

# Lego 21011

## Brandenburg Gate

### *Installation Guide*

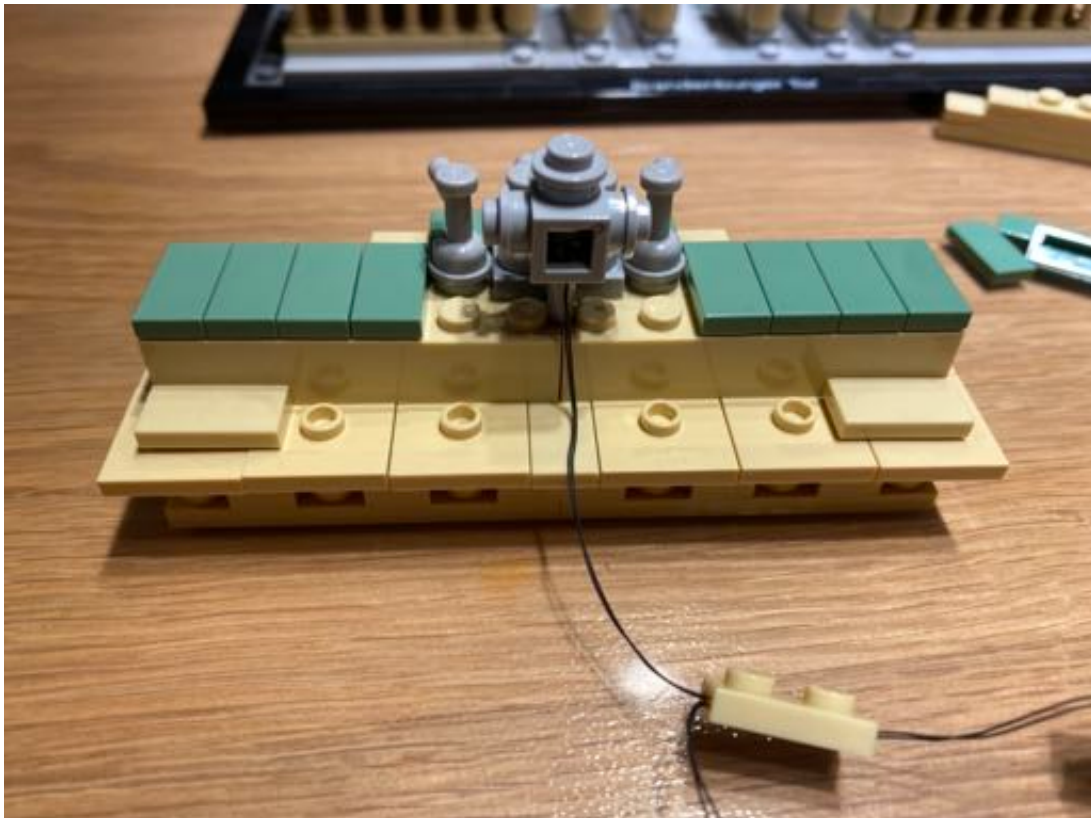

Firstly, turn around the building and take the shown parts off

