Lego 10220

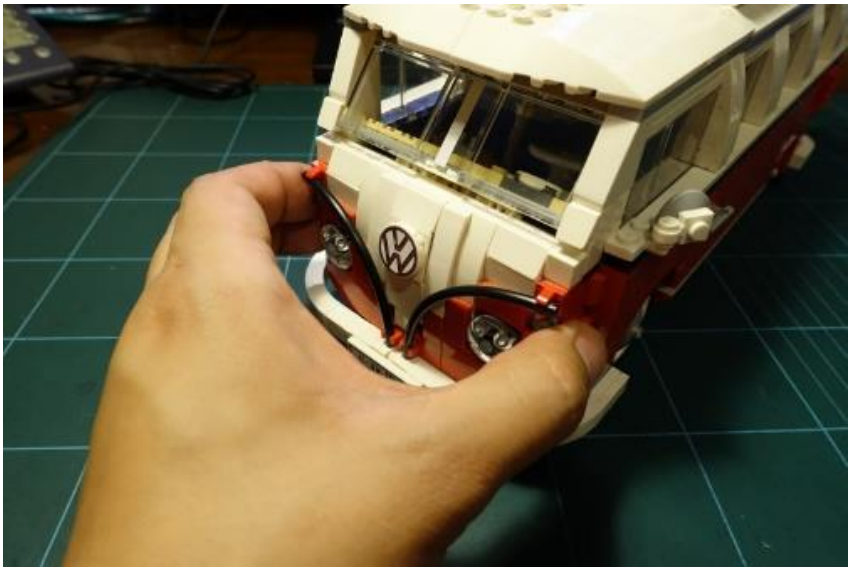
Volkswagen T1 Camper Van

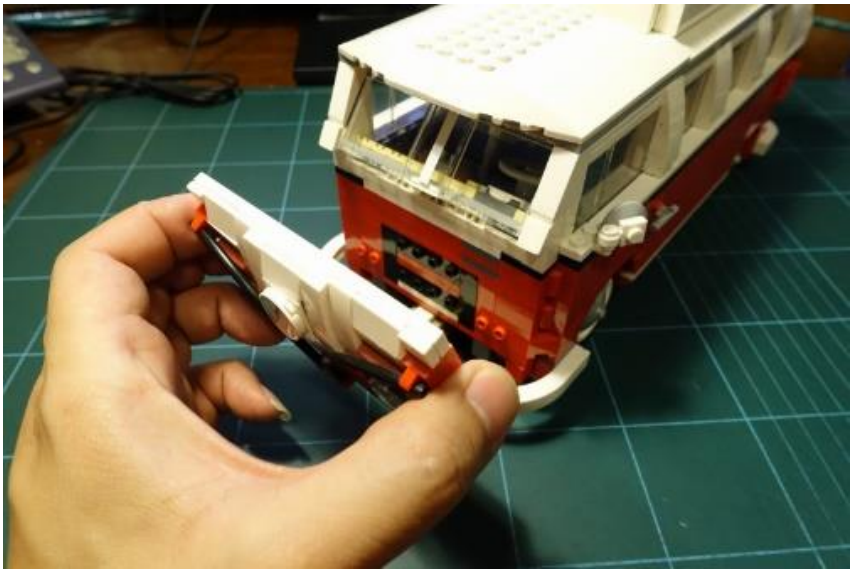
LED Lighting Kit Installation Guide

GLOW BRICKS

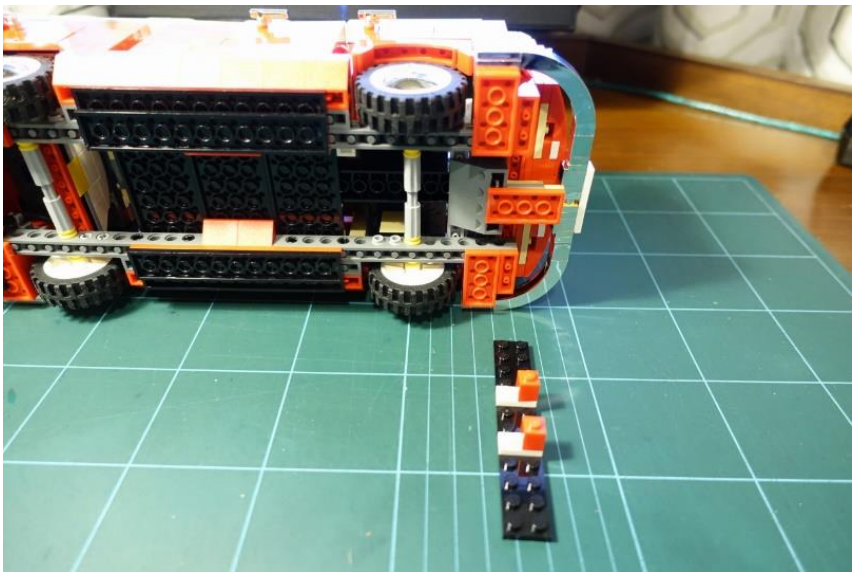
A. The front lights

Remove the face

