

# Lego 76239

**Batmobile Tumbler:  
Scarecrow Showdown**

## *Installation Guide*

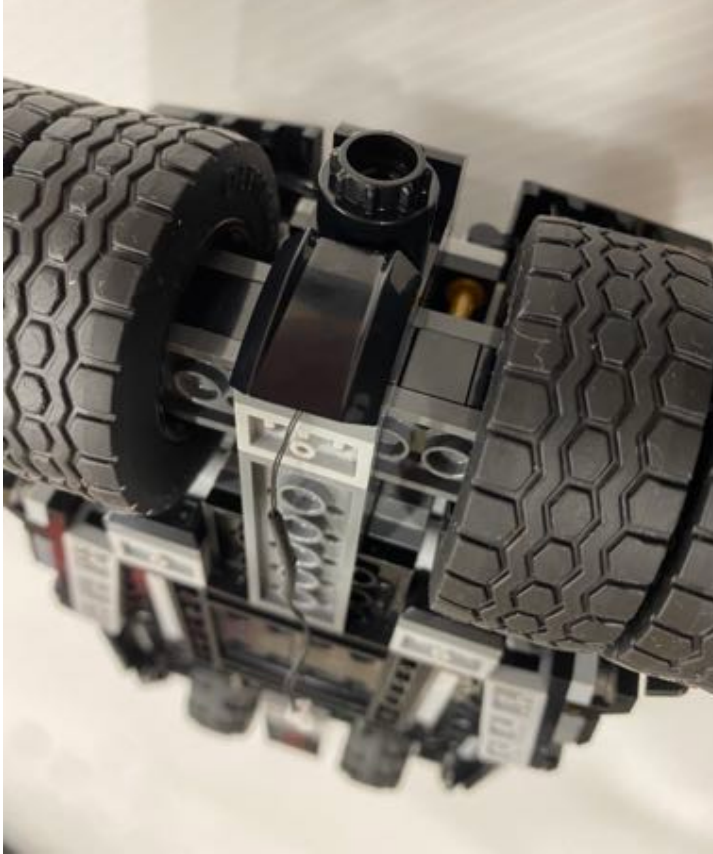

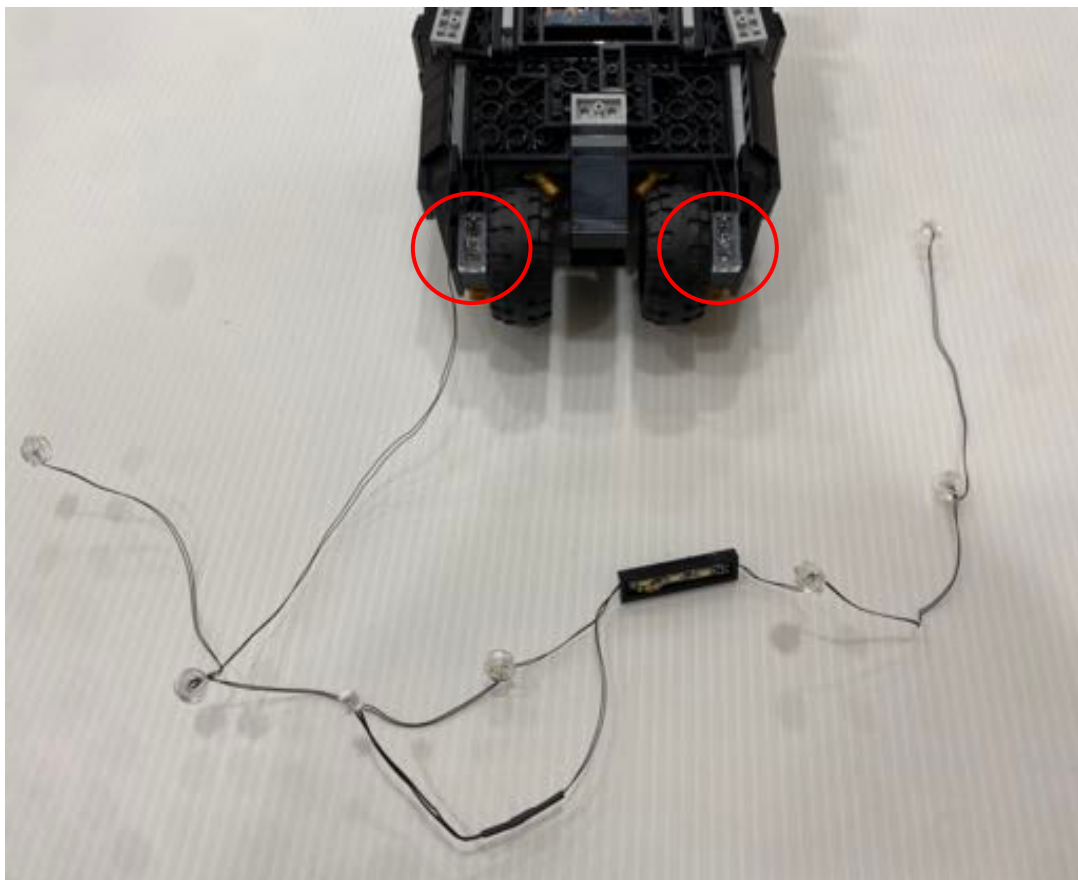

