

Lego 75968

Harry Potter **4 Privet Drive**

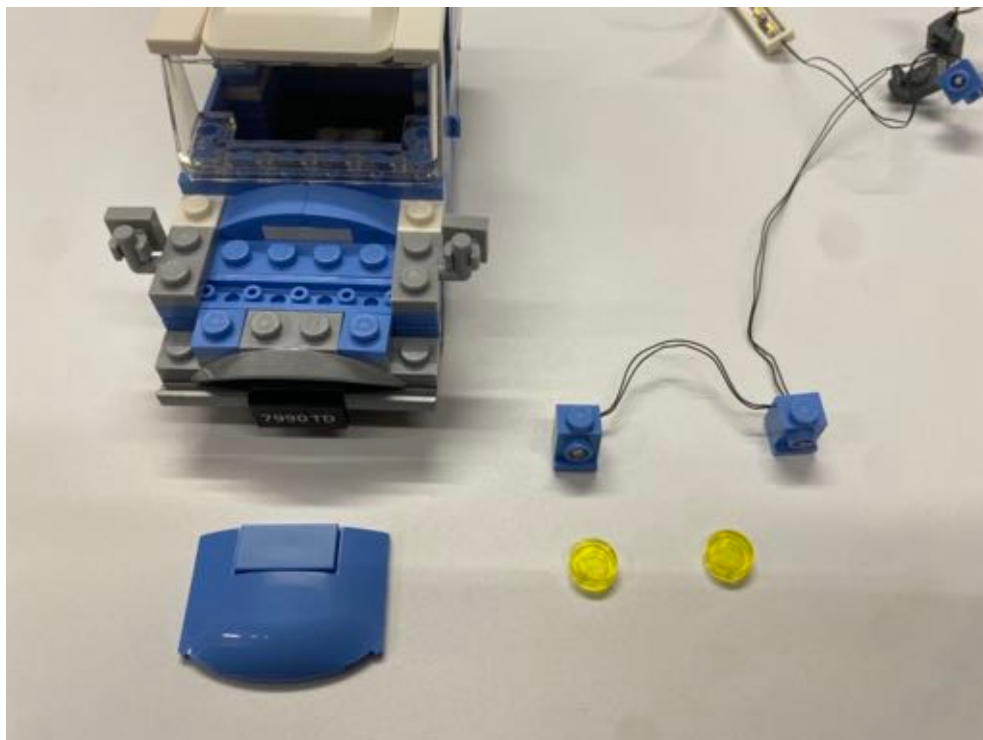

Installation Guide

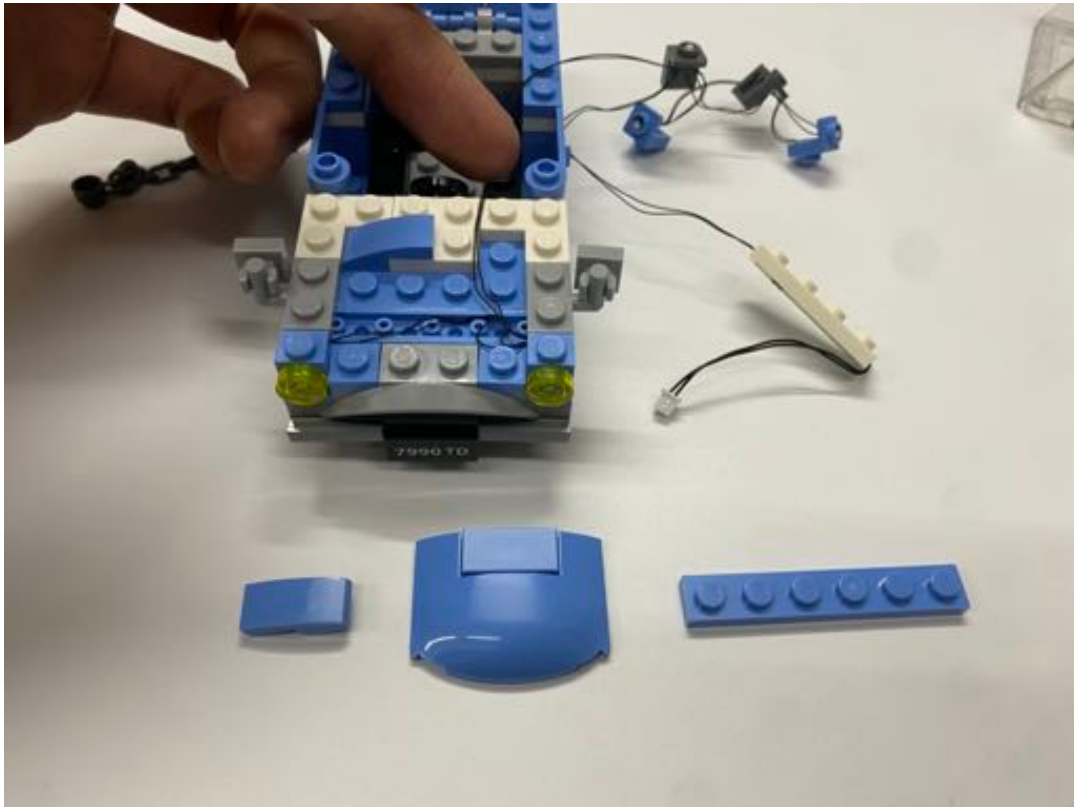

