

Lego 75354

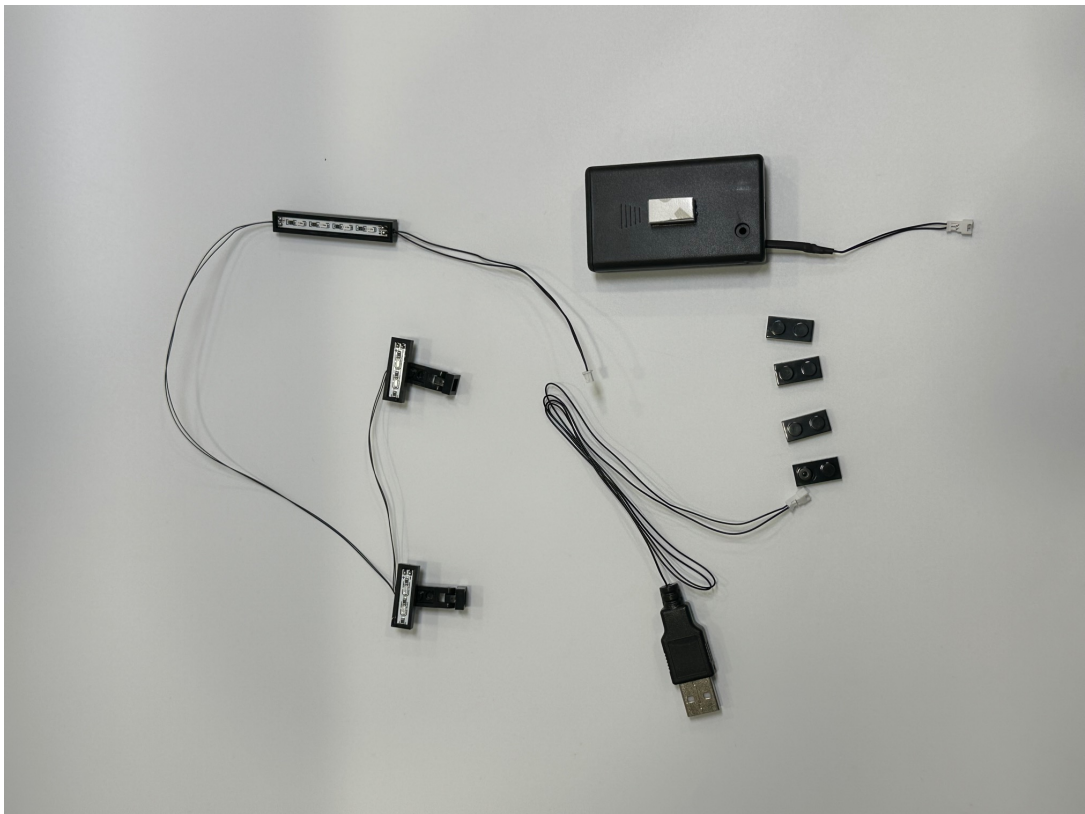

STAR
WARS

Darth Vader

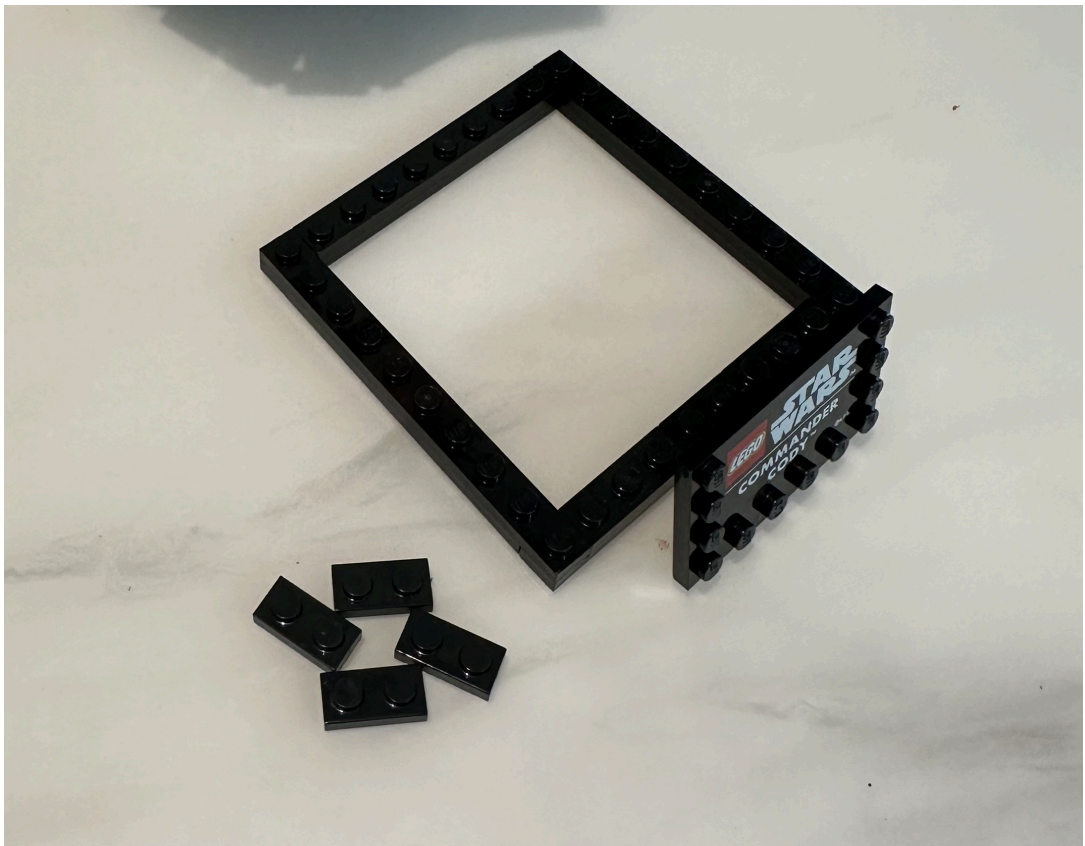

Helmet

Installation Guide

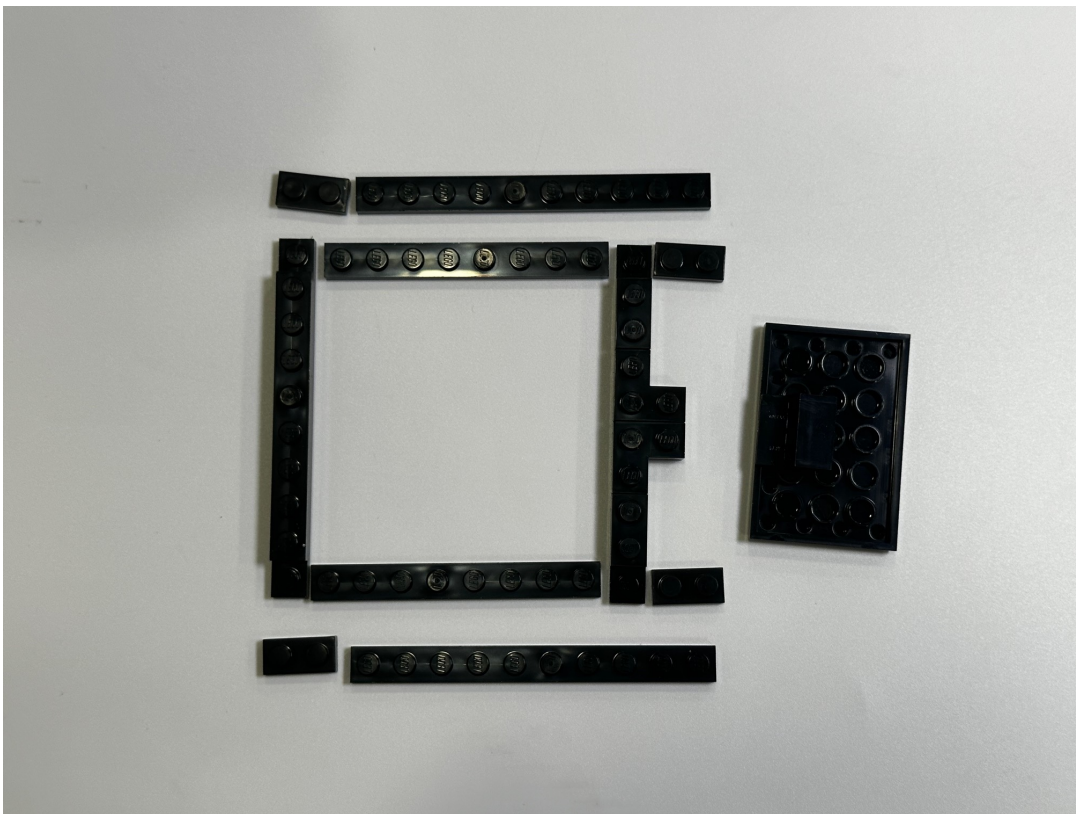