Take the black lighting part to replace the 2x2 tile with pin on the back

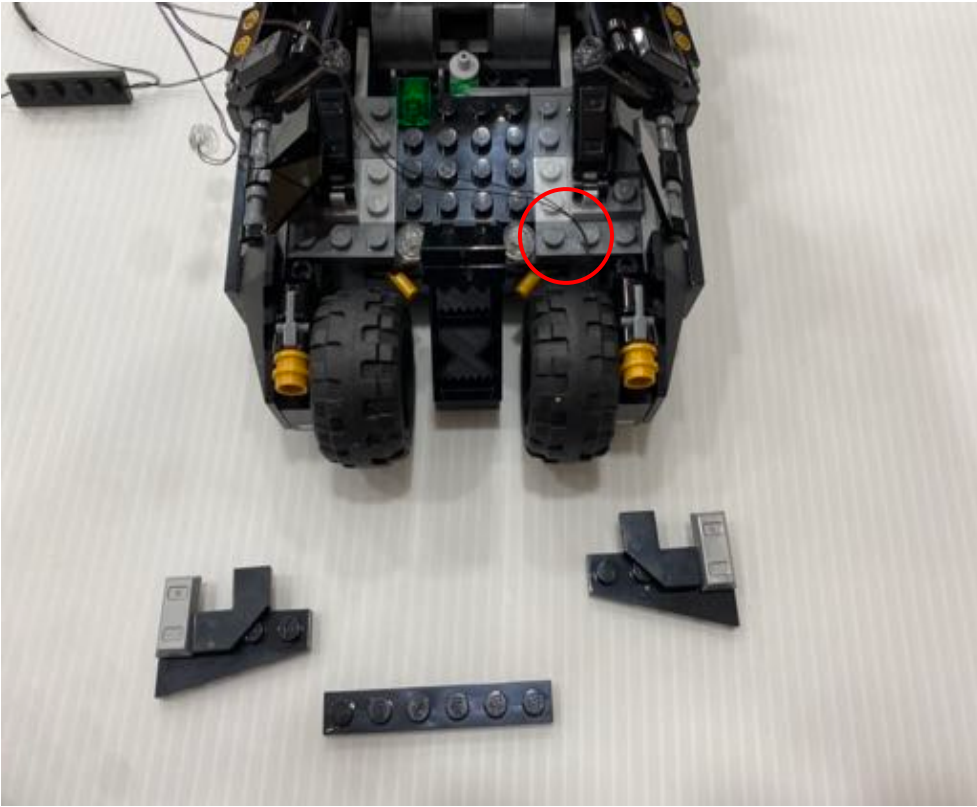

Restore the removed parts from previous step and stable the wire

