

Lego 76408

Harry Potter

12 Grimmauld Place *Installation Guide*

First of all, split the 2nd+3rd floor on both sides

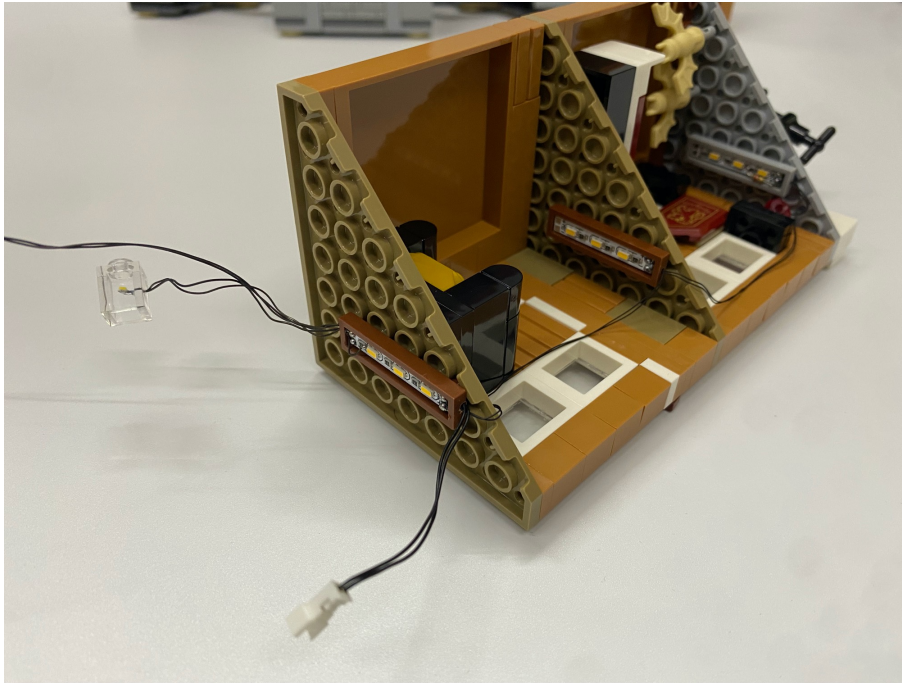

Take the lighting part with the red diamond for the shown side

