F•R•I•E•N•D•S

## *Installation Guide*

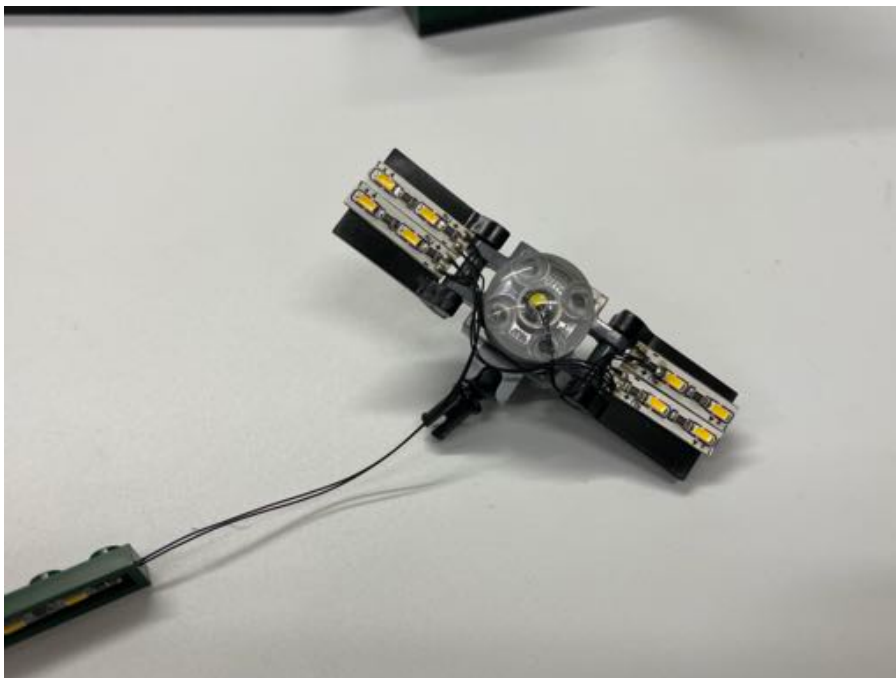

First take off the right spot light, remove the clear 2x2 round plate and replaced by the lighting part, and peel off the white tapes to stick on the spot light

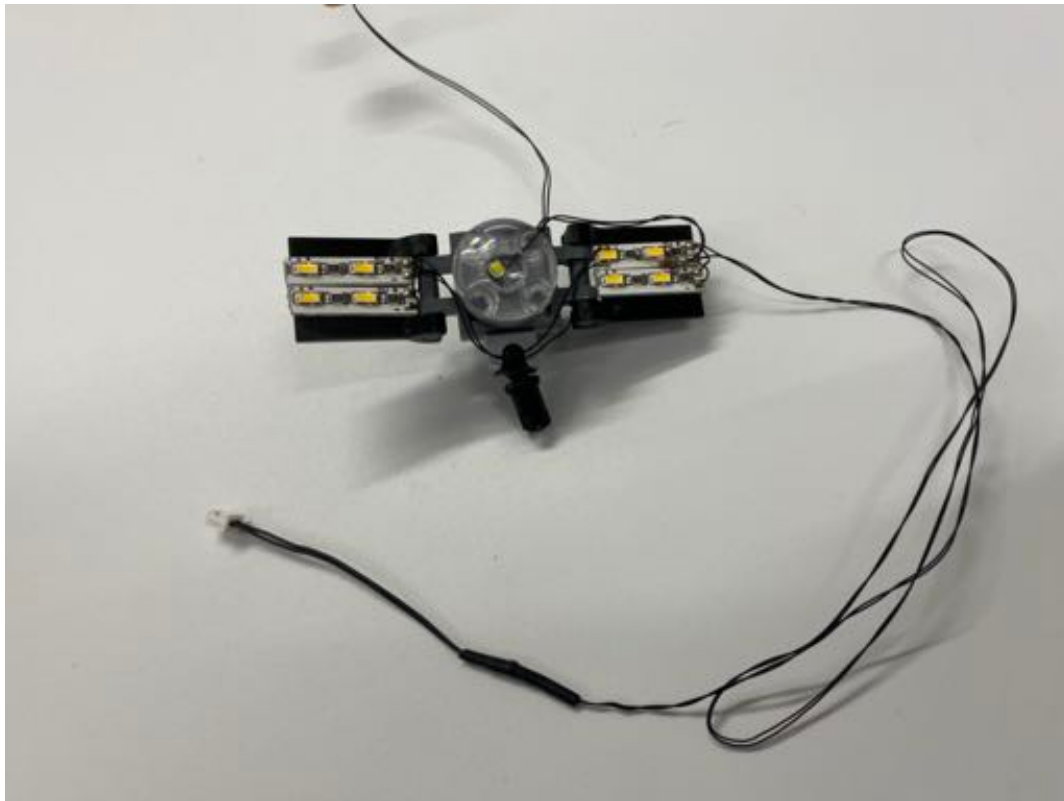

This is how it looks like after installation, and mind the direction of the wires  
Otherwise it may not long enough