Move the the 3pcs of grey round plate to the lighting brick

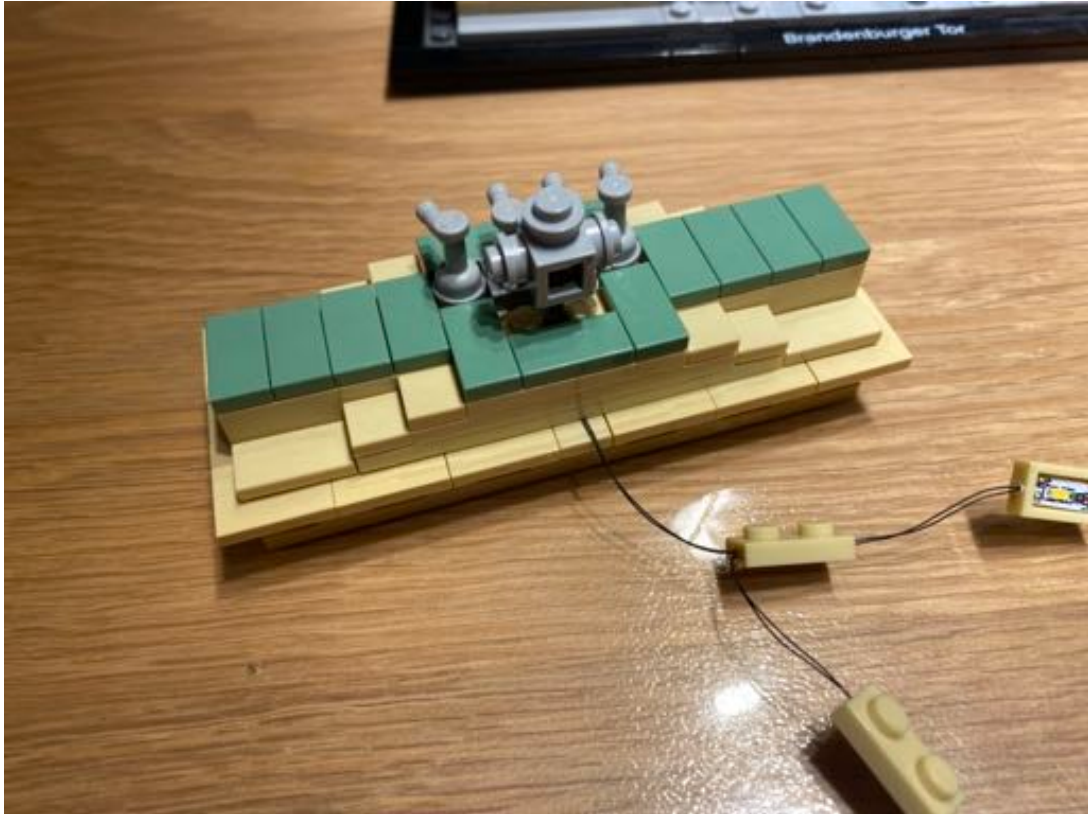

Assemble the lighting brick on top to replace the brick on that position, then place the wire as shown