First of all, separate the base to modify it by the 1x2 plates provided

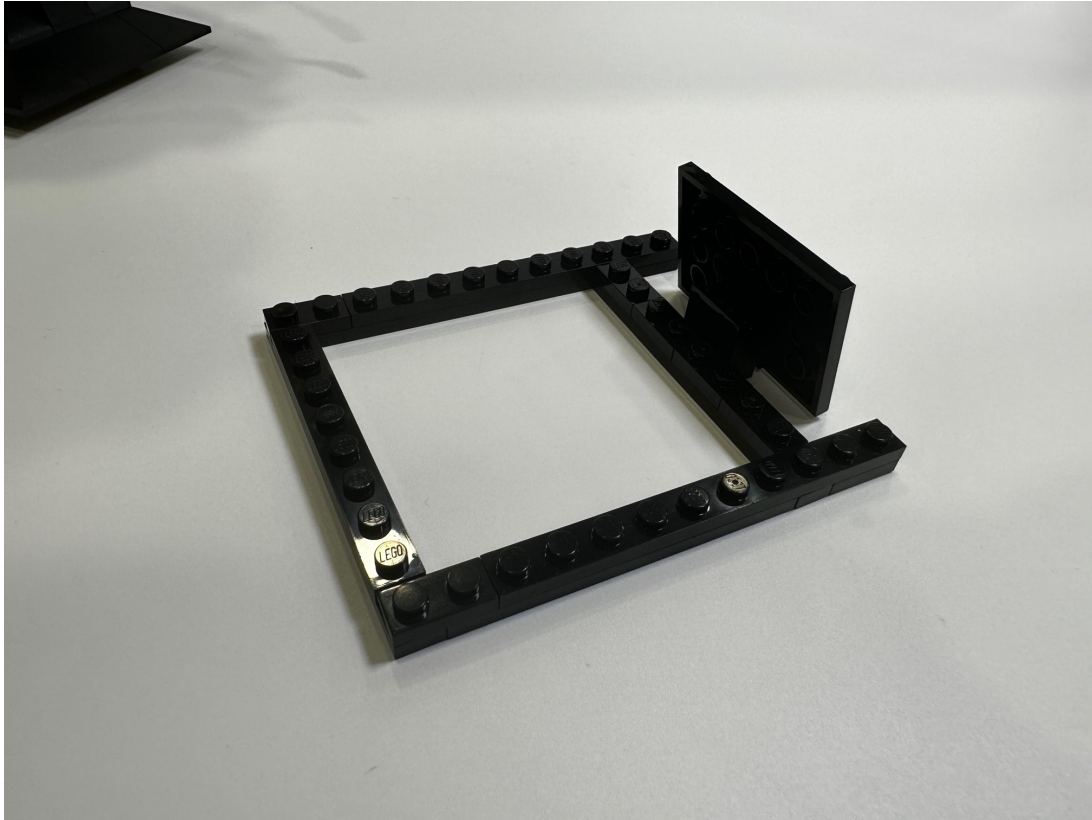

Split the base as shown, detach the 1x8s and 1x10s on the side

