Lego 42123

## *McLaren Senna GTR*
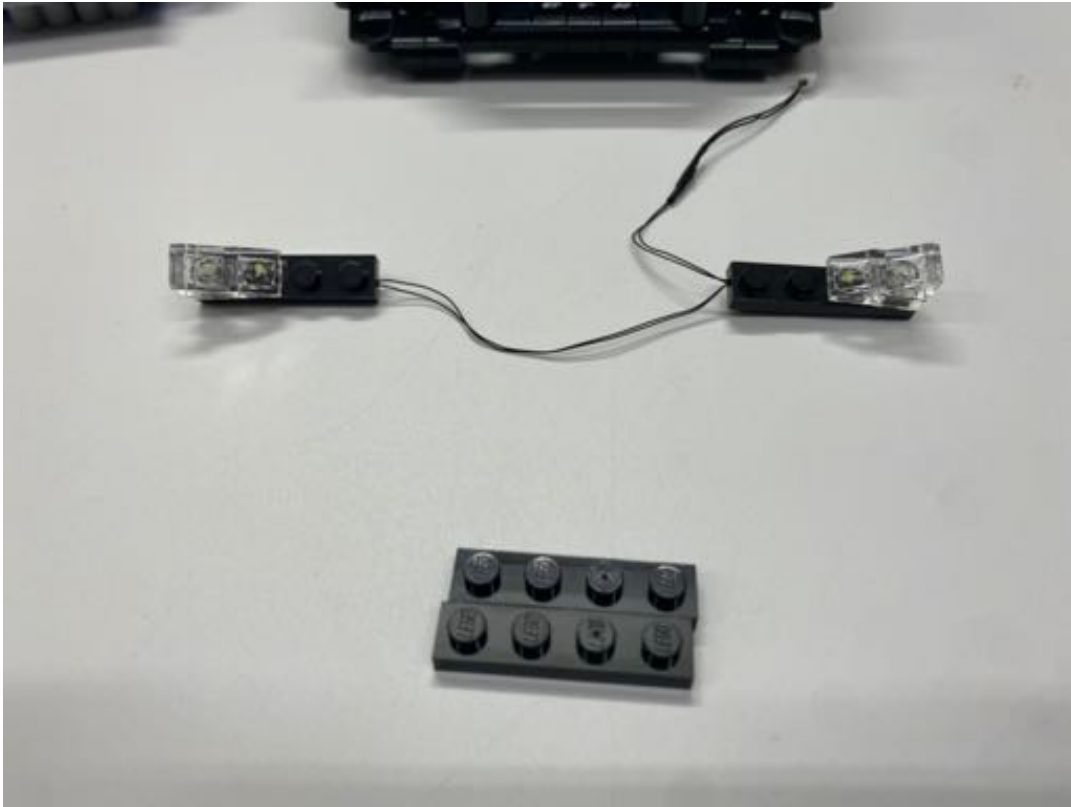

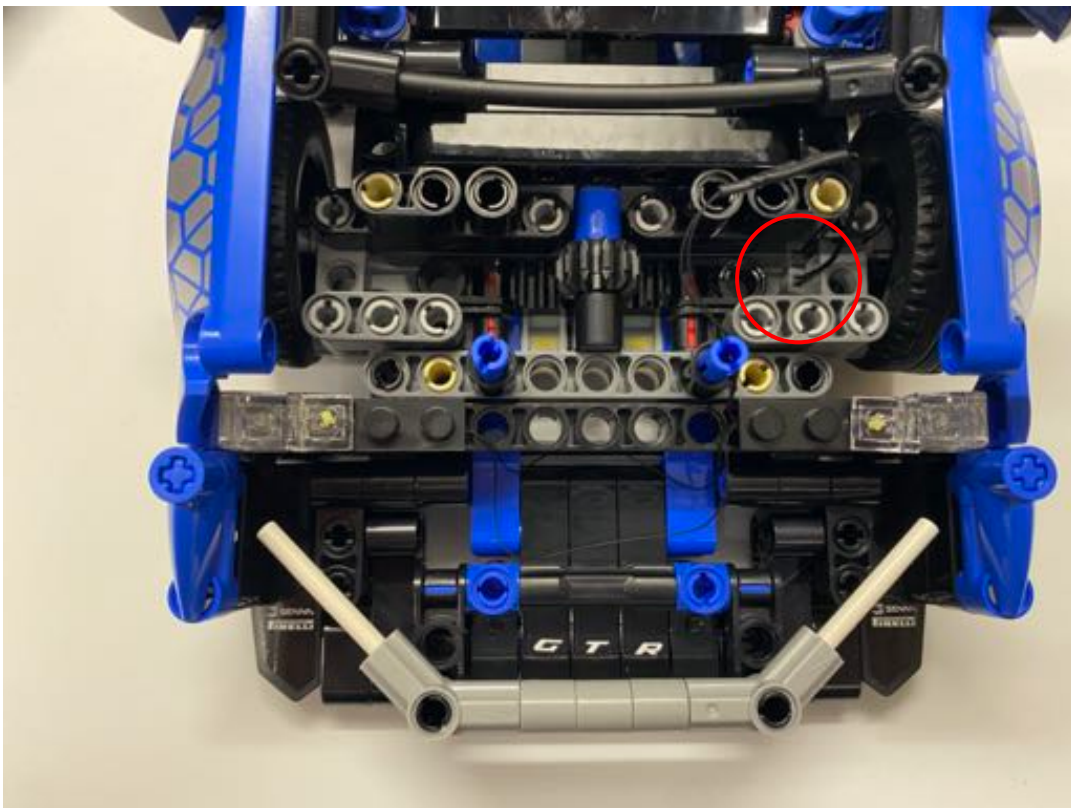

Installation Guide
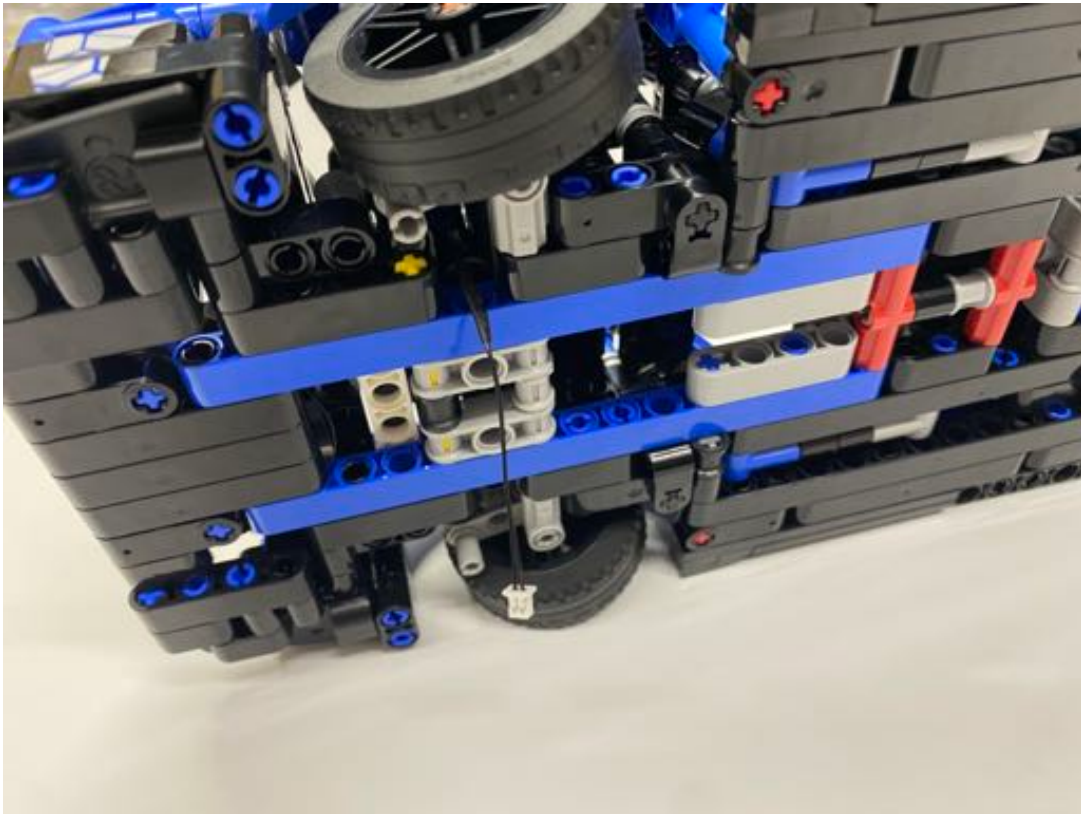

Start from the front lights, remove plates shown

Remove the clear parts from the 1x4 plates to put them on the lights

