

Lego 21052

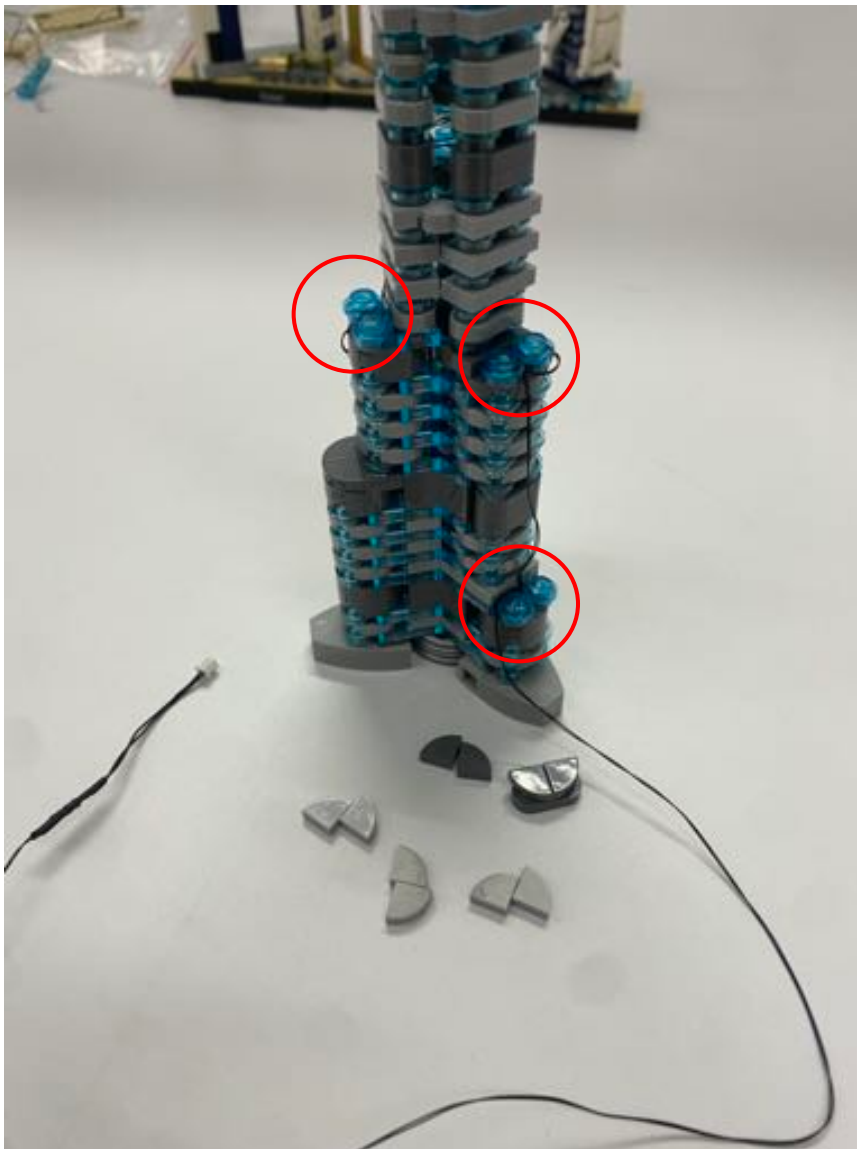

Dubai

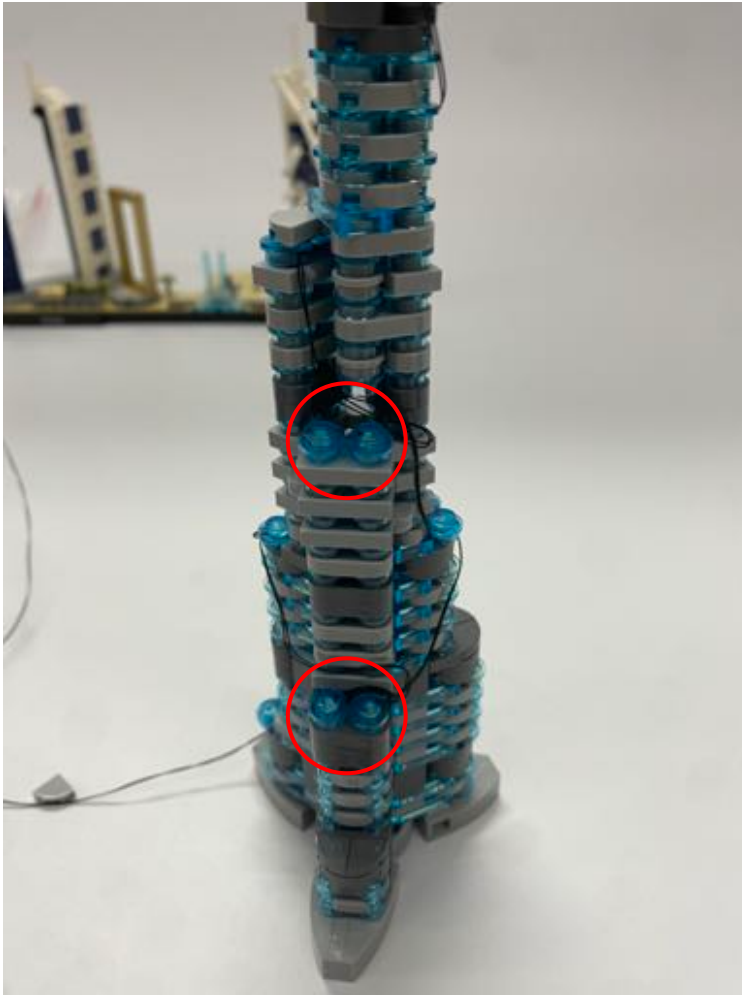

Installation Guide

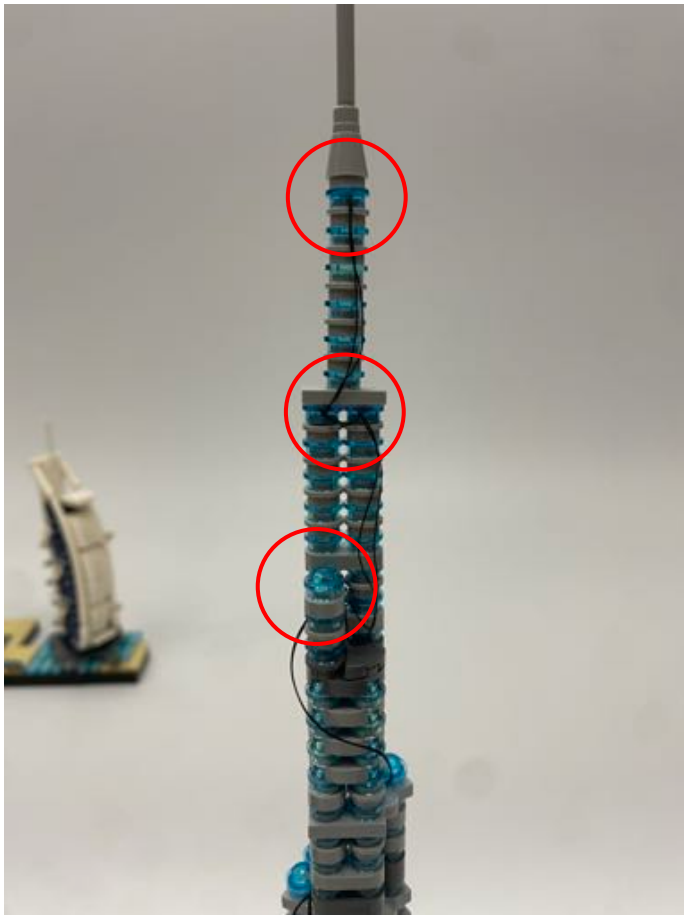

Start from tower, take the lighting blue round plates to install on the outer edge of the tower to replace the blue round plates

