

# Lego 76187

## *Installation Guide*

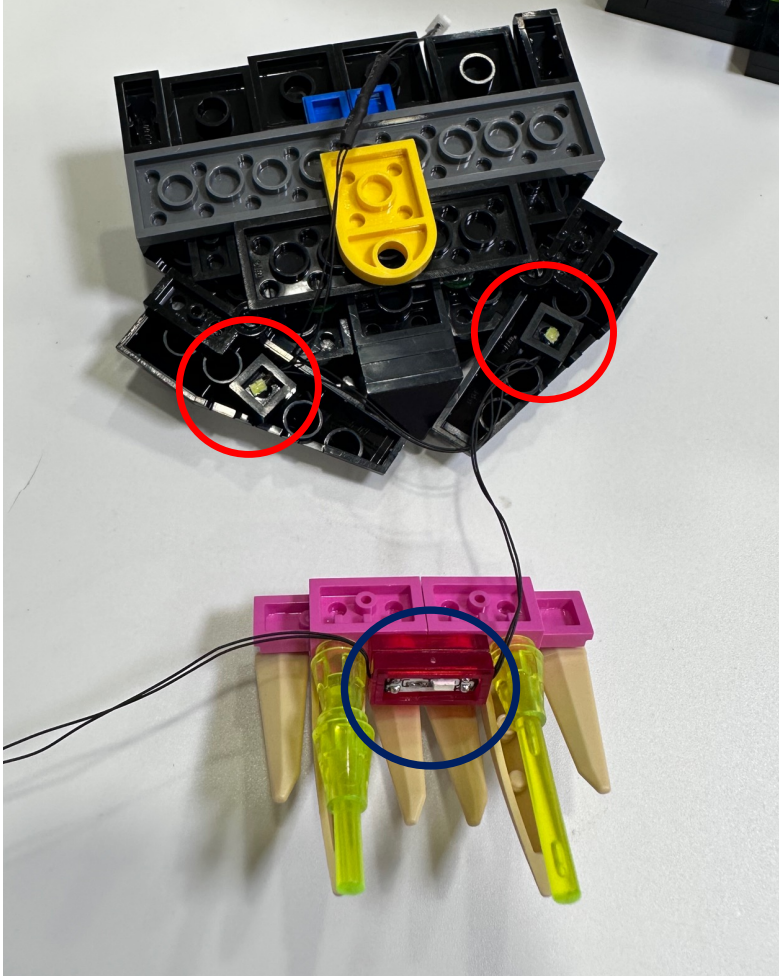

First of all, split the parts as shown

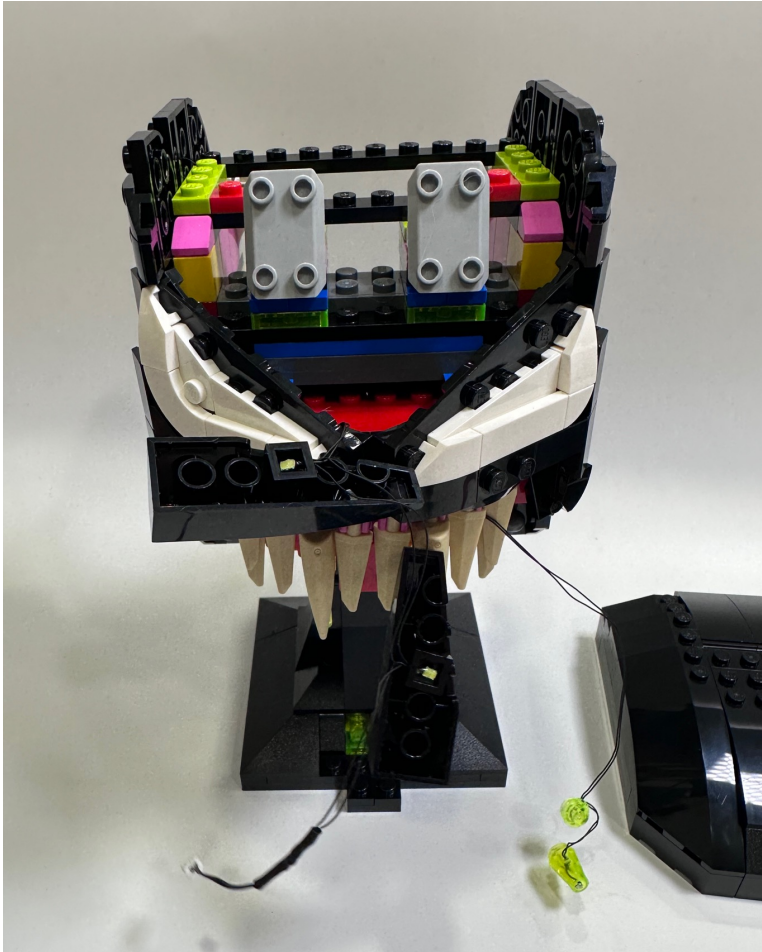

Assemble the clear red 1x2 lighting part at the teeth