# Lego 76223

Nano Gauntlet

Installation Guide

First of all, detach all the infinity stones
Split them apart and use the lighting plates to replace the bottom plates of
each stone

The stones would look like this after, make sure the position is followed by the picture

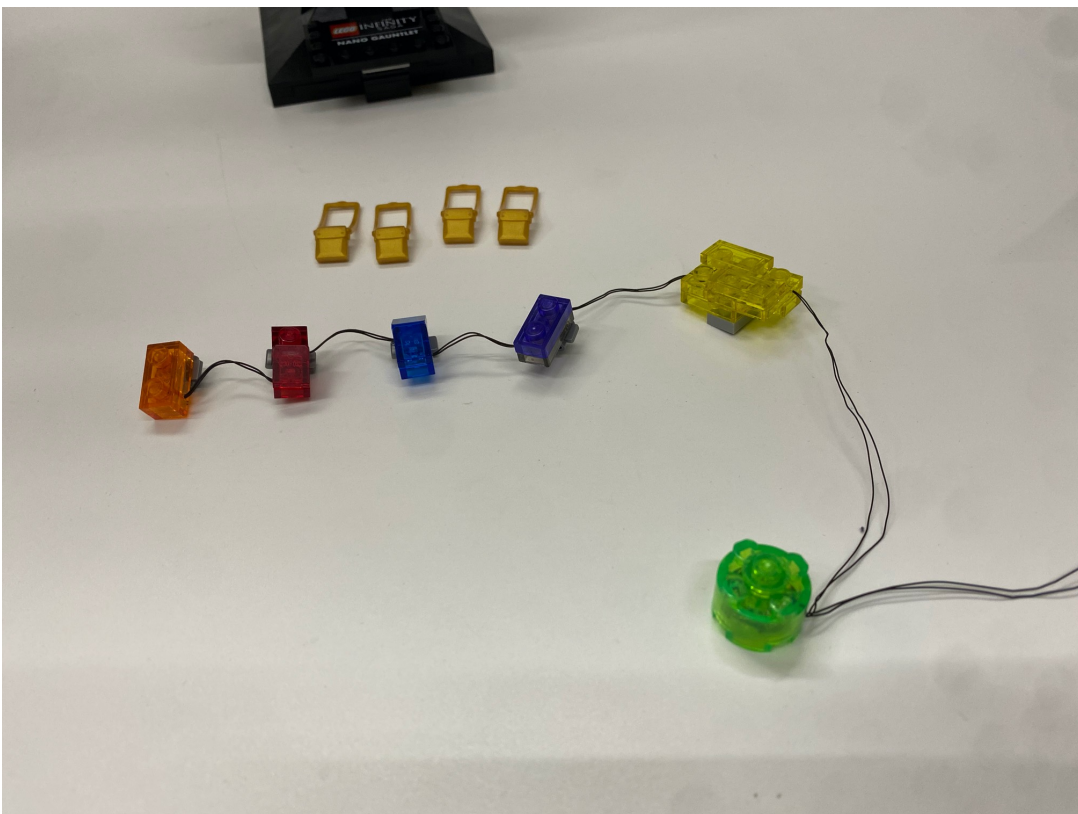

Then it's turn for the soul stone, replace the there plates at the middle by the lighting plates, place the tiles on the lighting plates first then place on the ladder shape
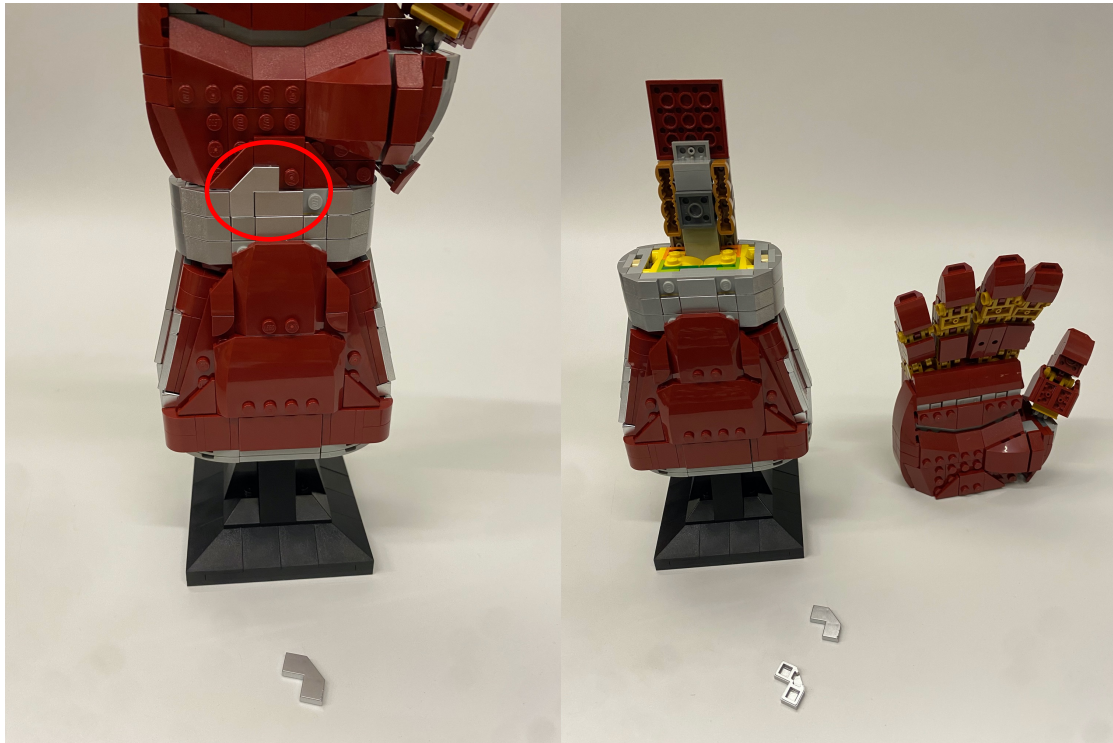

