Lego 75343

Dark Trooper Helmet

Installation Guide
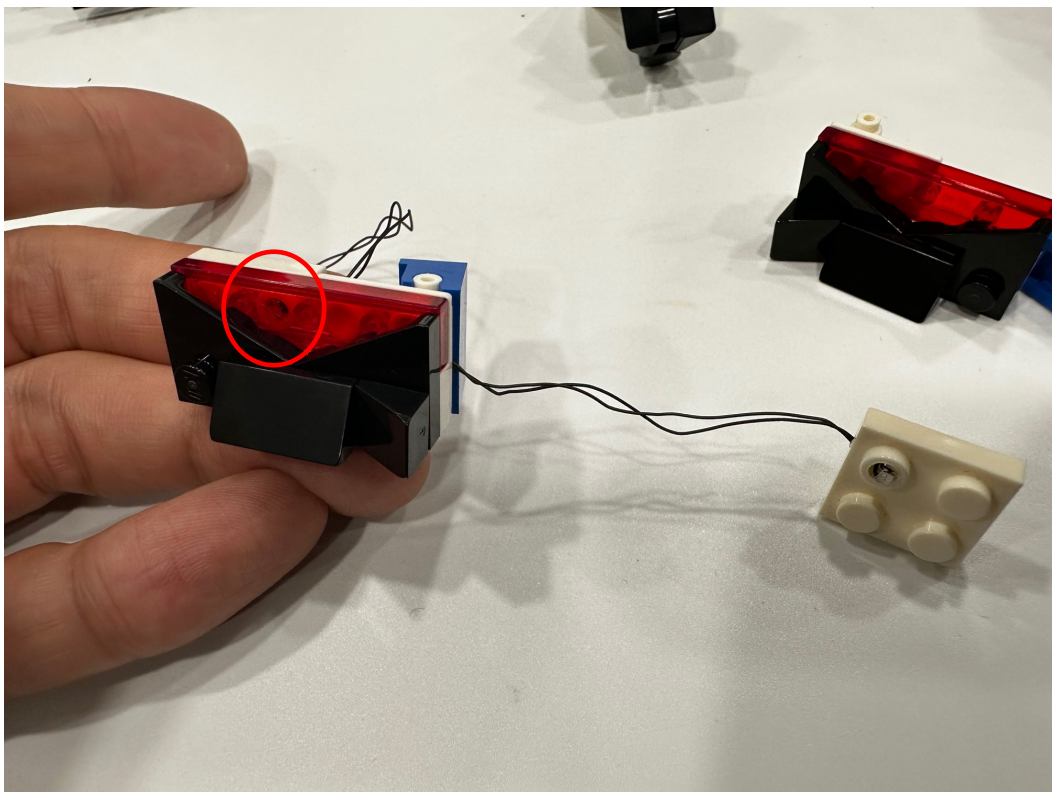

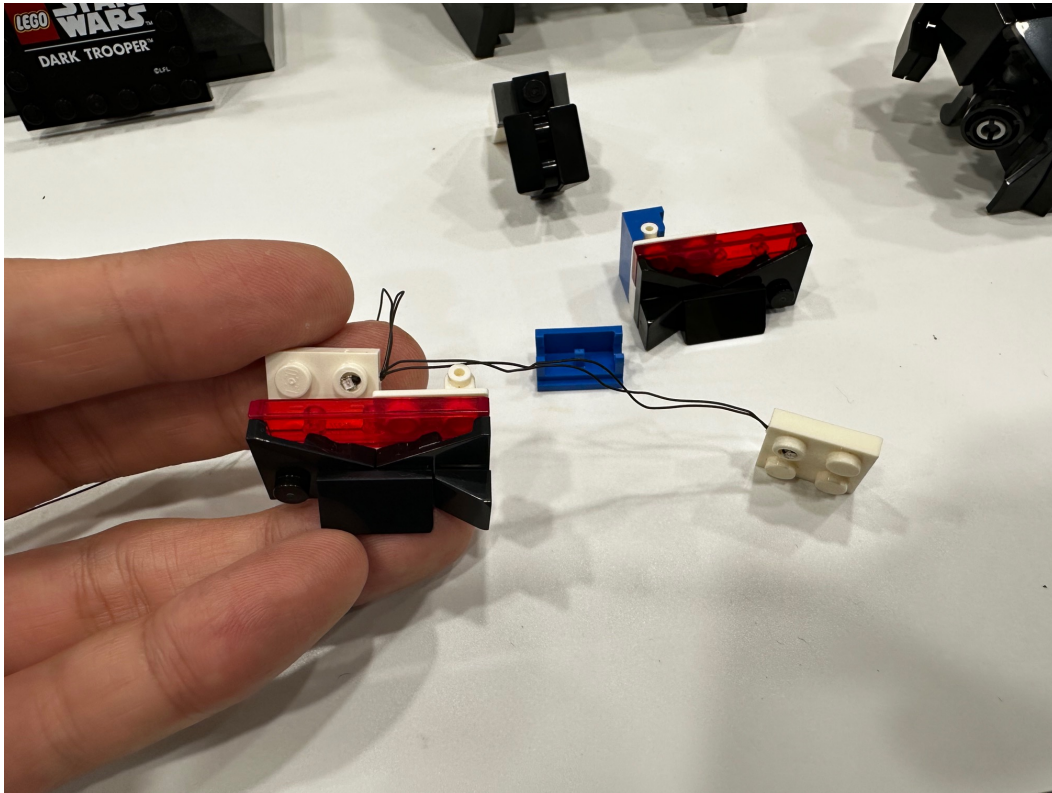

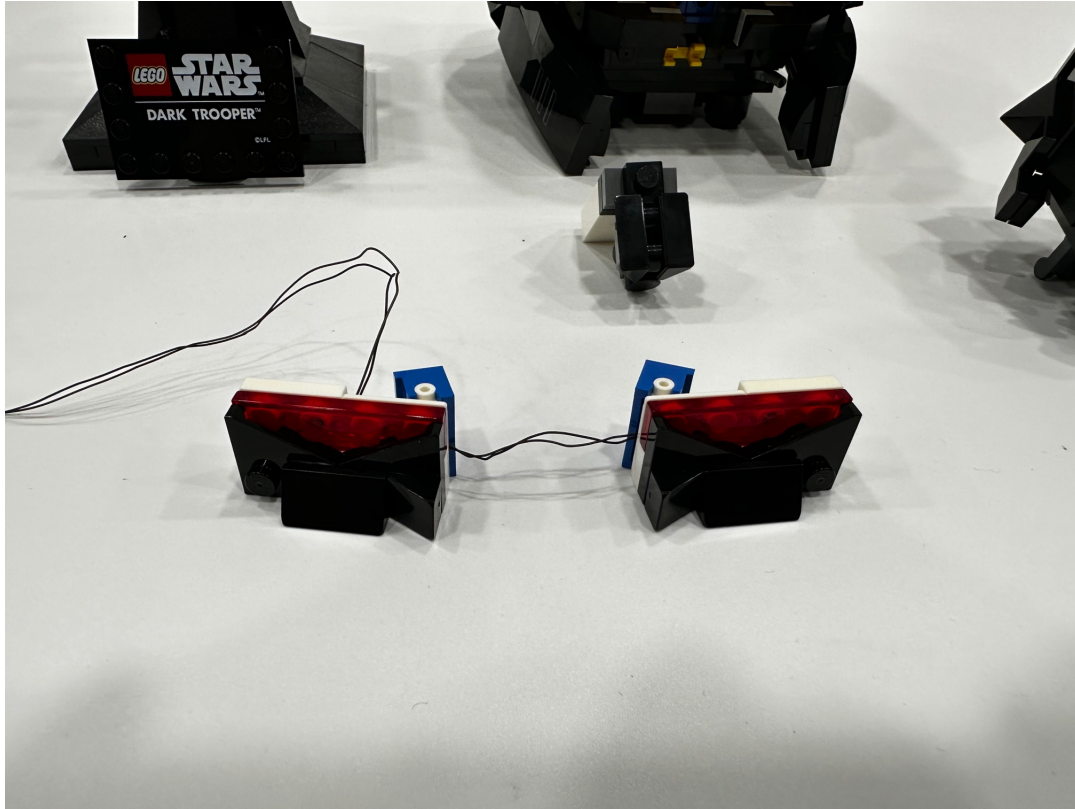

