

# Lego 42141

## McLaren Formula 1 Race Car

*Installation Guide*

Take the shown lighting part and start assembling from the rear

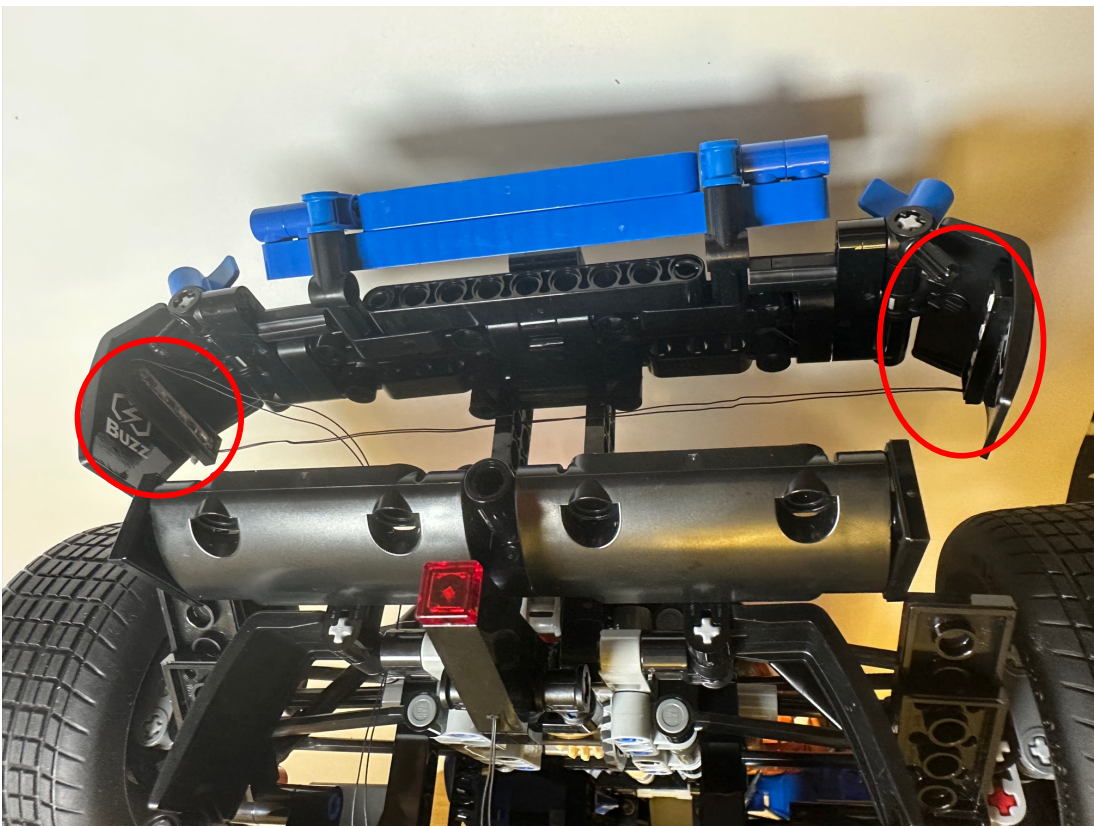

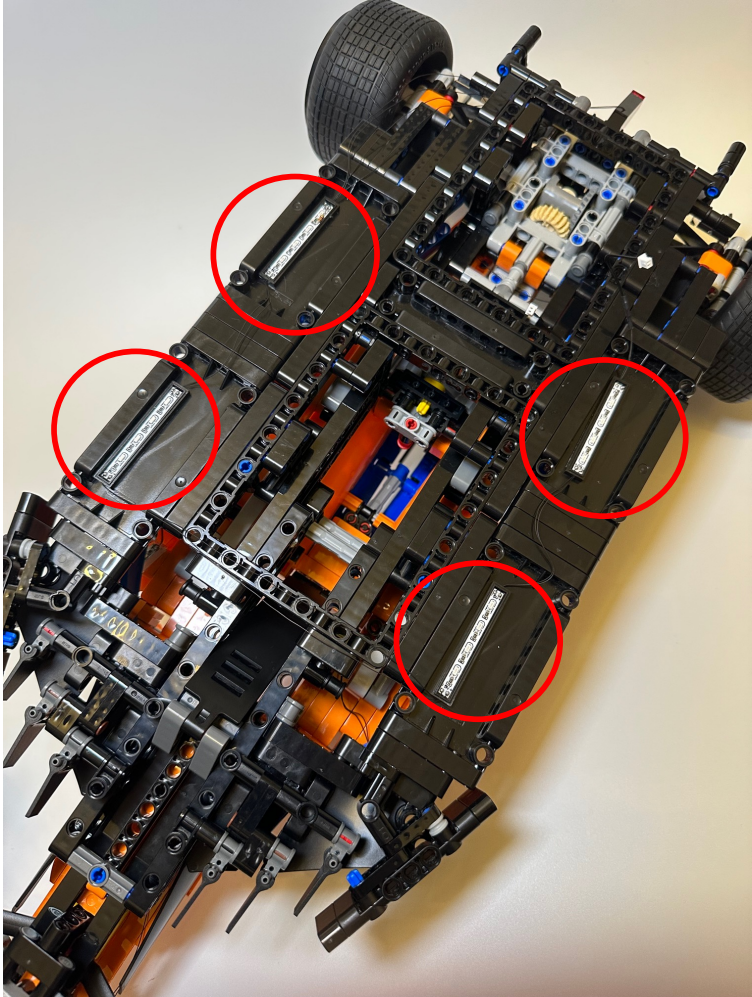

Remove the clear red tile from the model and place it on the lighting part

Assemble the brake light then stick the two short lighting tiles at the rear spoiler