For the time stone, simply just put the green round plate on it

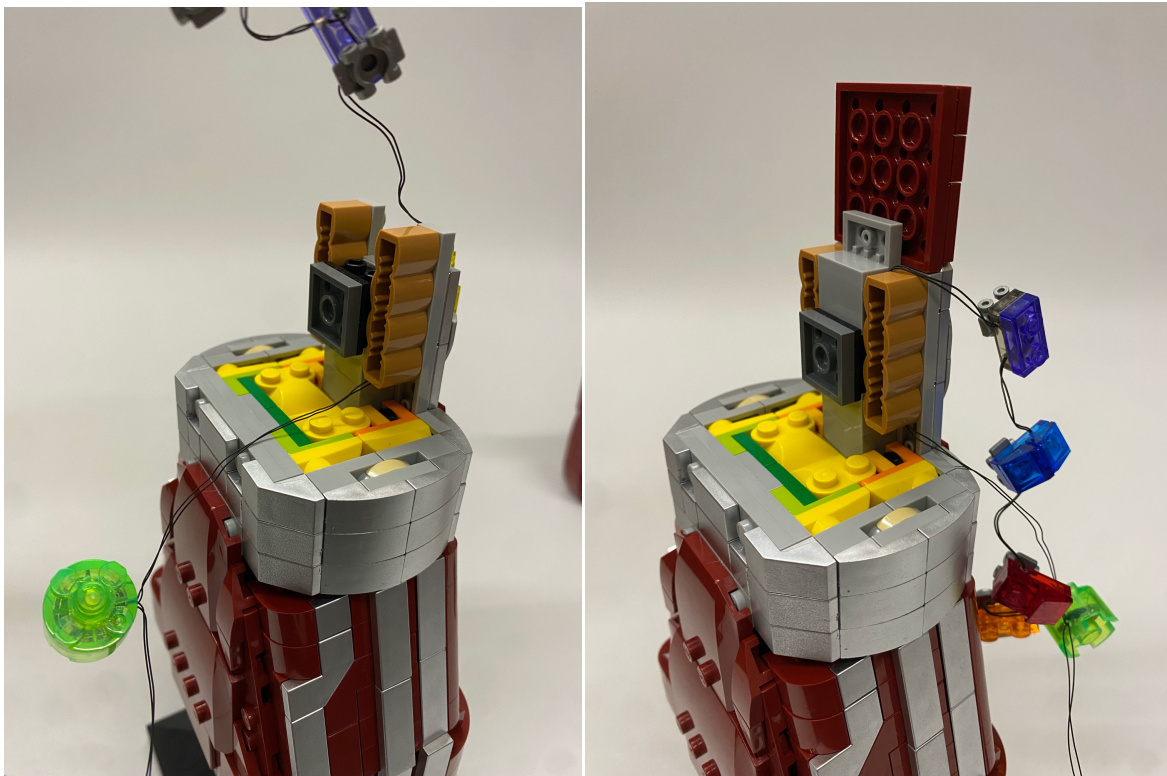

Now the six stones are ready

Before put the stones on the gauntlet, release the palm out by removing the shown tiles to unlock it first

Turn the gauntlet around, remove the shown part and