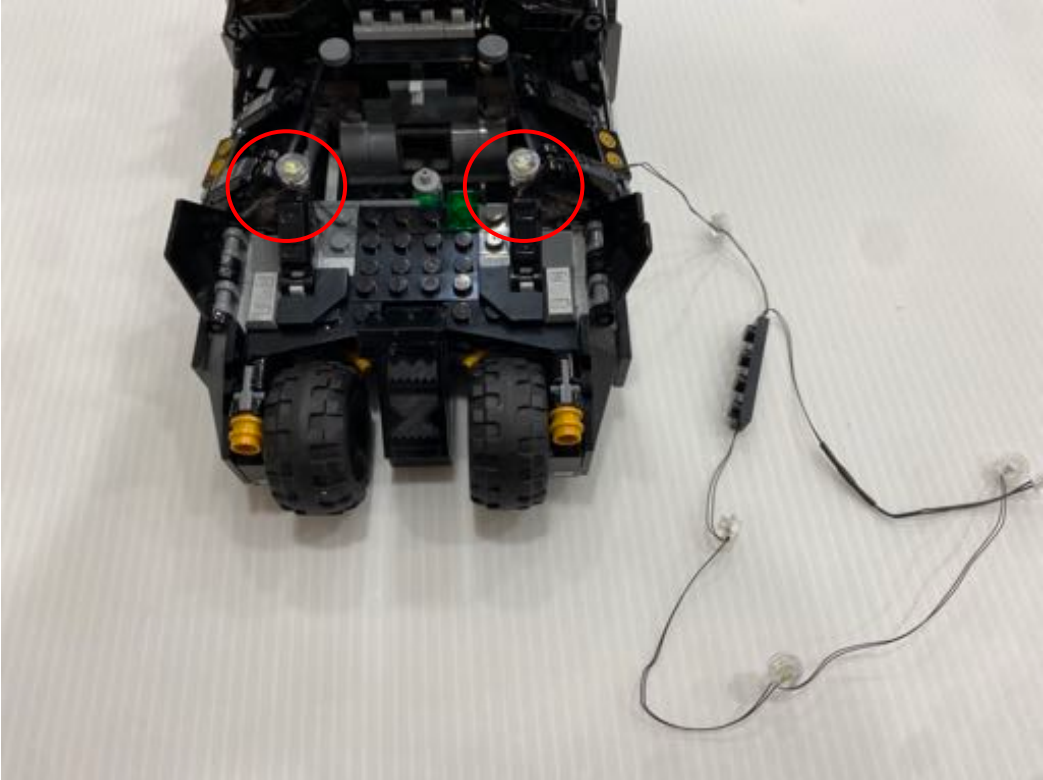

Turn around the car, assemble the 1x2 lighting plates as shown

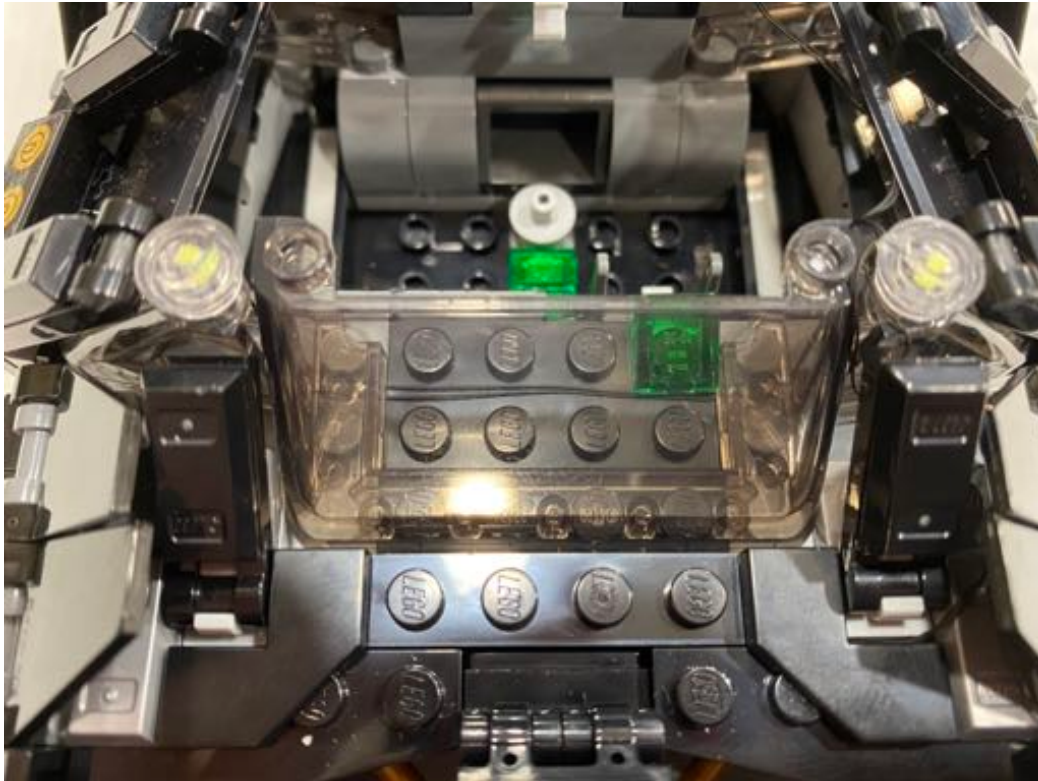

Move the lighting parts to the top, remove