

Lego 31119

Ferris Wheel

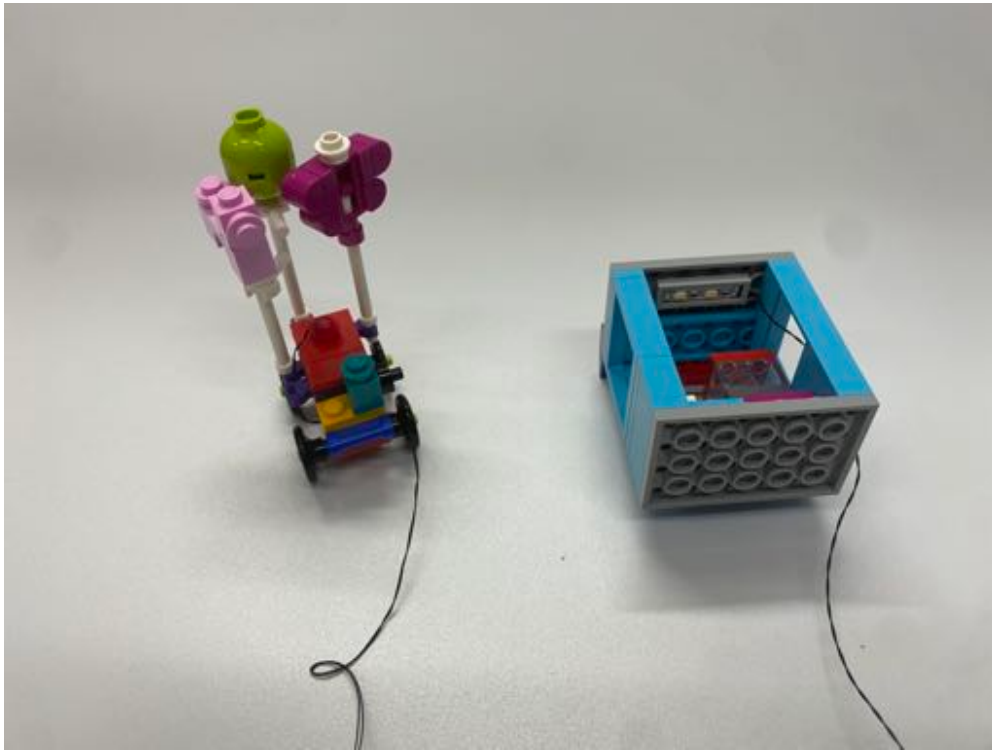

Installation Guide

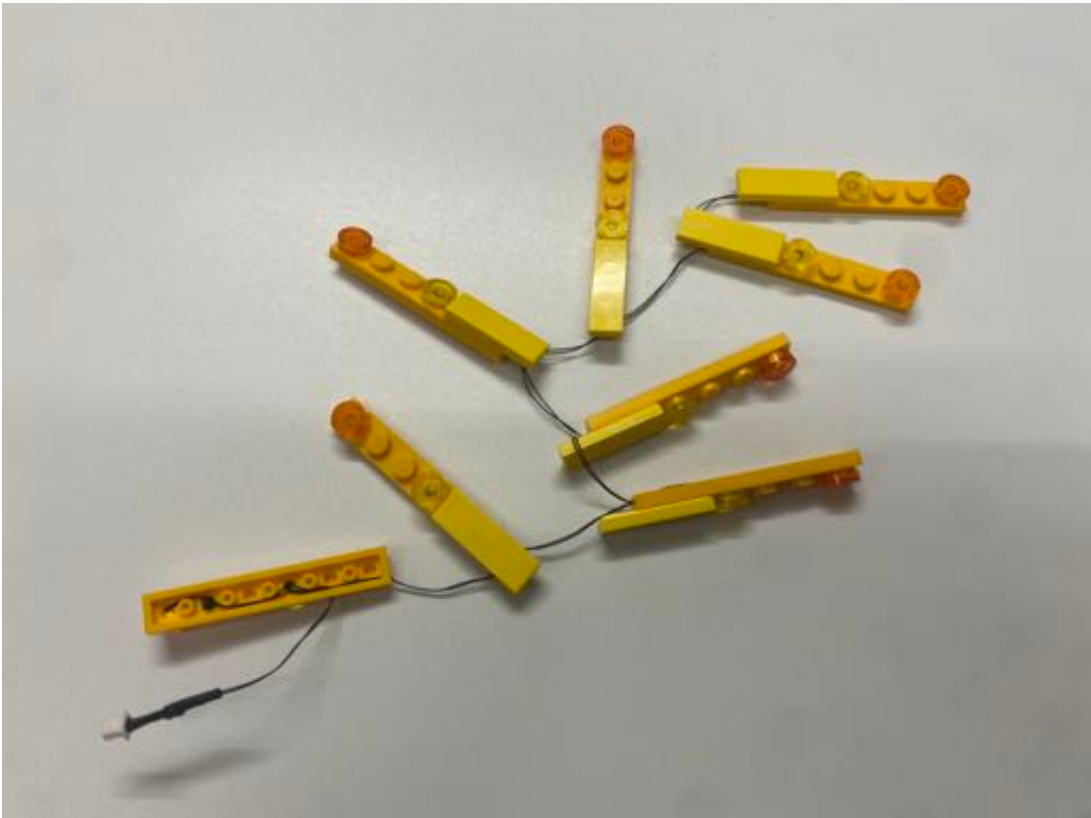

The two small lighting parts will be assembled in the following parts

Remove the yellow plates on the wheel, take out all the tiles from it
And assemble them on this lighting plates

Now put the plates back to the wheel

Then take the white lighting plates, remove the white plates on the inner circle and install it

Remarks: make sure the connector is placed next to the connect of the yellow lighting plates

