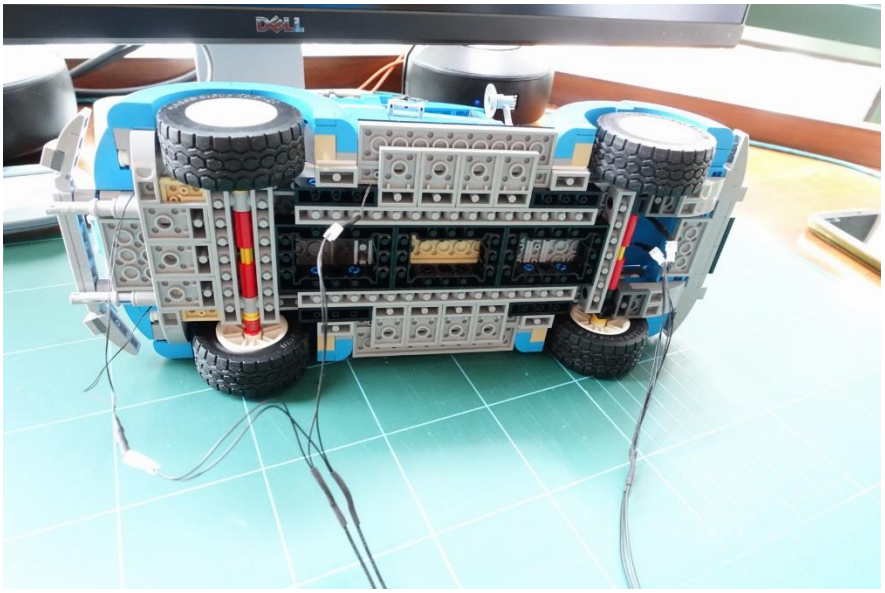


So the same steps on the right side

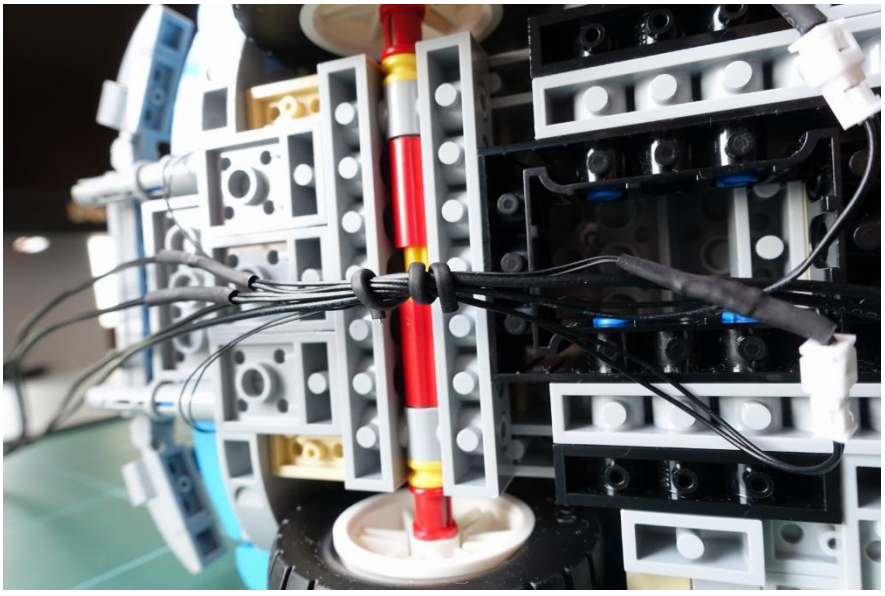


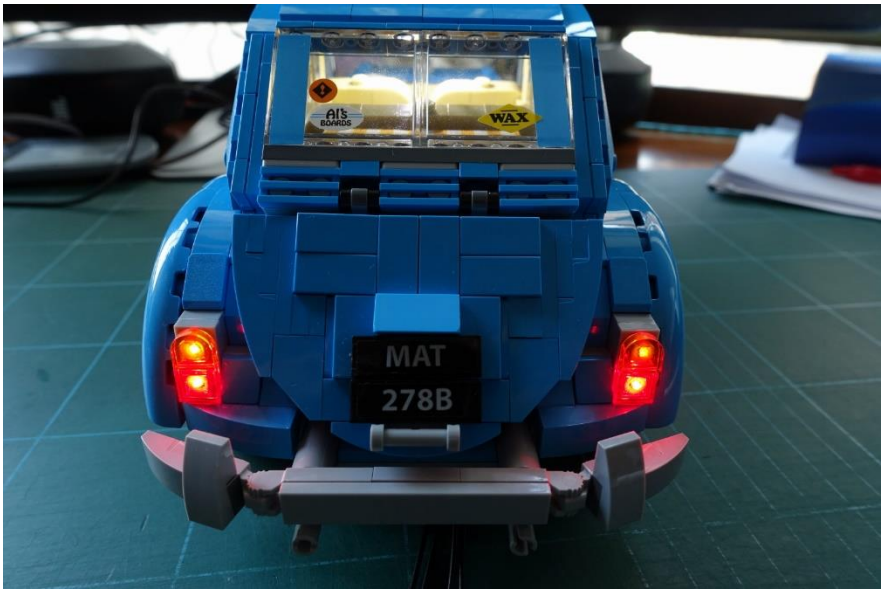
Install the rear lights





Fasten the wires





Plug in and done!