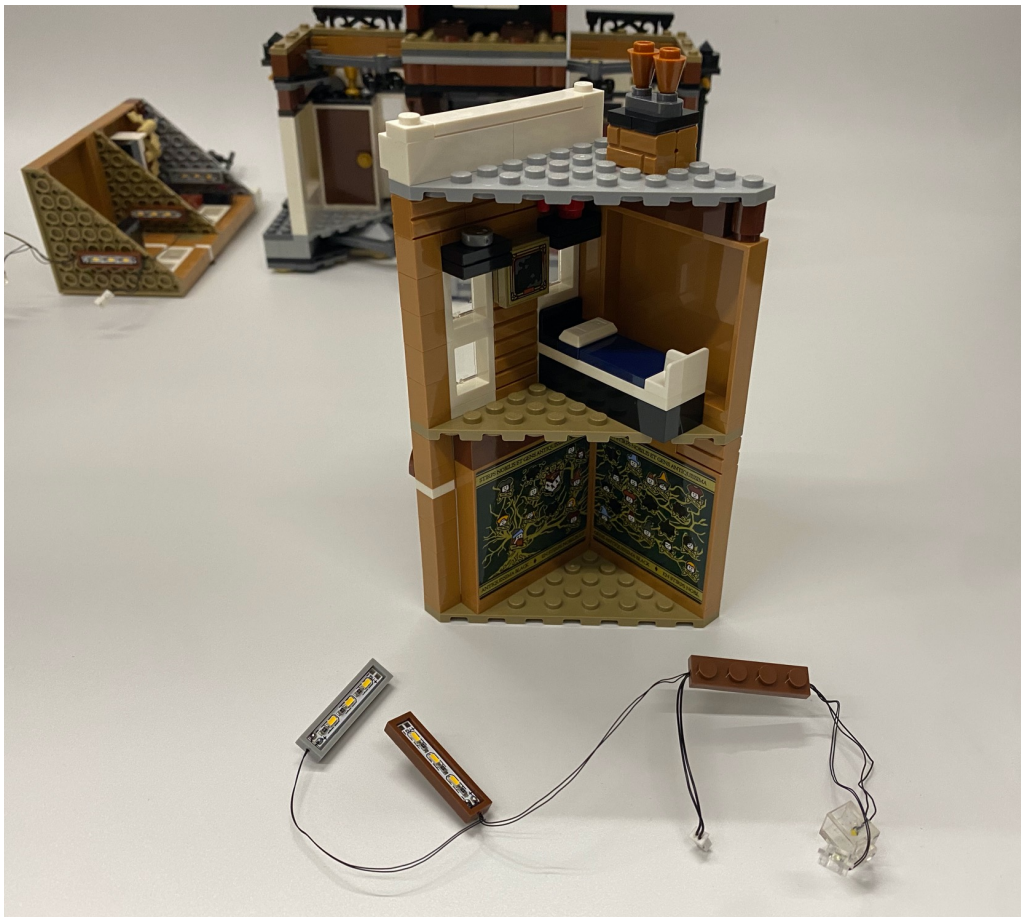

Assemble the grey 1x4 lighting plate and the red diamond at the top floor

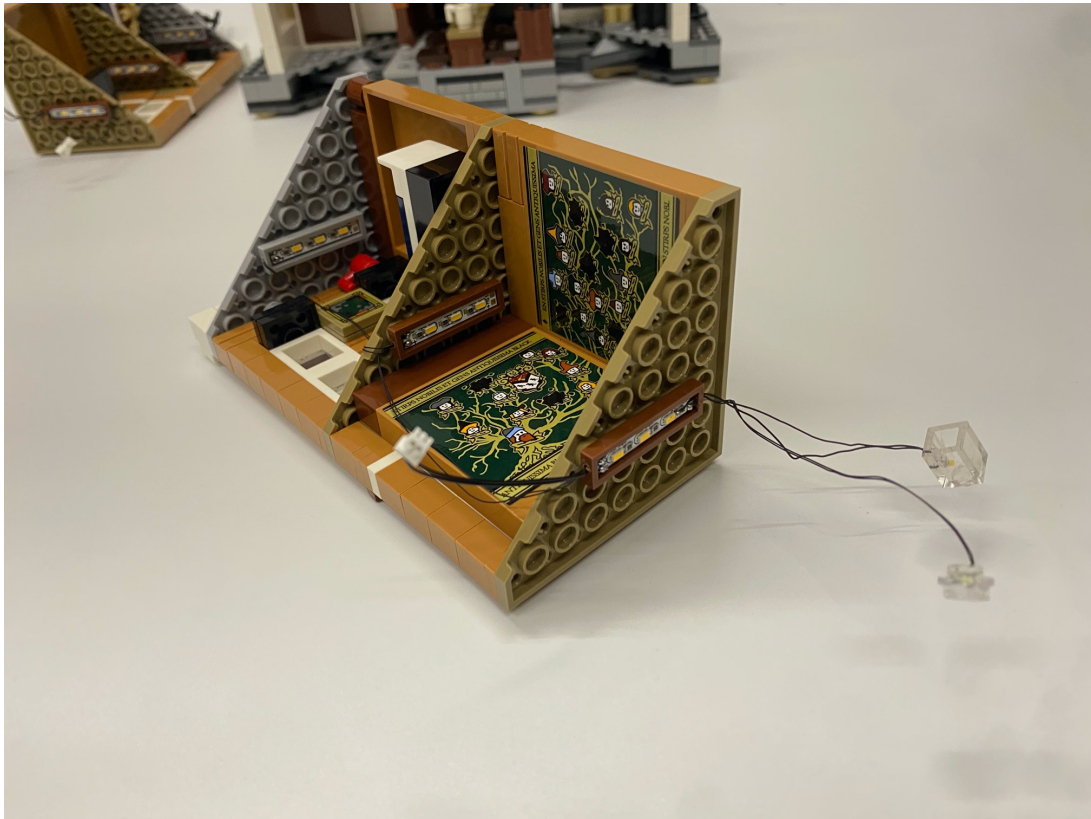

Then assemble the remain lighting plates at shown

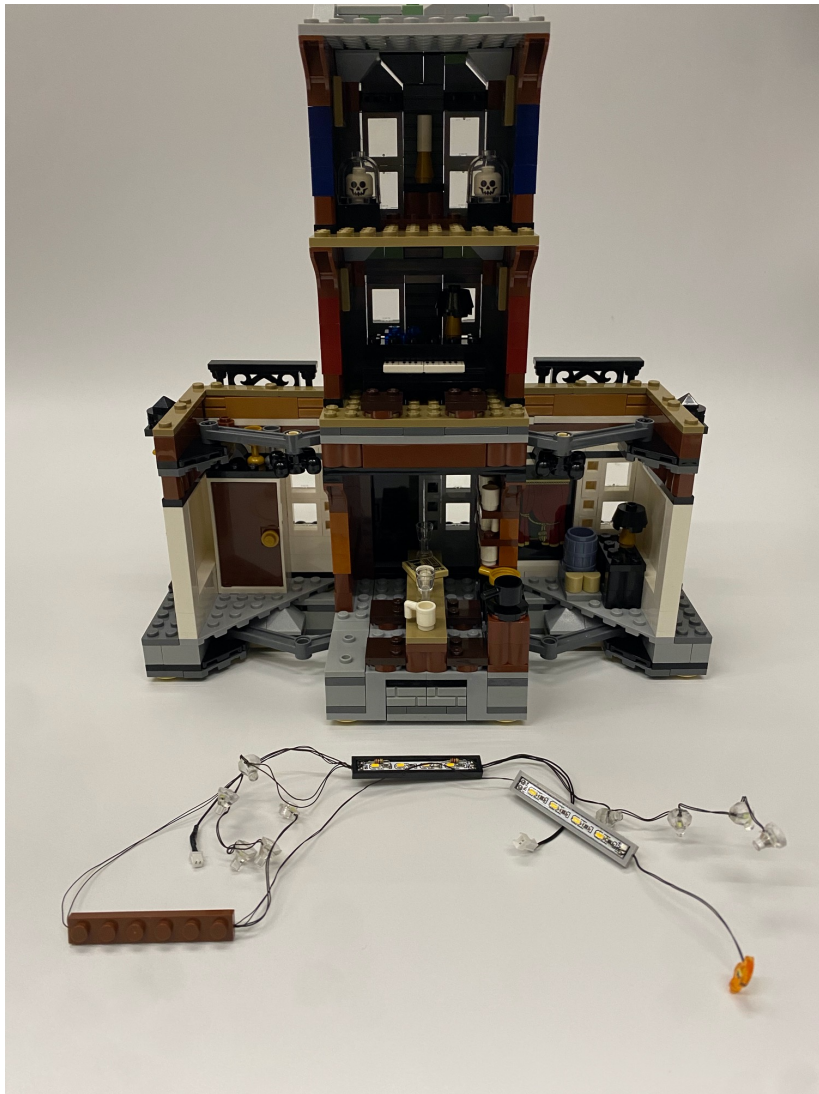