Start by installing car lights

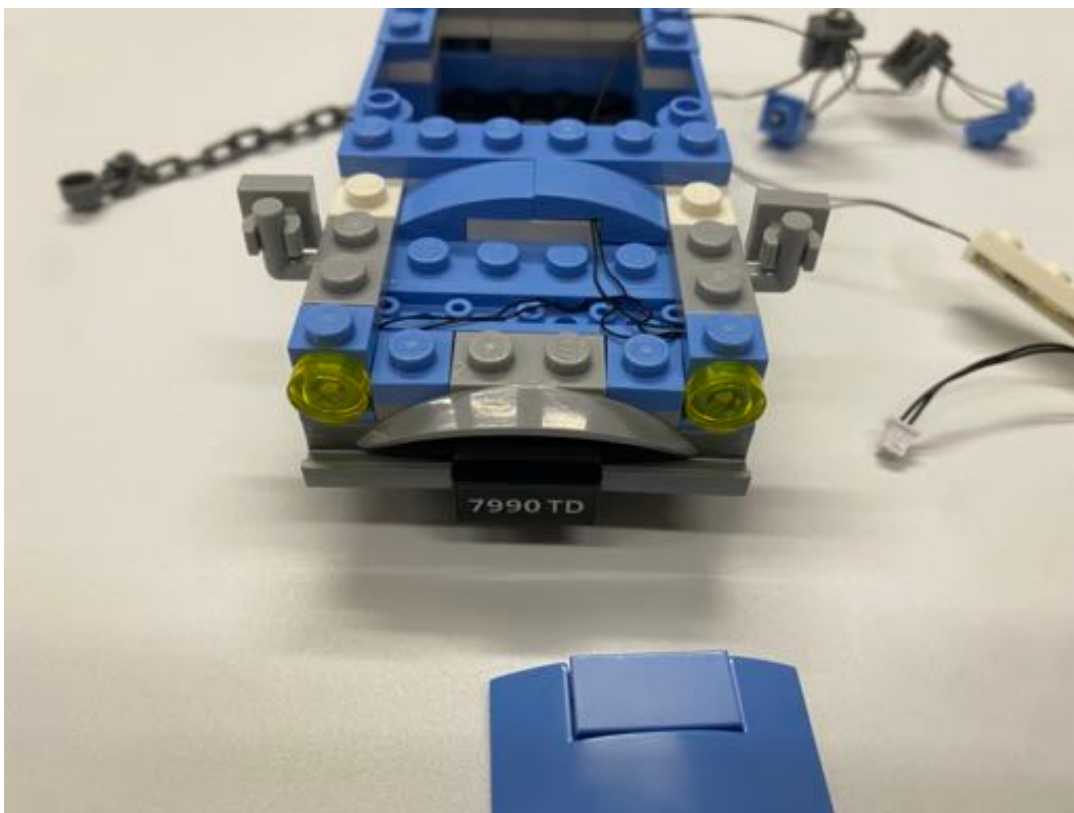

First of all detach the two bricks and remove the clear yellow tiles

