

Lego 21003

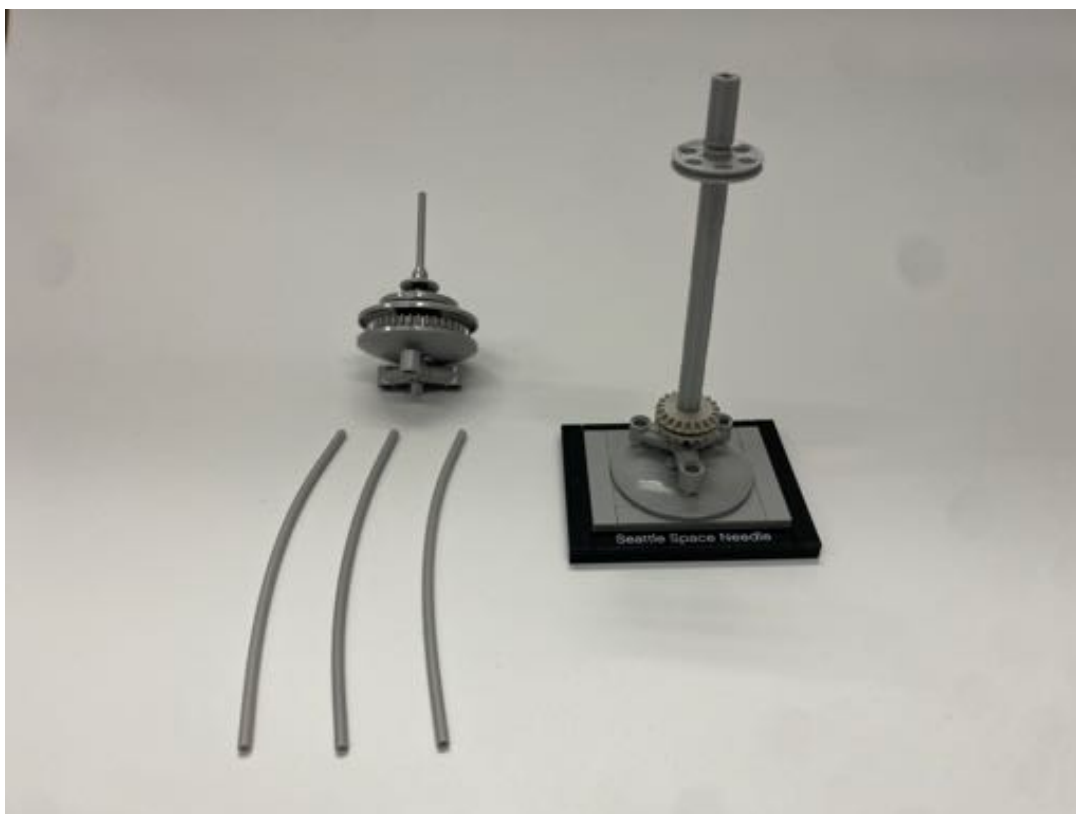

Seattle Space Needle

Installation Guide

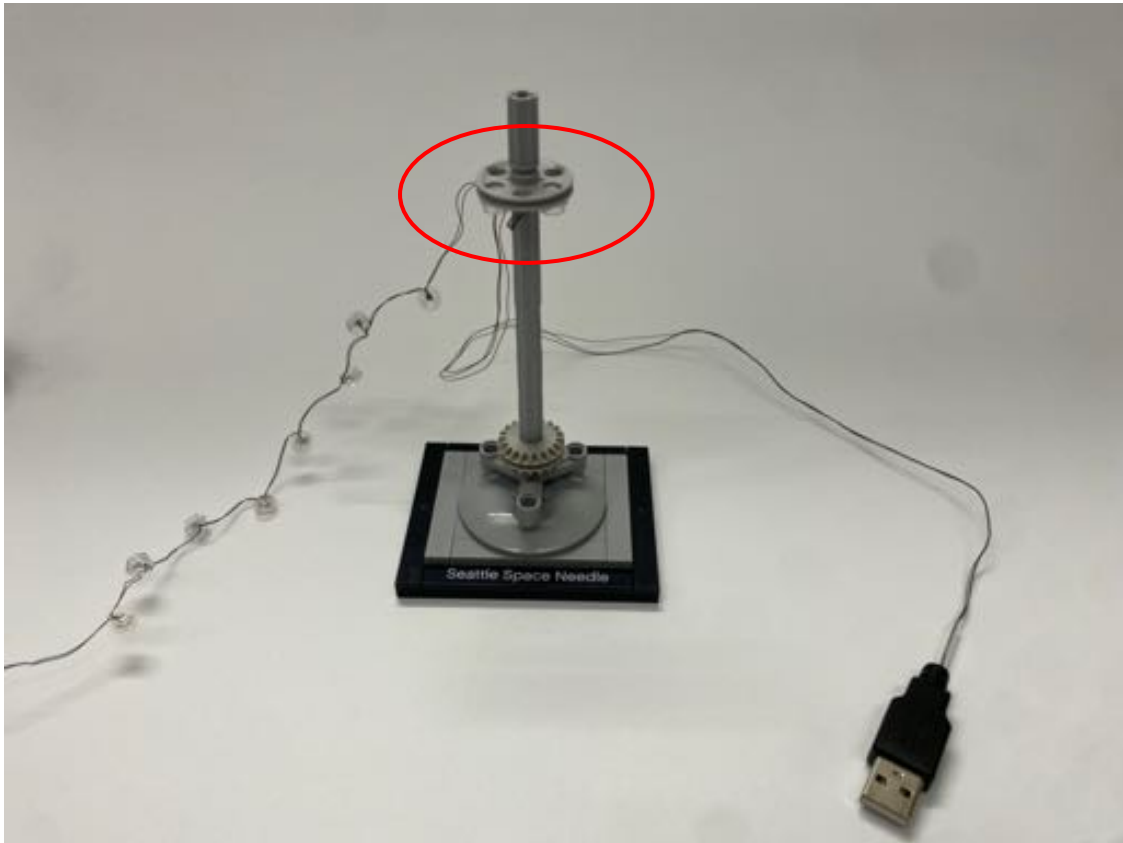

First of all detach the parts shown

Install the 3pcs of lighting parts next to the USB plug

Stable the wire by the pole, then restore the bars

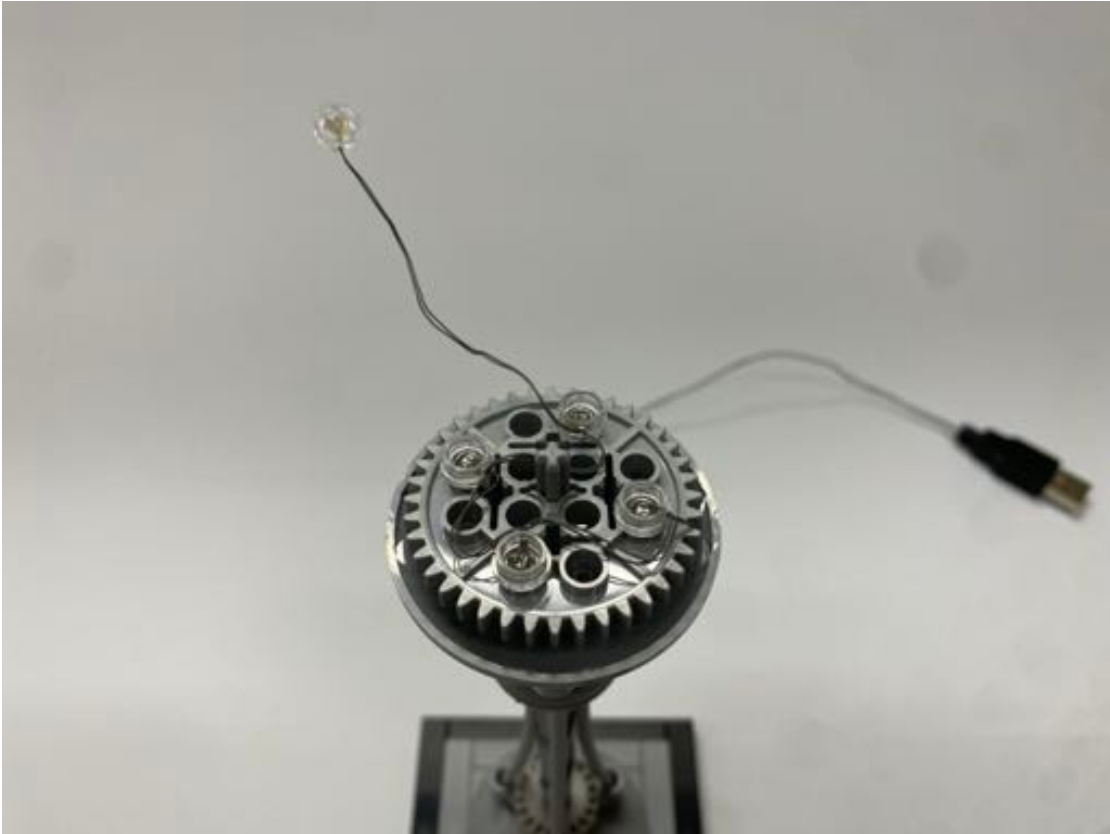

Put the following part back to the tower, and split the remain parts

Then install 4pcs of lighting round plates to the bottom of gear

Restore the gear, then install the 4pcs of lighting round plates on top

Replace the grey round plate to the last lighting round plate, then it's done