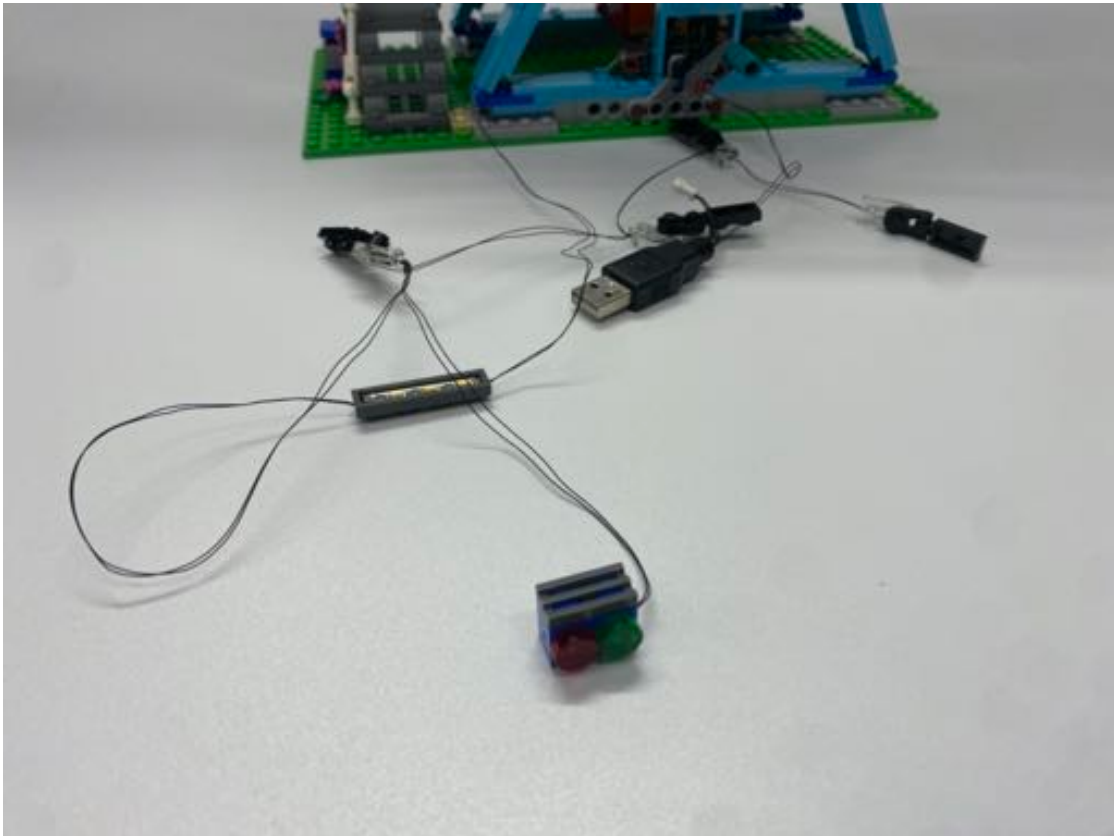

For the space in between two plates, take out the tile the clip the wire in the gap of studs

