

Lego 40478

Mini Disney Castle

Installation Guide

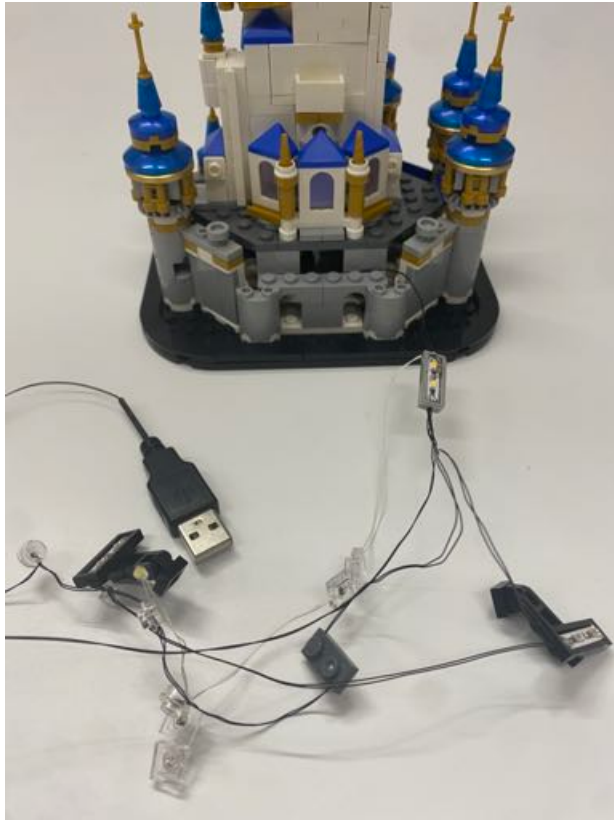

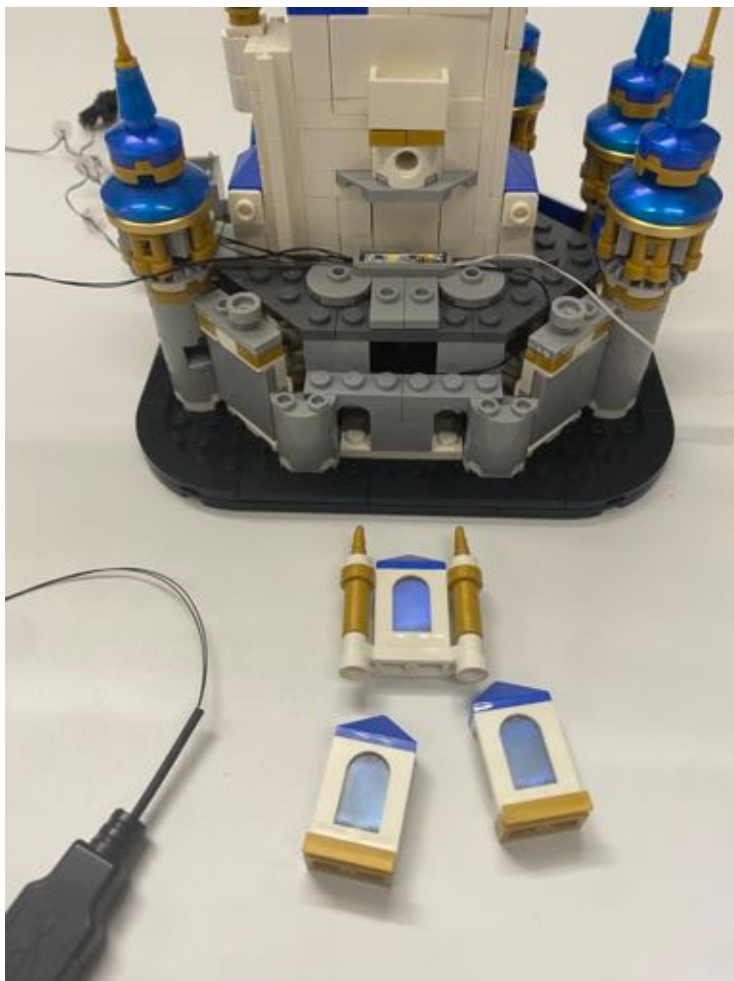

First of all, turn around the castle, detach the shown parts and remove the 2 pics of 1x3 arch