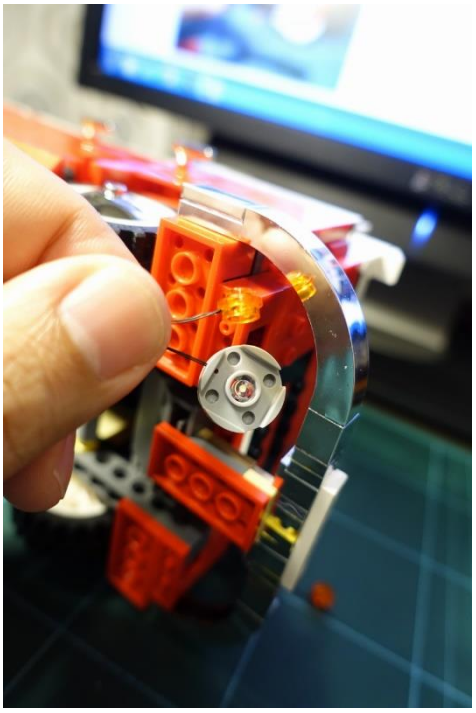


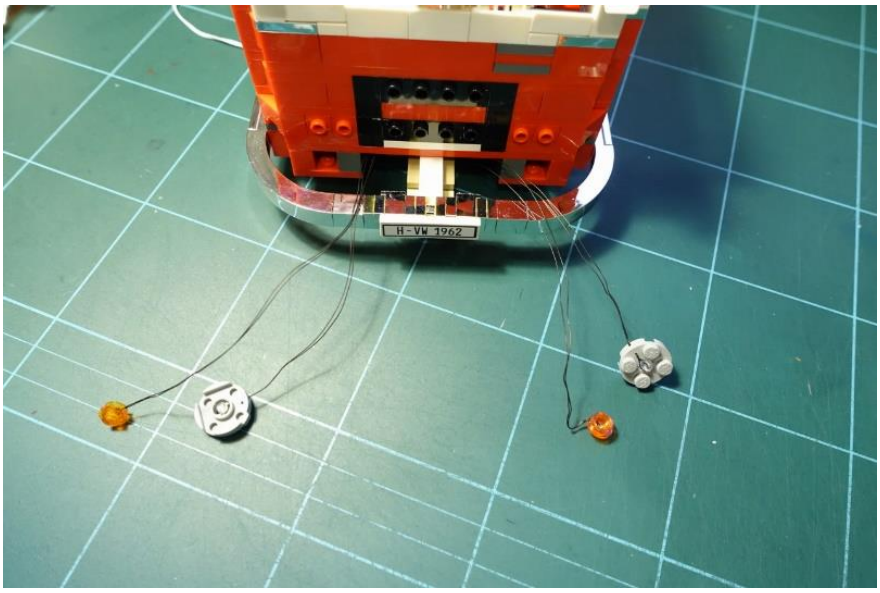


Take off the black plate on the bottom

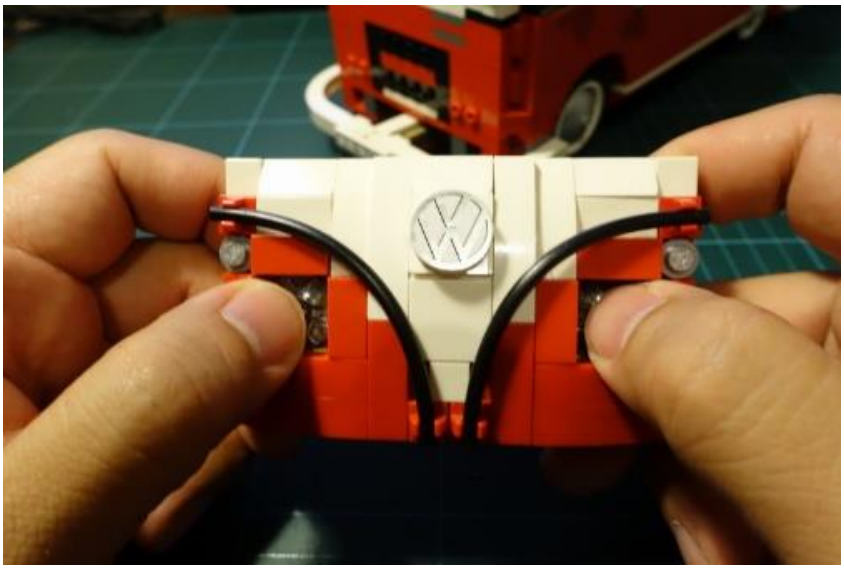


Pass one orange light and one grey plate with light through the bumper to the front, do the same on the other side