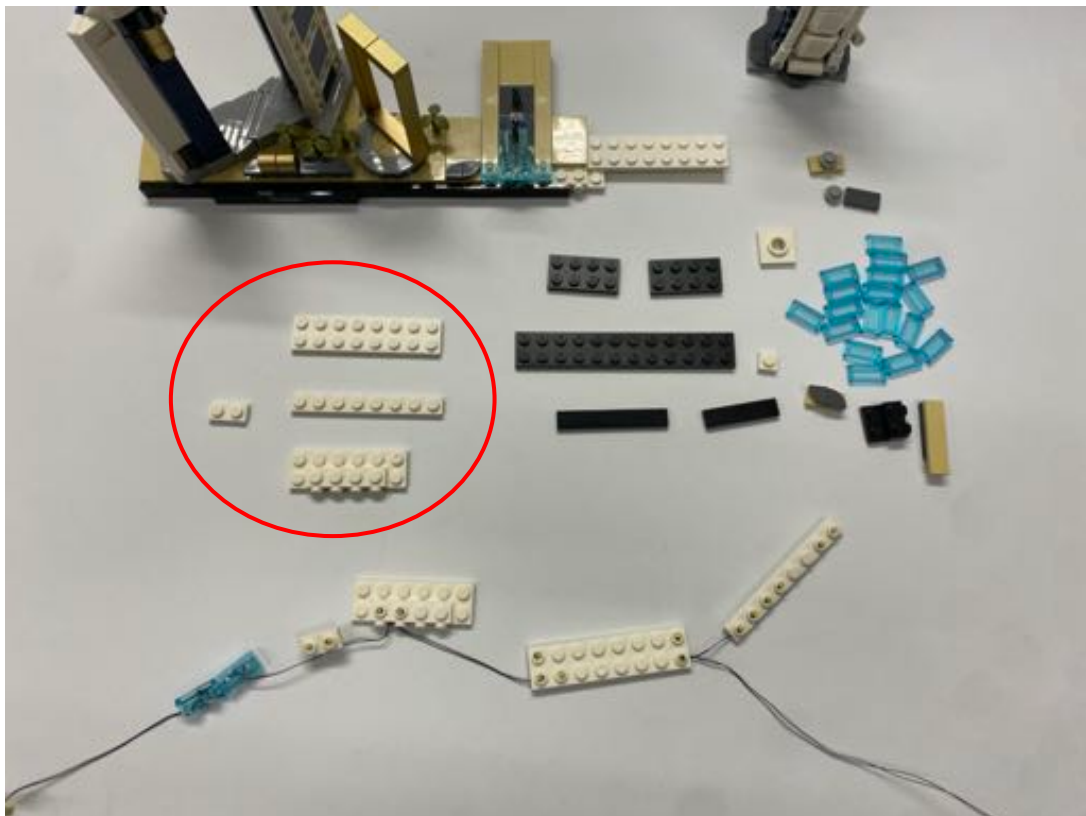

Then replace the following round plates of the tower top

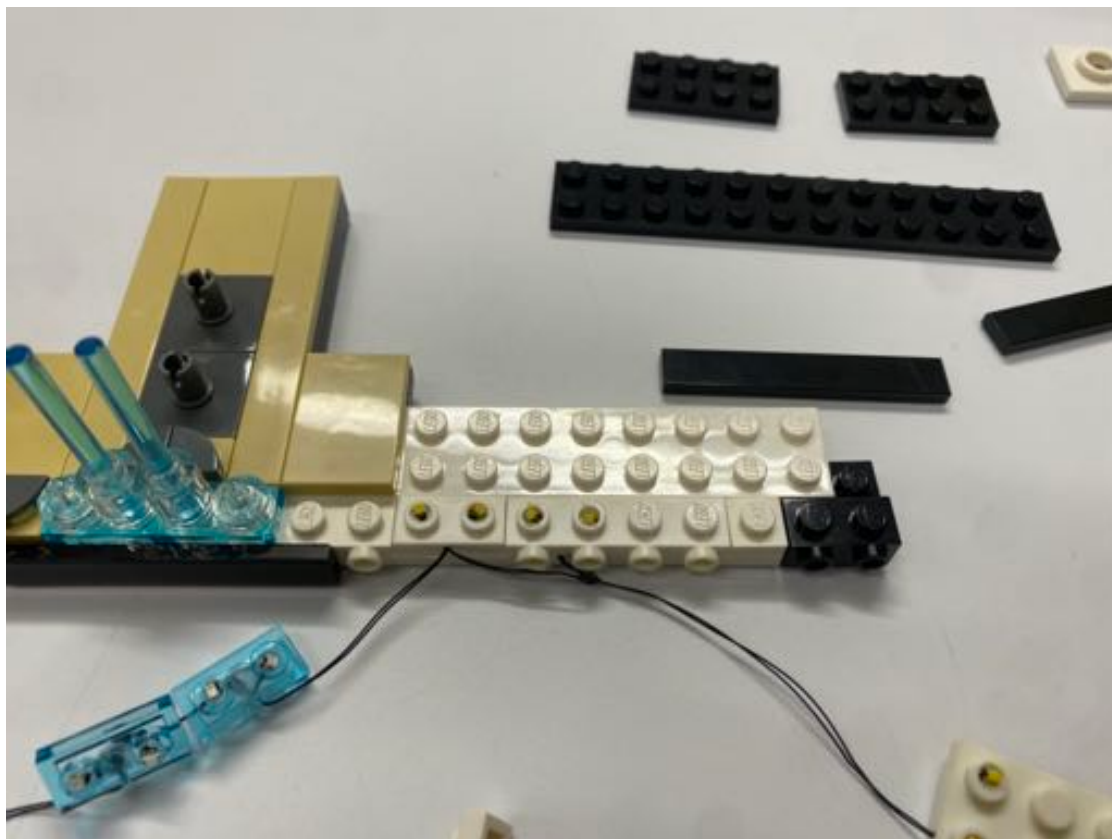

