# Lego 21054

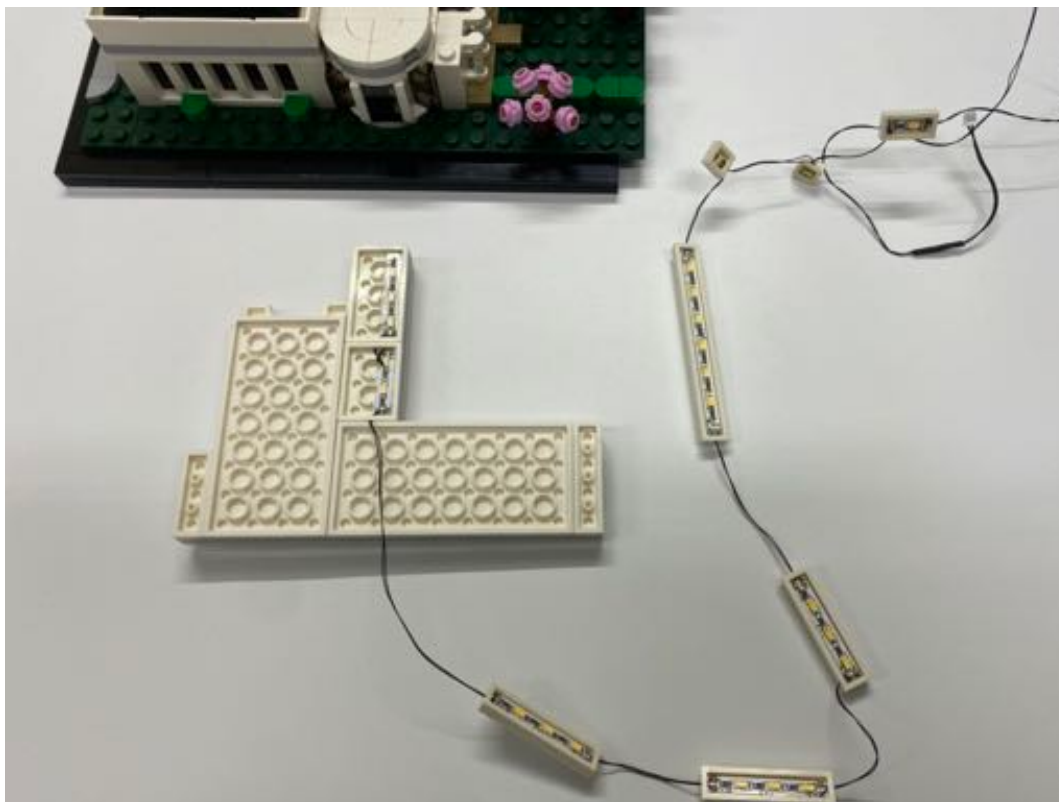

THE WHITE HOUSE
WASHINGTON

Installation Guide

GB GLOW BRICKS

First of all, split the whole building to 3 separate parts, then take this lighting part for the left side building