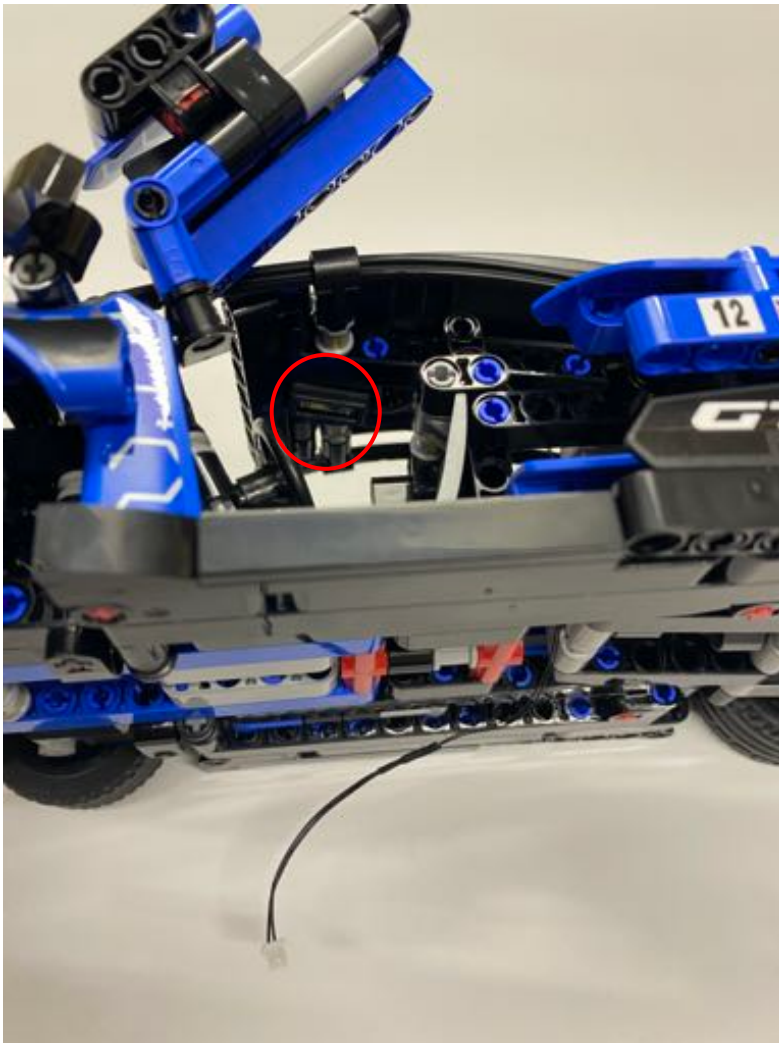

Put them back to the position, then put the connector through to bottom
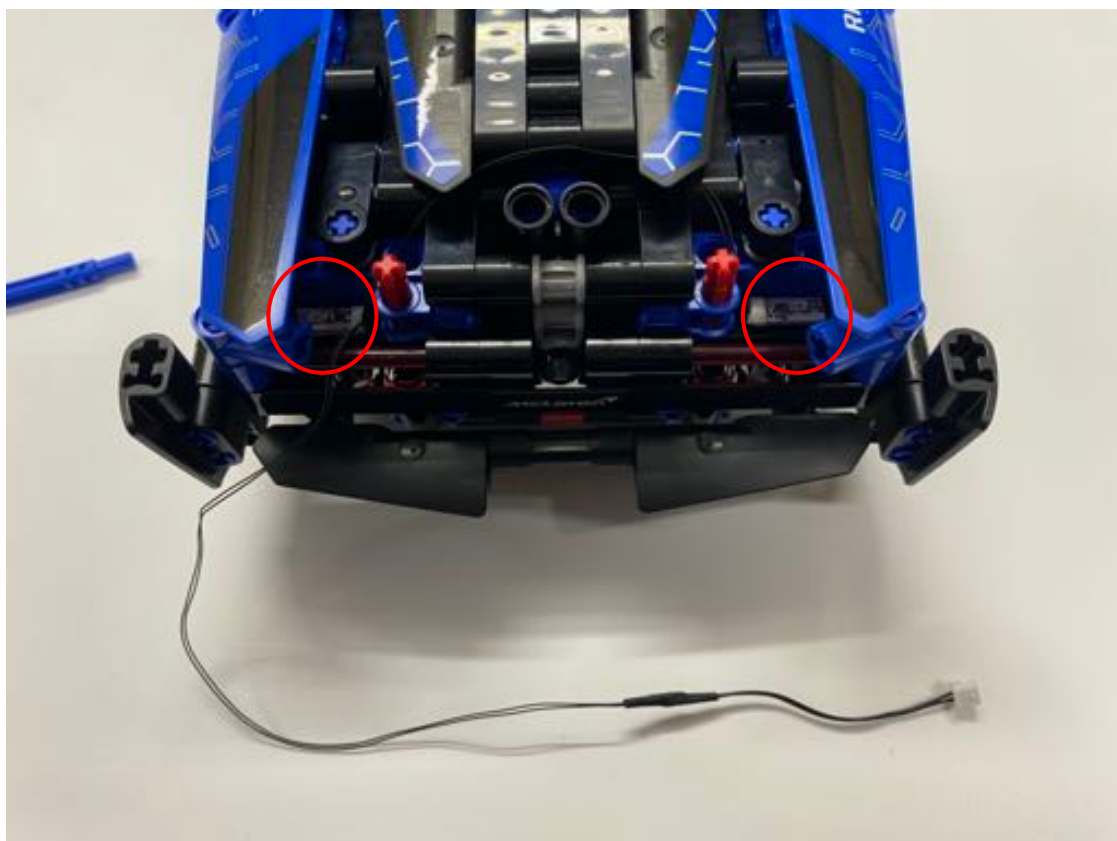

Leave the connector to the bottom

Install the lighting 1x2 tile to the circle shown, then pull the connector throught to the bottom

Now for the rear light, remove the spoiler and the blue bar

Stick the lights to the circle location

Pull the connector to the bottom from the rear tires position
Then connect 3 connectors to the USB cable

To power by battery, pull the connectors back to the passenger seat, connect with the battery case and place the case on the seat
