

# Lego 76188

## Classic TV Series Batmobile

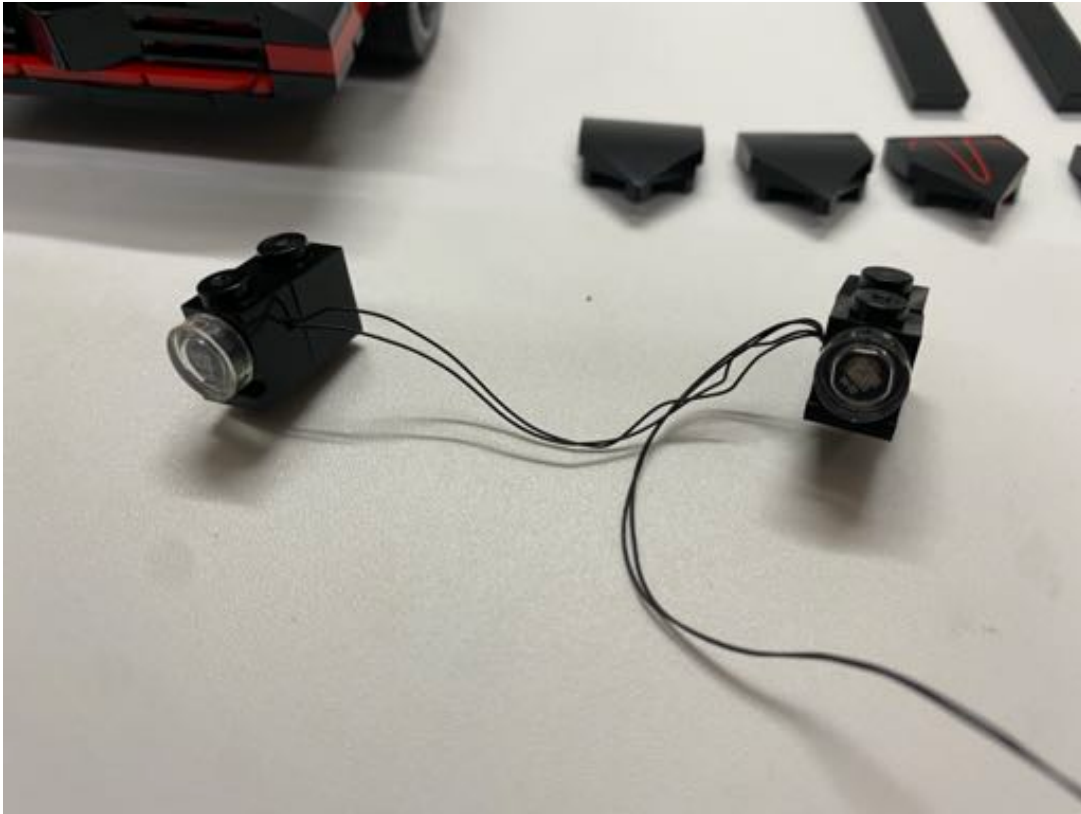

### *Installation Guide*

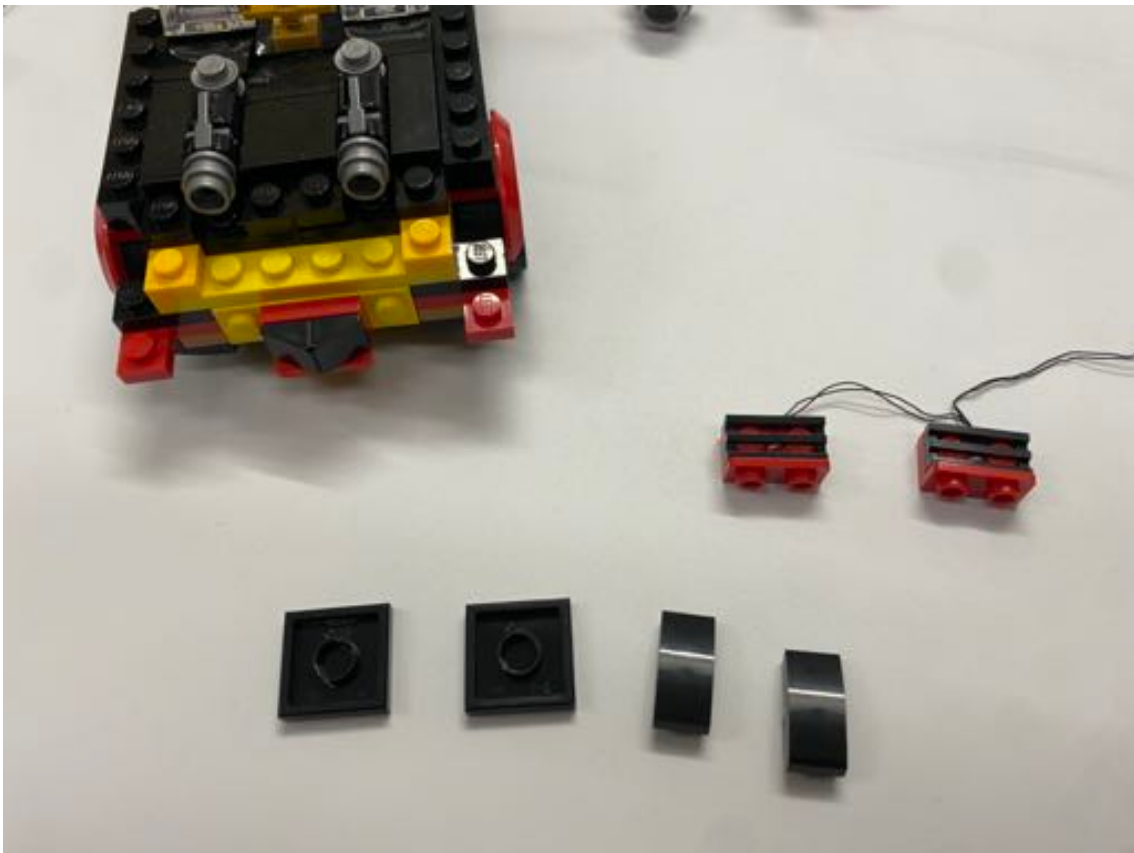