take out the 2x2 tile with stud at centre and merge with the soul stone

Then put the soul stone and it's bracket back to the gauntlet

Move the rest stones to the front and put the palm back, detach the shown part
to leave space for the wire of time stone
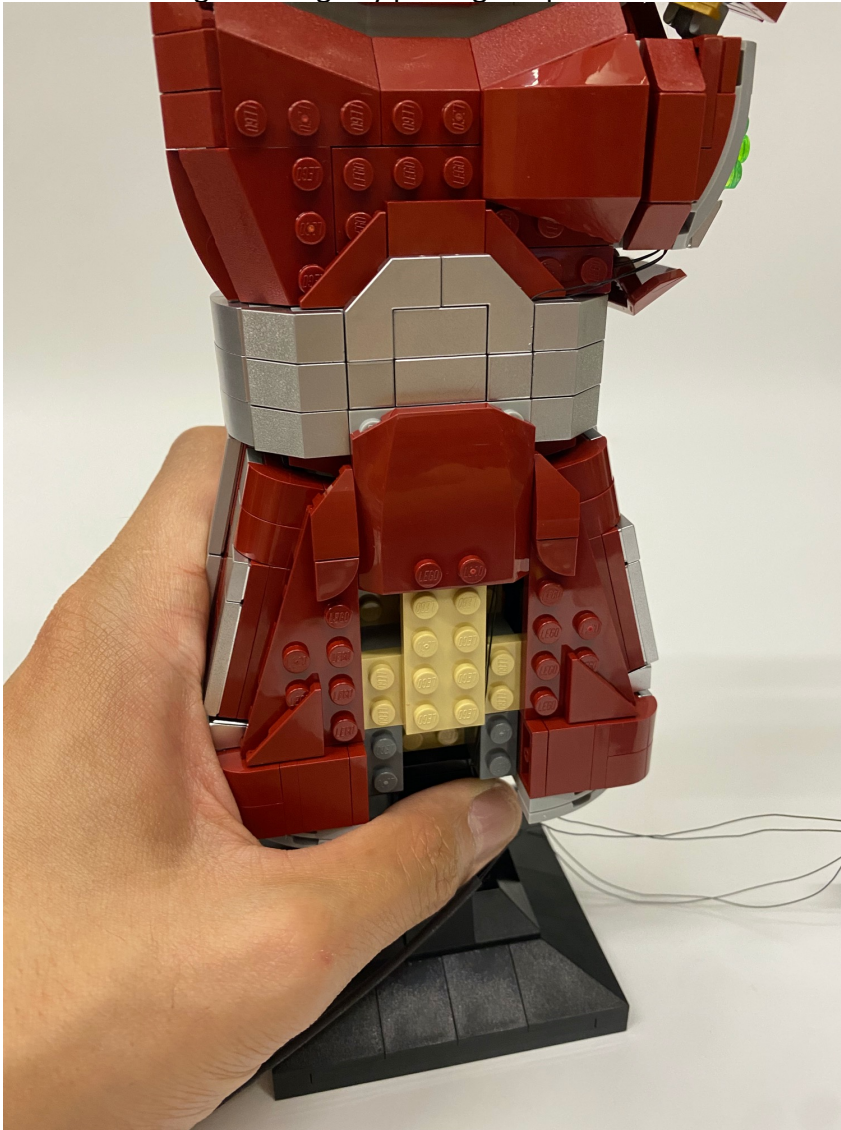