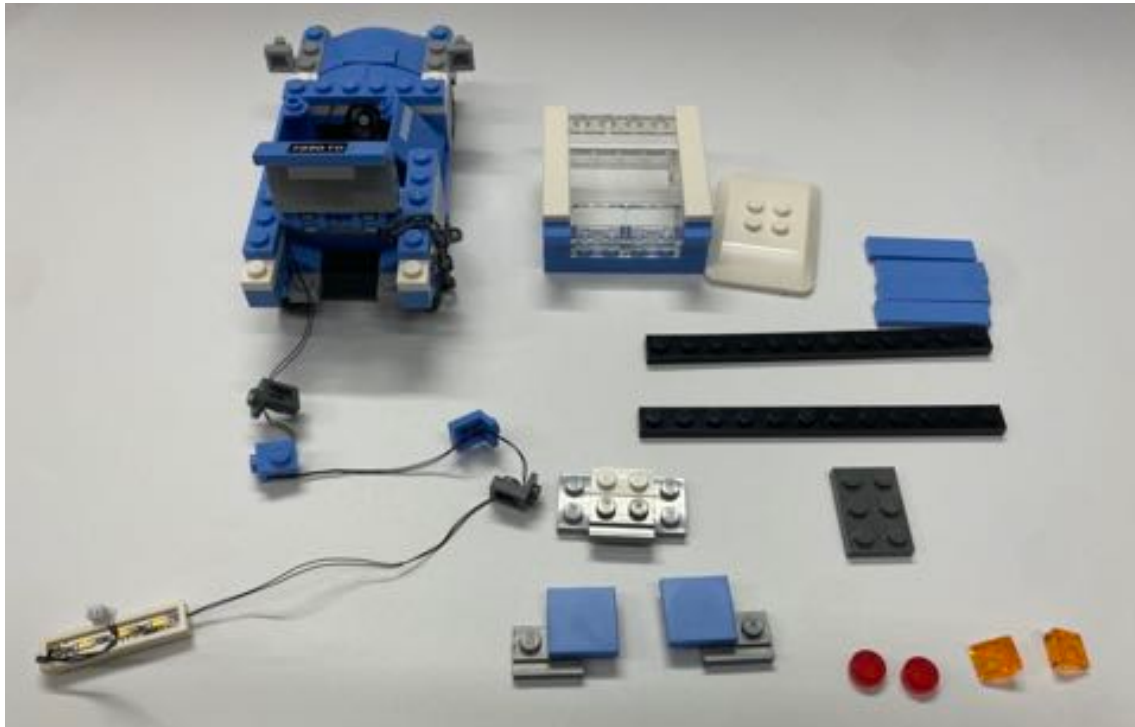

Install the tiles to lighting bricks, put them back to the head light position
Then place the wire in between the white studs

