

# Lego 76199

## *Installation Guide*

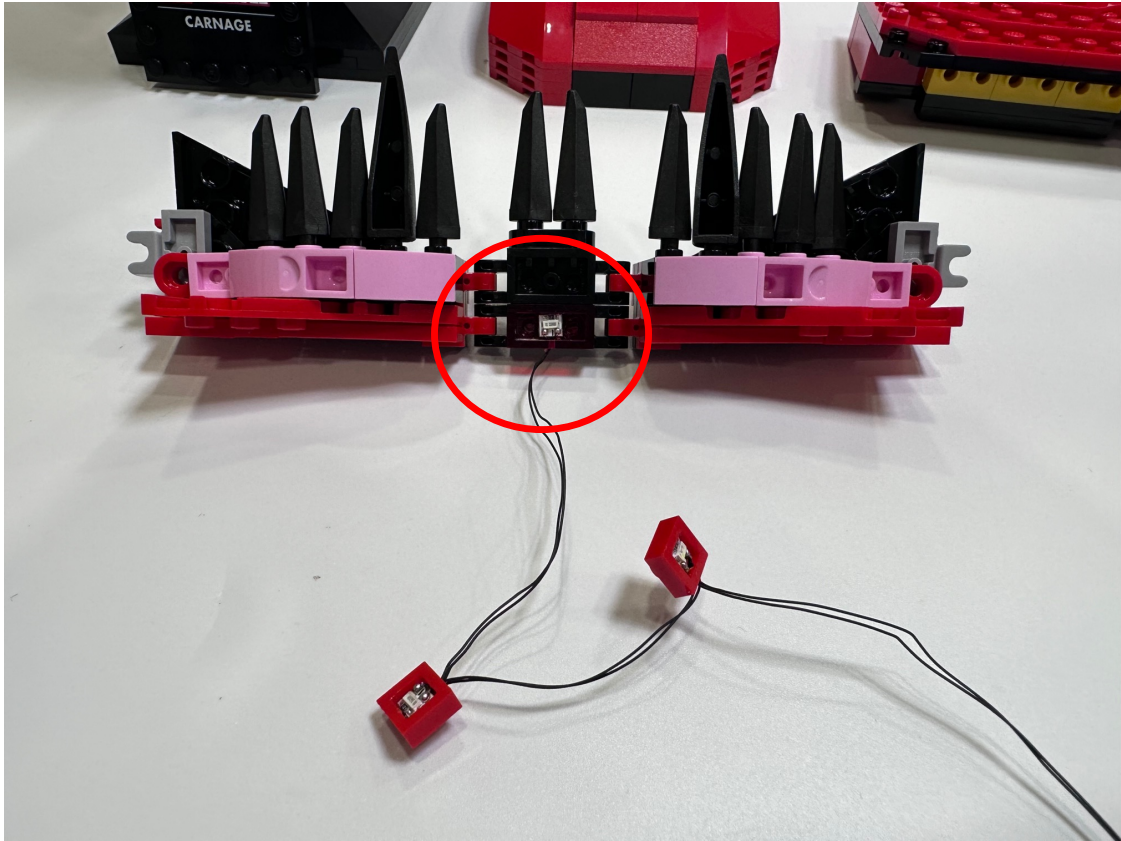

First of all, split the parts as shown

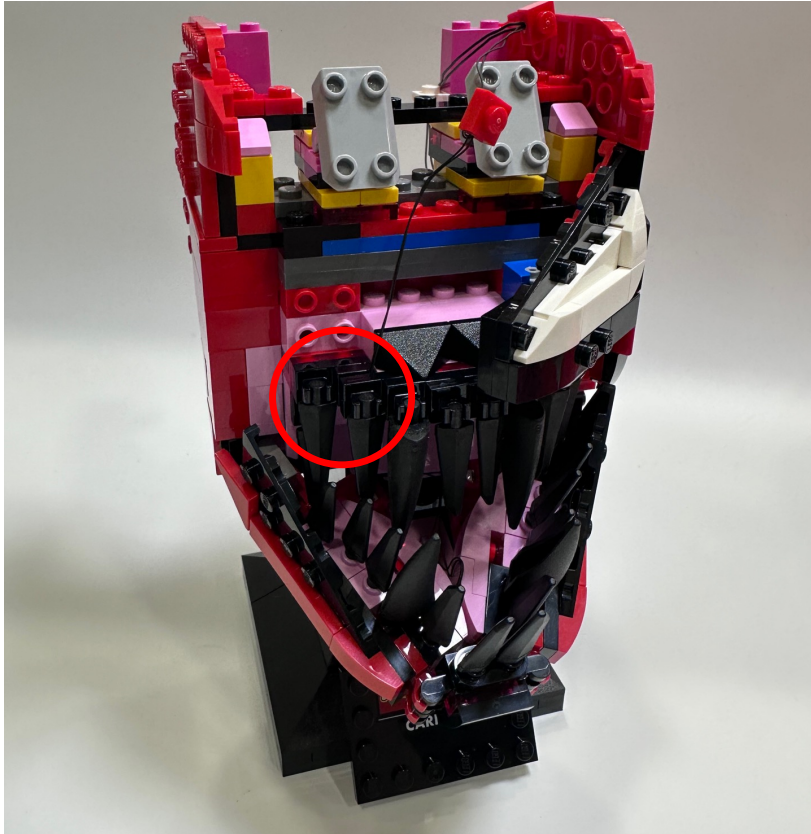

Assemble the 1x2 lighting part inside the jaw first

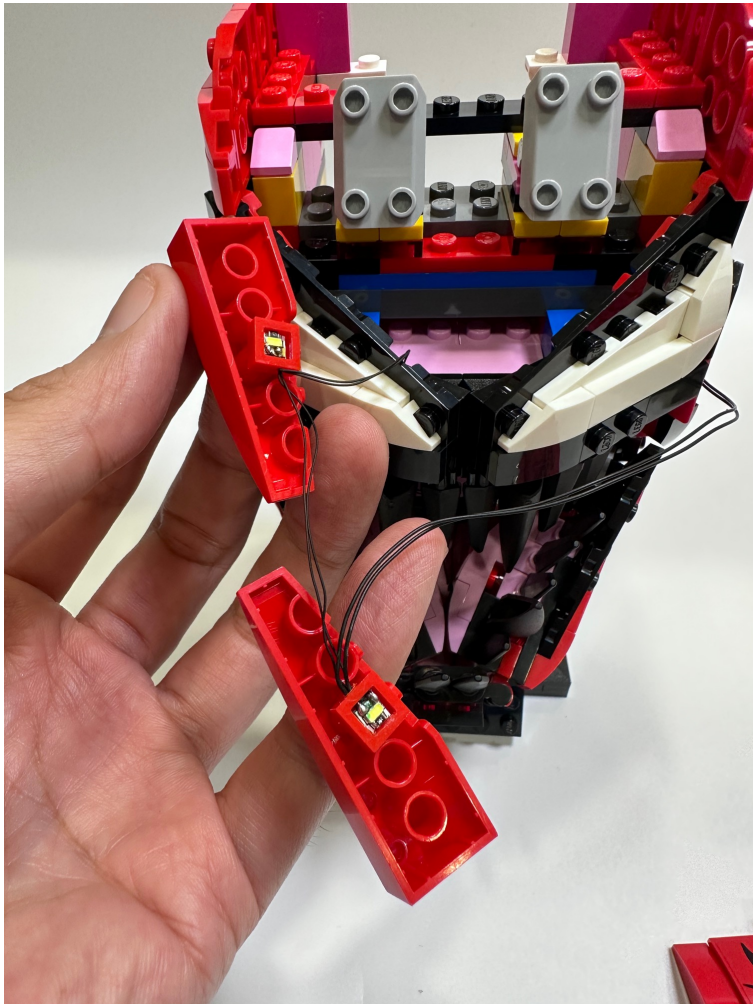

Then assemble the 1x1 lighting plates at the shown area of the jaw

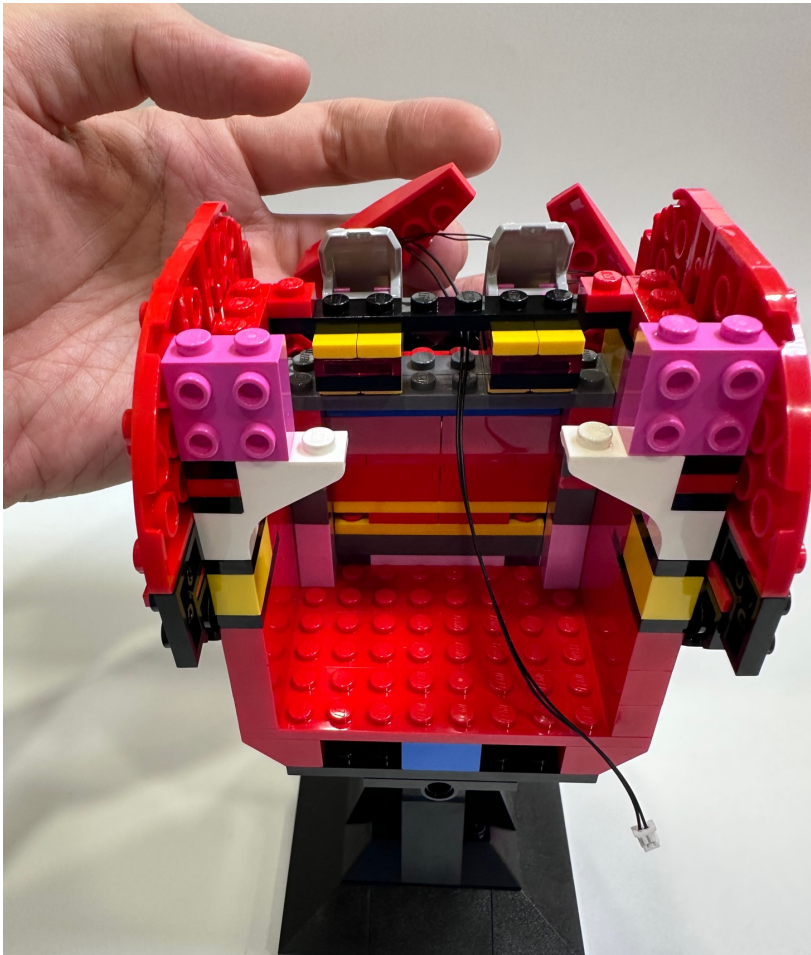