Replace the removed arches by the lighting parts

Then remove the shown parts and stick the lighting tiles on the shown position

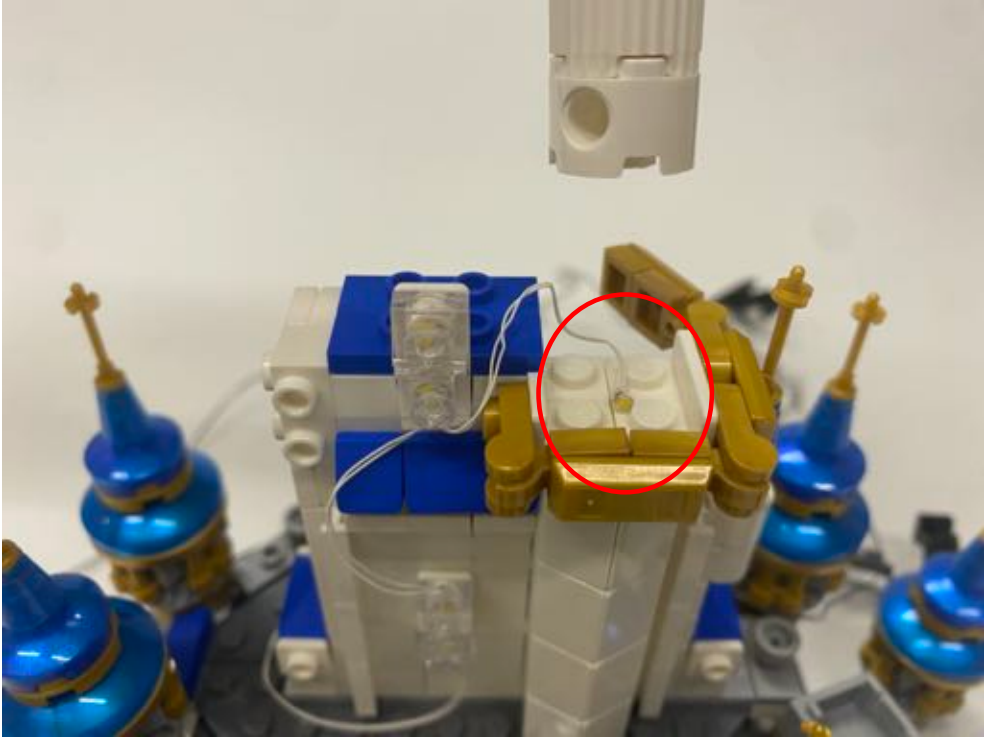

Then restore all the removed parts

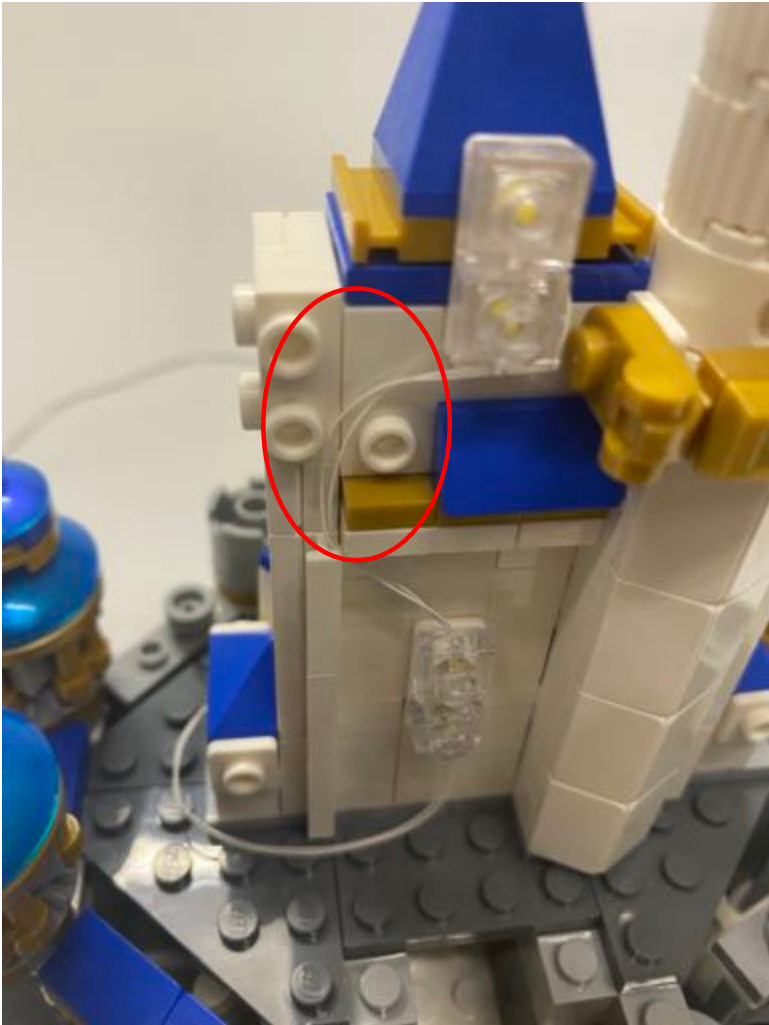

Turn back to the front side, remove the shown parts and assemble the clear parts as shown