Then assemble the remain four lighting tiles at the bottom of the car

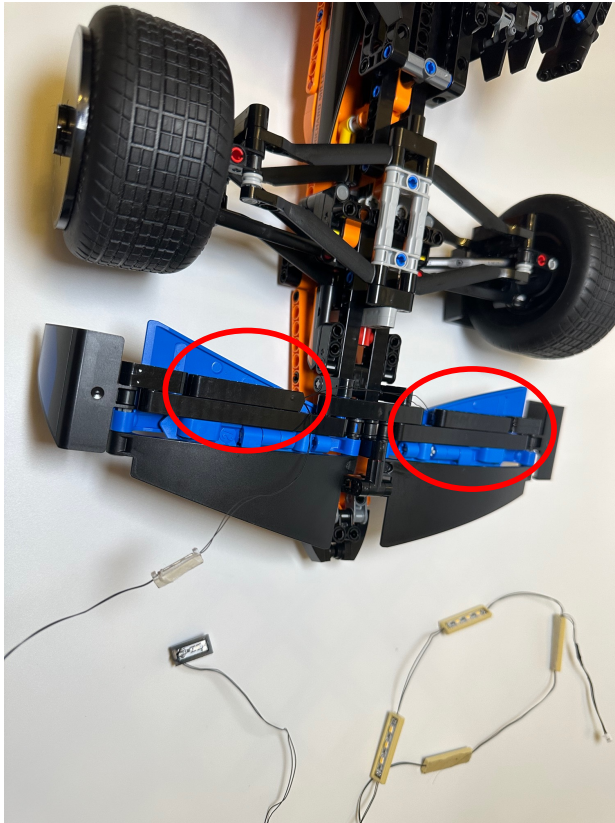

Now for the other lighting parts

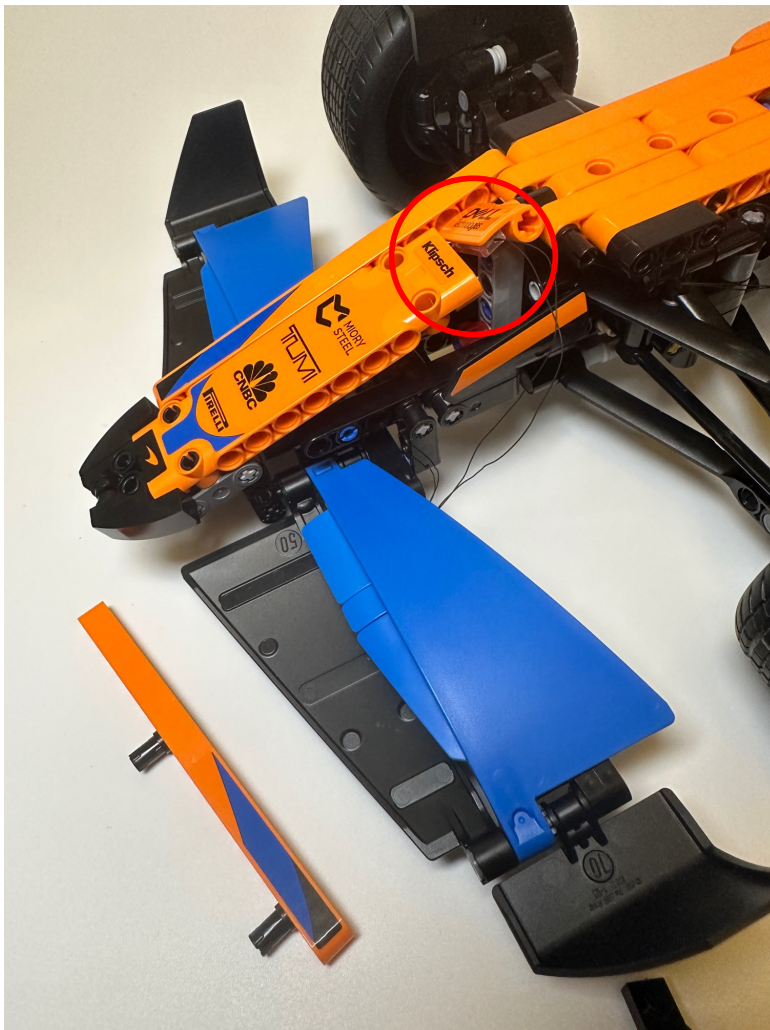

Start from the lighting liftarms, turn upside down the car and assemble them as shown