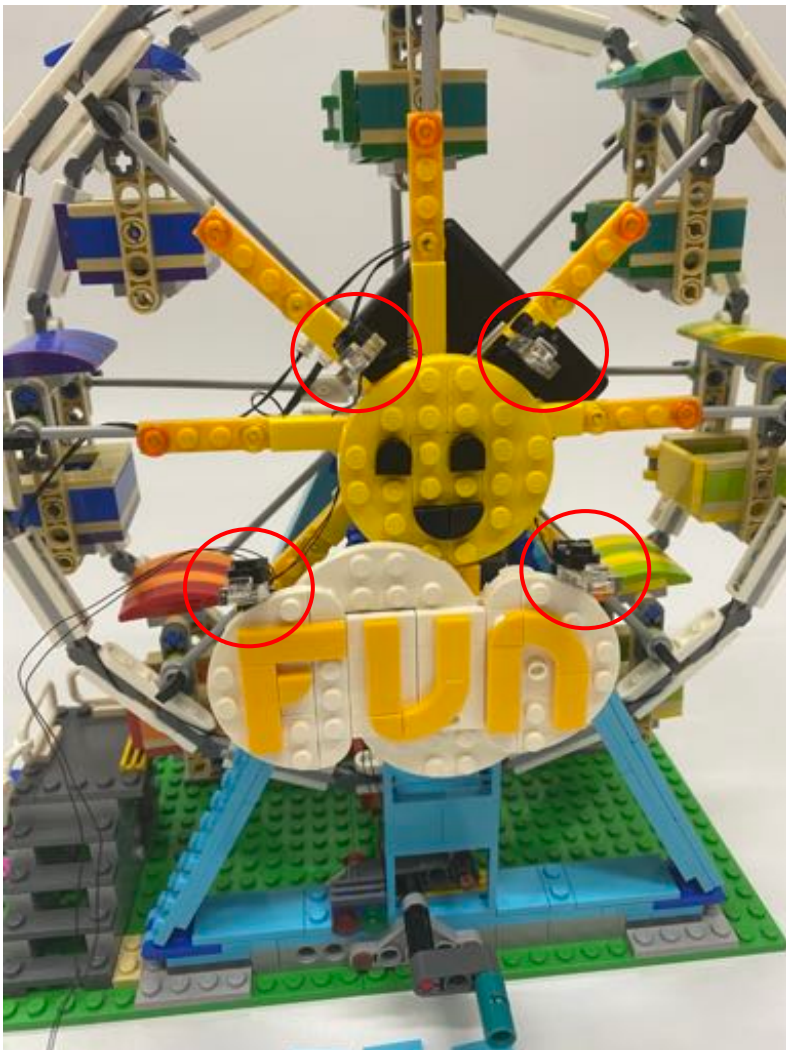

Take the battery box, connect the wires then assemble it in the wheel

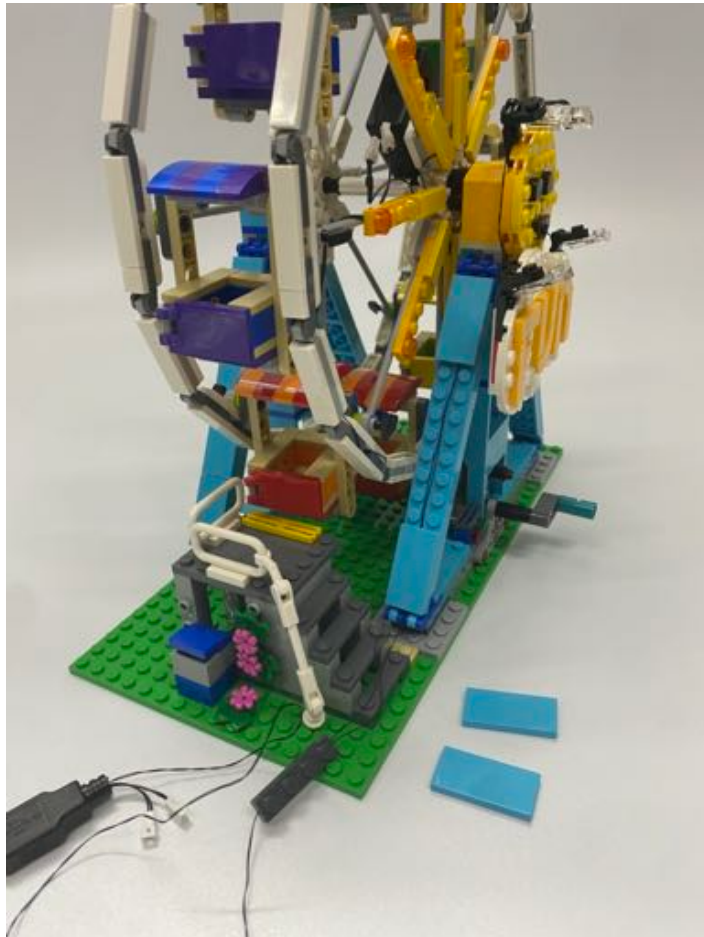

Take the tiles away from the blue block at bottom, install them on this lighting parts