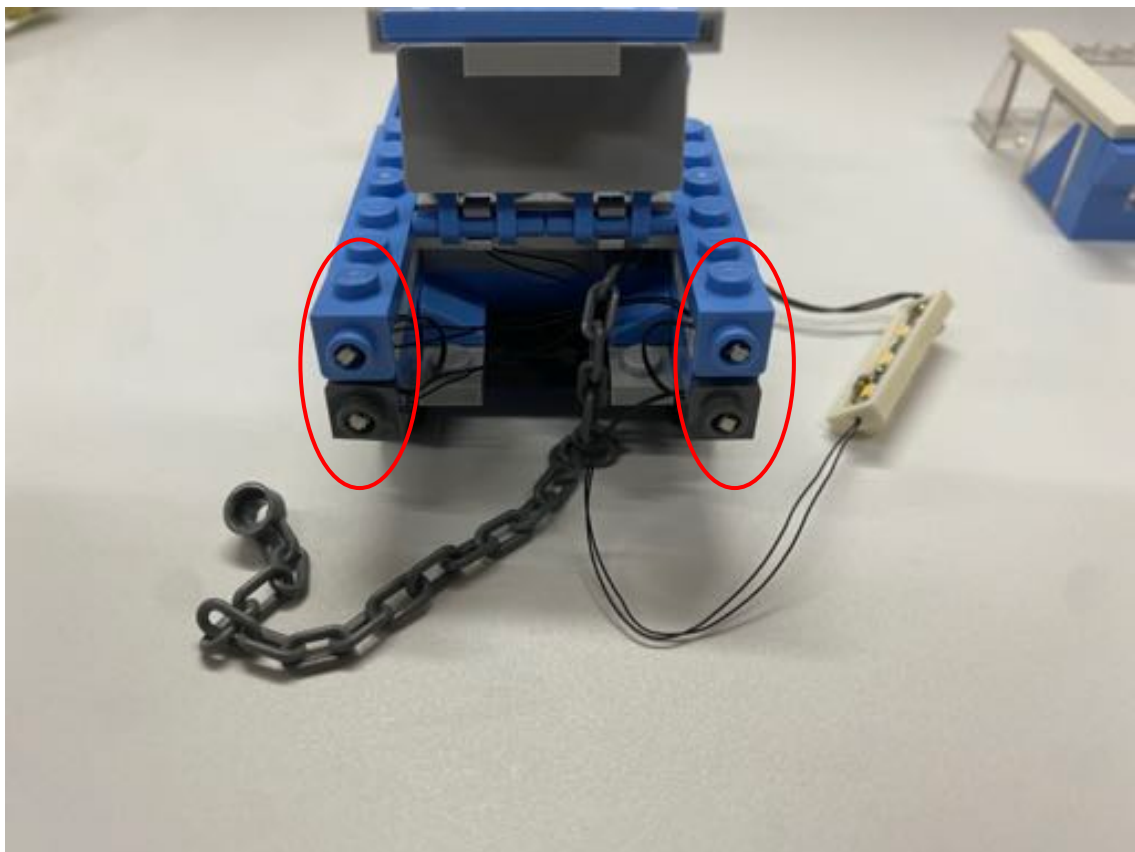

Restore the 1x6 blue plate and the slope, watch out don't break the wire

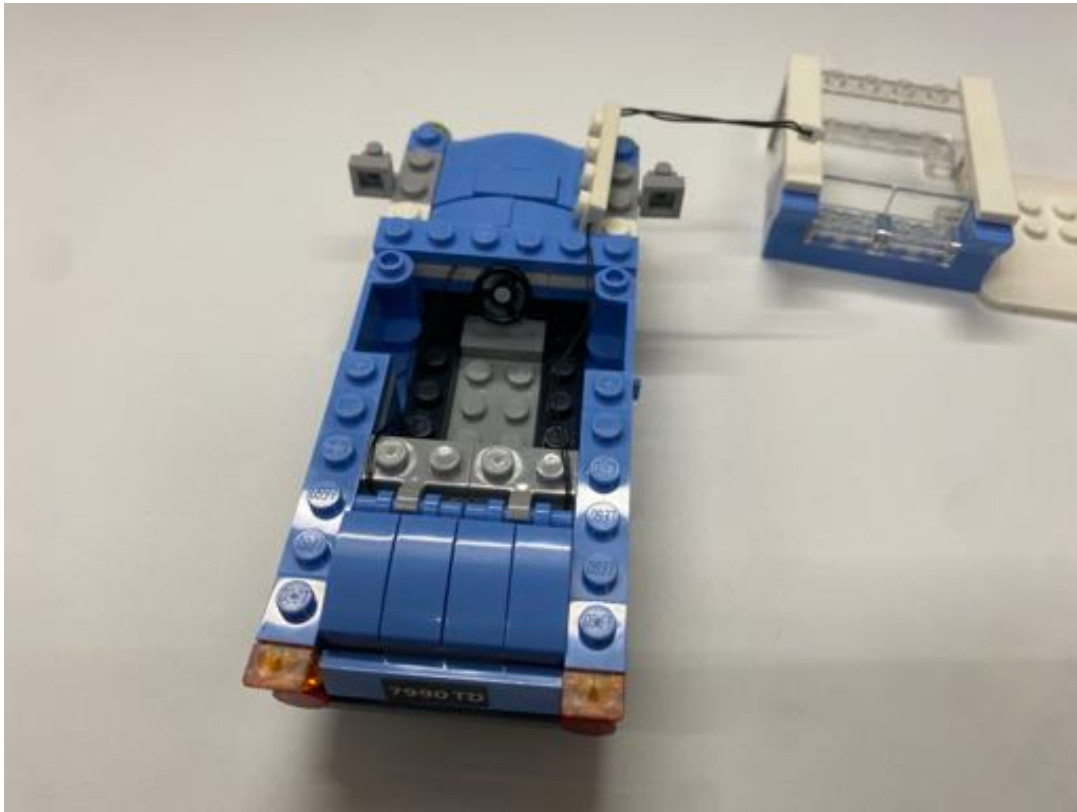

Pull the remain lights to the back of the car, and detach the parts shown

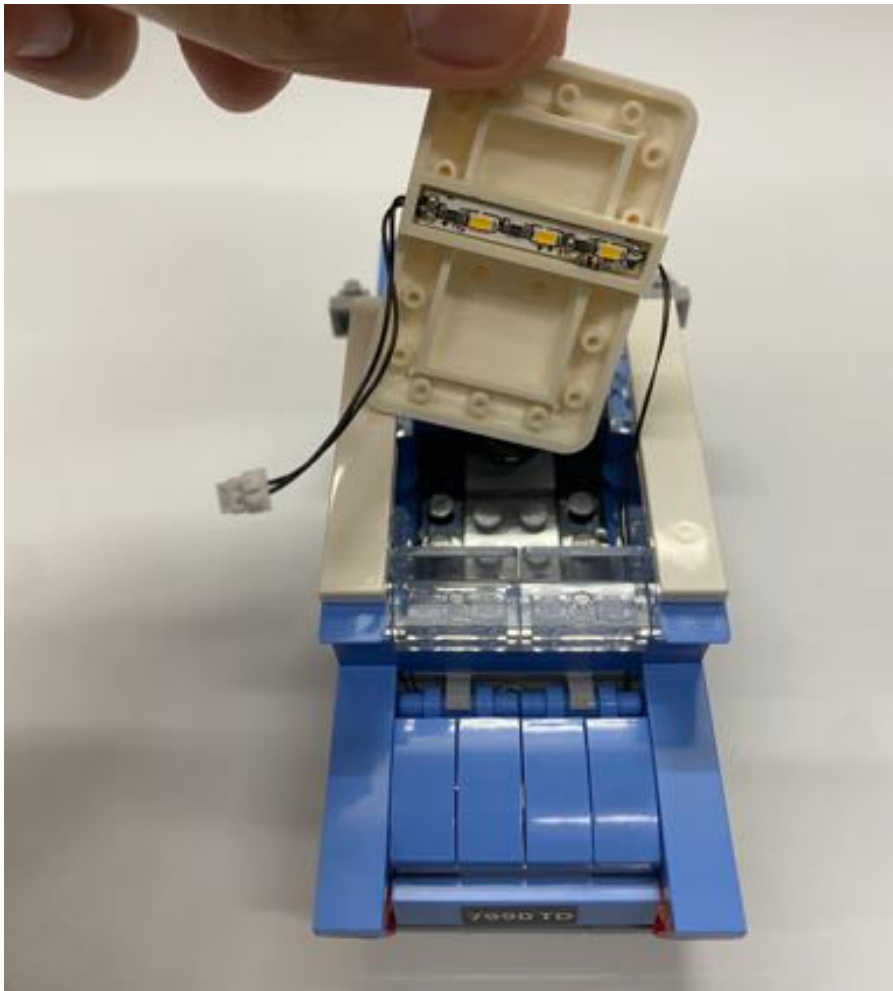

Replace the following lights to the rear lights position

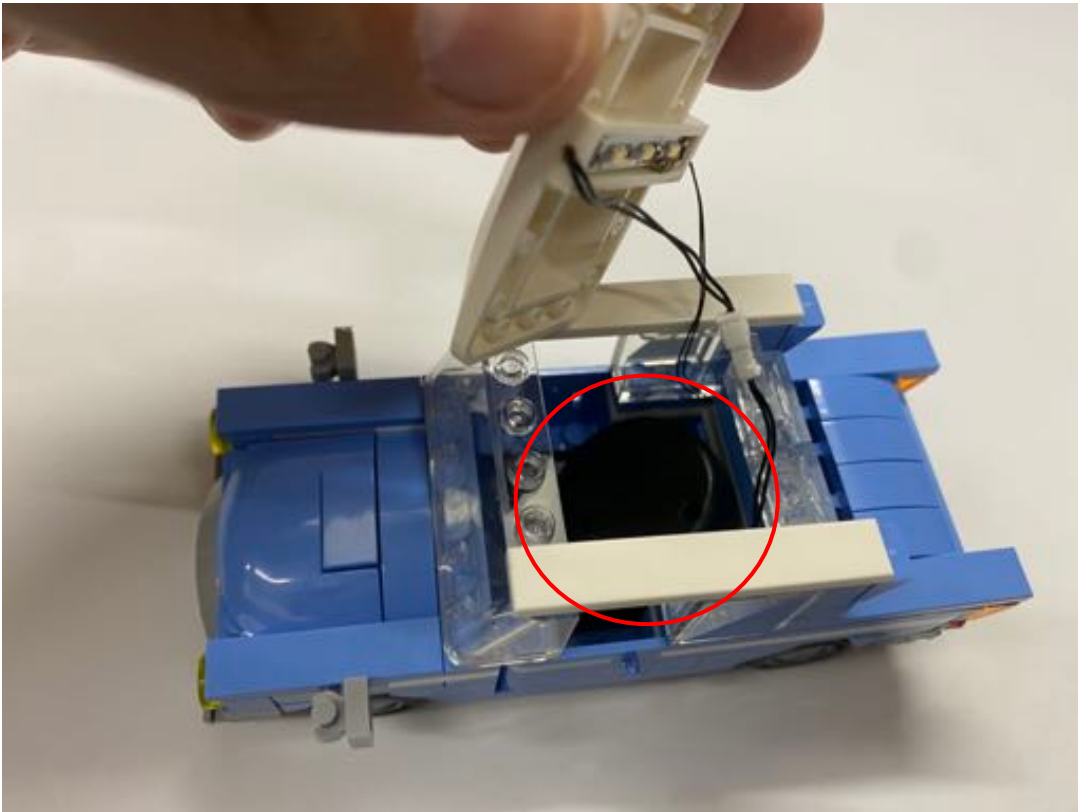

Restore the parts removed from previous steps, move the lighting plate to the middle