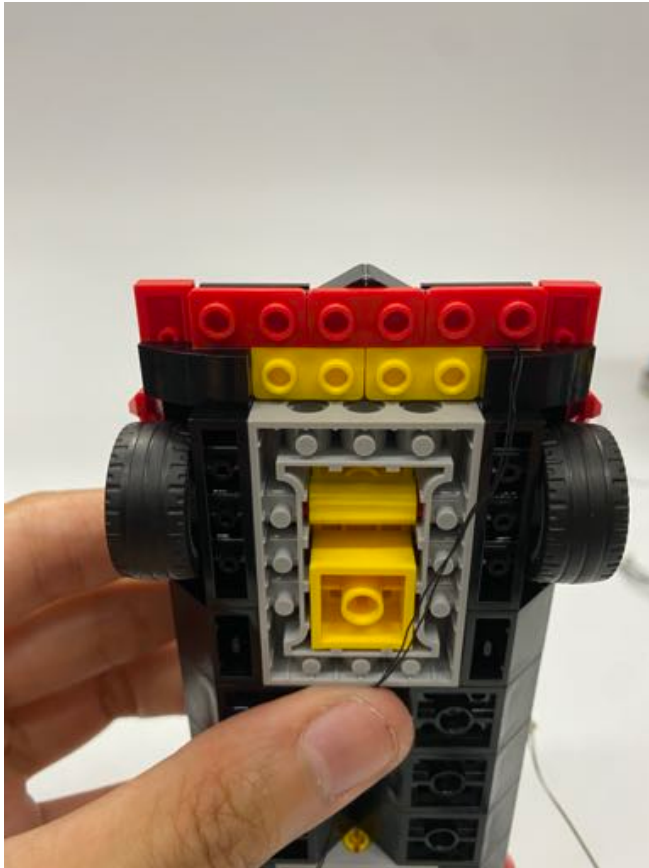

Combine the lighting parts with the clear and tiles and black brick

Don't install the light first, detach the