

# Lego 76389

Harry Potter

**Chamber of  
Secrets**

*Installation Guide*

Take the lighting part shown for this building

First of all split the building as shown, remove all the clear green round bricks

Start from assembling the end light to the bottom corner

Then assemble the second one and third one

Then assemble the fourth one

Now assemble the 1x2 grey lighting plate and the green lighting brick with longer wire at the bottom

After install all the green bricks, put the top back to the position

Then assemble the remain 1x2 and round plate as shown

Take the following lights for this side of the house

Start by splitting the building like this

Assemble the lighting plates exactly as shown

After that take the fire place at bottom and replace the fire

Pull the remain lights to upstairs by the gap and beware the wire has to be in between the studs

Assemble the 4 pcs of lighting fire in the fireplace first

Open the brown triangle plate, assemble the brown plate and the fire

After that take the two connected fires to the candles

The remain single fire will be assembled at the front side

Do the same procedure for the other side

Replace the blue and purple diamond by the lights

Move the last 2 lights to the middle and stick them as shown

Before assembling the light, split up this building first

Start by assembling the grey lighting plate which is next to the connector

Move the remain lights to upstairs by this gap, beware has to be in between studs

Assemble the diamond and the fires to candles

Take the upstairs parts and assemble the tan lighting plate

Take the lighting clear round plate out and install it on the clear pole

Restore the top and place the wire in between the studs

Assemble the green lights to the scope

At last stick the light to the top, this side of building will be done

Finally, connect three connectors to the USB cable to light it up