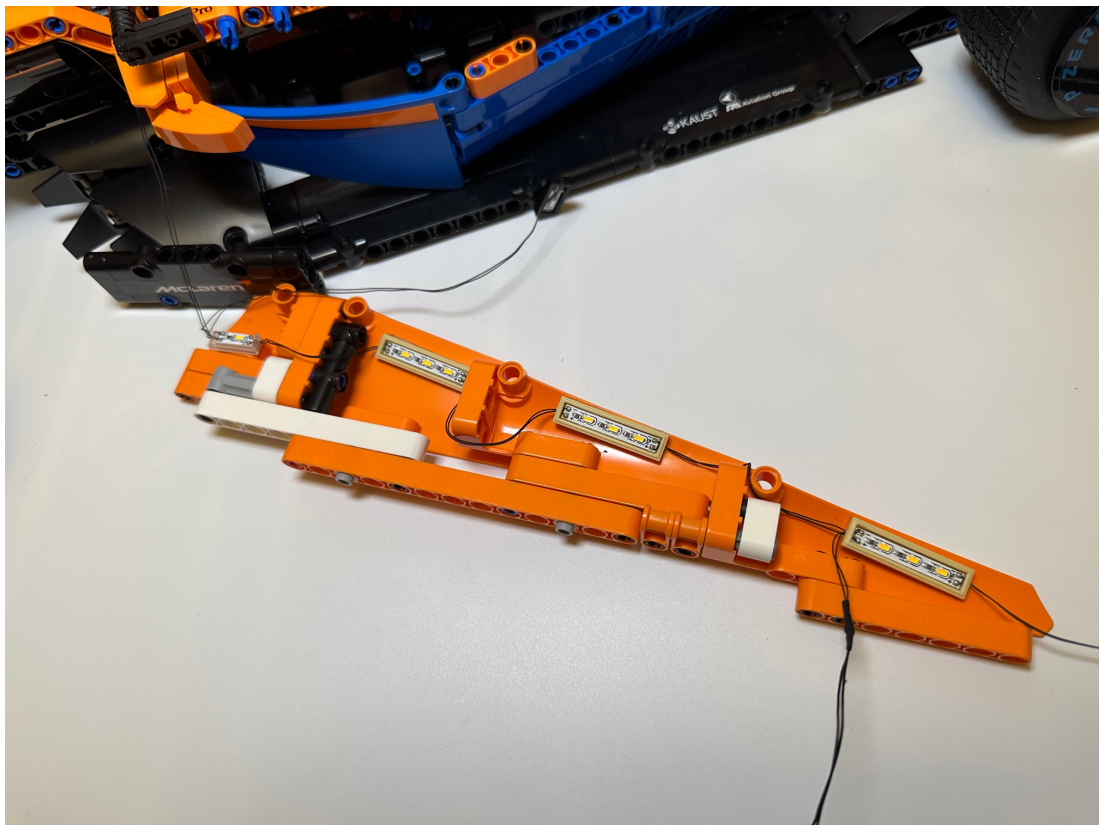

For the 1x2 lighting tile follow by the liftarm, assemble it at the middle as shown