following parts from the car bottom

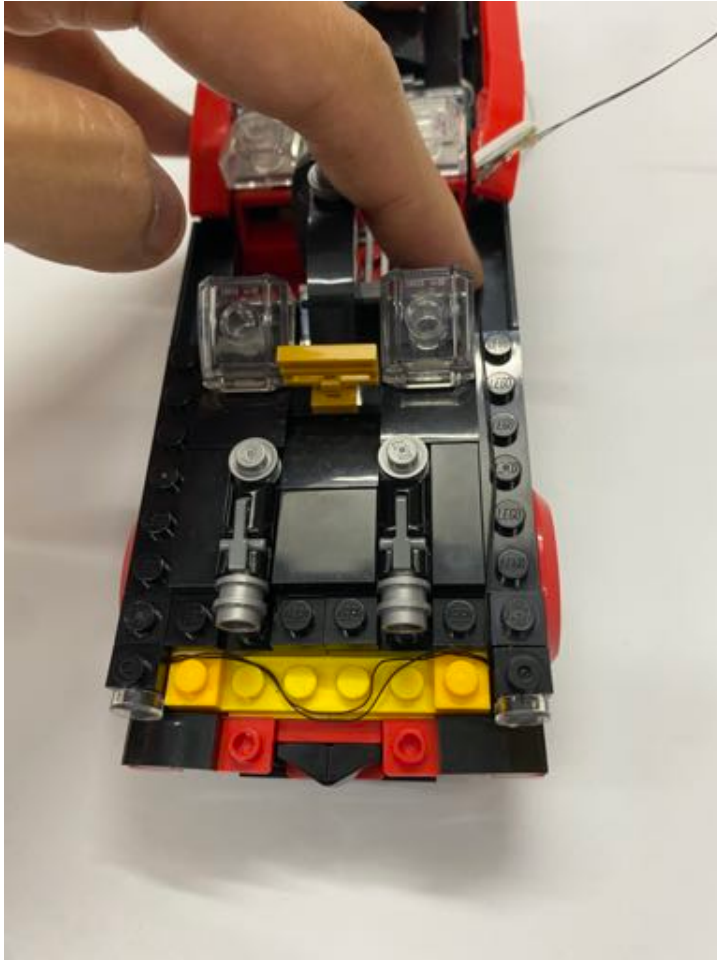

Install the lighting part

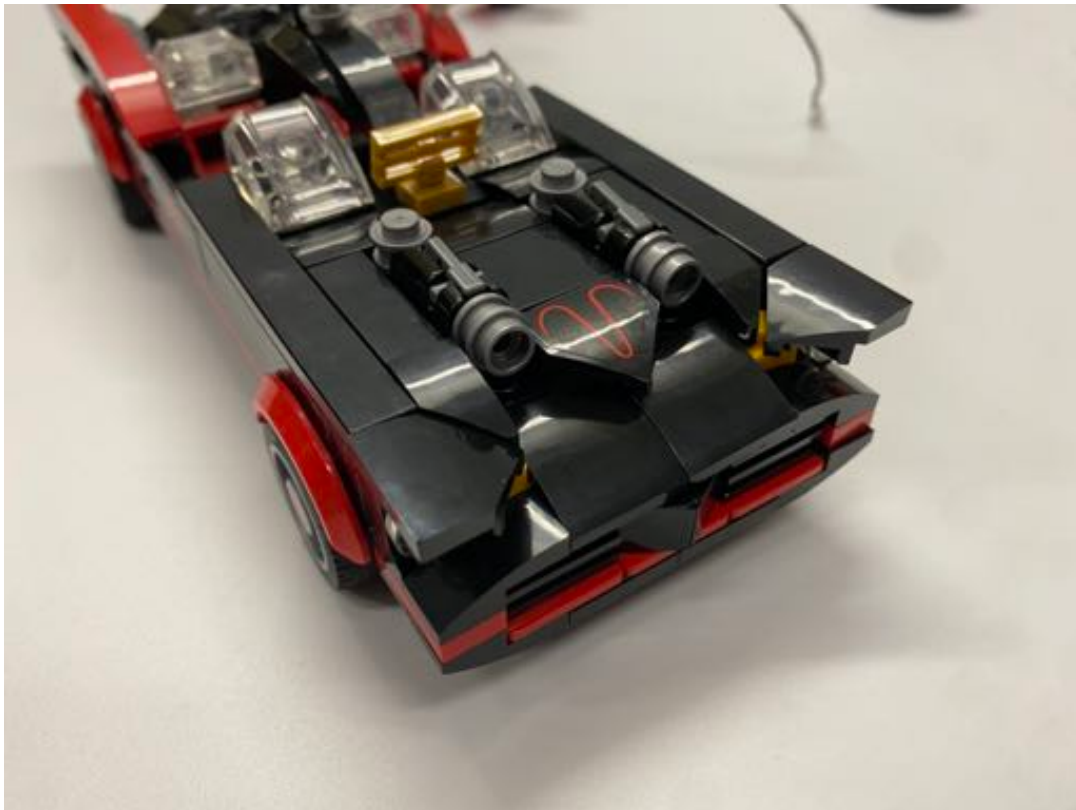