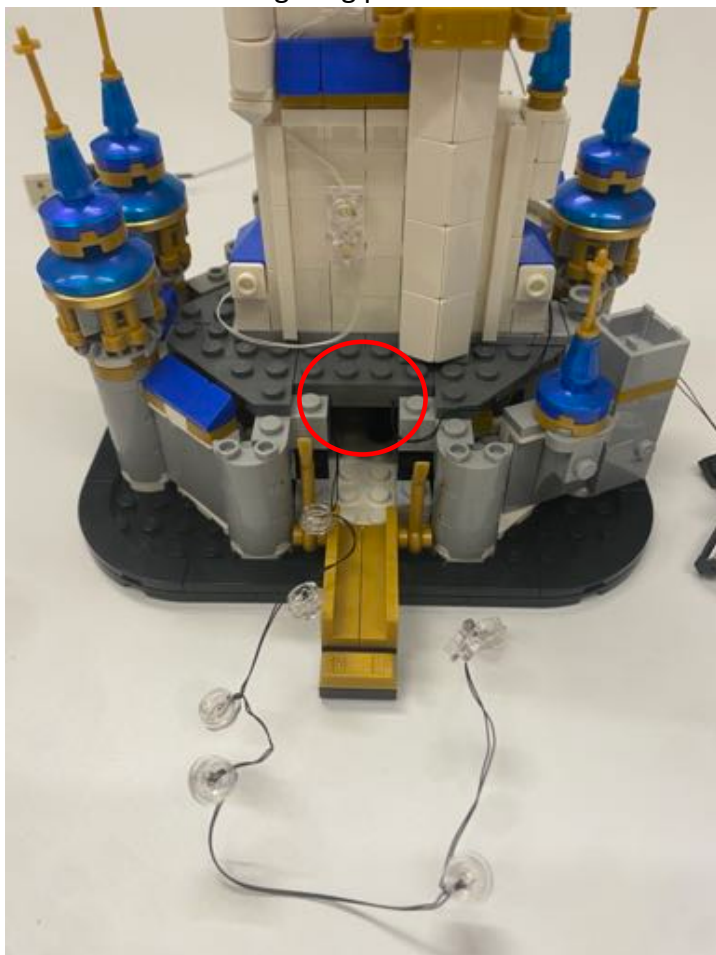

For the led at the end, take away the pole and place the led in between the studs

