

Lego 10308

Holiday Main Street

Installation Guide

Take this lighting part to assemble on the tree, separate the tree as shown

Remove the clear yellow round plates and the top green cone and replace by the lighting part, beware don't push the yellow bar to deep which would damage the light inside the cone. Then assemble the lighting yellow round plates on one side

Restore one side with lights, then restore another side with lights assembled

Keep going to assemble the four sides then it's done

Now it's turn for the lamp post

Replace the lamp post, take one side of the clock out, place the wire in between the studs then stable by the clock

Take the lighting plates and two black round plates

Detach the tram as shown

Place the led bulb inside the top hole

Stable the wire by the round plate

Do that procedure for both ends

Restore both ends and beware the position of the connector

Assemble the lighting plates and put the top back

To power up connect the connector with the battery case

Take the lighting parts with two yellow round blocks for this house

Split the house and take away the lamps and detach them

Reassemble the lamps by the lighting round blocks

Take away the shown parts of the front door then restore the lamps

Then take the red and green lighting round plates to assemble them

Then restore the removed parts

Move the remain lighting parts to 2nd floor
Take the 4x6 plate from the 2nd floor to stable them

Now restore the whole 2nd floor back

Assemble the lighting plate and the candle fire

Now it's the turn for the other house

Firstly, take away the x'mas tree and assemble the lighting round plates on it

Put the tree back and start assembling other lights, start by the brown 1x4 plates

Then assemble the yellow lighting round plate to the lamp

Then assemble the lighting 1x8 plate to the bottom of 2nd floor

Remove the front door from the 1st floor, and move the remind lights out of the house

Move the connector to outside as well, and place the wire in between the studs before restoring the 2nd floor

After that assemble the lighting round plates on the front door

At last, connect all the connectors to the USB cable
*The remain connector can be used for the tram