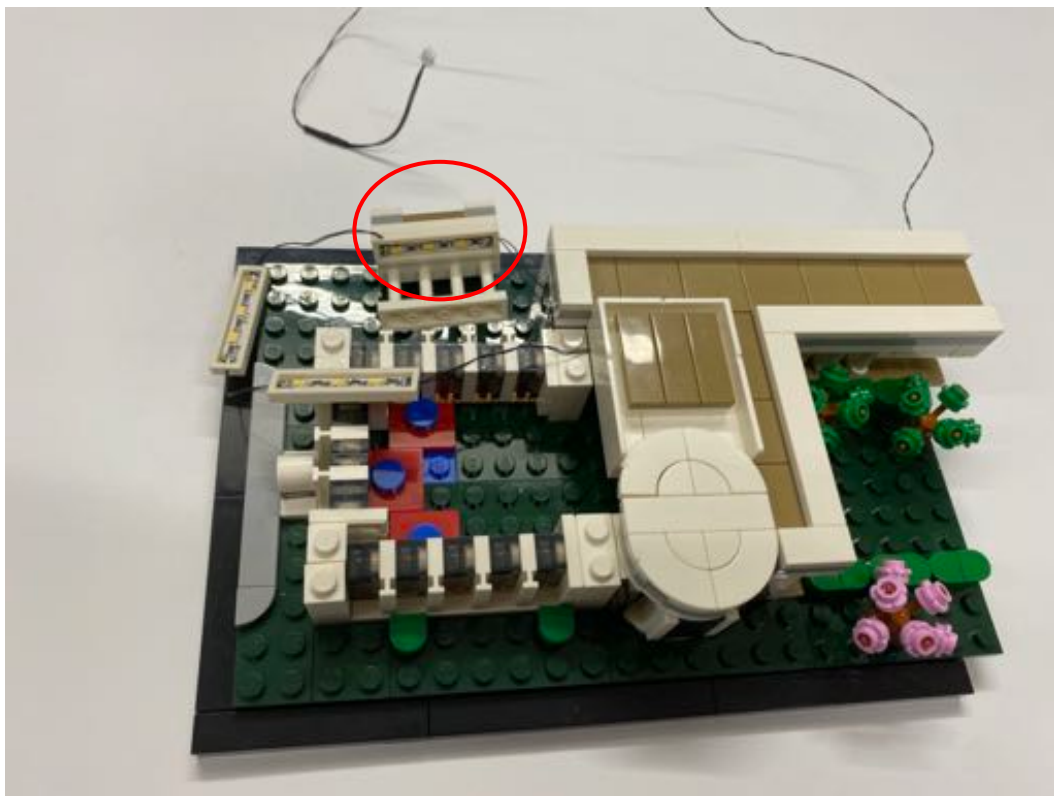

Take off the top L-shaped top, remove the 2x3 and 2x4 plates and replaced by the lighting parts (beware the direction of the wire)
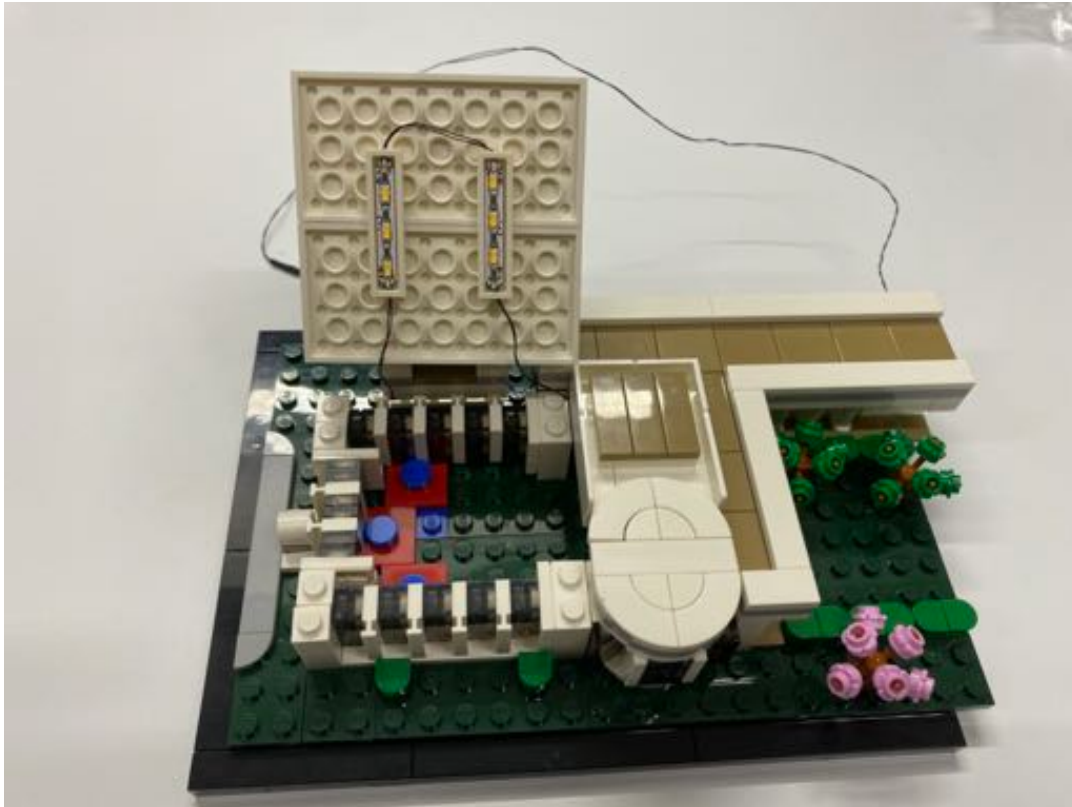