First of all, remove the helmet from the stand and split it as shown

Remove the 2x2 white plate from the eye and replace by the lighting part
After the installation the led bulb should be at the middle of the eye like the picture below
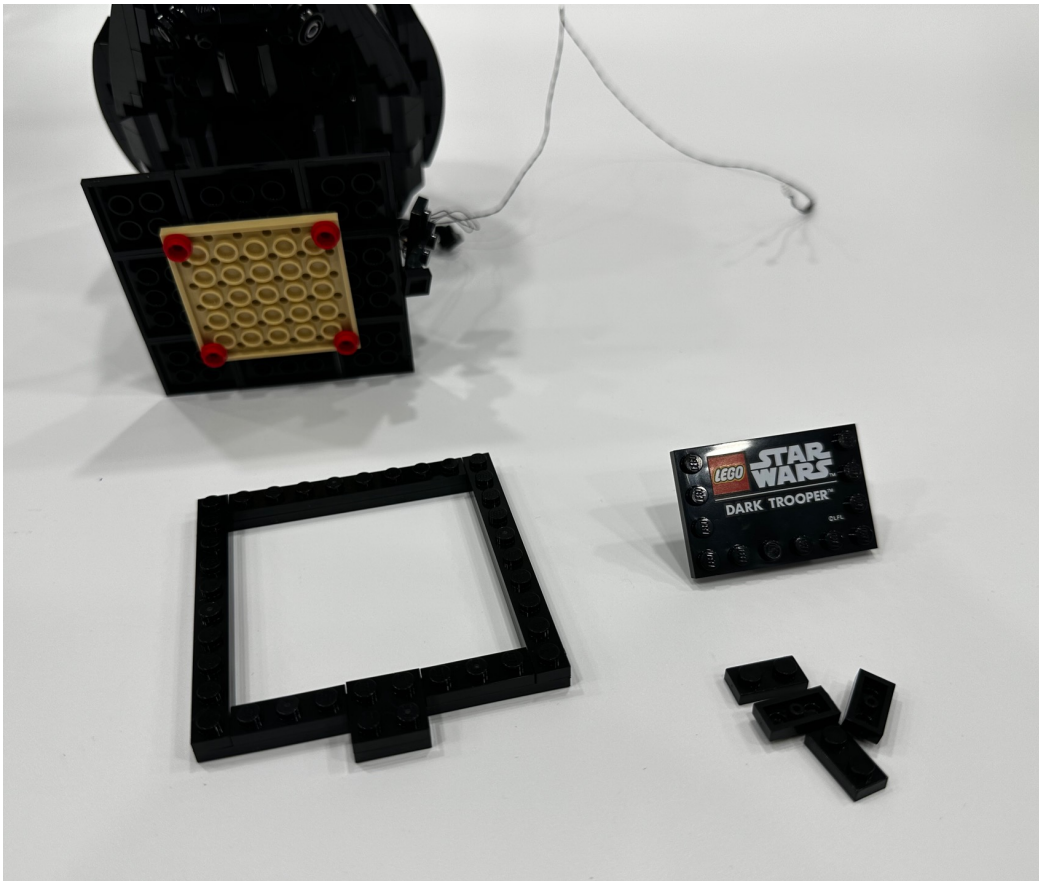

After the lights for both eyes are installed, restore them back to the helmet
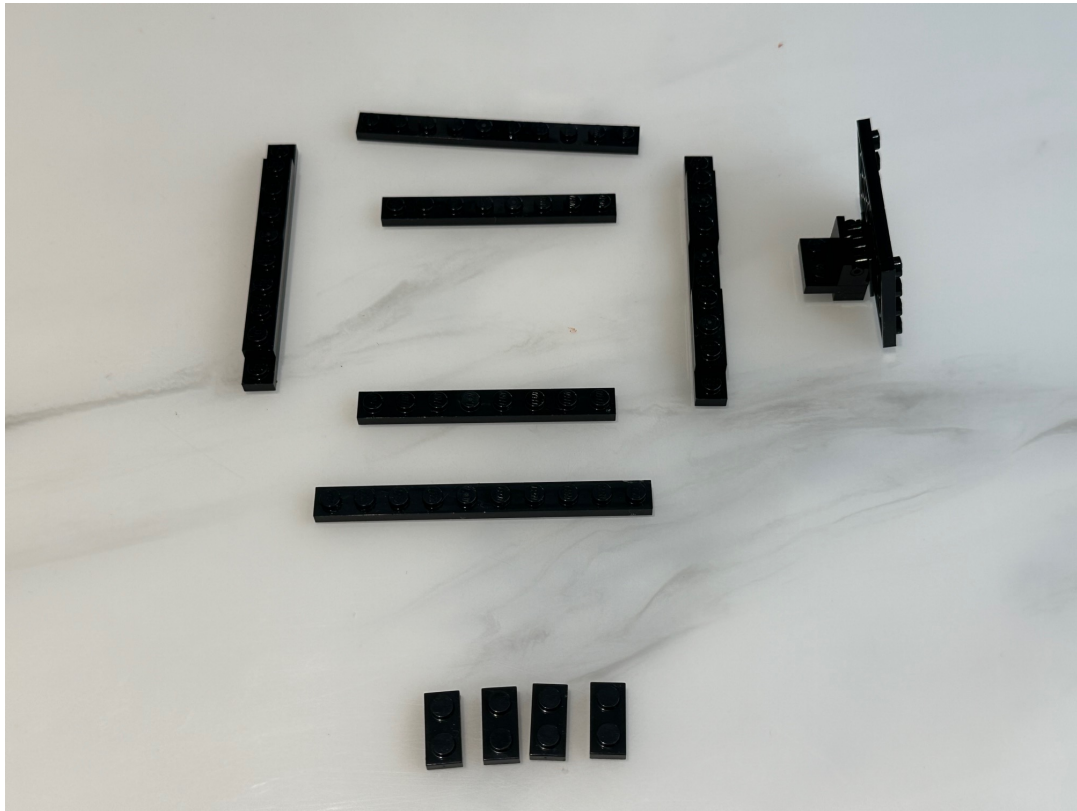