Take this lighting part for the other side

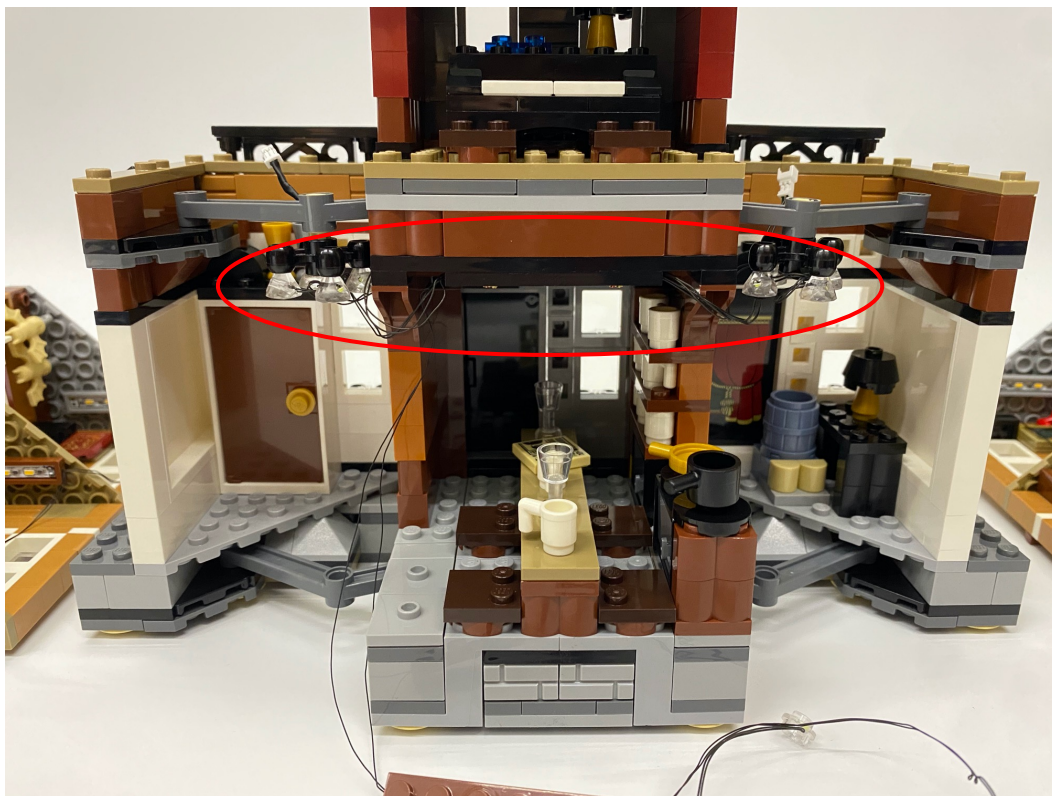

Similar as the previous side to assemble three lighting plates

Now take the remain lighting part to assemble it into the main building

Start by assembling the black lighting plate and the clear diamonds
And make sure the position of the connectors must be **male on left female on right**

Otherwise it won't match the plugs when placing the upper level back on the building