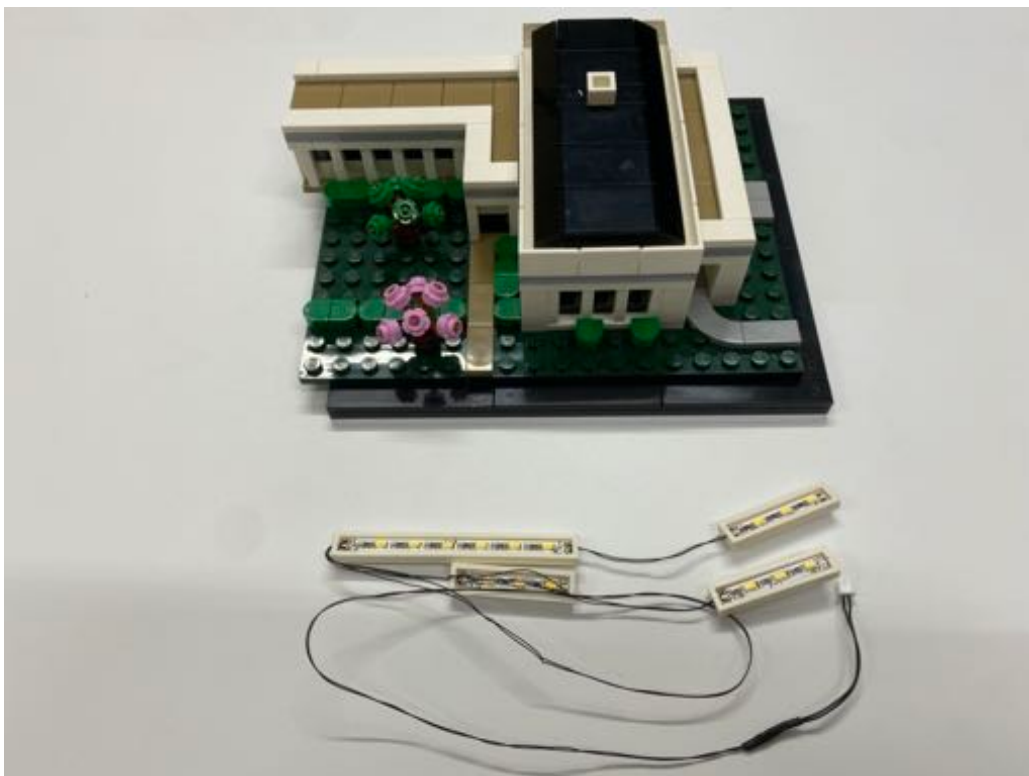

Install the 1x8, 1x2 and 1x1 as shown

Restore the L-shaped top, remove the squared top and install one of the 1x4 plate
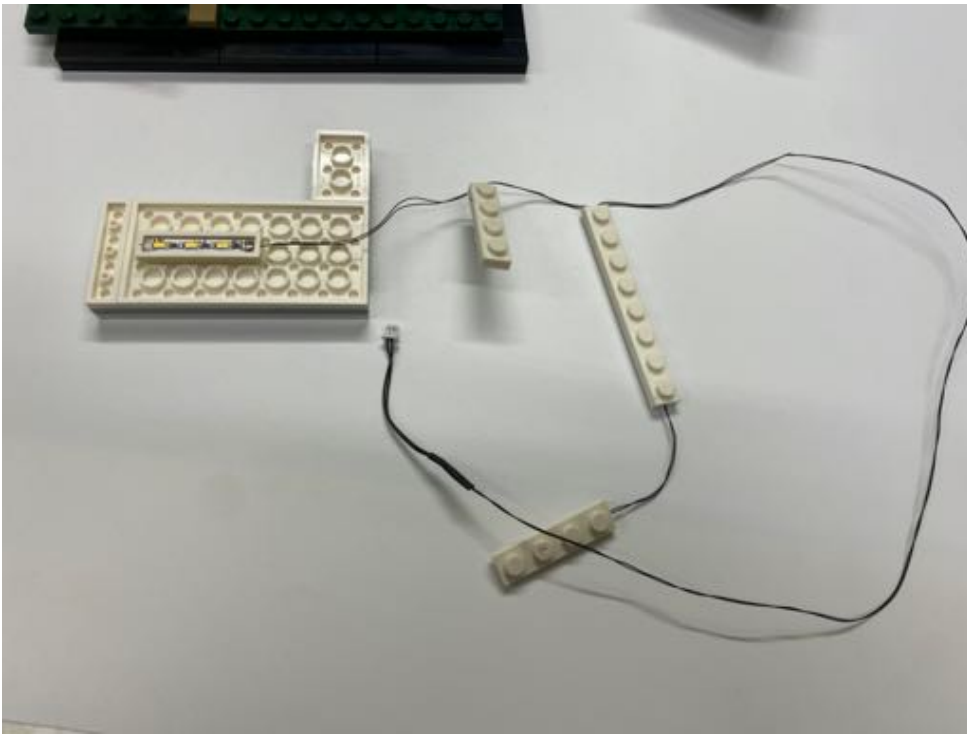