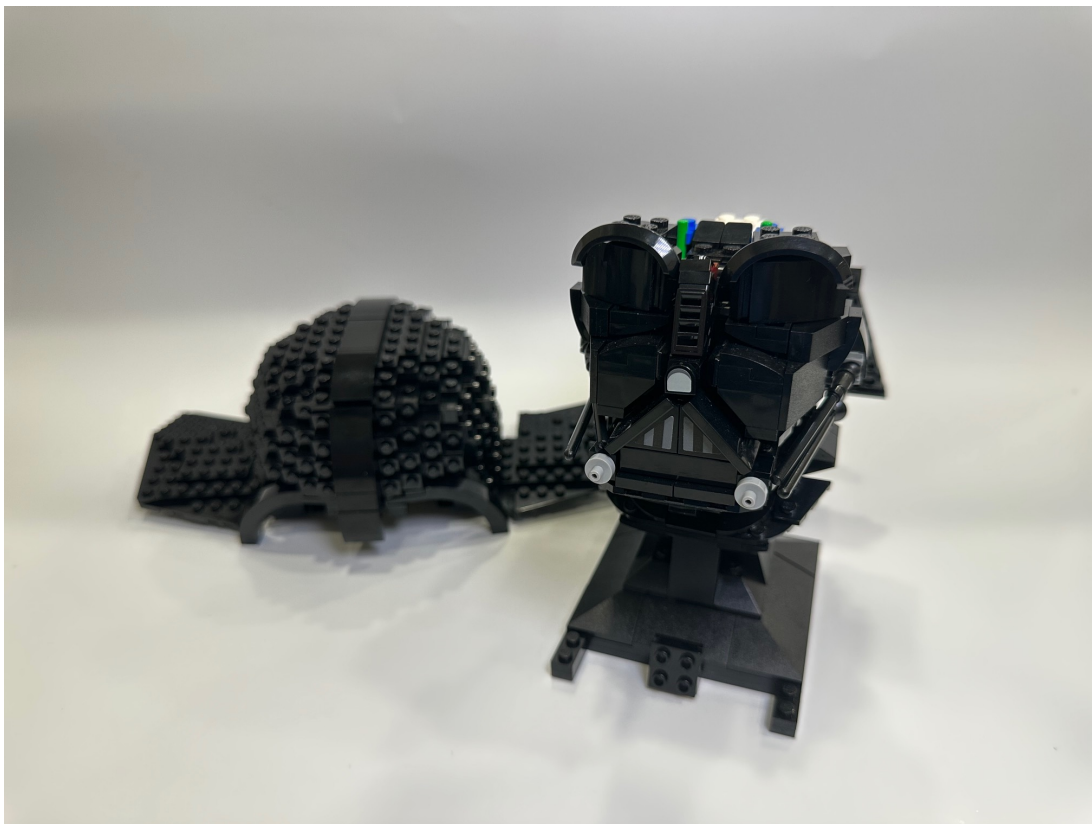

Rearrange the base by putting the 1x8's at the bottom with one 1x2 plate on each side, the cover the top by the remain 1x2 and the 1x10