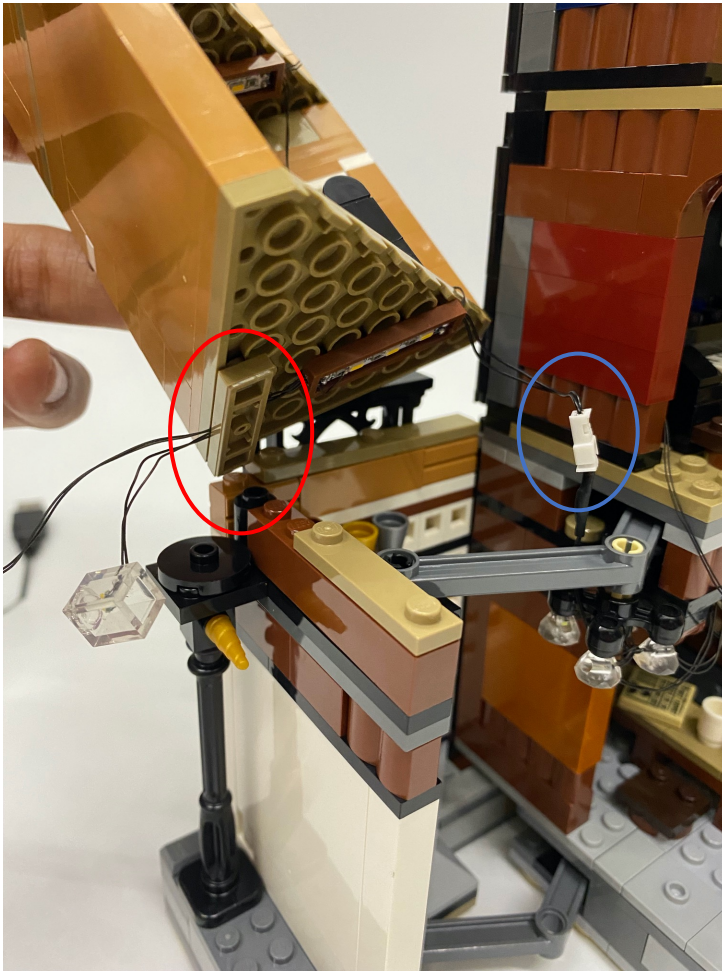

Assemble the brown lighting plate and the lighting round plate for the lamp

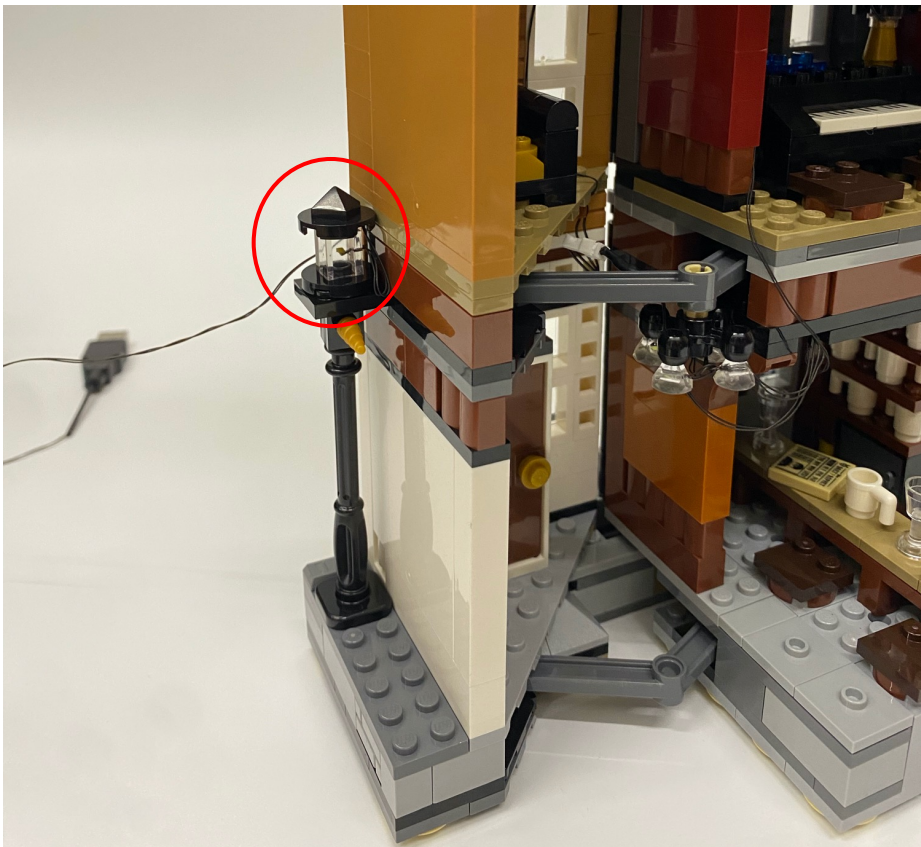

And the top level follow by

Now placing the upper level back, take the tile out the clip the wire as shown in the red circle, then connect the plugs

Restore the building, then replace the clear brick by the leftover lighting brick

Now do the same thing for the other side, and put the lighting round plate inside the wall

At last, replace the lighting round plate from the previous step to the lamp