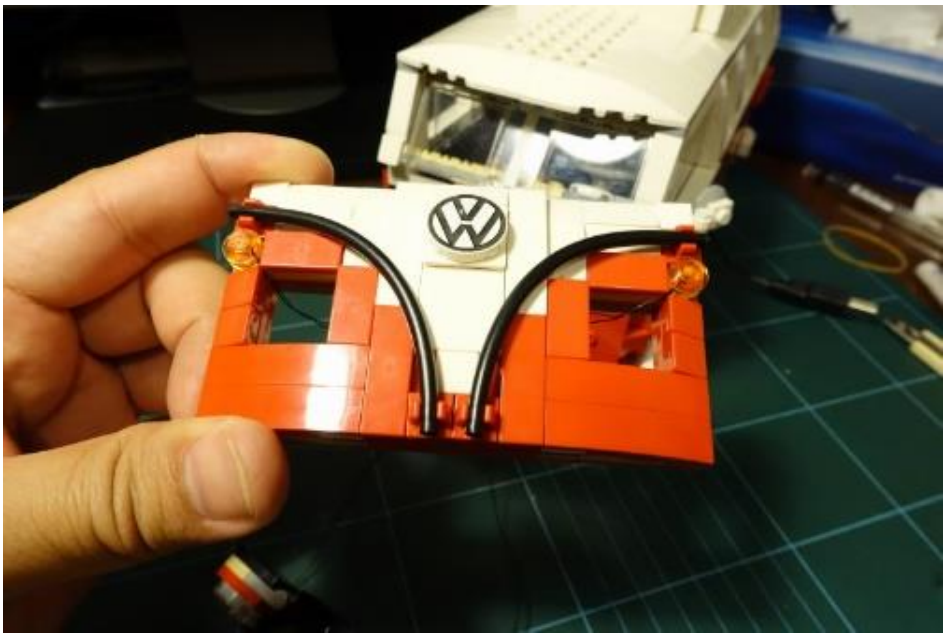




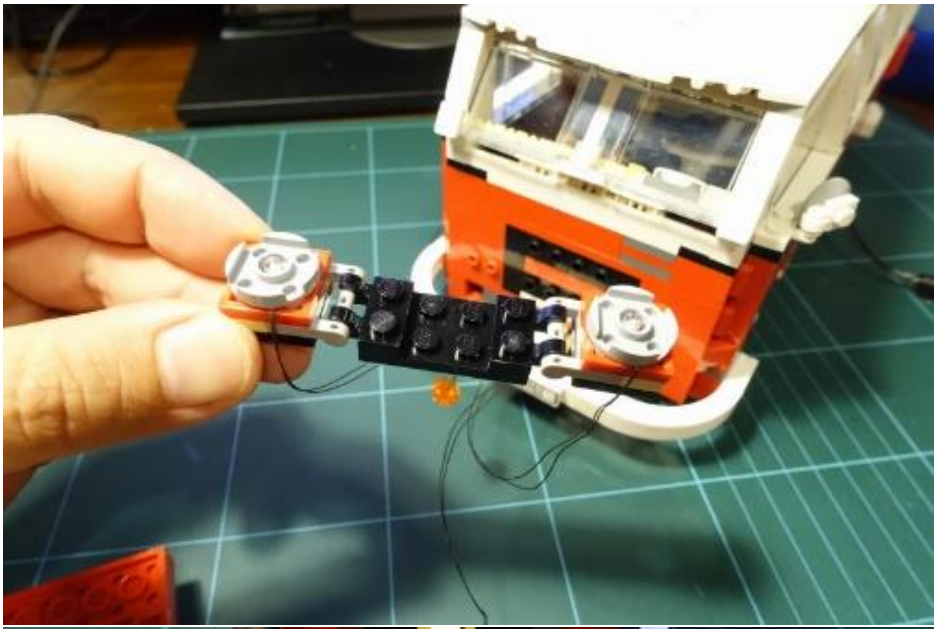
Hold the face, push the headlights in by thumbs