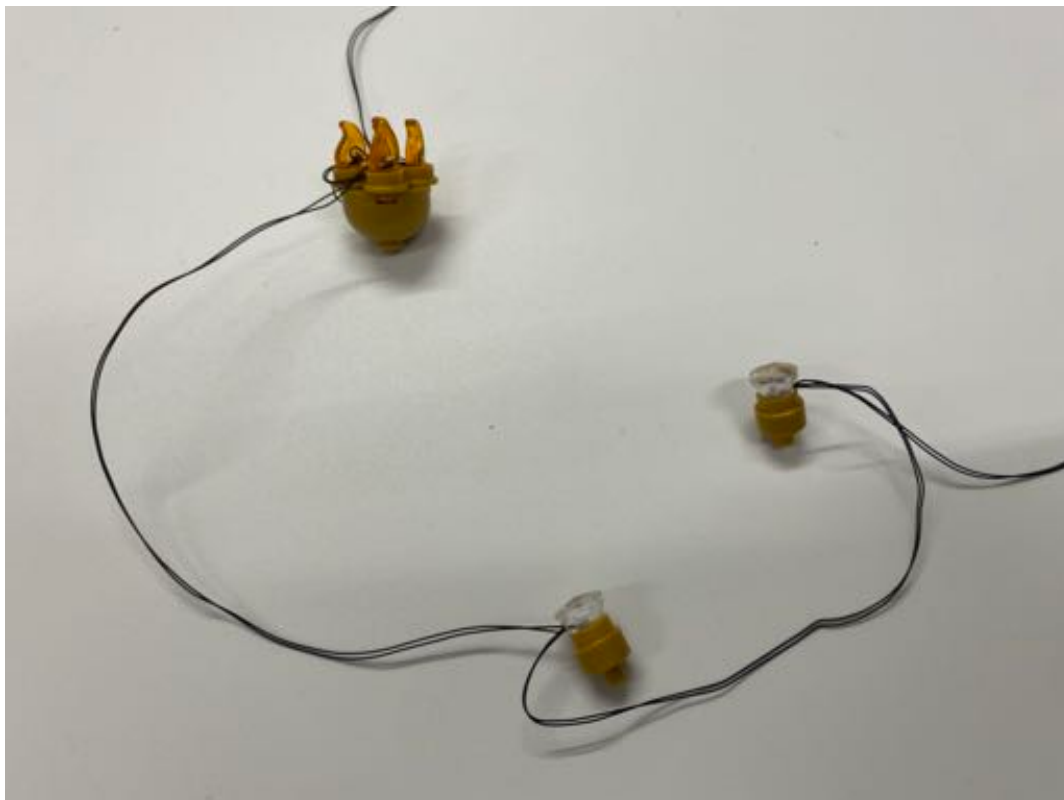

Put the spot light back to the position then install the green lighting plates as shown

For the other lighting part, do the same thing for the spot light as the previous steps  
Also mind the direction

Remove the gold plates and assemble with the lighting parts

Restore the spot light, two wall lights and the candles stand

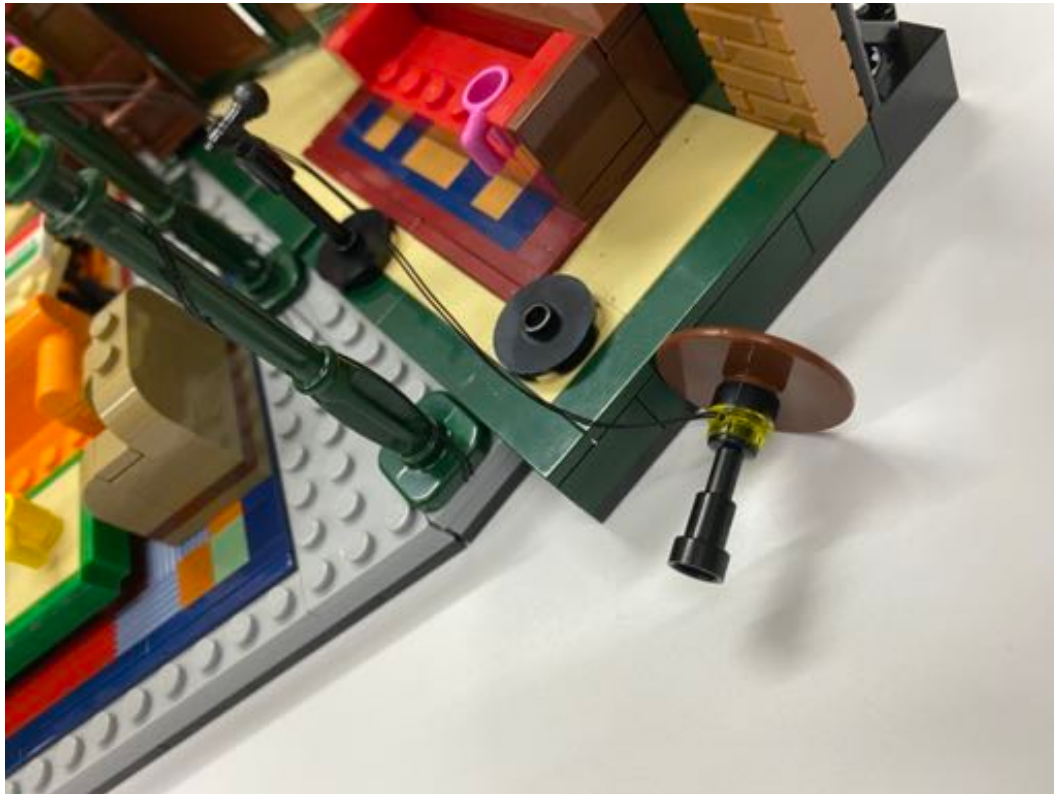

Now for the lighting green round bricks, install on the first pole, pull the wire to the ground then to the middle pole

Then repeat the steps to the 3<sup>rd</sup> pole and will look like this

For the remain lighting yellow round plate, install it at the table besides the pole

Connect the plugs to the USB cable and that's it