Then install the rest 2 1x4 plates, and this part would be finished

Now it's turn for the right-handed side, take this lighting part out

Remove the L-shaped top and install the 1x4 at the end as shown

Put the top back, remove the other 2 tops and install the rest plates like this
Restore the top then this part is done

Now it's turn for the middle building

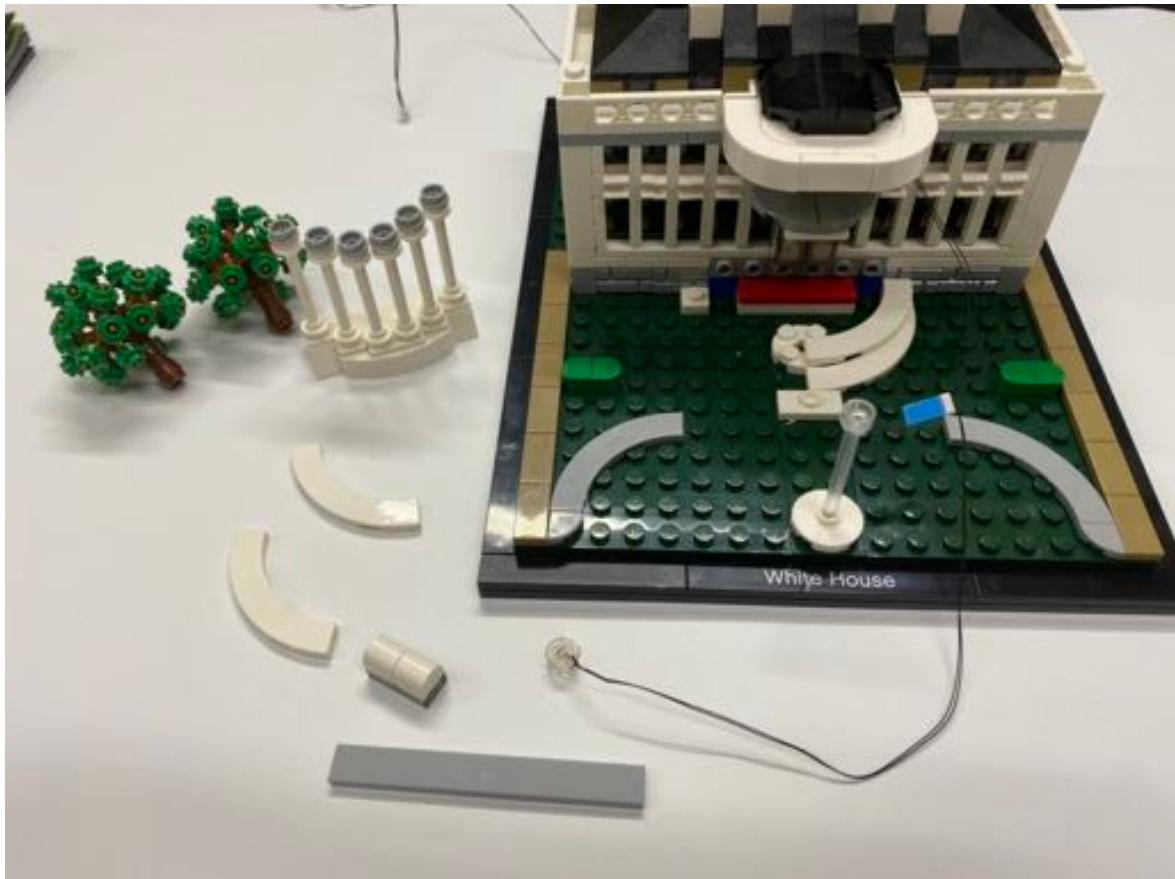

Remove the top first

Then install the lighting plates

Then stick the lighting bar as shown

Put the top back and remove the following parts

Then stick the short lighting bar here

Adjust the wire and pull the lighting round plate to the front

Install the lighting round plate then restore all the parts removed

At last combine all the buildings and connect the with the USB cable and that's done