Restore all the tiles after installation

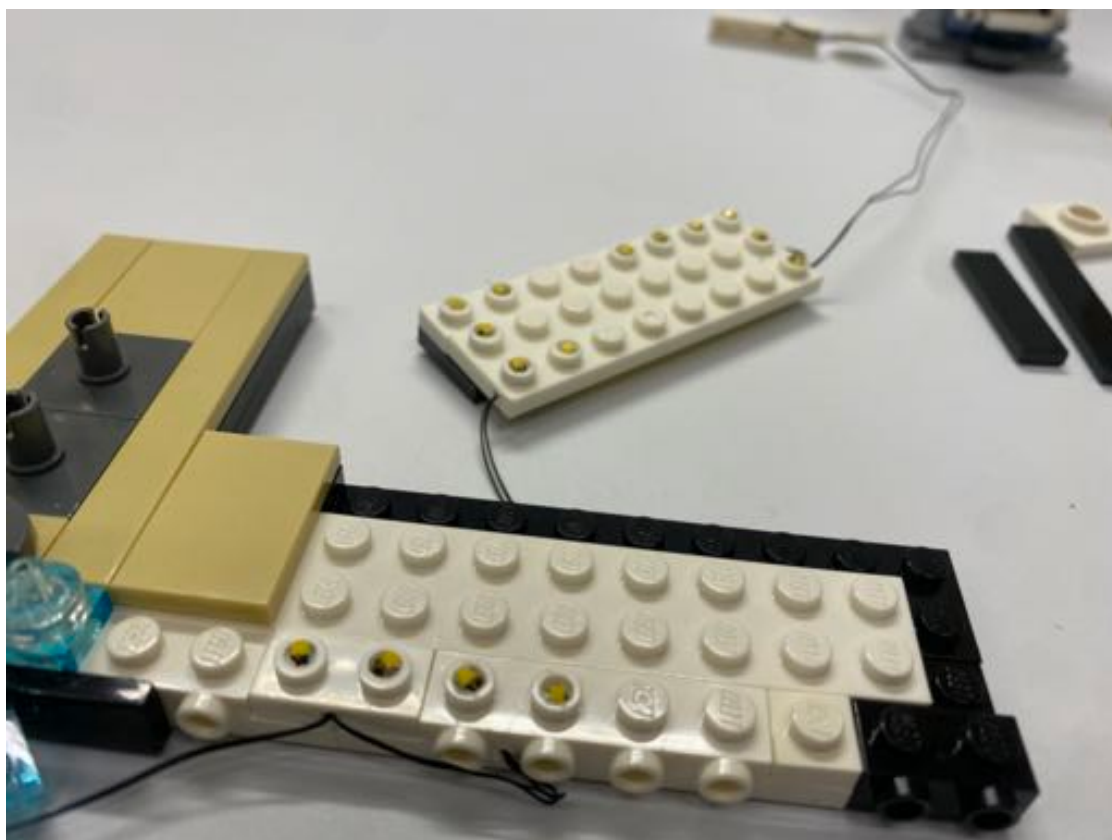

Remove the parts shown, for the white plates in red circle will be replaced by the lights