Then put the black tiles back

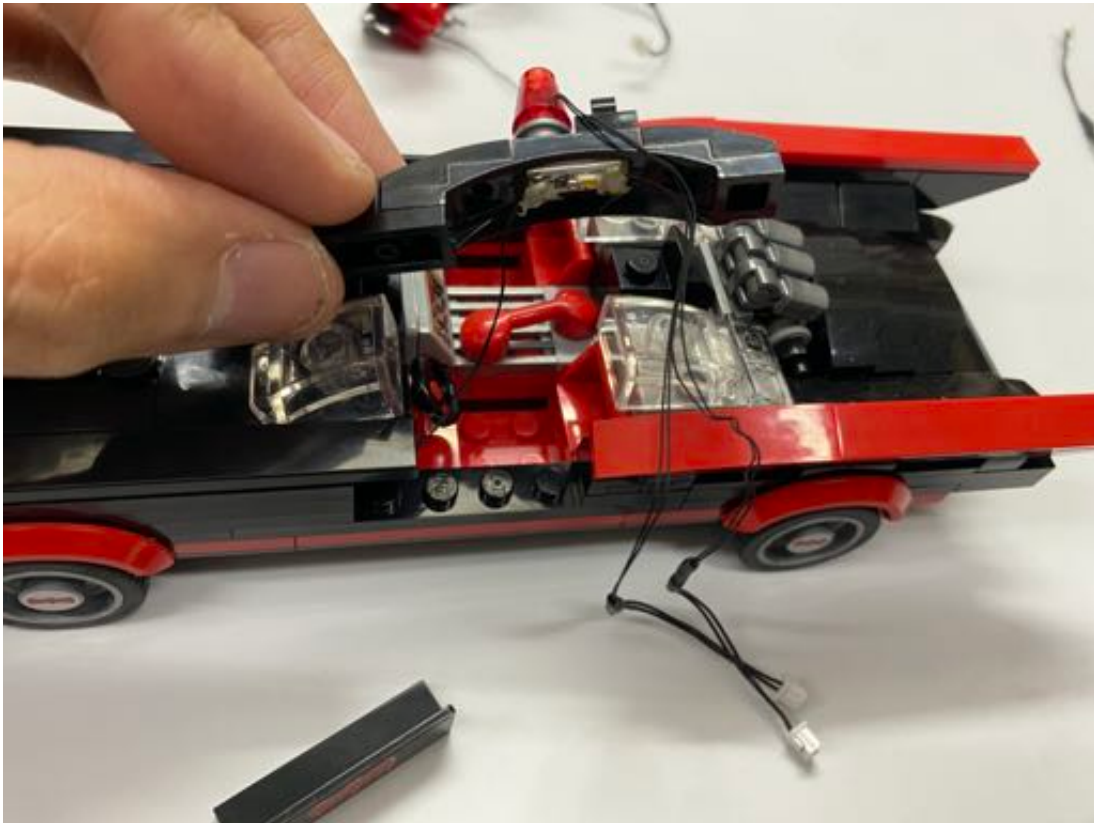

Back to the top you can install the front lights now, and pull the remain light to the seat