Move the lights on the side, remove the shown parts

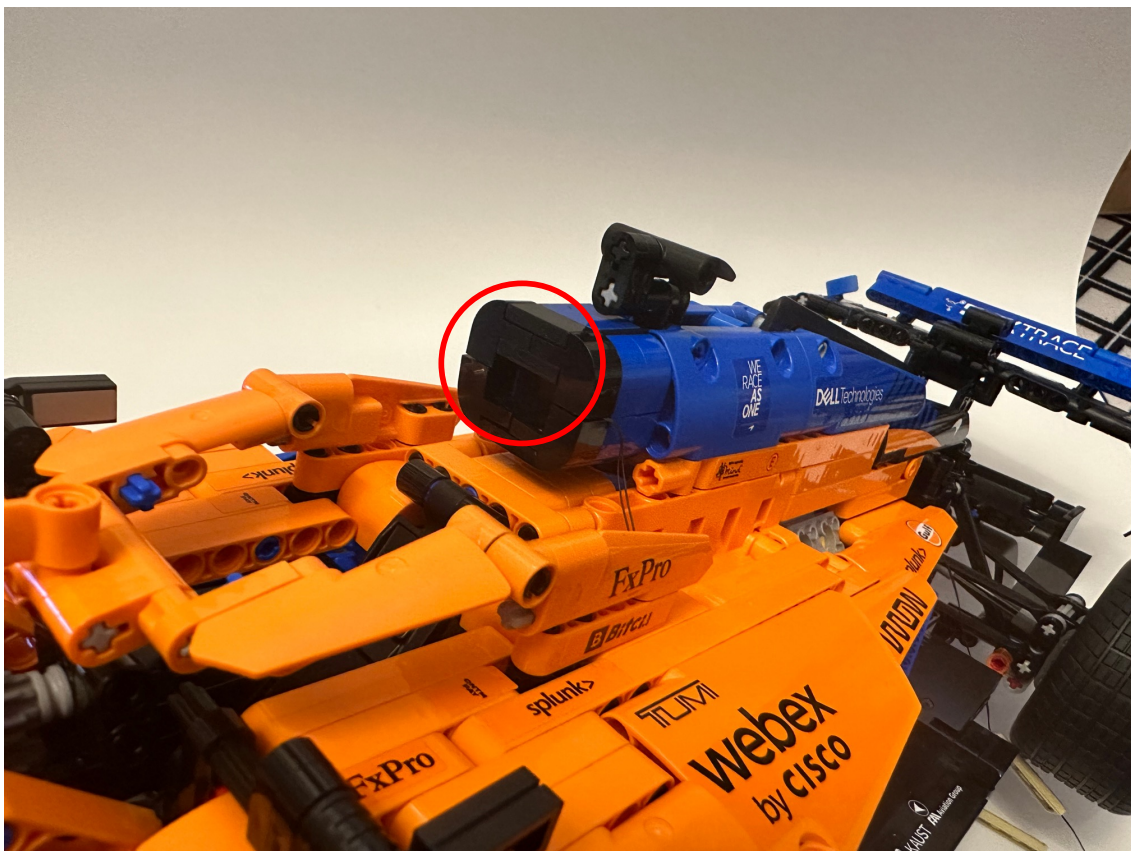

Stick the four lighting tiles at the following position

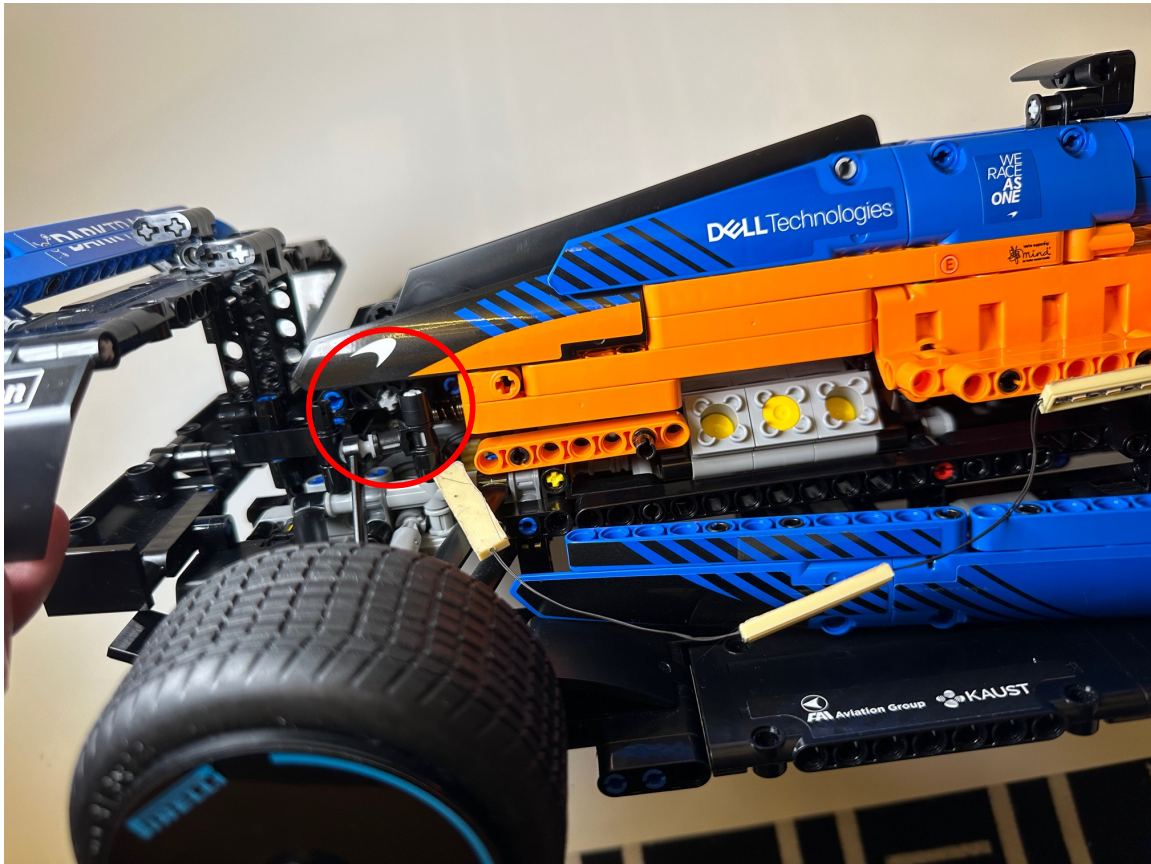

Pull the black 1x2 lighting plate to the pilot seat area  
Then assemble it at the red circle place

In the red circle area there's a hole, you may pass the rest of lighting parts through the hole to the other side

Then stick the lights, just like the same way as the other side

To light it up, you can power by USB or battery