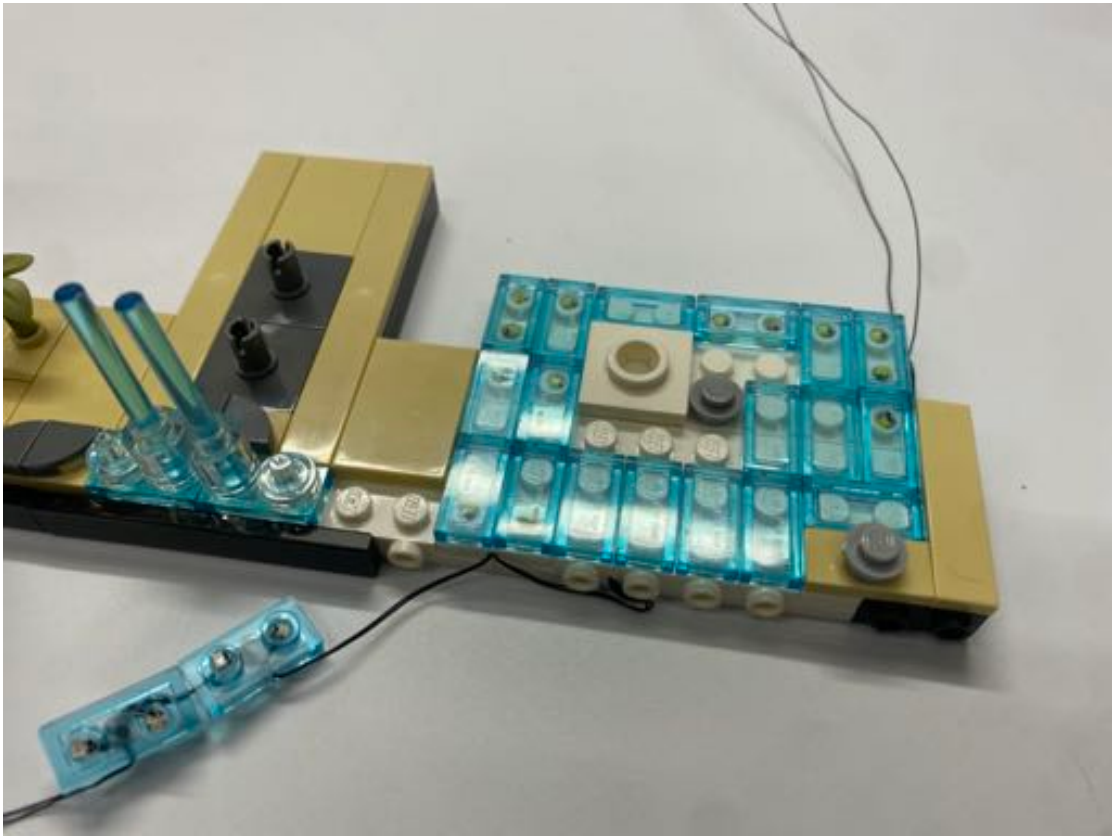

Install the 1x2 and 2x6 first, then pass the remain lights to behind

Then combine with the 2x4 black plates

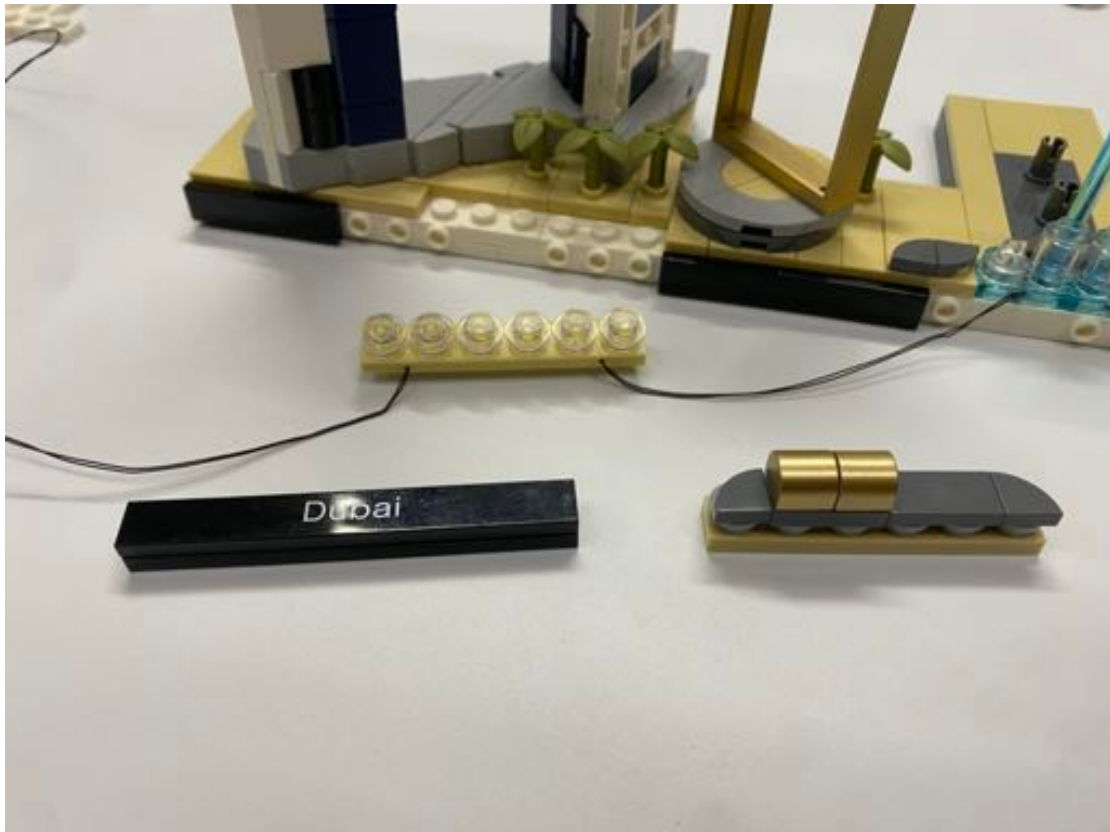