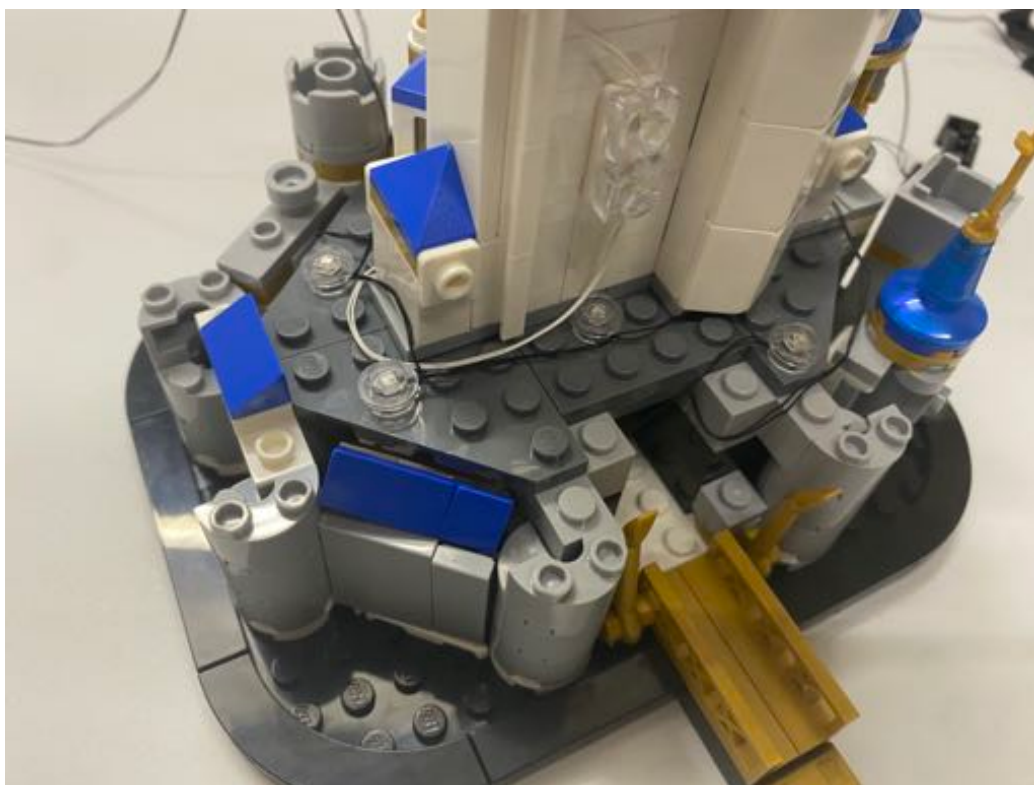

Then hide the cables underneath the parts

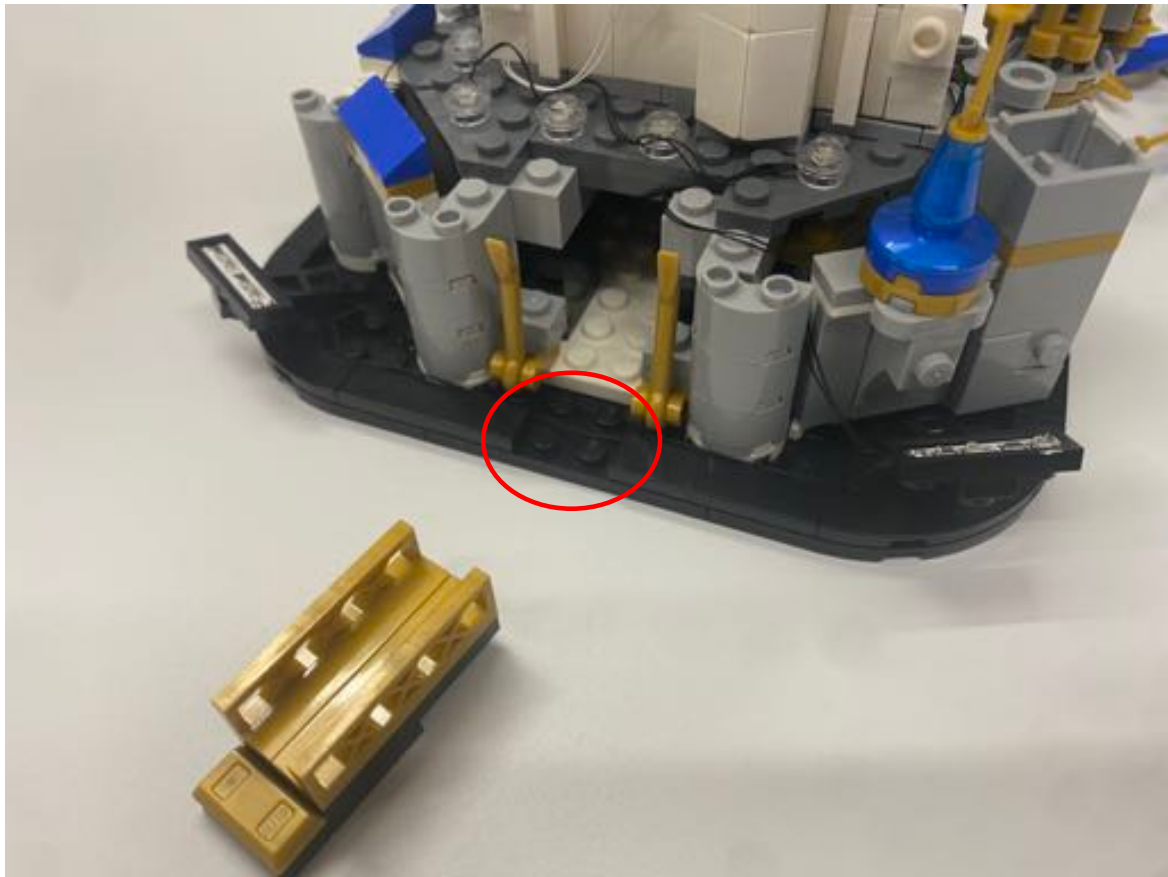

Assemble the 1x2 lighting plates at the front door

Then assemble the clear lighting round plates on the platform randomly

Then assemble the black spot lights on 2 sides of the front
For the wire in between, remove the bridge and place the wires in between the studs

At last you can light it up~
