Installation Guide

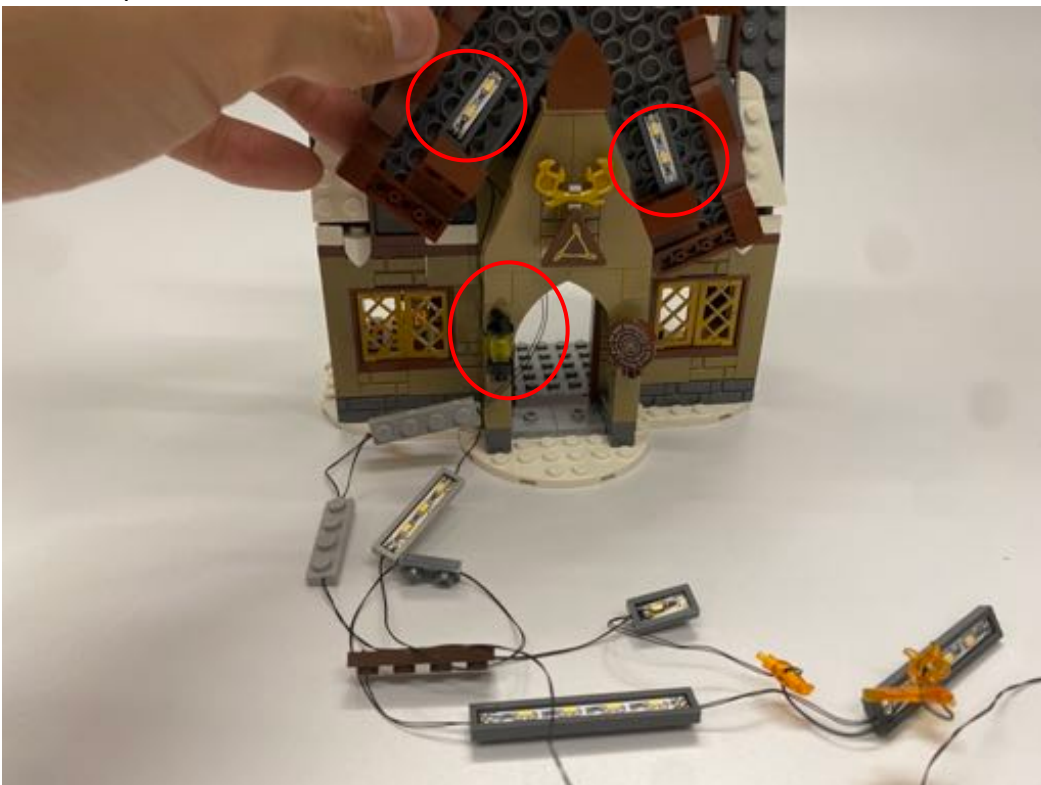

For the lamppost, just simply swap the round plate at bottom and the top parts to the lighting parts

Take the following lighting parts for this house

Start assembling the 2 pcs of 1x3 at the end to the shown position
And switch the lighting round brick to the lamp on front door
Then pass the remain lights into the back side of the house through the hole below the 1x3 plates

Put the grey triangle plates back after the lights are passed through the front door

Assemble the 3 pcs of 1x4 lighting plates on 1st floor ceiling
Remark: the wire with connector should be placed on LEFT side

Replace the fire on candle

To pull the lights to 2nd floor, detach the windows first

Take the lights to 2nd floor through the hole, restore them after that

Assemble the lighting plates as shown

Then replace the fire and the one in fireplace

Then it's turn to install lights for another house

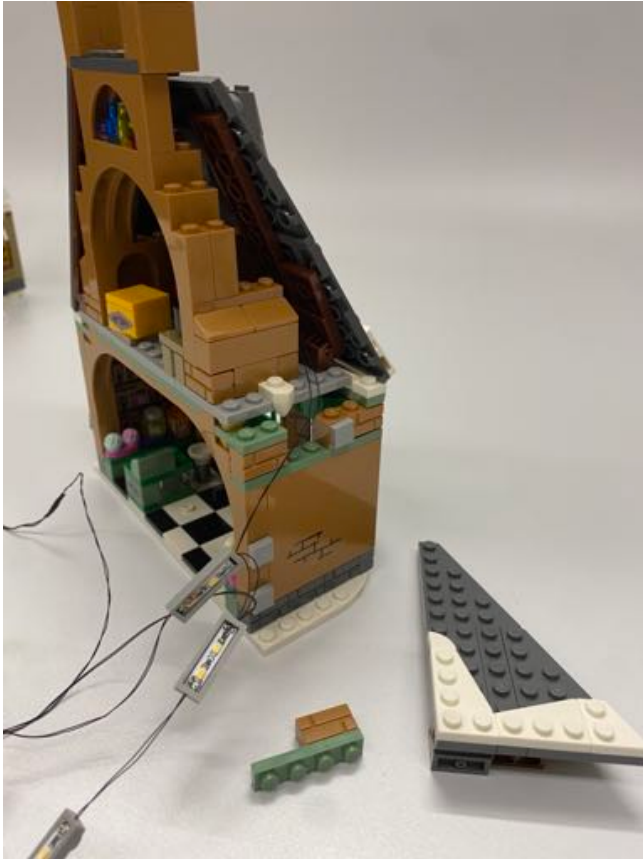

Start installing from the top, detach the shown parts and the clear parts first

Assemble the lighting clear parts and replace the arches below that by the lights

To pull the remain lights to below floor, remove the parts shown

Then restore the parts after the lights are moved to downstairs
Assemble the 3pcs of grey lighting plates to the ceiling

Then replace the lighting cones

At last, replace the following lighting plate to the showcase

Connect all three connectors to the USB cable and that's all