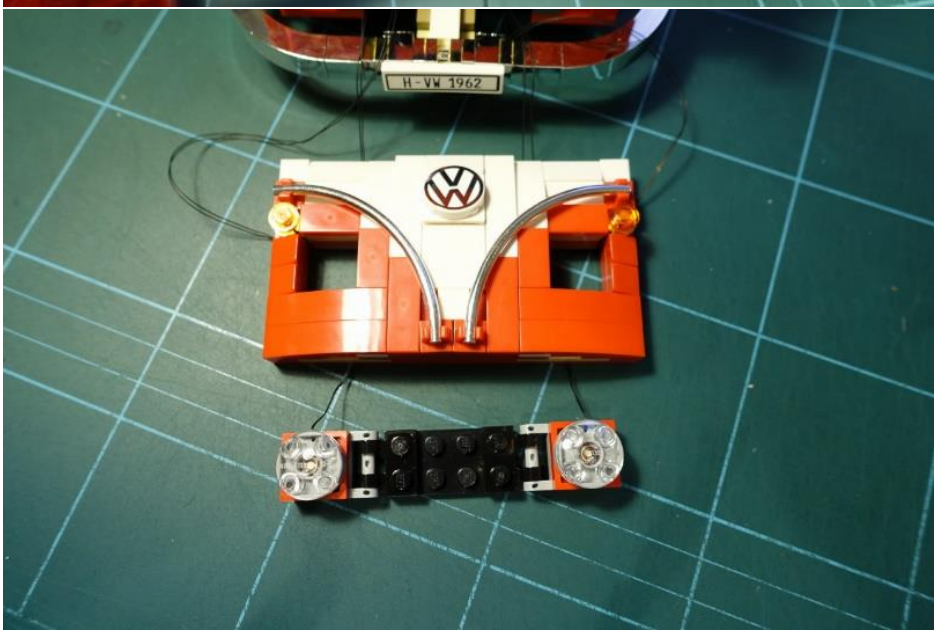


Replace the 1x1 orange plates with orange light plates

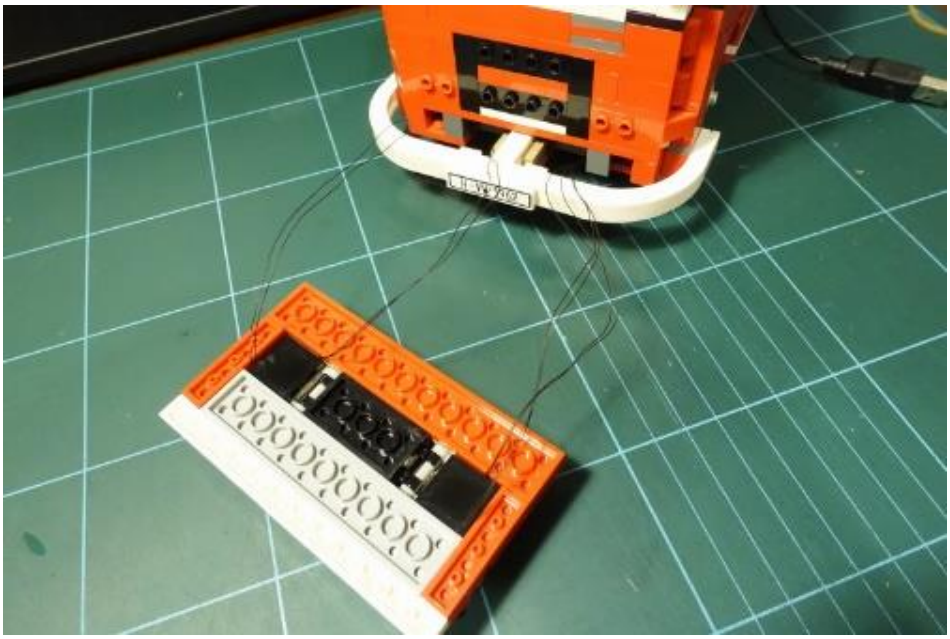


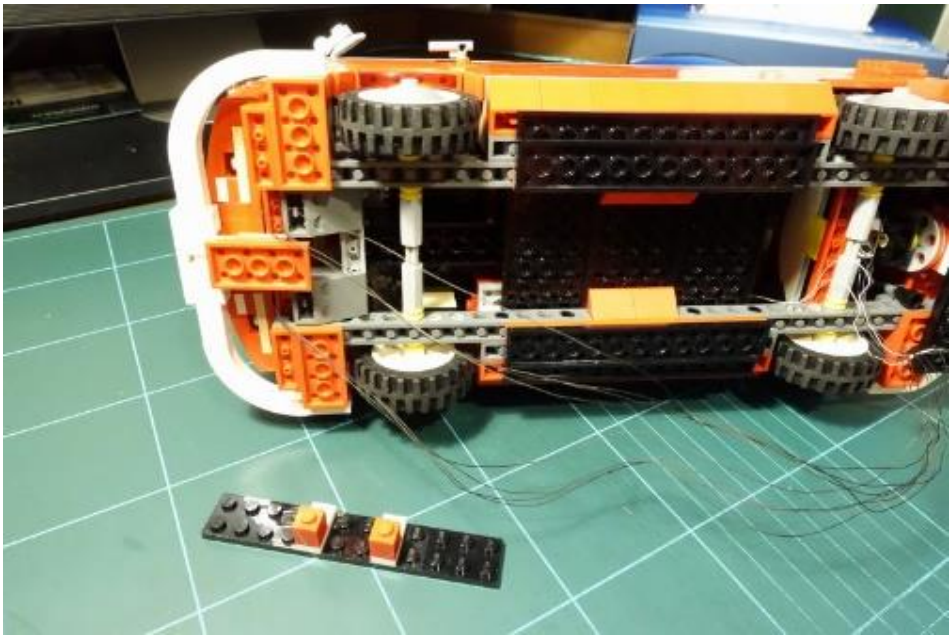
Replace the 2x2 round grey plates with light plates