Restore the blue clear tiles after installation

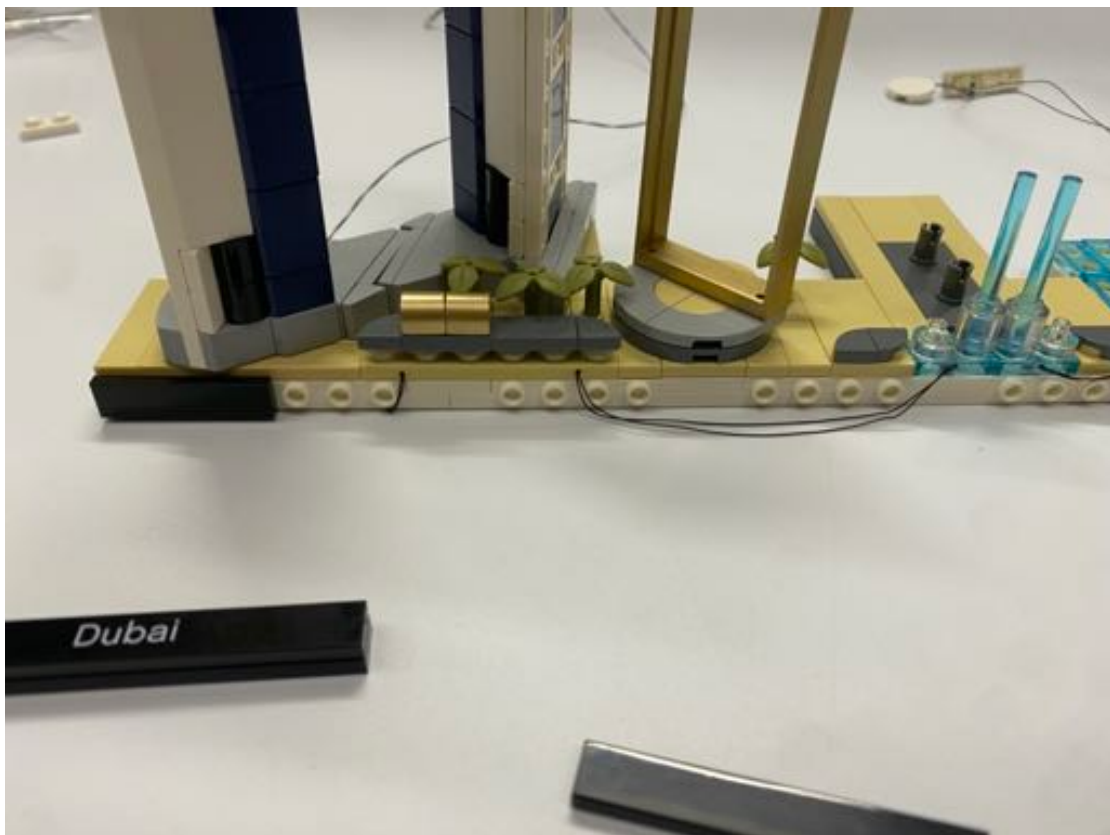

Remove the 1x2 plates replace by the lights

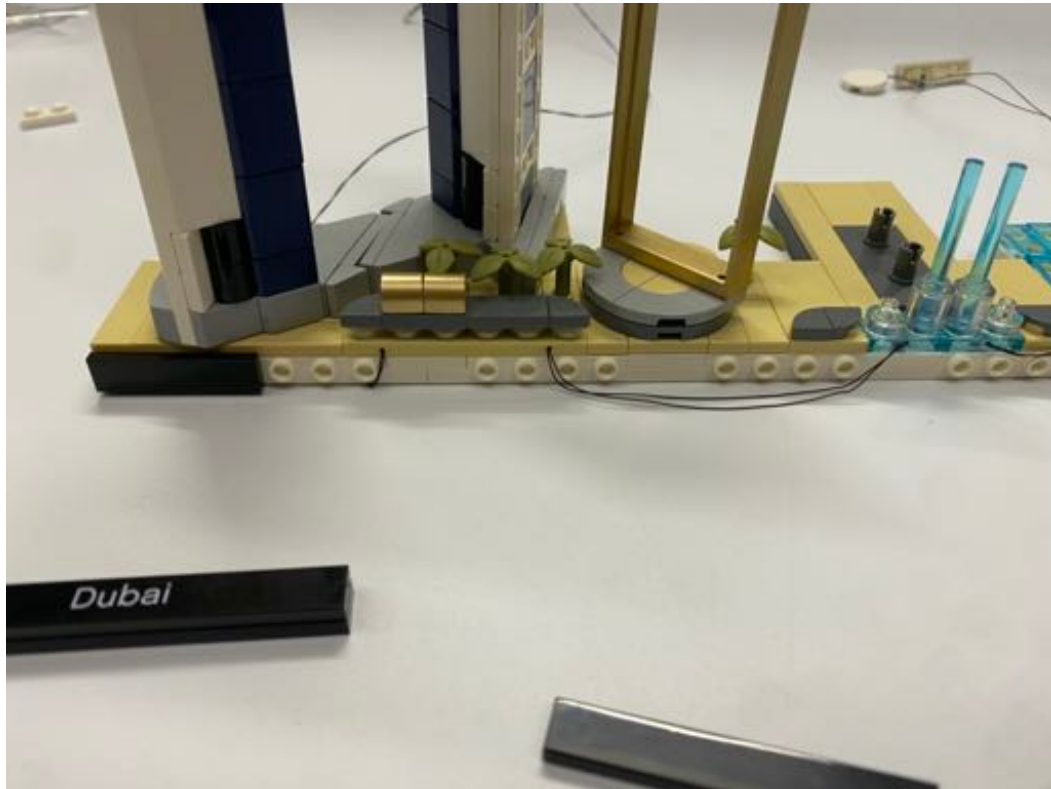

Remove the part with 1x6 tan plate