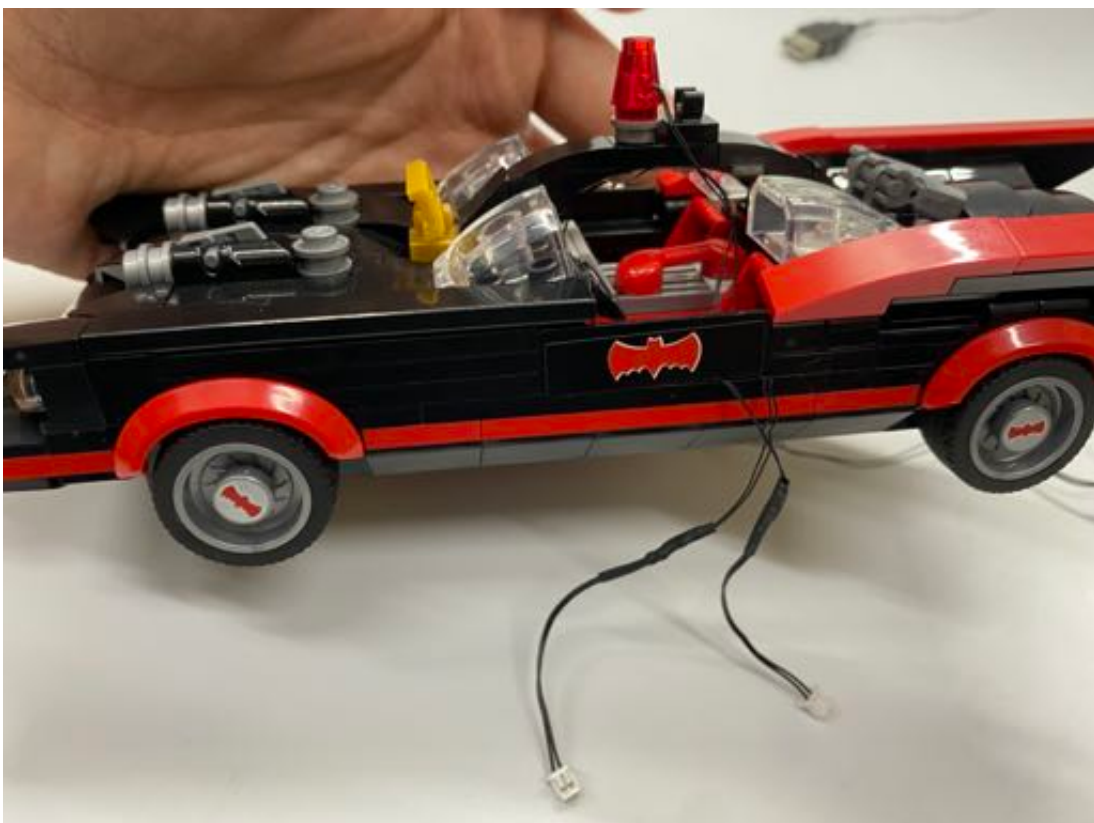

Then restore all the parts removed from previous step

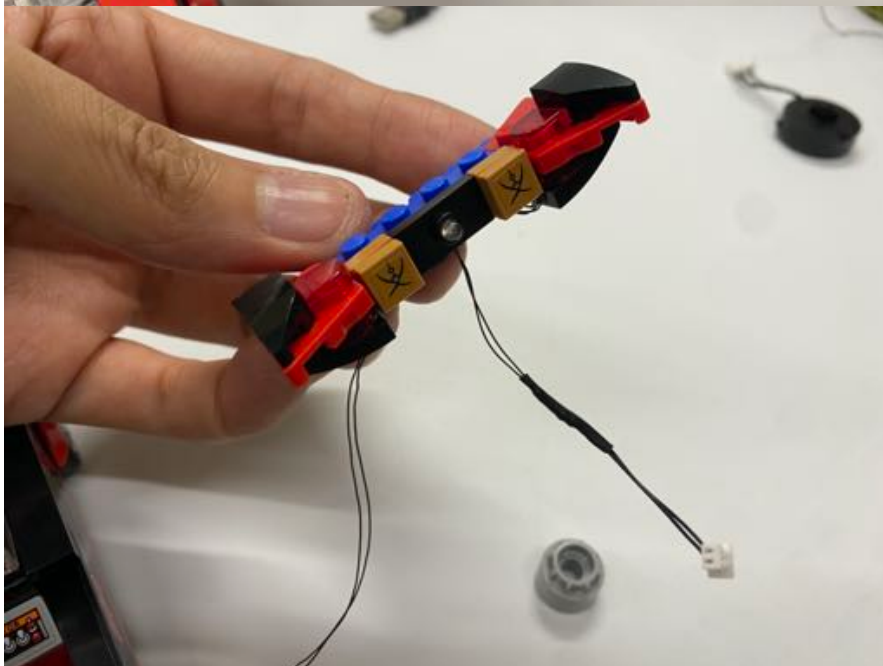