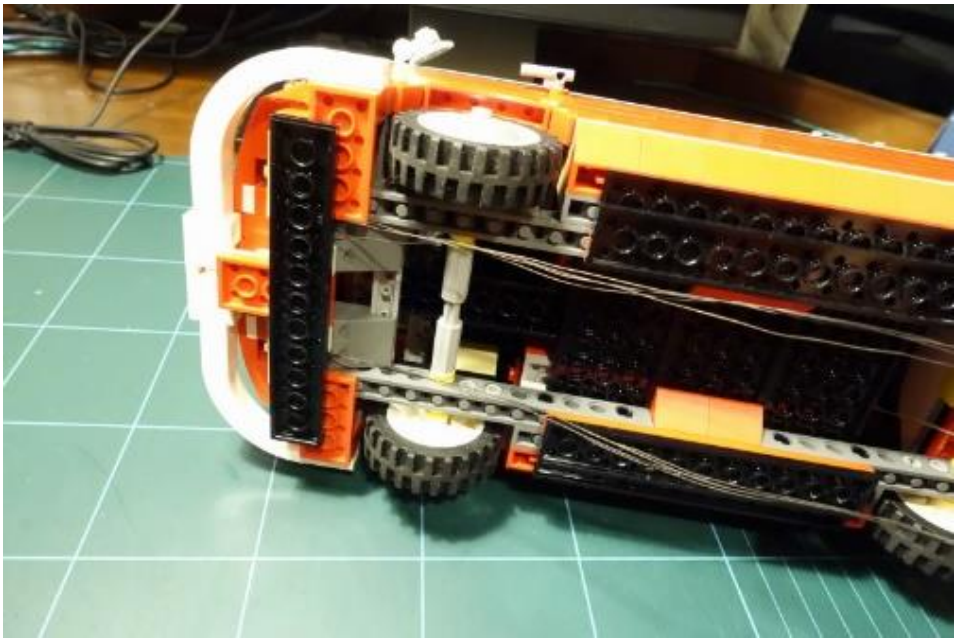




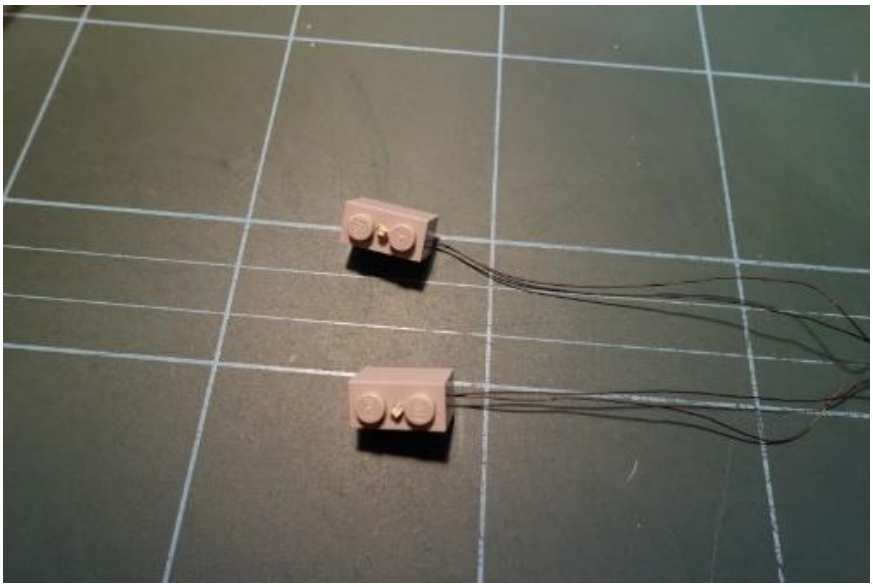
Put the face and black plate back





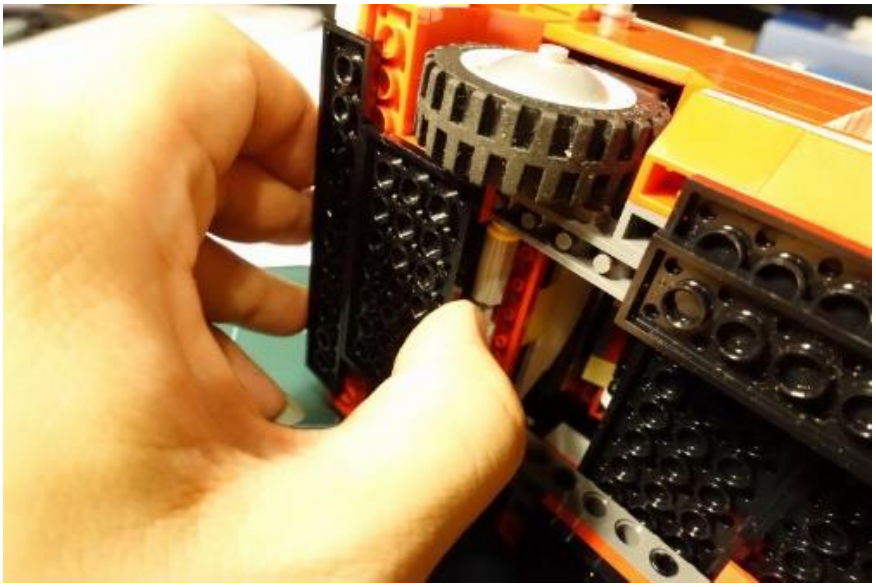


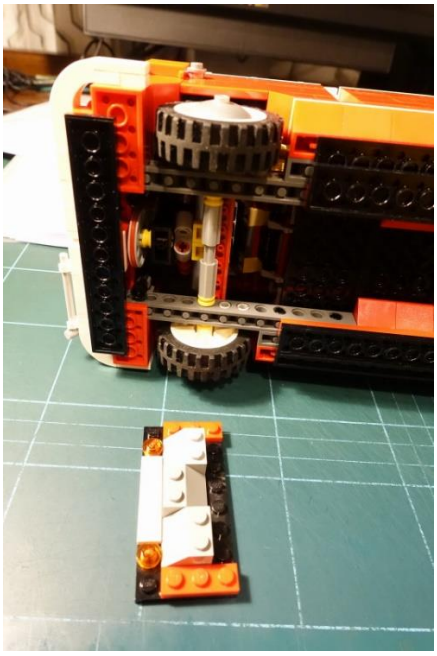
B. The rear lights



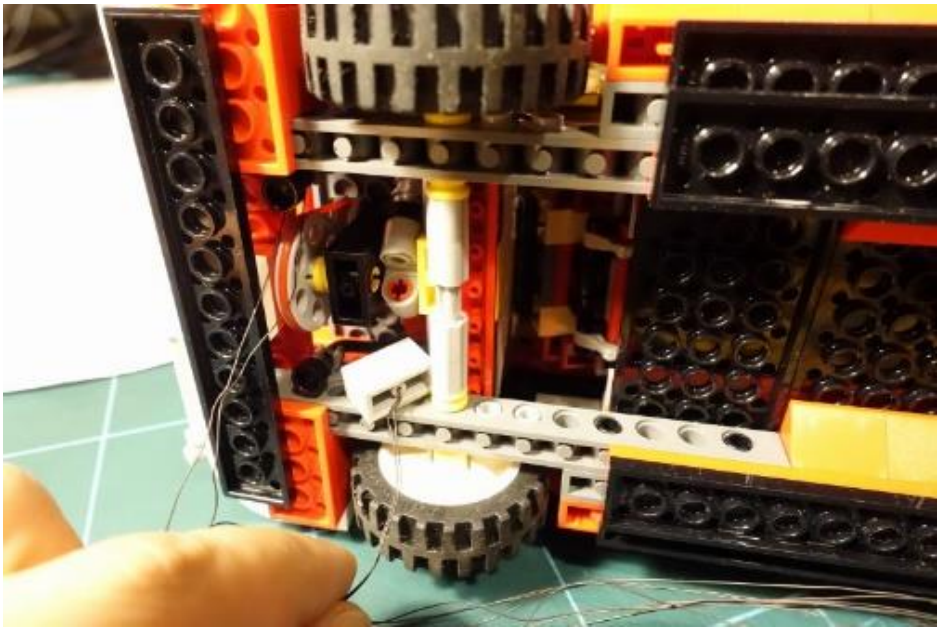