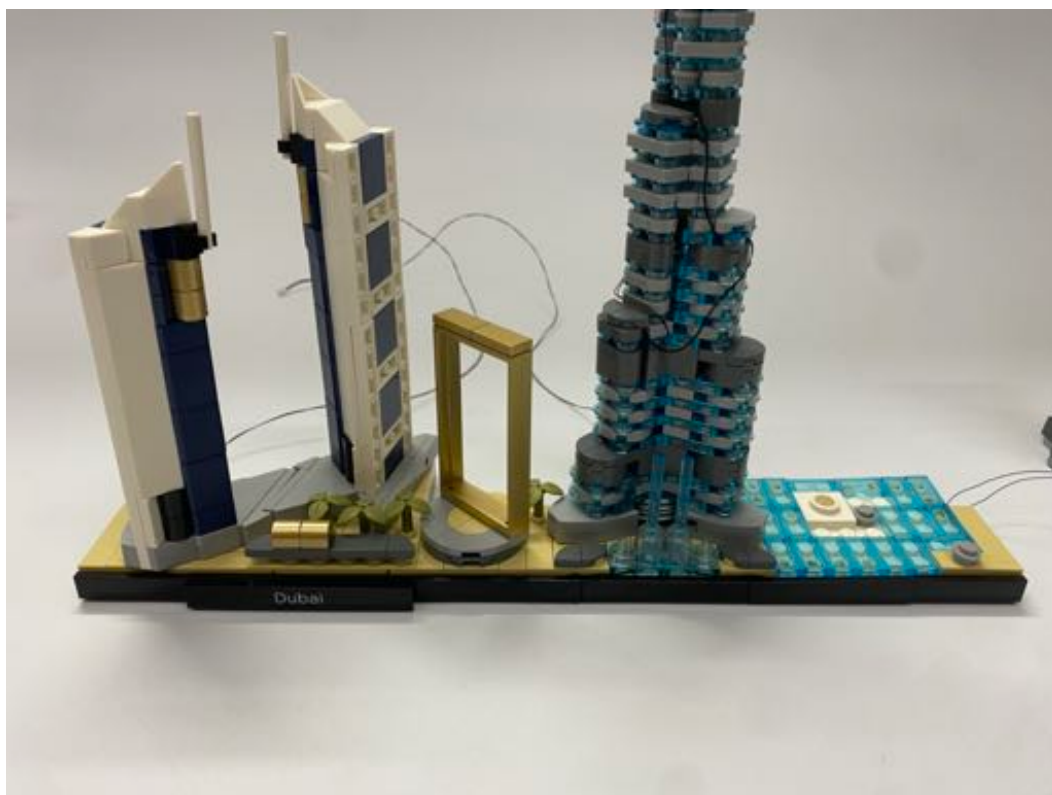

Replace the 1x6 tan plate and 6pcs of grey round plates by the lights

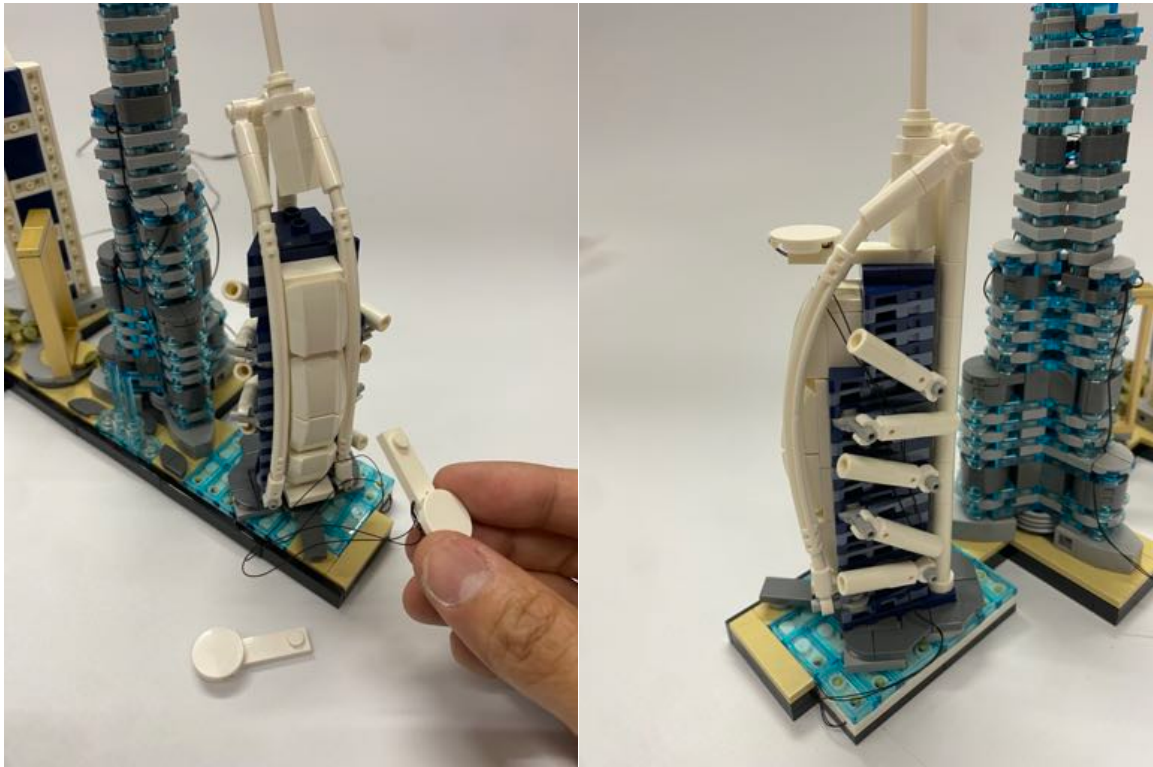

Hide the wires in between the studs, then cover by the black tiles

Restore the grey tower

Remove the white parts and replace by the light, then hide the wire behind the building

Connect with the USB plug then you can light it up
