

Lego 40532

Vintage Taxi

Installation Guide

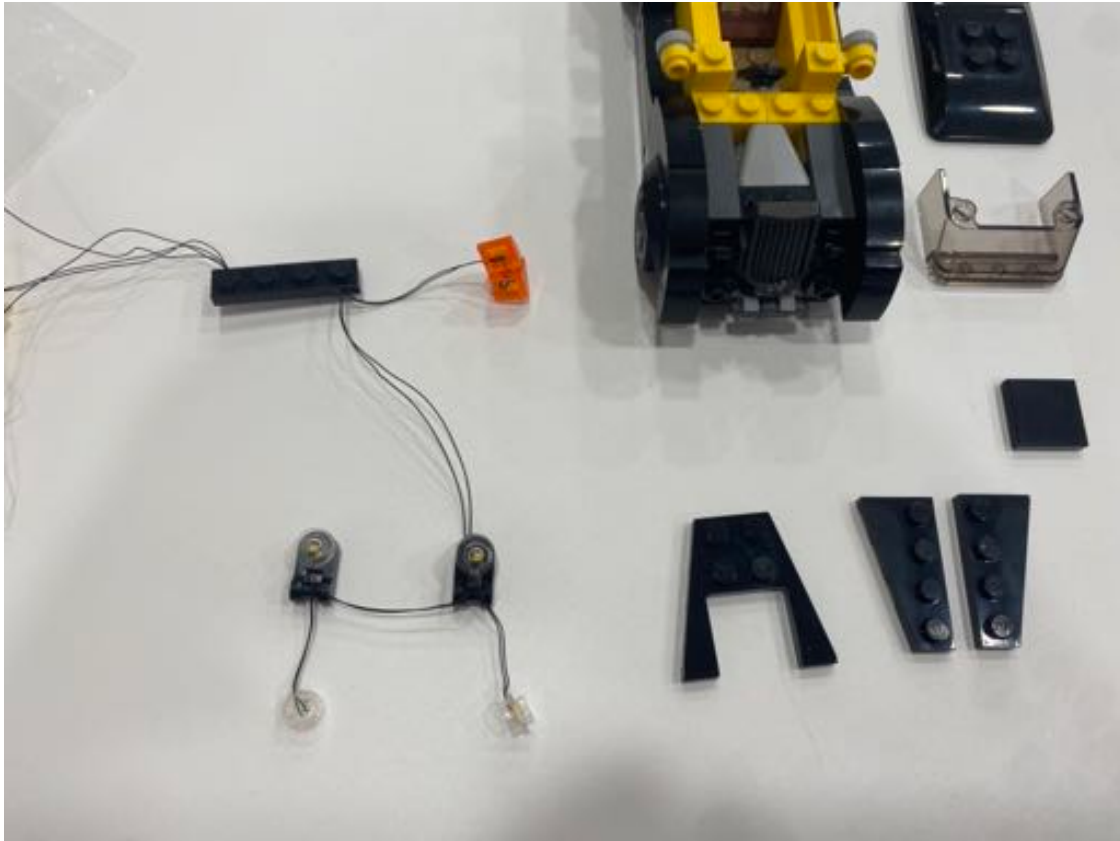

First, detach the front side of the car as shown

Remove the round plates from the detached headlight and replaced by the lighting parts