Remove the original rear lights first

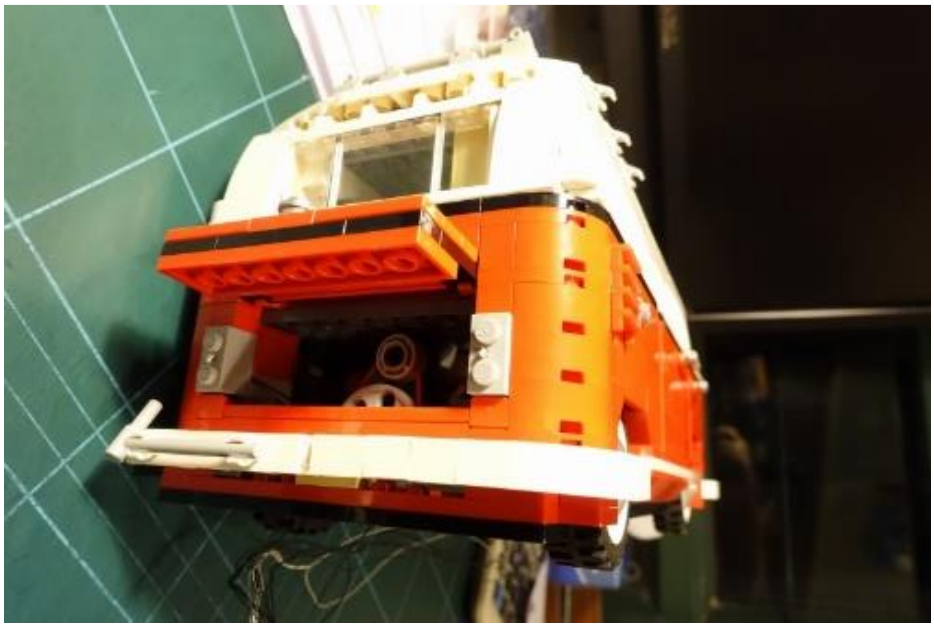
Remove the black plates at the bottom



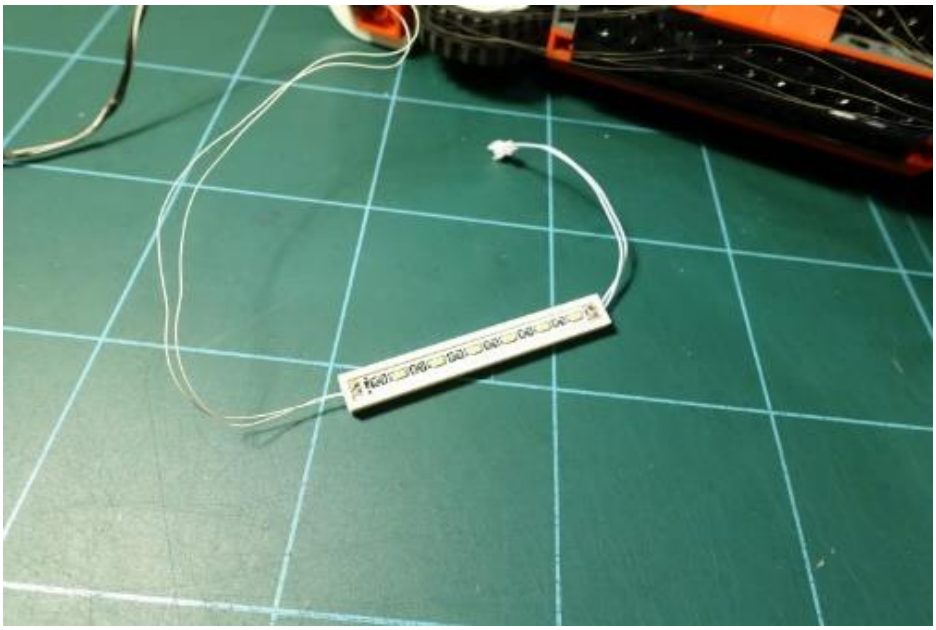


Pass the grey bricks with light through the engine

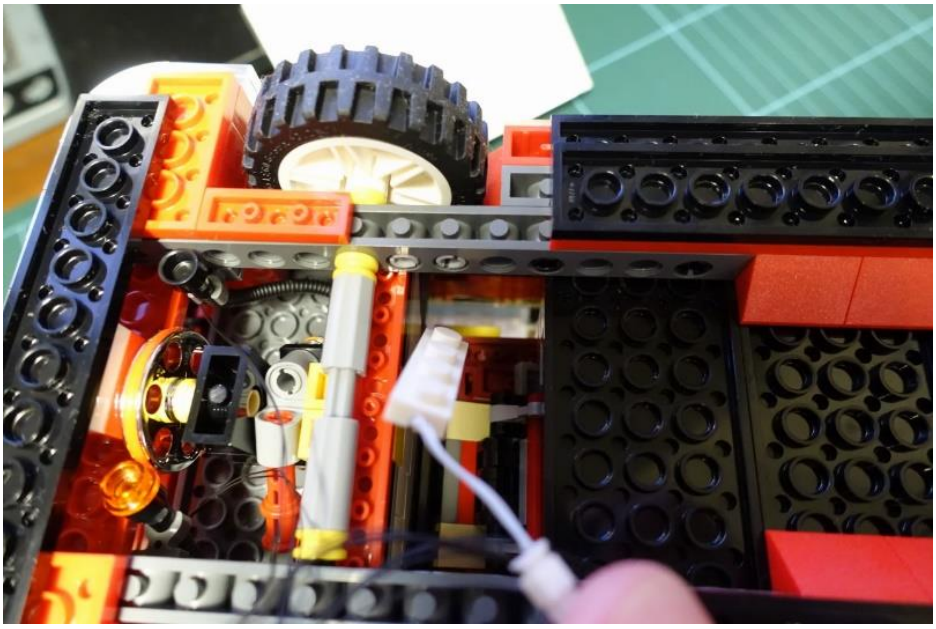