the shown parts to hide the wires in between the studs

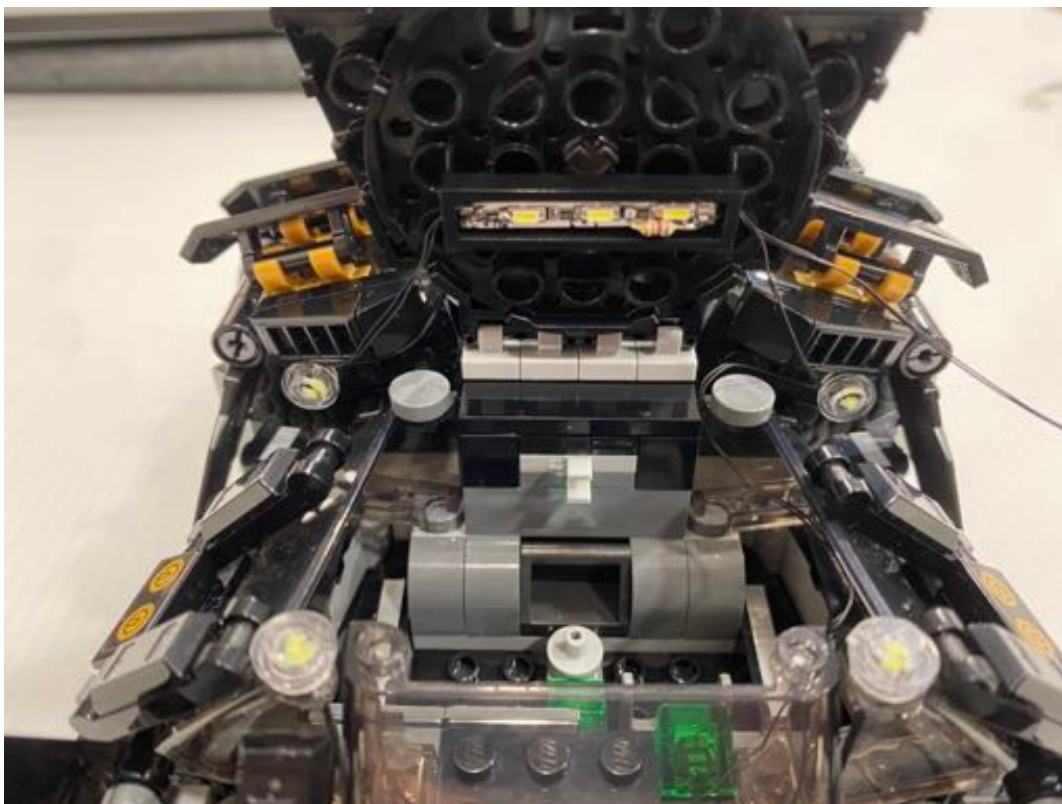

Assemble the 2pcs of lighting round plates after removing the round plates on that