Now restore the four stones back to the spot

Remove the thumb and the bracket of the time stone and place the stone on it

Restore the parts, the wires should be invisible except between four small stones

Turn around the gauntlet, remove the shown parts and hide the wires underneath
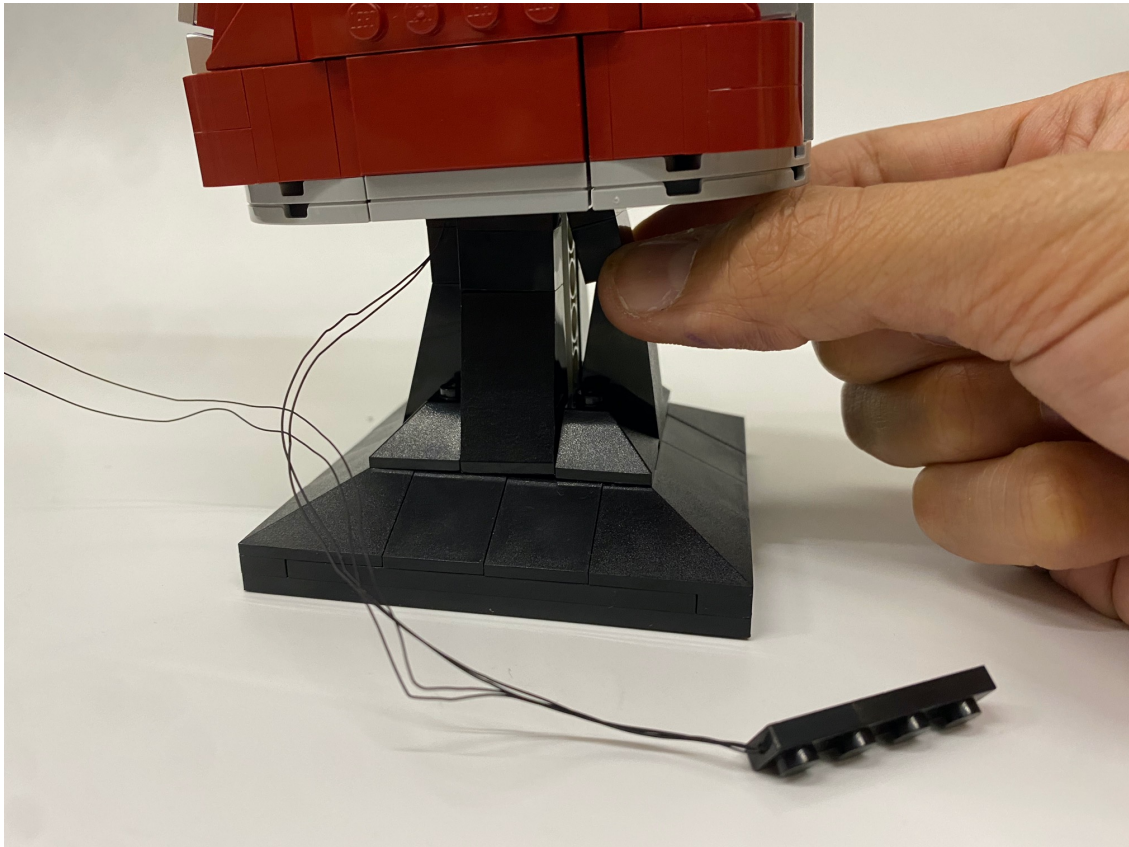