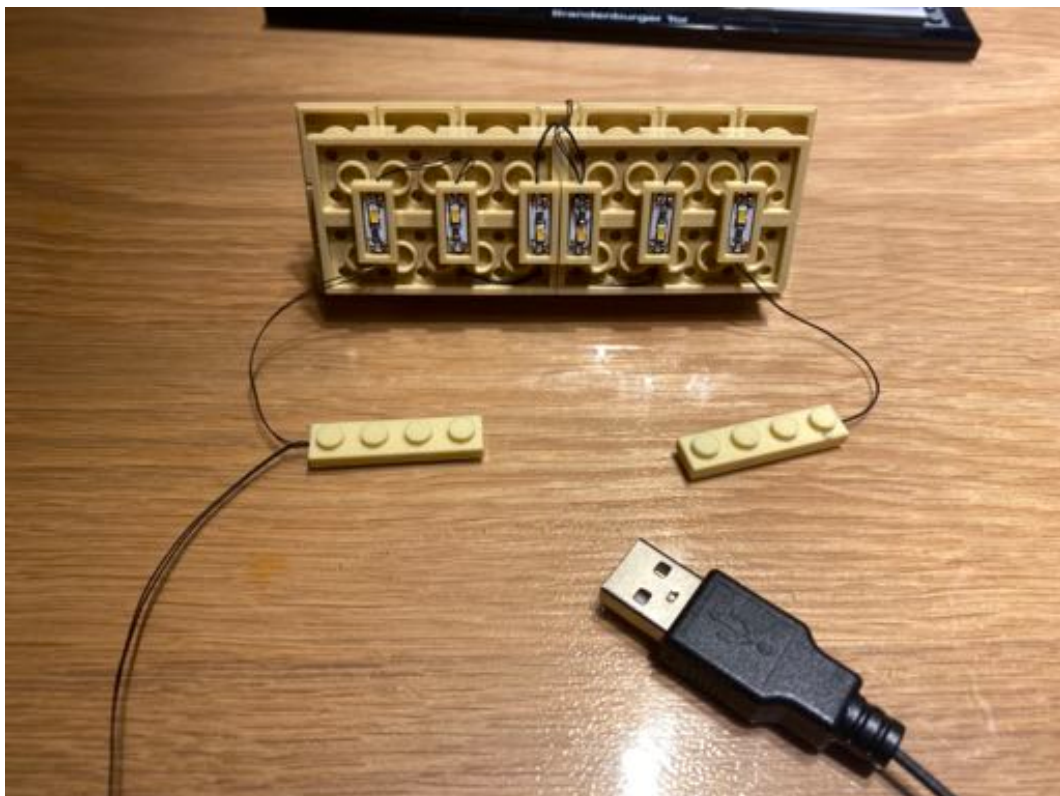

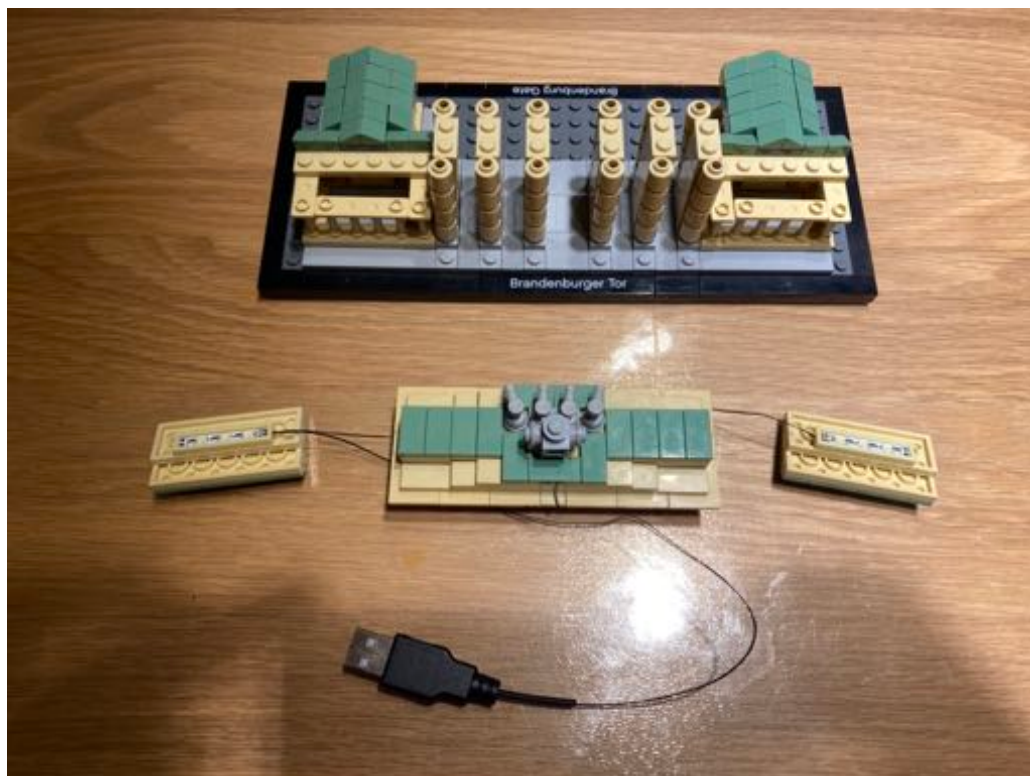

Then restore the removed parts back to the top

Assemble all the 1x2 lighting plates underneath the top  
Please follow the position exactly as the picture shown

Remove the top plates from both edges, then assemble the remain 1x4 lighting plates

To restore the whole building, start by any side of the edge then pull the wire to the middle carefully

After restored both edges, put the top back to the building  
Beware the wires won't be broken by the studs

Now you can light it up~