Assemble the headlights and cover the wires in between the studs

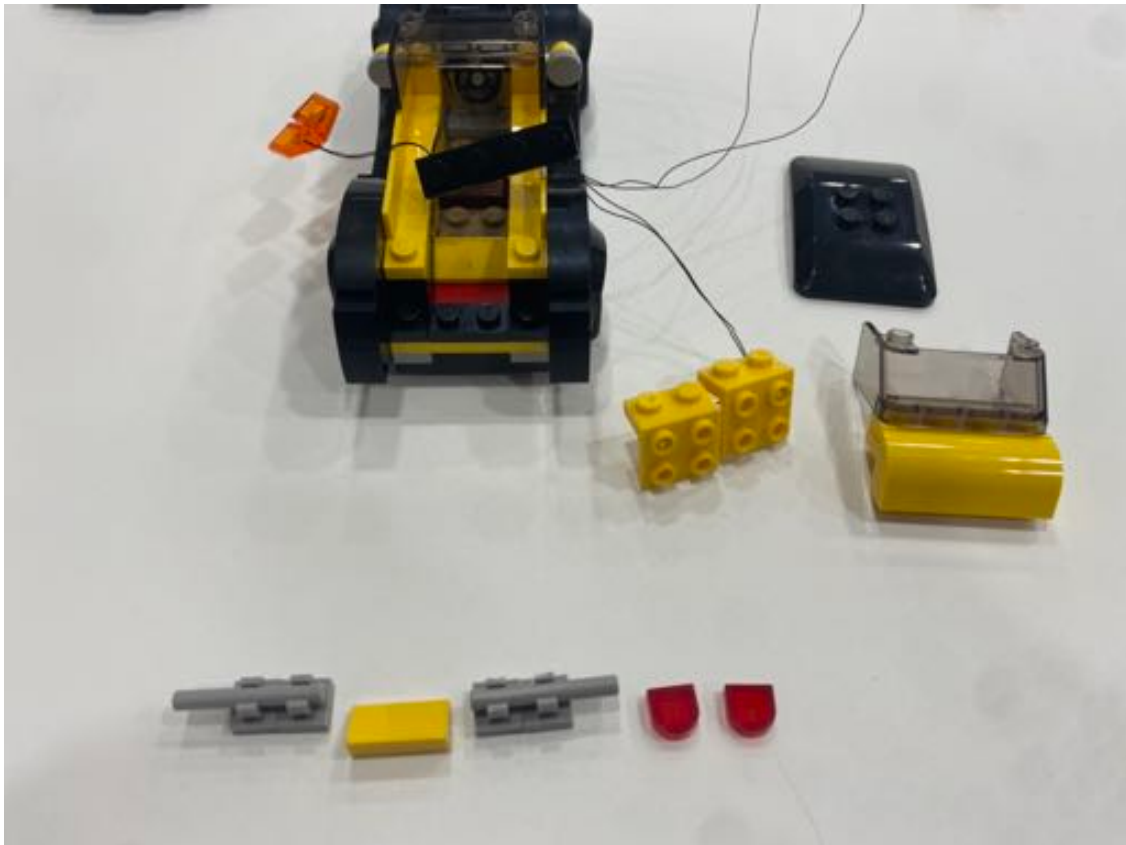

Move the remain lights to the back

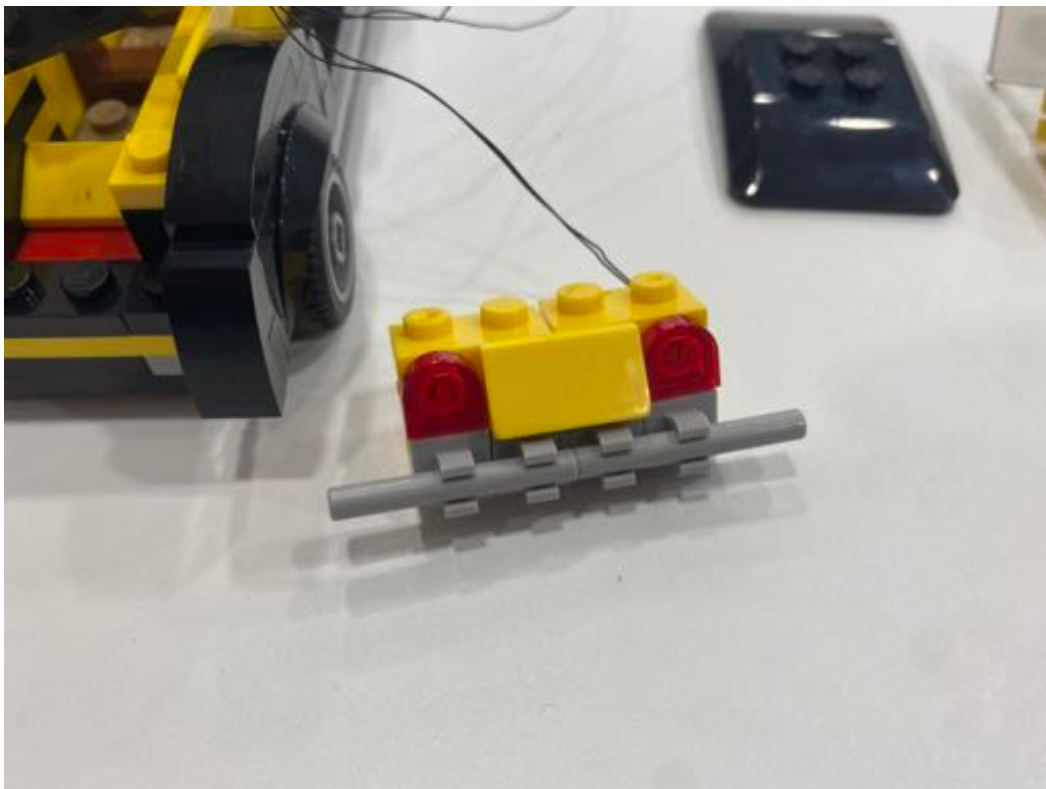

Restore the removed parts to finish the front part installation

For the rear side, detach the shown parts

Then reassemble the rear lights with the lighting parts

To put the rear light back to the body, it's better to remove the shown black part in purpose to hide the wires next to the tire

Then the wires will be hidden nicely

Then assemble the 1x4 lighting plate as the interior light

At last, replace the orange slopes on top by the lighting parts

For the separated yellow lighting part will be used to assemble on this post
