

Lego 75255

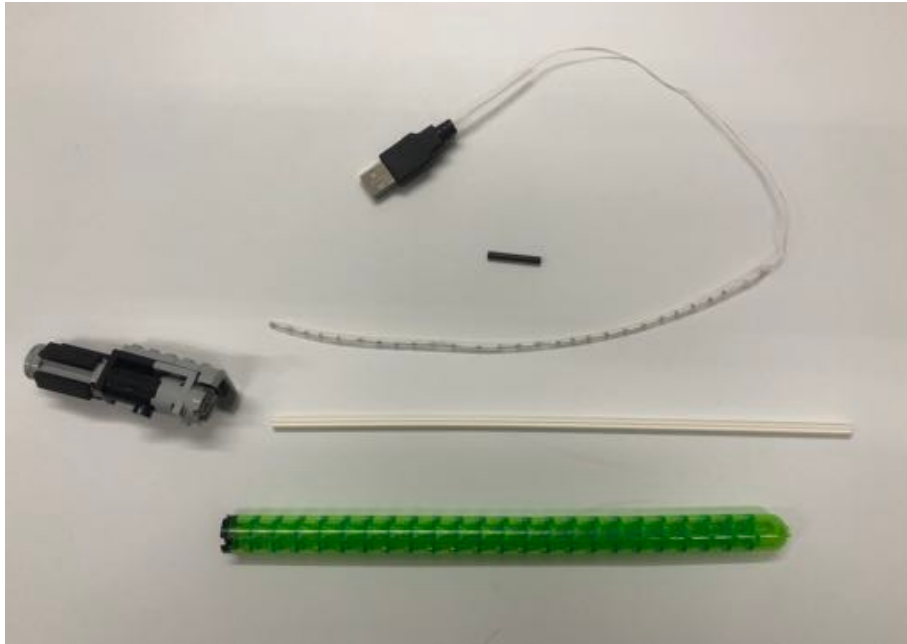

UCS YODA

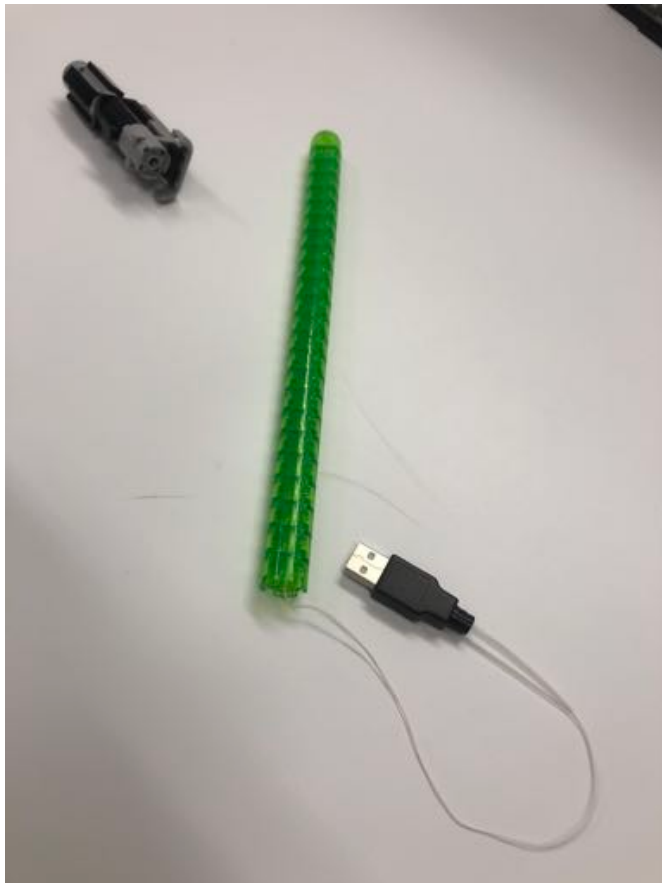

Installation Guide

First of all, we break down the lightsaber by taking out the white axle

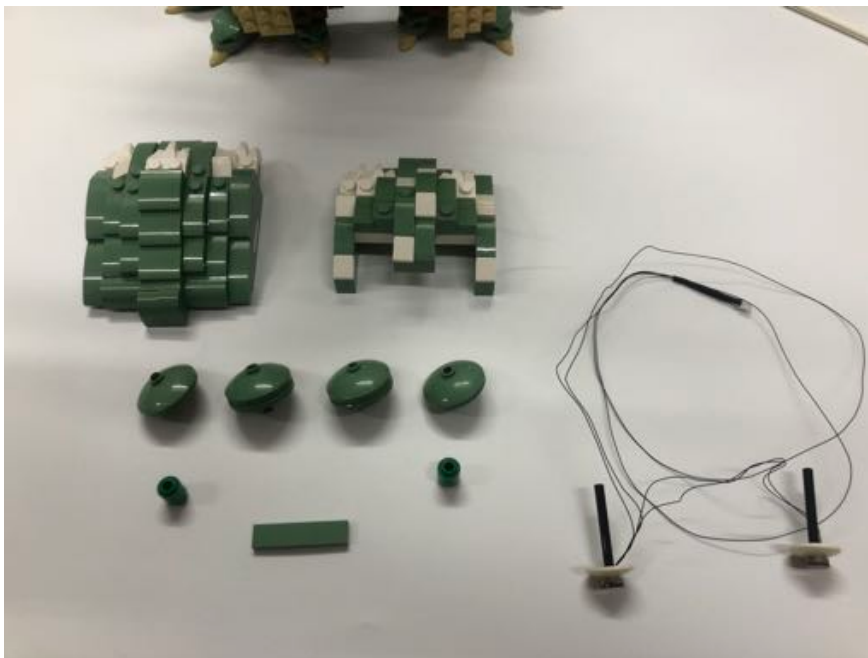

Insert the lighting part into the green round bricks

To connect the saber and the hilt, needa use the bar as shown