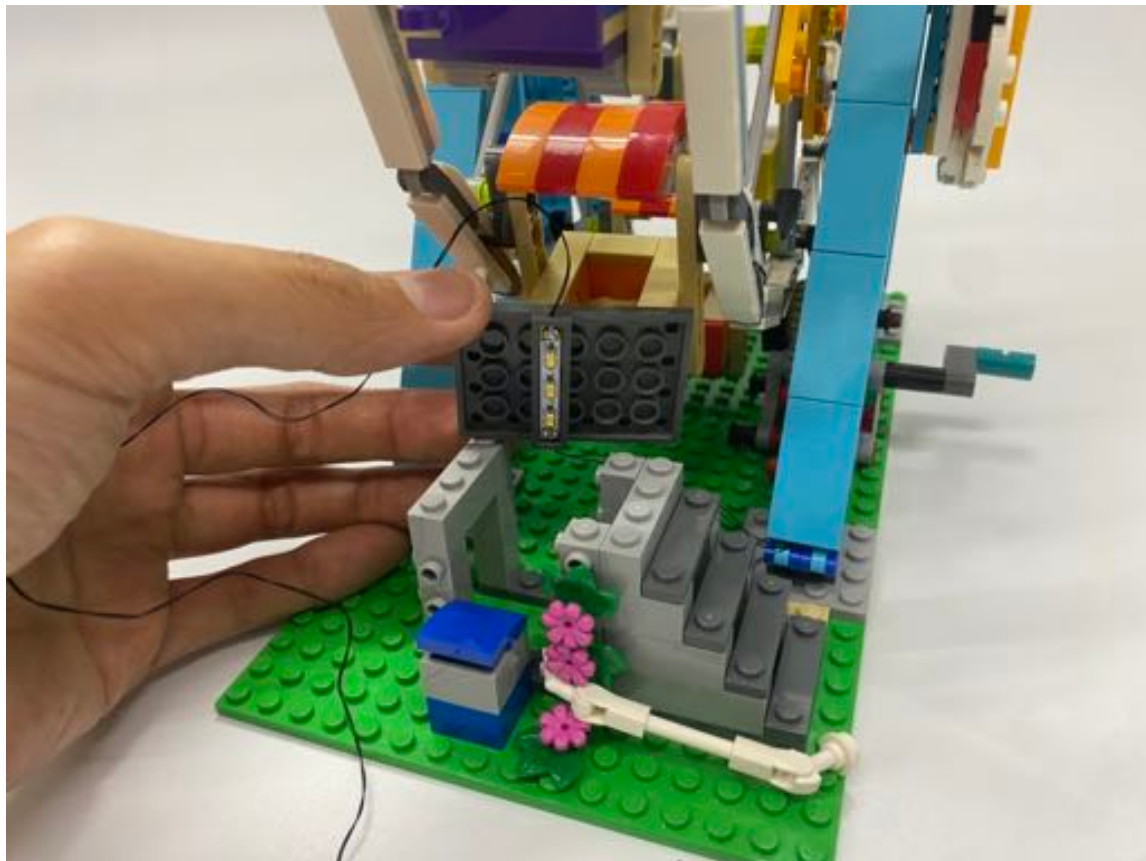

Restore the blue block, assemble the black lights at shown

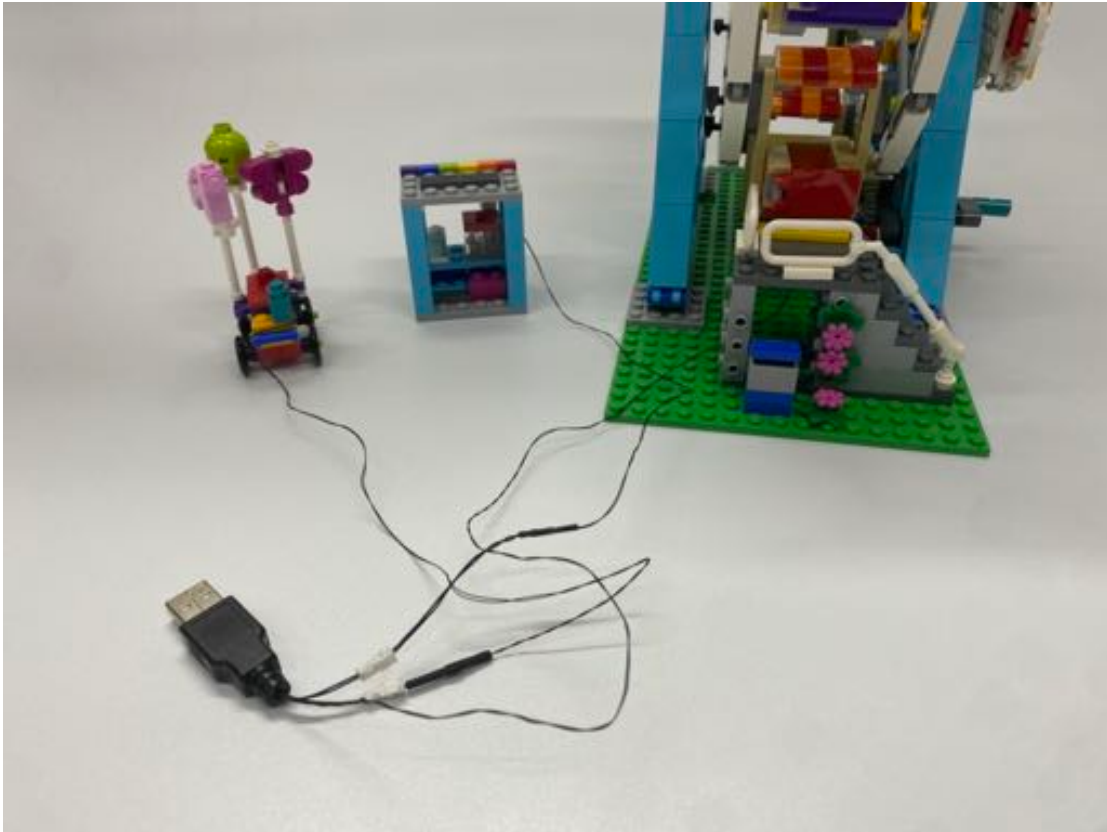

Move the remain lights to the stairs, hide the wire underneath the blue 2x4 tiles

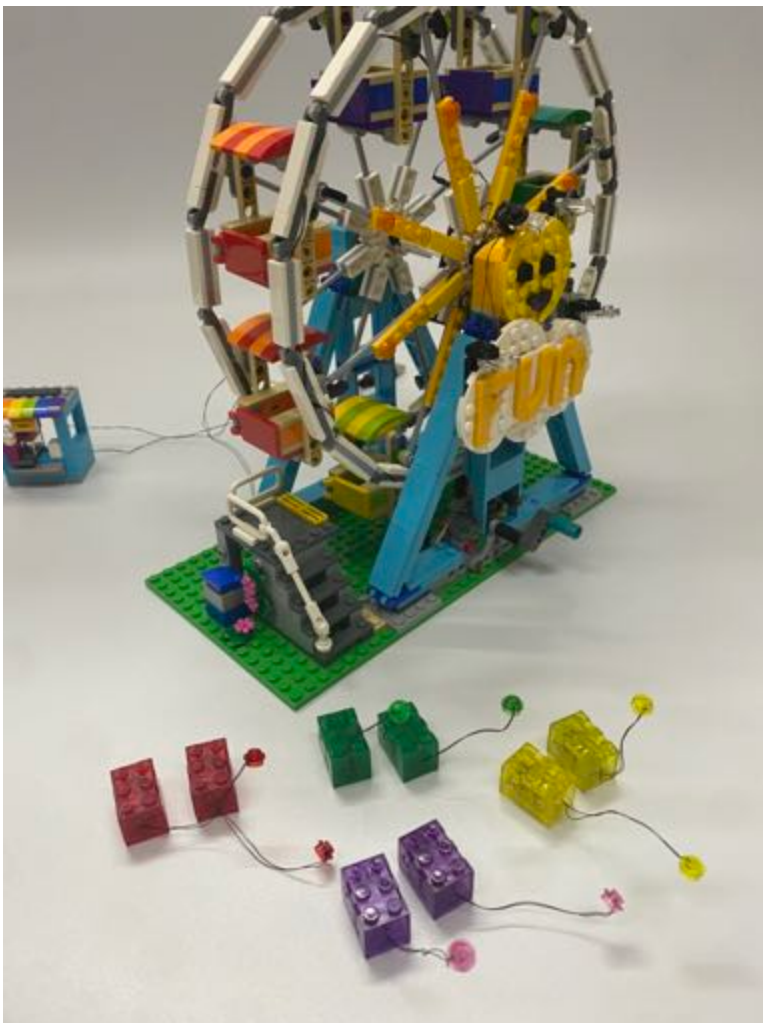

Install the 1x4 lighting plate under the platform

Now connect with the USB cable with the previous parts

(OPTION PARTS)

Put the blocks inside the seat, assemble the round plates attached to the top

Switch on the lights and close the door

Done~
