Lego 75978

Harry Potter

Diagon Alley

Installation Guide

GLOW BRICKS

First we take this lighting sets for the house 1
Split the house like this before installing the lights

Replace the following lighting parts to the lamps and candle

Remove the windows and install the lamps back to the position

Install the candle, leave the black lighting plate and install it later

Pass the remain lights to the room on left

Remove the windows at front and install the lighting fire

Restore the window, install the lighting yellow round plate to the lamp

Now take the 1x4 black plate and put the wire in between the studs

Then restore the plate
Now you can restore the building

Then stable the plates on the ceiling

Now it's turn for the upper floor, take the roof off as shown and pull the remain lights to the top

Pull the lighting round plate through the top and install as shown

Then install the lighting plate and restore the grey top after
Pass the lights to the other side by the gap

Install the lighting plates as shown

Now restore the roof, the wires between the lighting plates can be covered as shown

At last, install the ceiling light, the window lights and candle

And other window light and the lamp then this house is finished

Take this lighting parts for house 2

Split the house before install lights
Detach the door and install the 1x4 brown first (watch out the direction

Restore the door, pull the red lighting plates to the front

Install the lighting plate as shown

Then install lights in the middle

Then restore the top

Pass the following lights to the other side, take off the brick to hold the wire

Before restoring the house, leave the plates shown out and pull them upstairs after

Now you can restore the house

Install the ceiling lights

Then pull the grey lighting plates to 2nd floor and install them on ceiling

For the remain black lighting plates, pull them to the top and install under the black plates

For the remain lighting plate, install it as shown

Pass the yellow lighting round plate through the hole

Install it as shown

Replace the yellow round brick to the lamp, then house 2 is done
Now it's house 3's turn

Take the roof off first

Remove the bricks as shown, then install the black and brown lighting plates

Clip the wire between the studs and put the brown bricks back
Then replace the lighting round brick to the lamp
Put the roof back and install the lamp

Install the 1x4 black lighting plate under the stairs

To pass the lights through the wall, you can remove the 1x1 tan brick to make a hole, so that the stairs can be moved smoothly
Pass the lighting parts shown to upstairs

Install the ceiling light

Then replace the clear lighting part

For upstairs, remove the top first, and install the lighting cone to the lamp

Remove the bricks on wall to pass lighting round brick out

Install into the lamp and restore the wall

Install the ceiling light then remove the top

Then this side is done

Install the 1x8 lighting plate on ceiling

Then open the top to pass the 1x4 lighting plate outside

Install the plate as shown
(If you feel hard to split the house you can just pass the 1x4 out by the door, but it may disturb the door when opening and closing
It's house 4's turn

Turn around the house and remove the stairs first

Put the tan 1x8 plates, 1x3 black plate, 1x1 round brick inside the 1st floor, leave the rest lights on 2nd floor then restore the stairs

Install the tan plates and round brick

Then install the 1x3 plate, remove the pole and install the lights under the grey arch

After that restore the pole then the lights for 1st floor are fully installed

Now remove the stairs and the parts on 2nd floor

Pull the 1x10 black plate through the hold to the 3rd floor

Install the tan plates, round brick to the lamp as shown

Pass the yellow round brick outside to replace the lamp

Remove the orange bricks, clip the wire in between the orange bricks and purple bricks, then install the lamp and restore it afterwards

Now restore the stairs and install the 1x10 black plate as ceiling light on 3rd floor

Now house 4 is finished

Now's time to light up 4 houses