Then assemble the 1x2 and 1x10 plates on the base

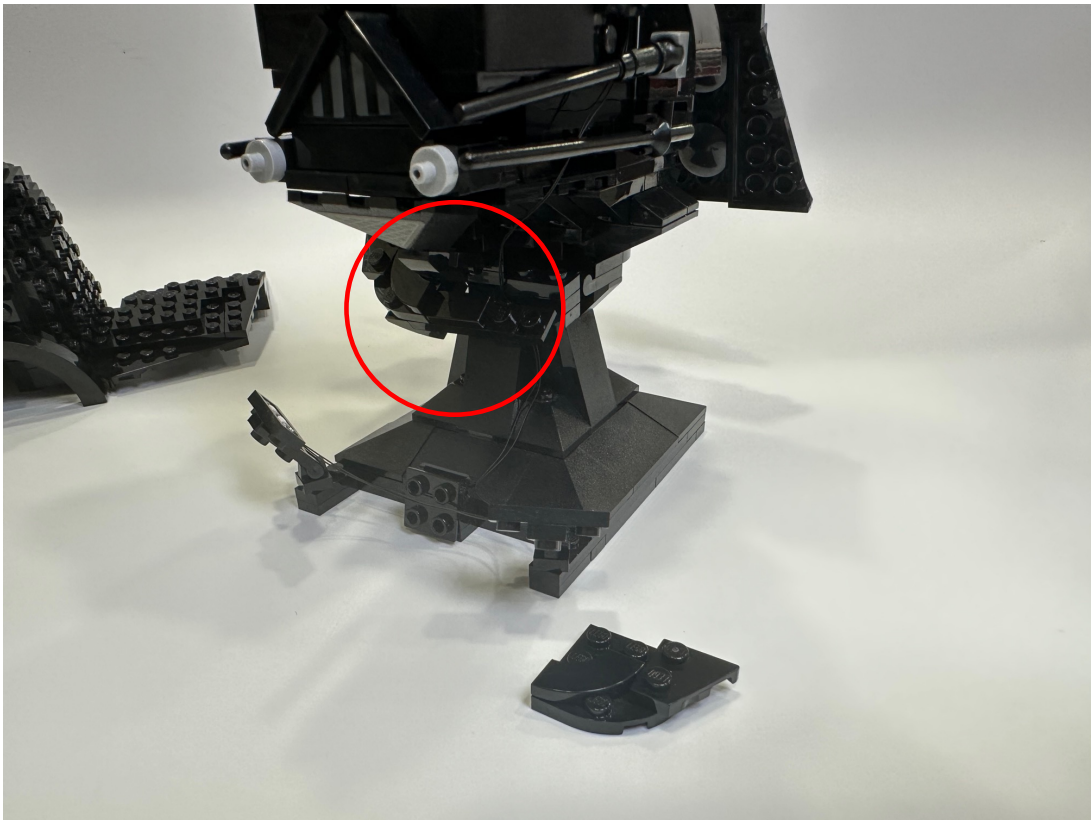

Restore the base, then detach the top of the helmet

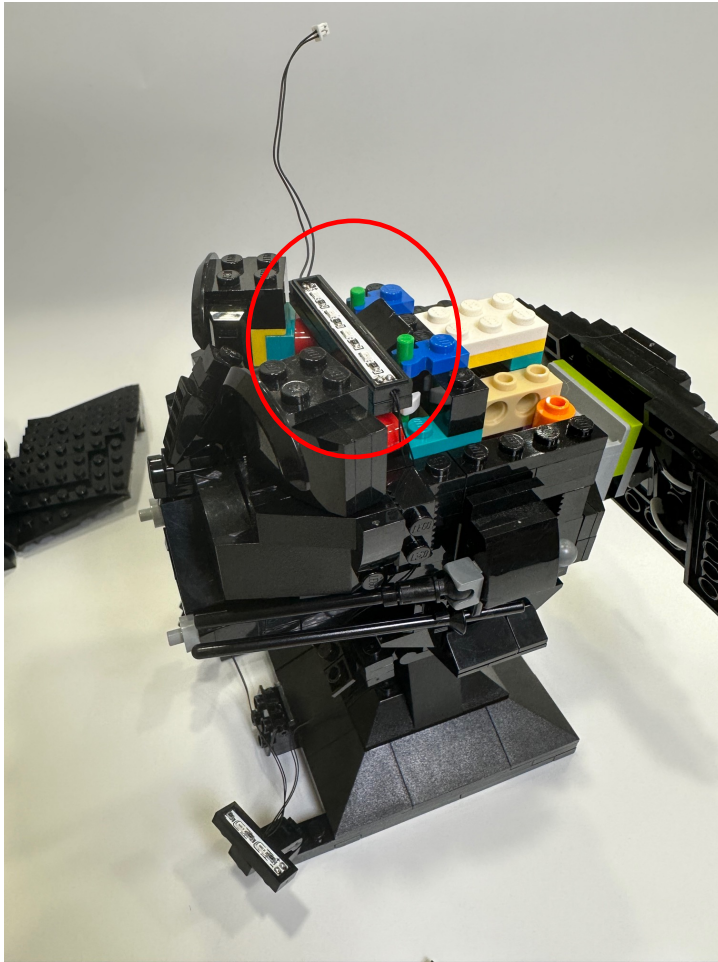

Assemble the spot lights on the expanded corners of the base, then move the remain lights to the top of the helmet