Restore the jaw, move the remain lighting plates to the top and the wires could be hidden behind the teeth at the red circle area

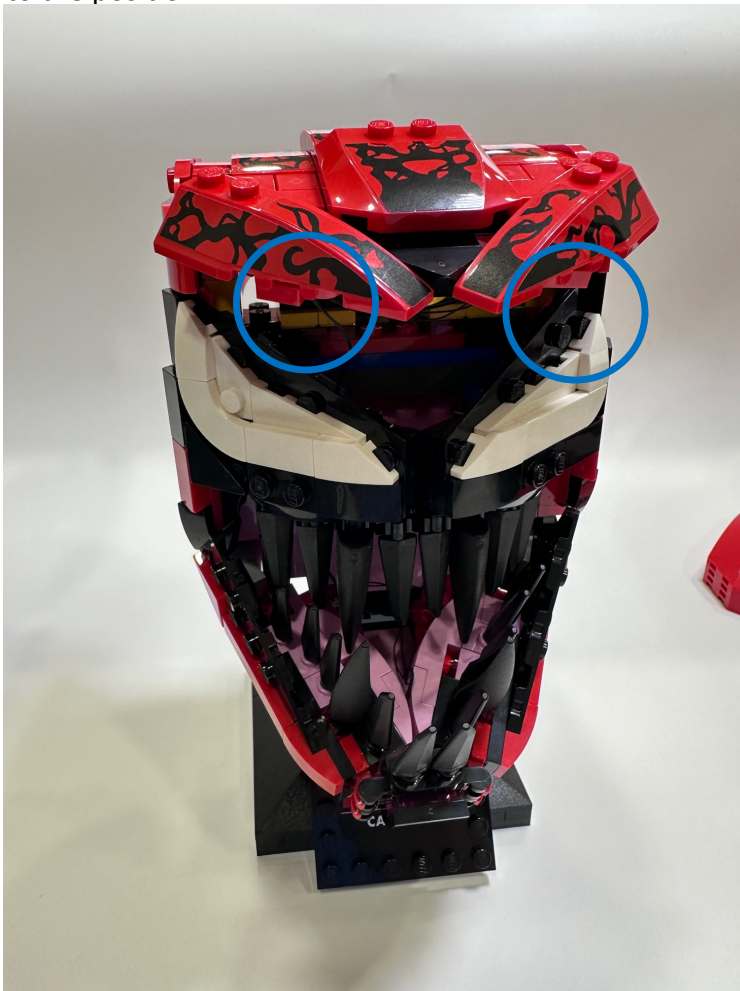

Restore the eyes, take the eyebrows from the forehead and assemble with the lighting plates at the middle hole of the eyebrows

Move the connector to the back before restoring the forehead and the eyebrows

Restore the forehead with the lights attached, they shouldn't be seen after it get back to the position

Now you may power it up by the USB cable or the battery case  
The case can be hidden inside the head

**\*Beware, if you powered by power bank with protection it might be turned off by itself due to the power consume is too little, then you need to power by AC adaptor or use the battery**