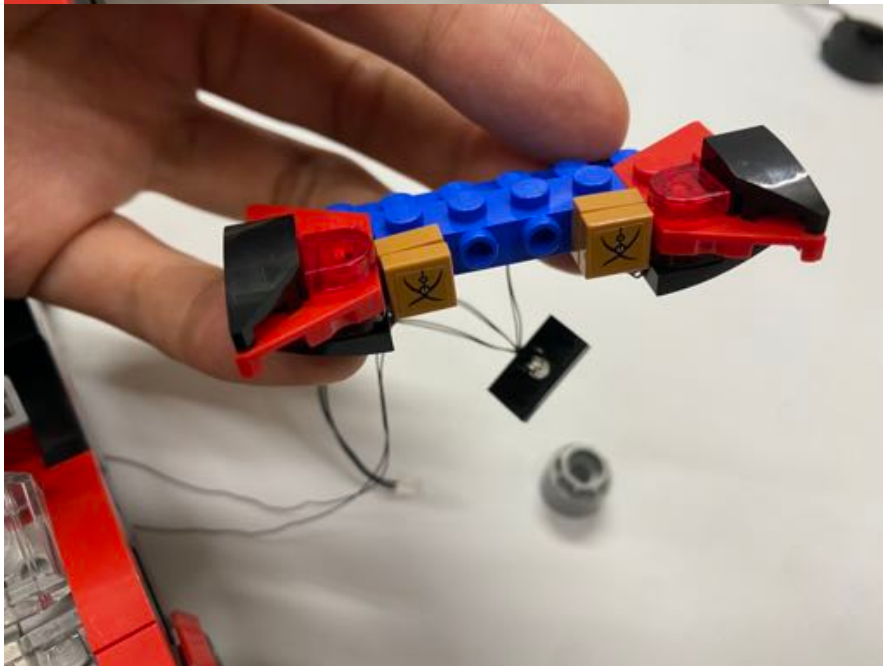

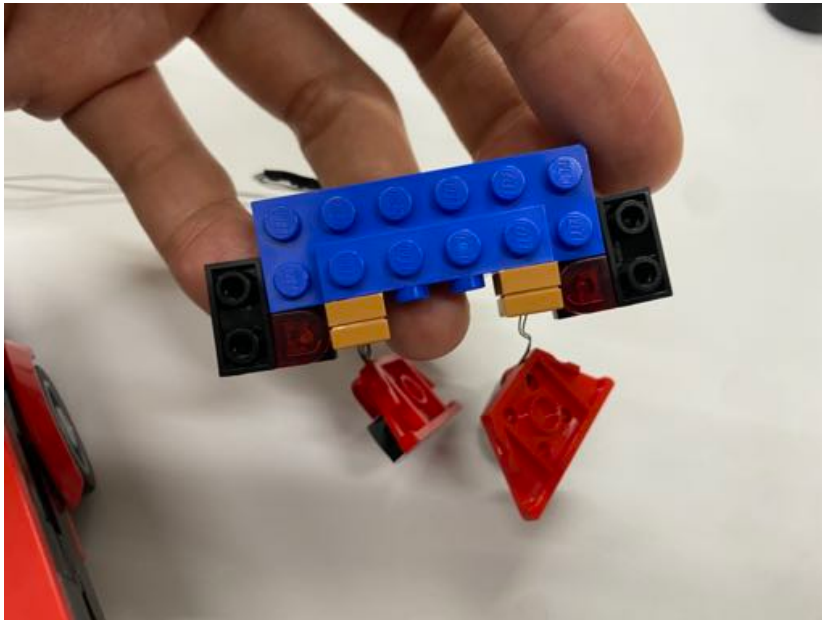

Install the light and the lighting red cone as shown

Then restore all the parts and pull