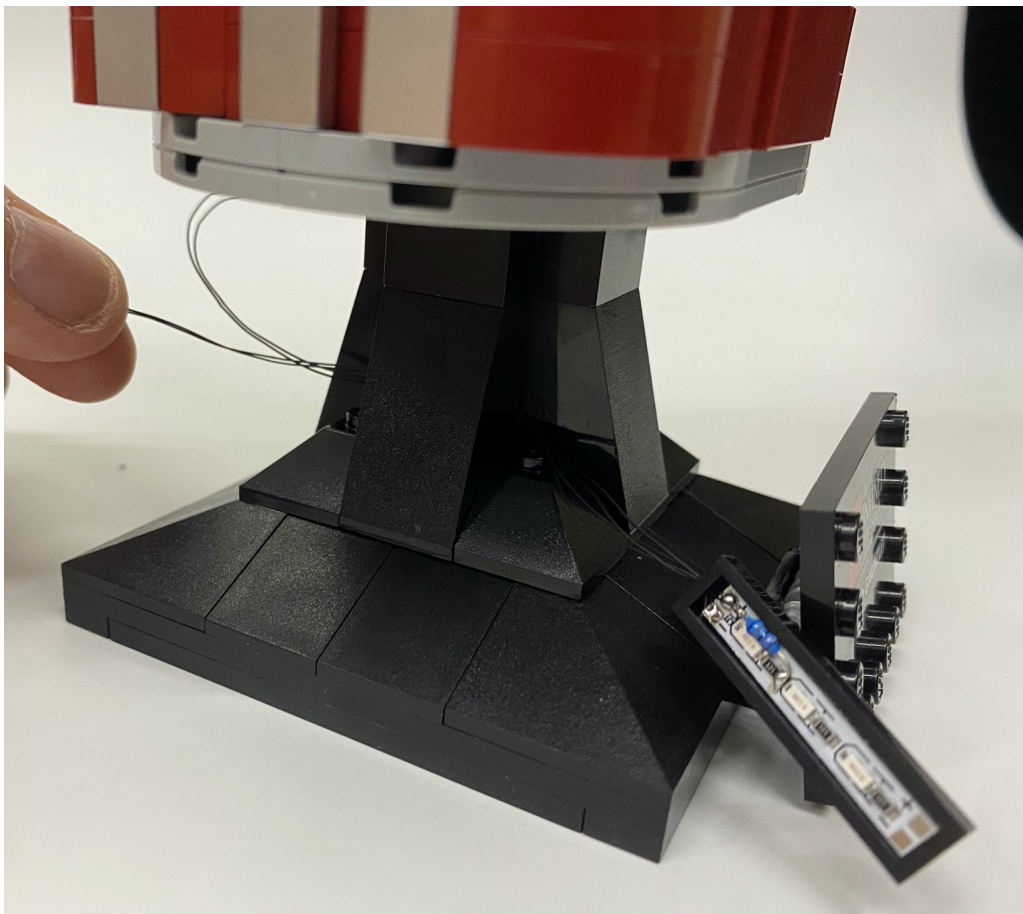

Hold the wire by your finger when putting the removed parts back to avoid it get on studs and get damage by putting the parts on

To move the remain black lighting plate to the front, you can make a space at the shown place

Get the lighting plate through the hole to the front

Then place the lighting plate behind the board