and the 1x1 lighting plates at the eyebrows of both side

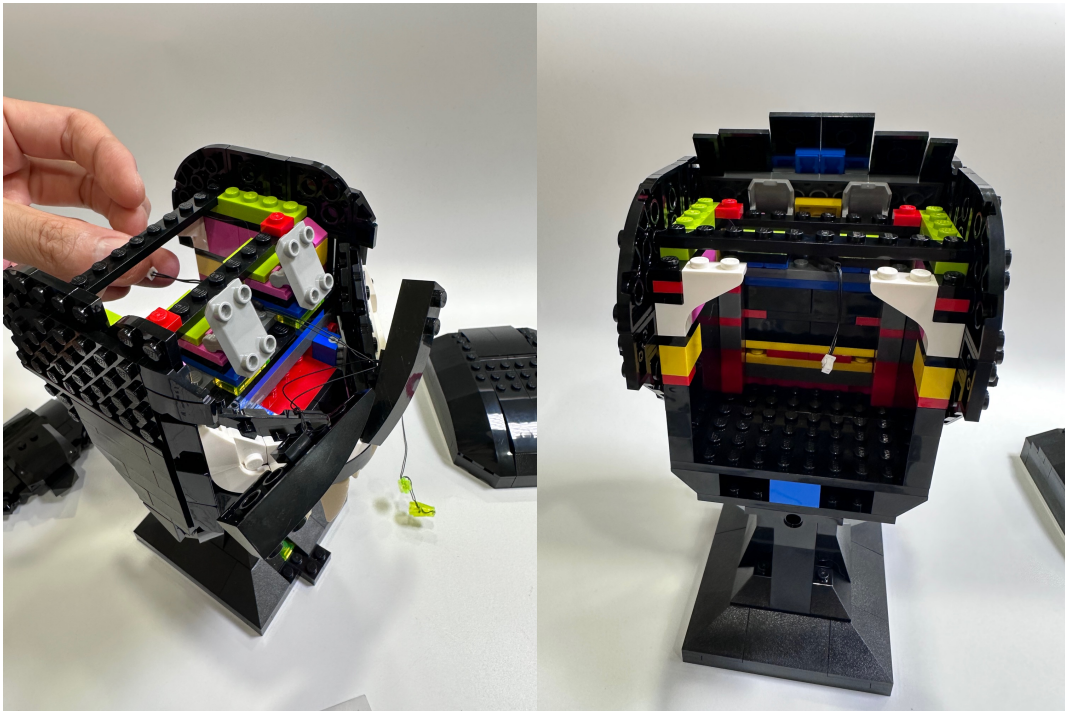

Restore the teeth then move the eyebrows to the top, the wire could be hidden by the gap shown in the red circle