the connectors out of the car

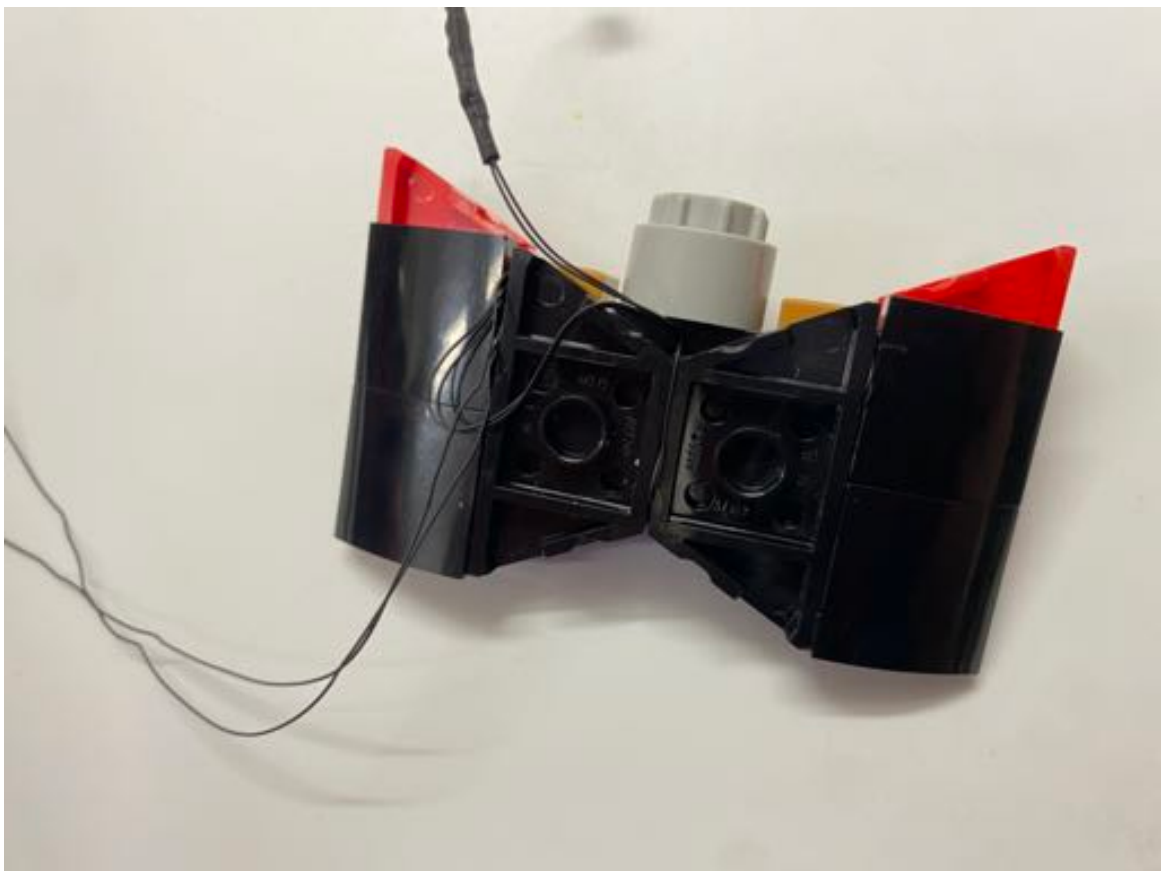

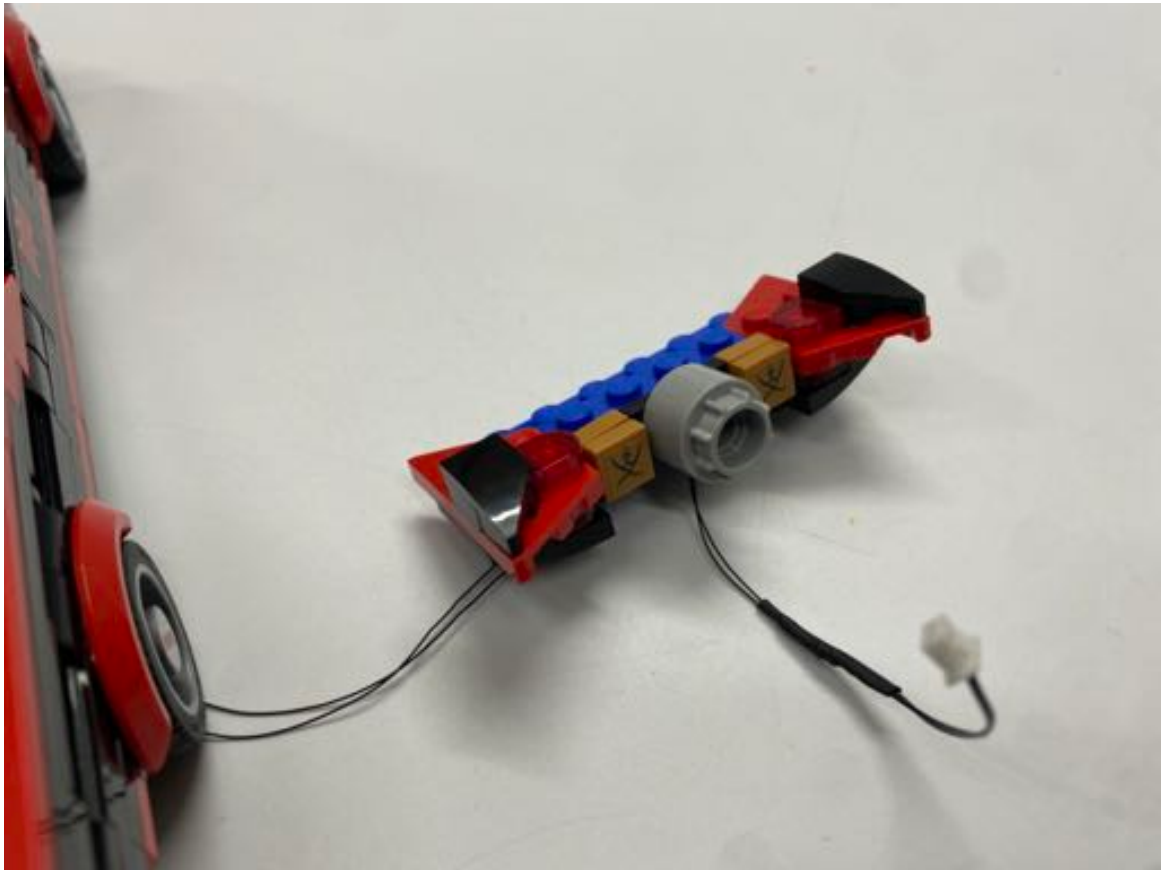

After that turn around and restore the black parts removed  
Be ware of the wires

Put the part back to the car then pull the connector to the bottom

To power up you can choose either USB or battery