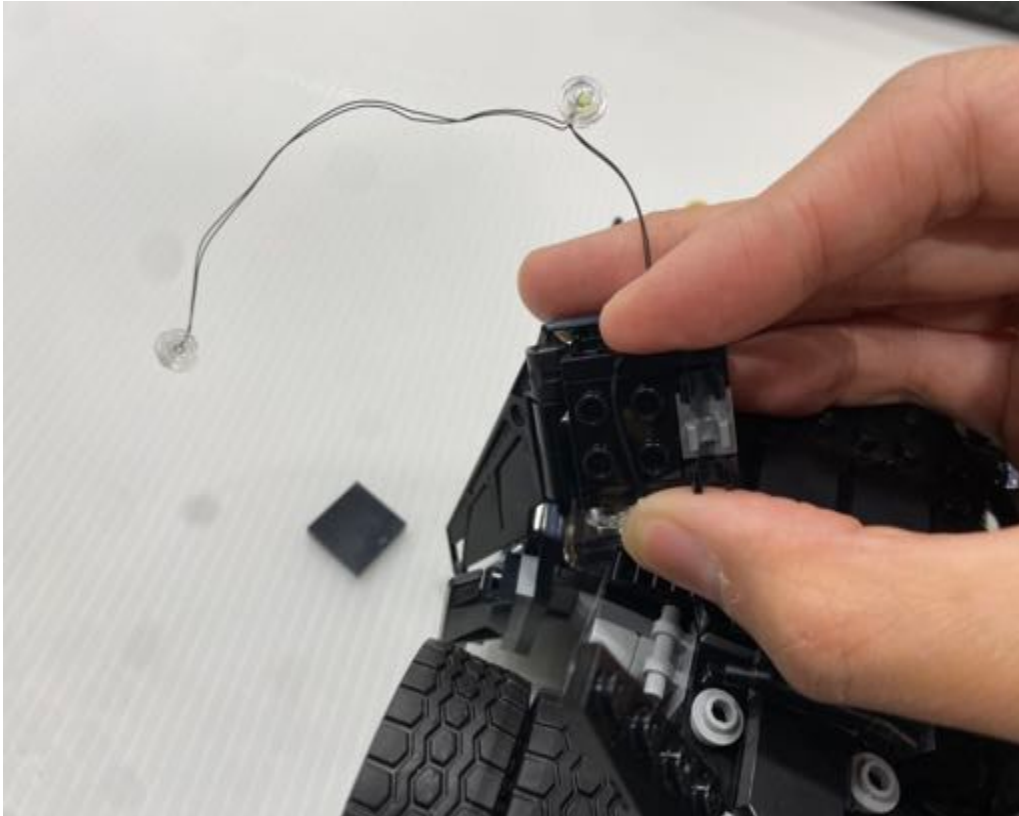

Put the windshield back and stable the wire underneath it

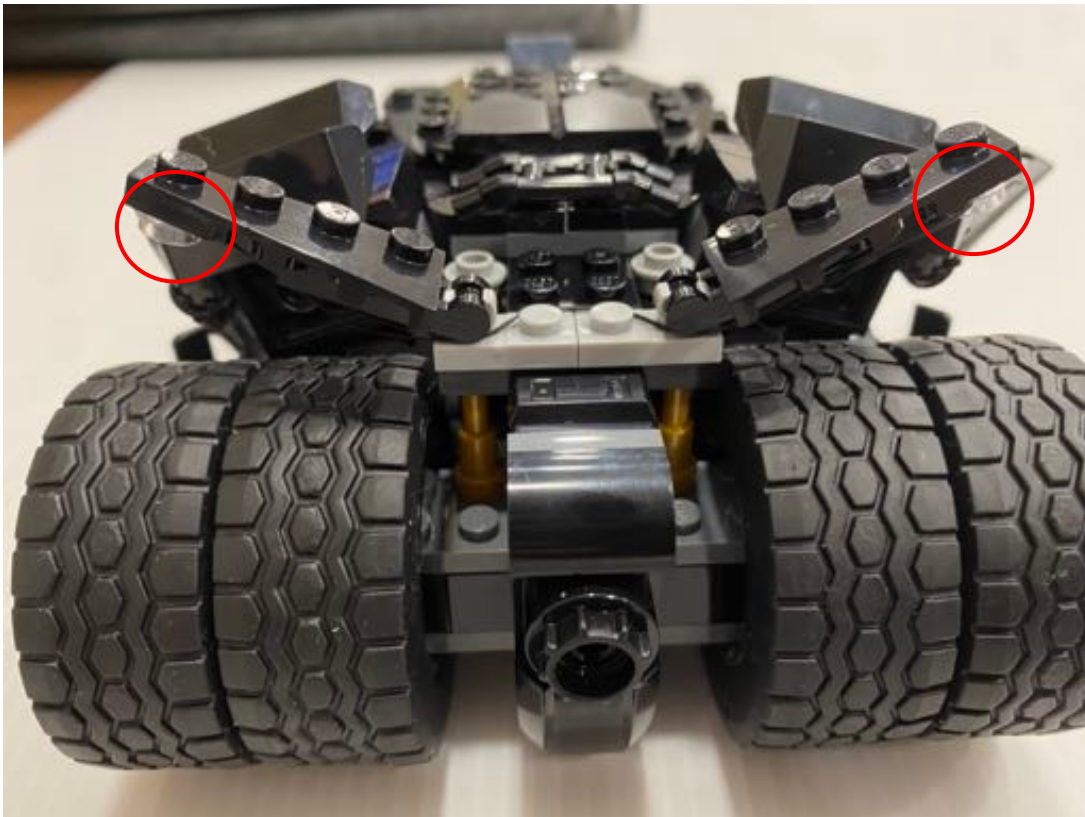

Assemble the 1x4 lighting plate and two round plates next to the plate on the shown position