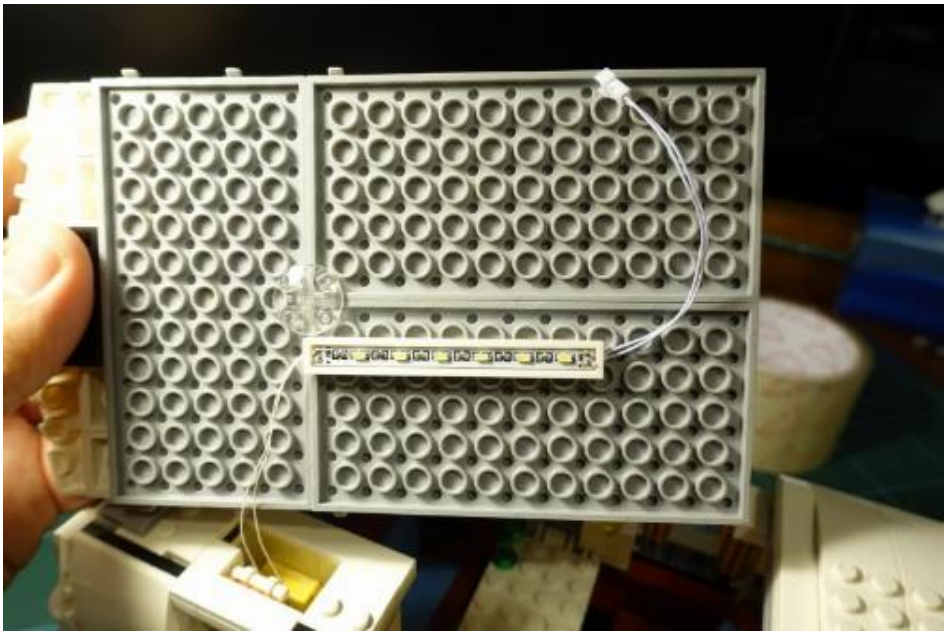


C. The room lights

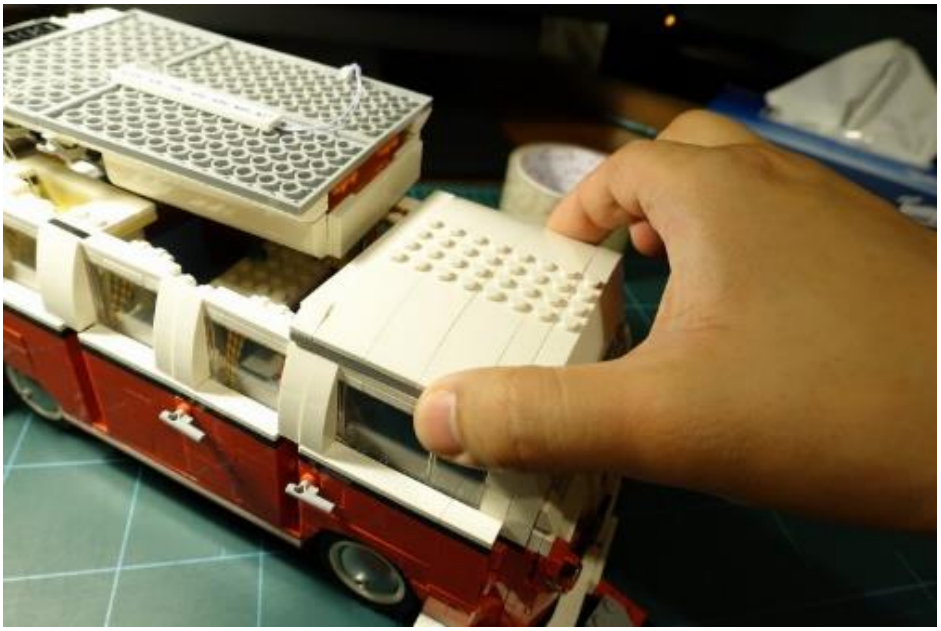


Remove the roof, pass the white light plate through the “Make Lego Models” room

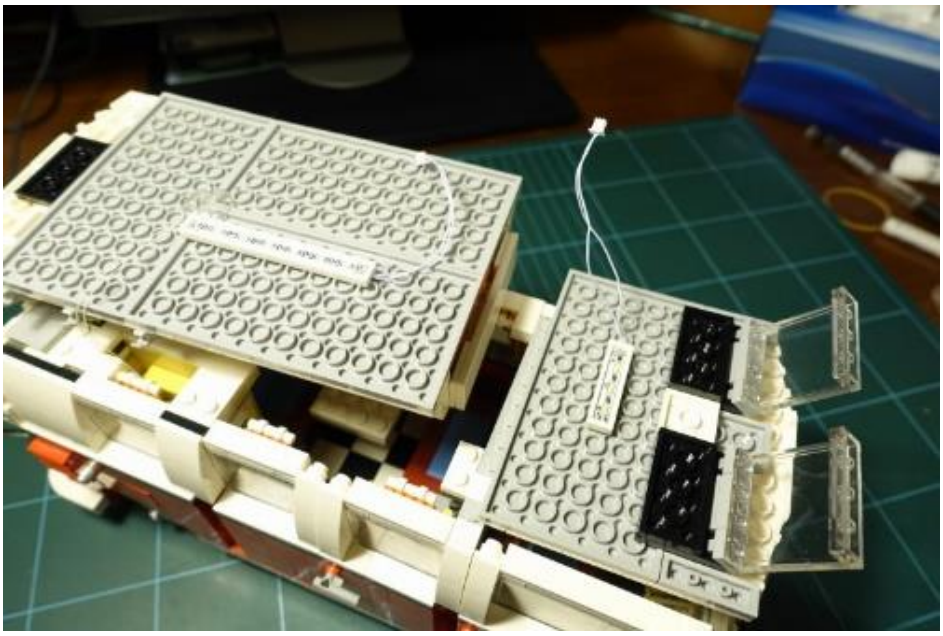