Then install then as shown

Before closing the top, connect with the battery case

Or connect with the USB cable

Now it's turn for the house

Take the cone with shorter cable to replace the lighting on the front door

For the 1x4 grey lighting plate next to the cone, install it on top of the door

The 1x4 tan lighting plate next to the grey plate install it to indoor area

Tap up the plate in red circle, place the wire in between the studs

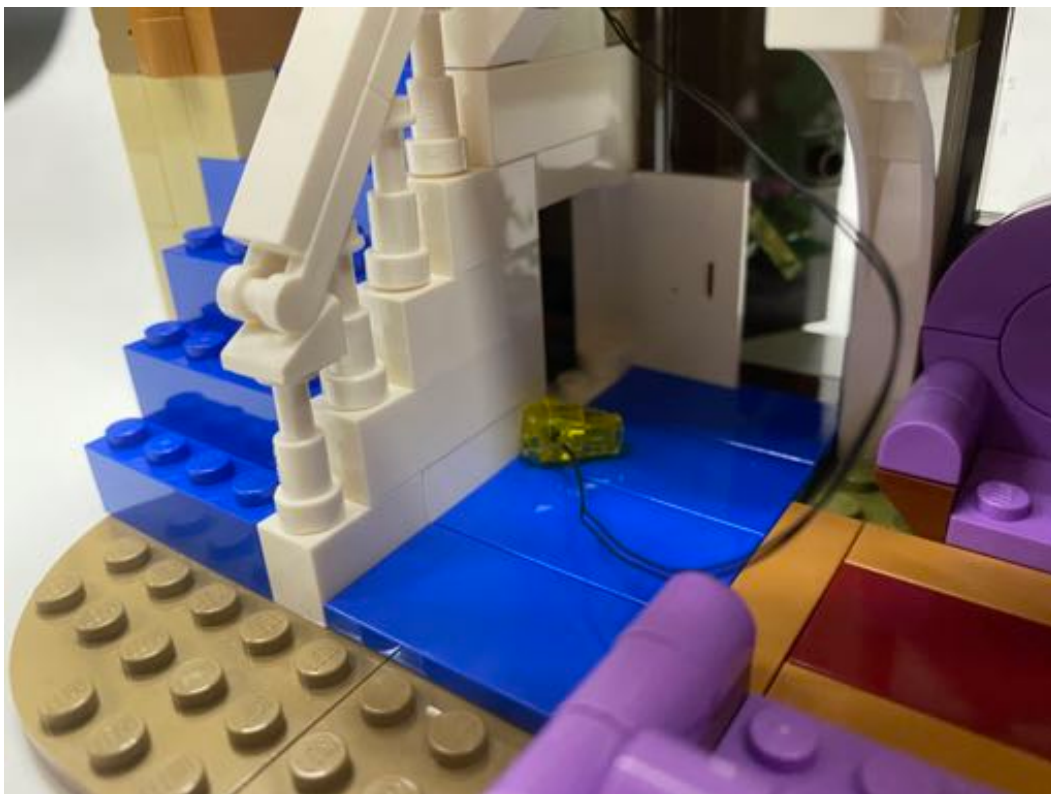

Install the 1x4 tan lighting plate in red circle area, then remove the picture, place the cable in between the studs then restore the picture

Then pull the remain two lighting plates to 2nd floor and install them on ceiling

For the other lighting cone, move it to the room under the stairs

Remove the shown parts, place the wire in between the studs and replace the lamp