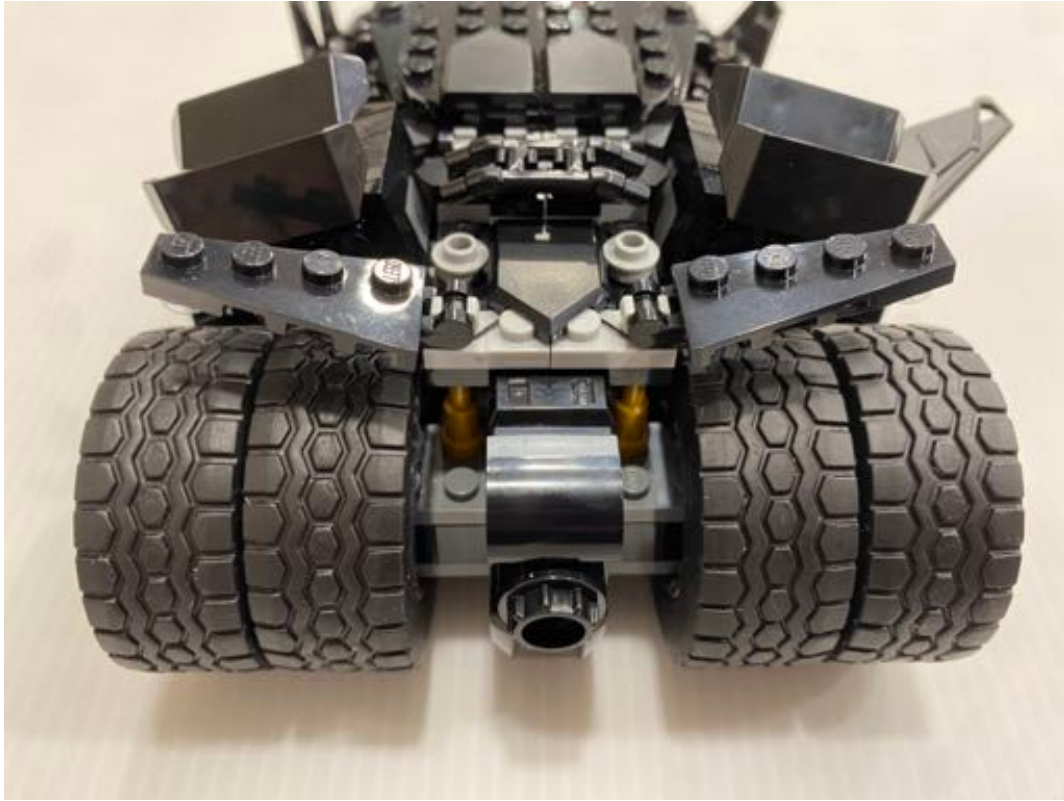

Move the remain lights to the rear side, the wire can be stabled in here

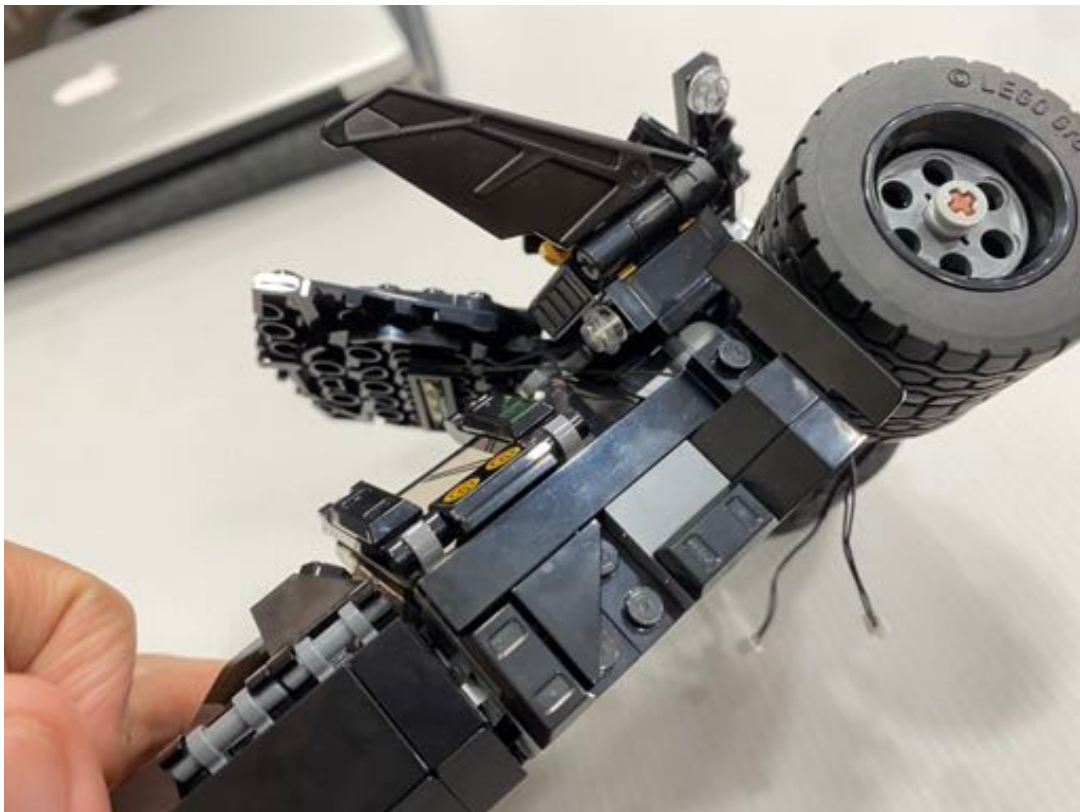

Assemble the lighting round plates underneath the spoiler  
The wire can be hidden in between the studs in middle