Restore the whole helmet then put it back on the stand

To assemble the spot lights on the corners of the stand, start by detaching the base and modify it by the plates attached
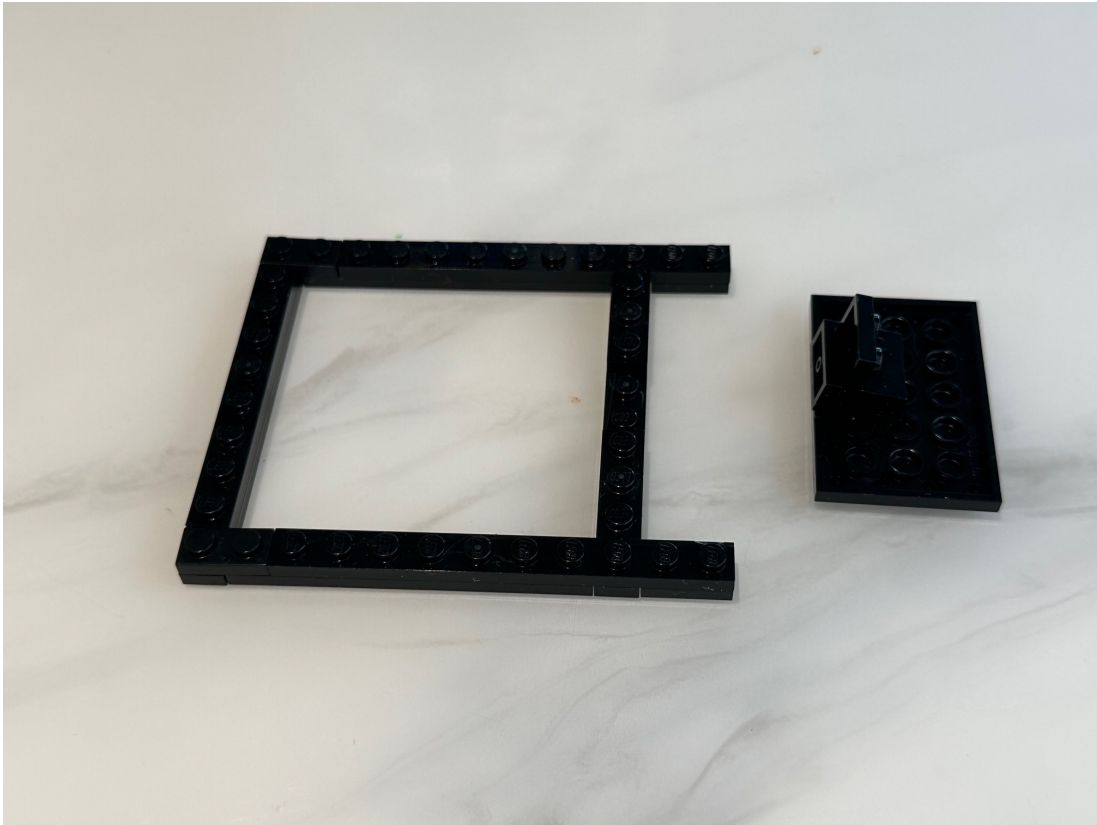

Split the base as shown, detach the 1x8s and 1x10s on the side

Rearrange the base by putting the 1x8's at the bottom with one 1x2 plate on each side, the cover the top by the remain 1x2 and the 1x10

Now you would get 2 extra studs extended from the corner to put the spot lights on

Restore the stand and assemble the lights, then you
may power it up by either USB or the battery case

*Beware, if you powered by power bank with protection it might be turned off by itself due to the power consume is too little, then you need to power by AC adaptor or use the battery