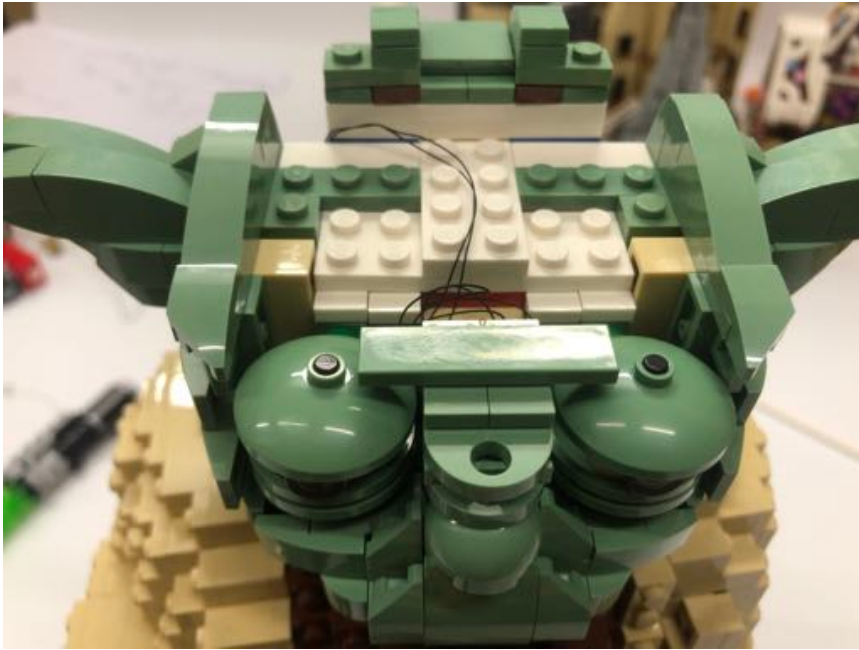

For the eye lighting parts, start by seperating the parts as shown

Assemble the eyes with light

Assemble the eyes with lights back to the head, adjust the cables then put the cover back

To make the cable looks nicer, you can open the back cover as shown to hide them under

At last, put the lightsaber back to the hand and replace the small lightsaber