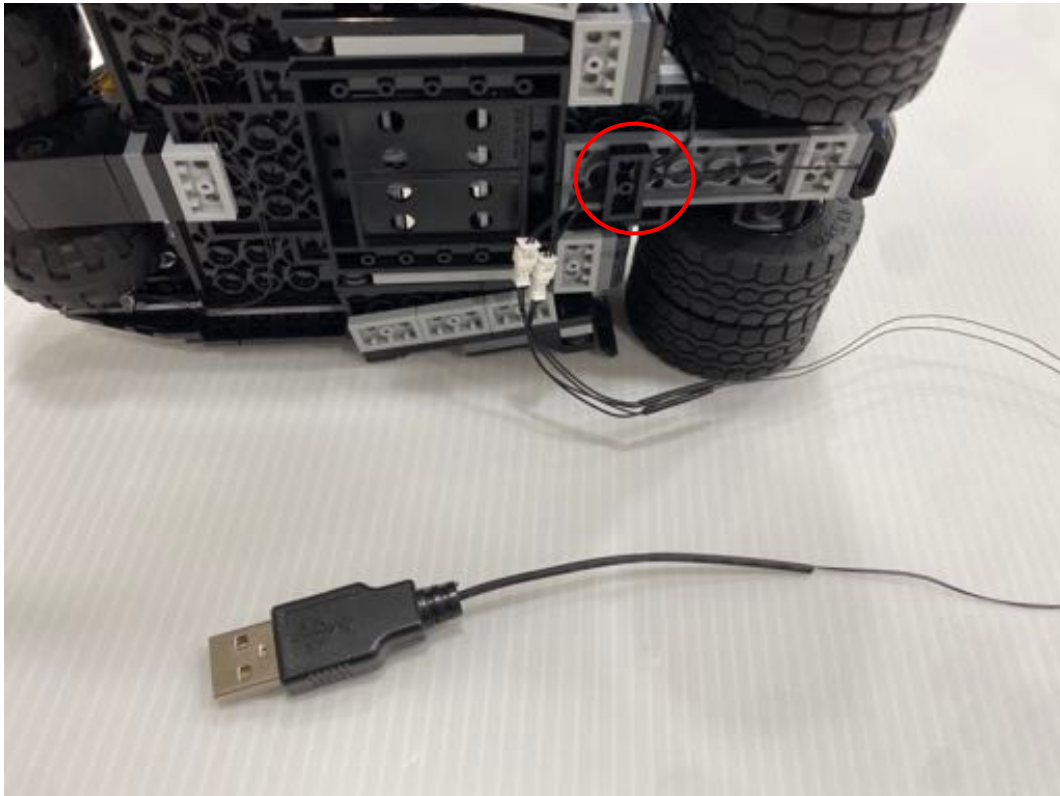

Put the tile back, try to make the wires invisible

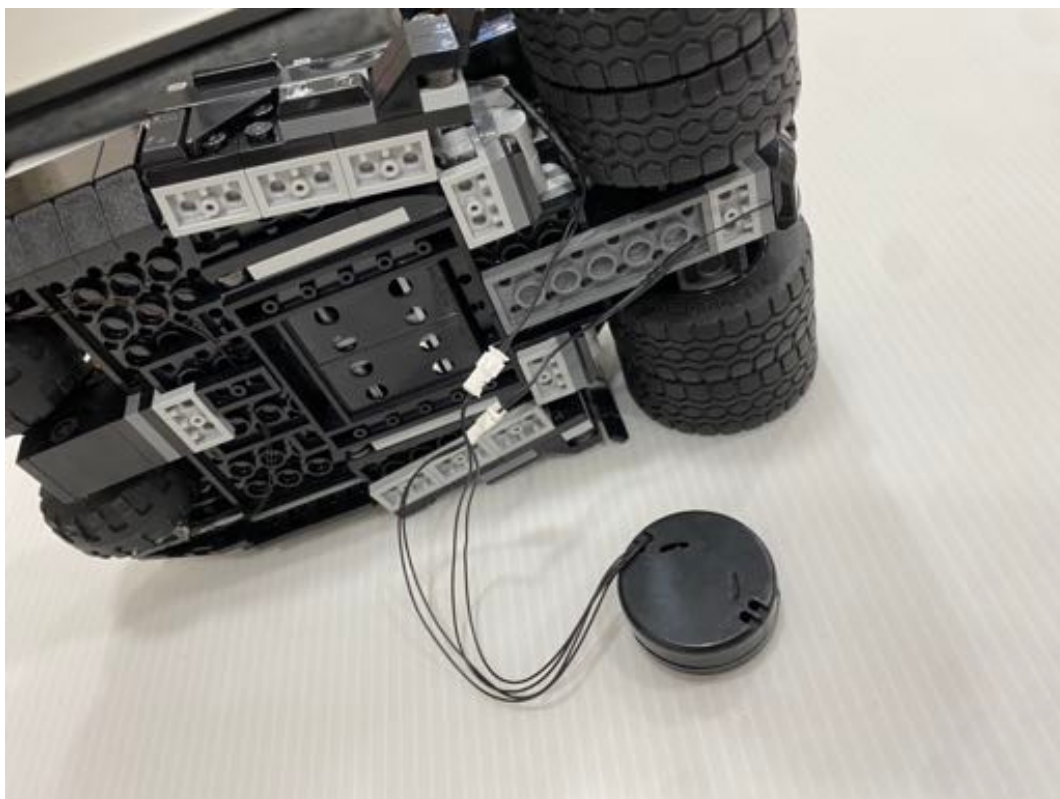

Move the connectors to the bottom of the car from the side

Use the plates provided to stabilize the wire, then connect to the USB cable

To power by battery connect with the battery case

Or you can put the battery case inside the car then move the connectors to the bottom through the space in red circle

Then connect with the connectors from the lights and stable the wires by the plates provided