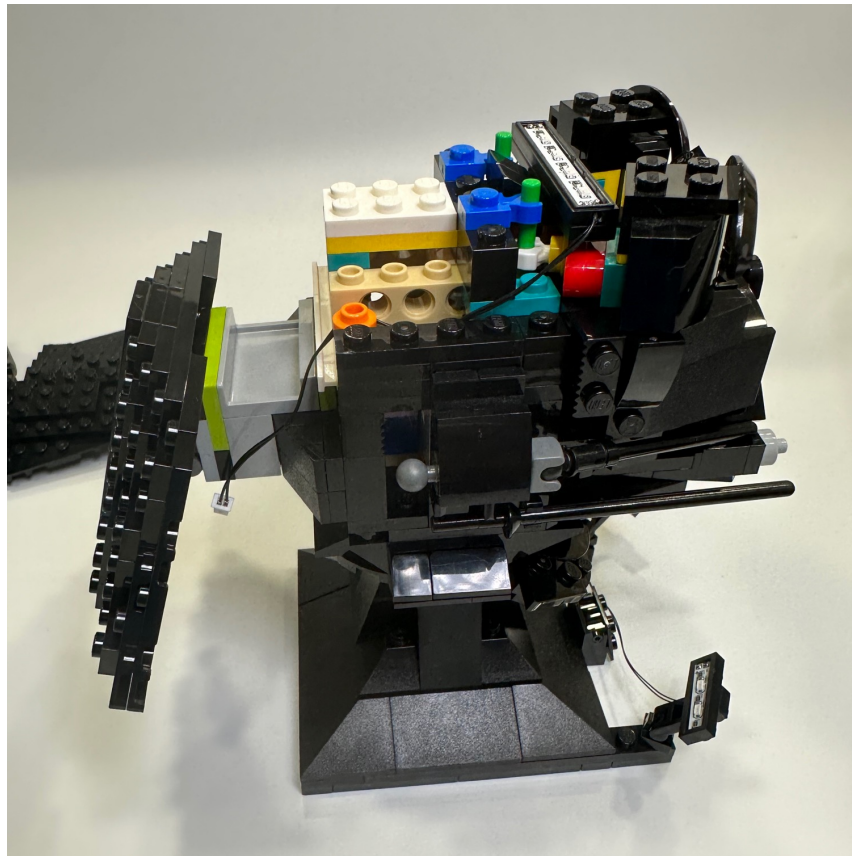

The cable from the spot light to lighting plate could be stabilized at the shown area
Remove the shown parts, put the cable in between then put it back

Assemble the lighting plate

Then move the connect to the back

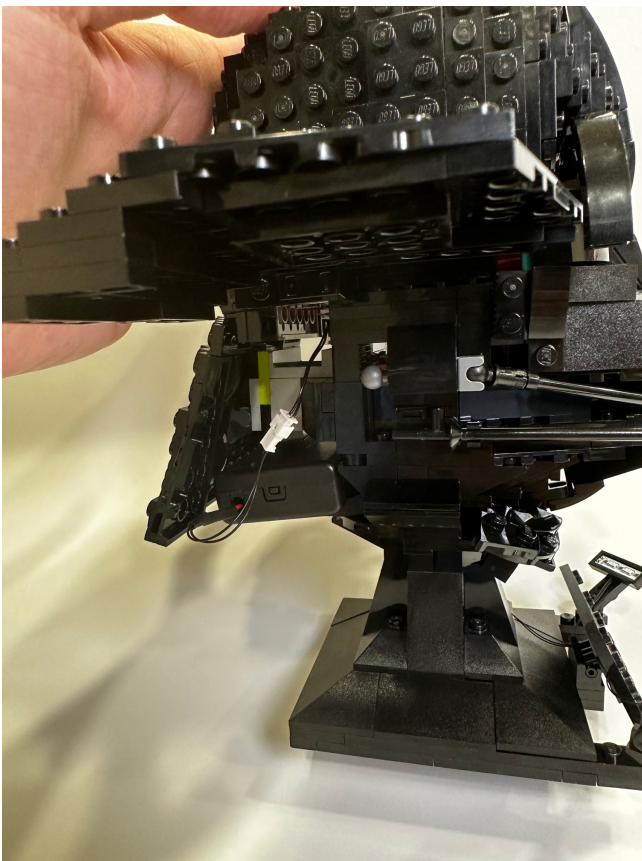

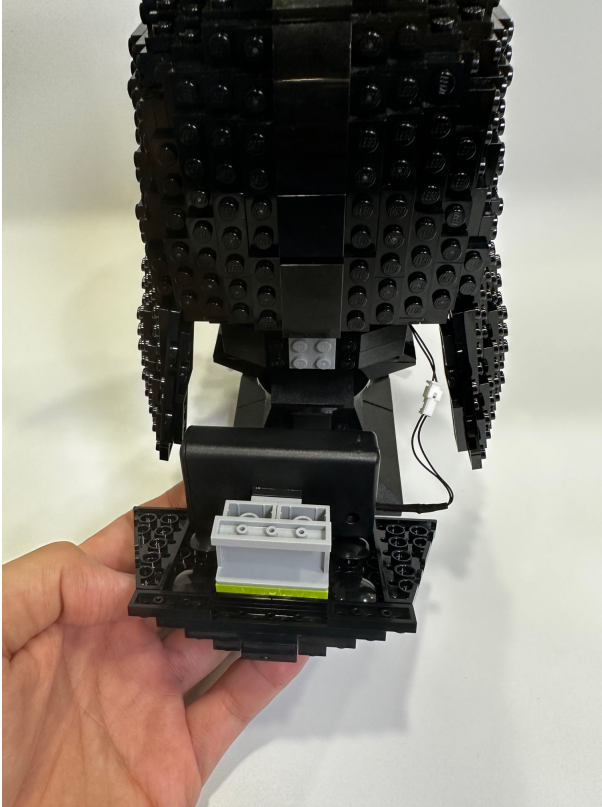

Now you can restore the helmet

To power up by the USB cable, just simply connect it with the connector

To power by battery, remove the back part from the helmet and stick the battery case as shown

***Beware, if you powered by power bank with protection it might be turned off by itself due to the power consume is too little, then you need to power by AC adaptor or use the battery**