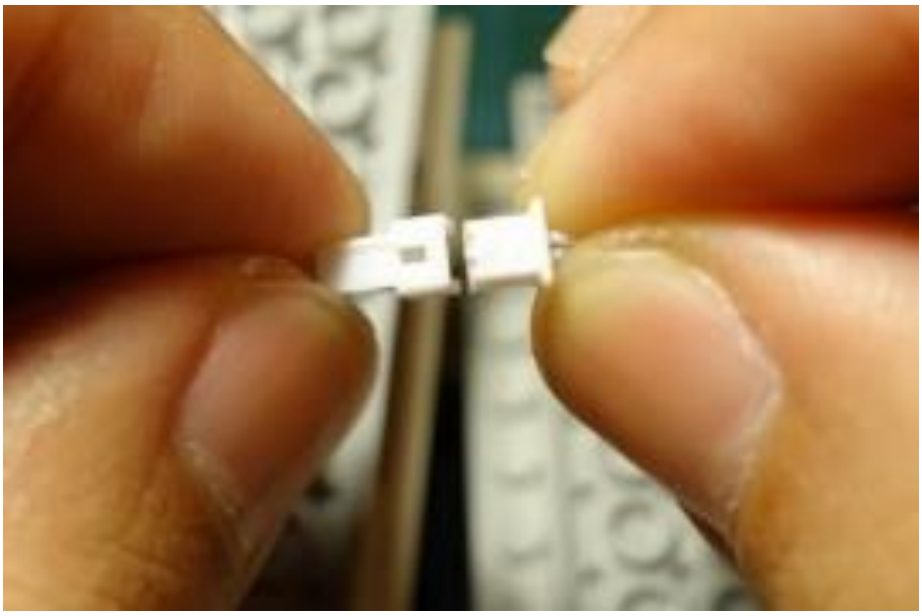
Remove the driving room roof



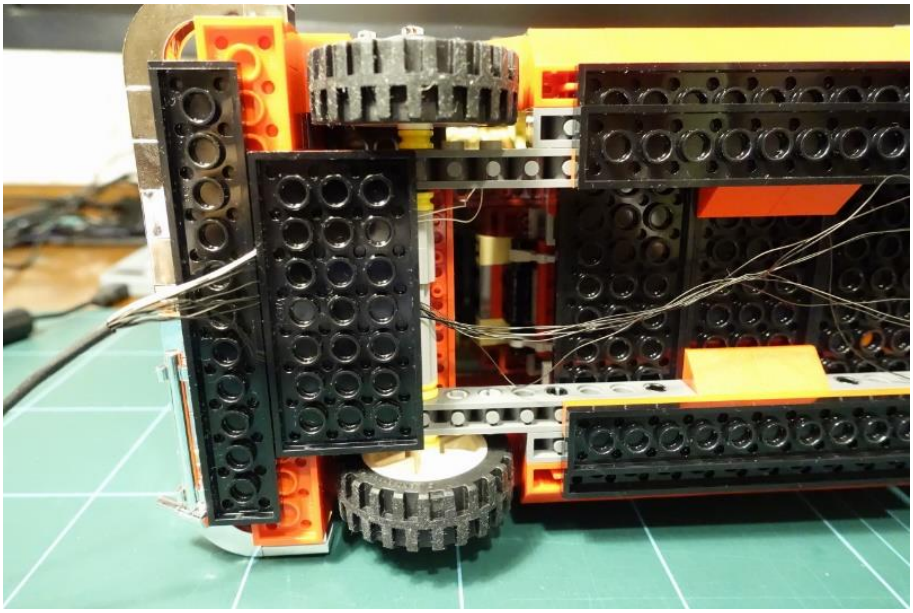
Put the 1x4 white light plates on the driving roof



Plug in the small connector



Put back the roofs and the black plate



Plug in the USB and done!