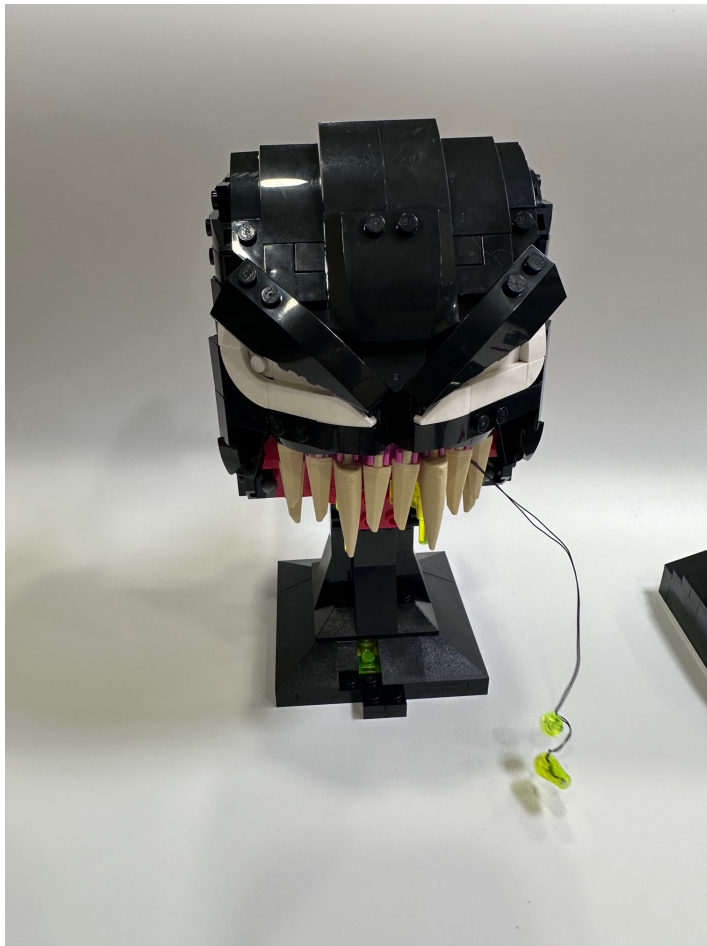

Now restore the eyes, before that make sure the eyebrows are placed above the eyes

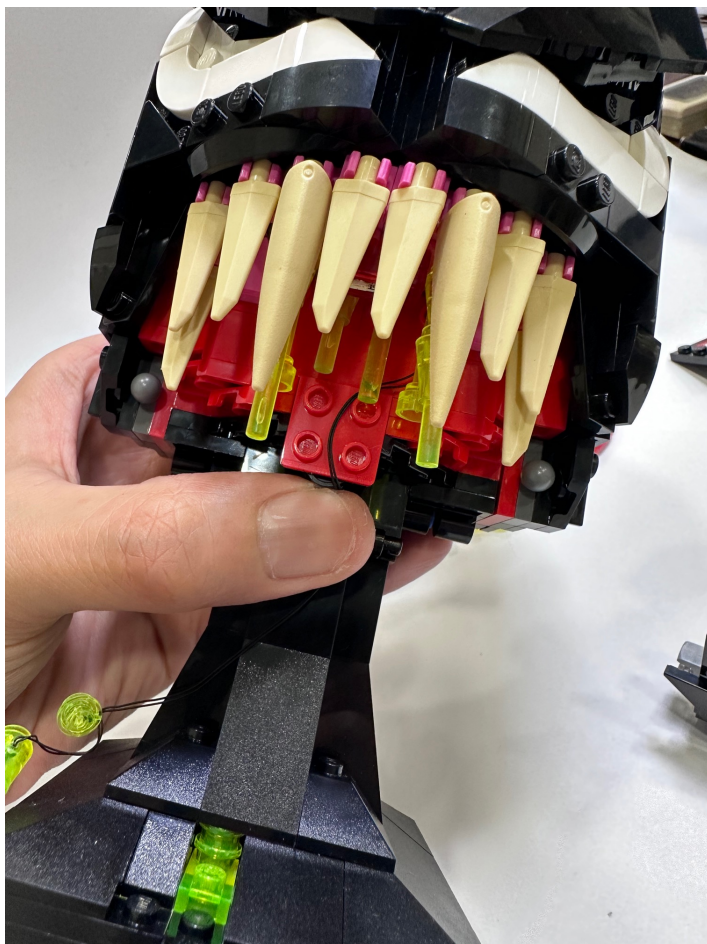

Before restoring the forehead and the eyebrows, pull the connector to the back first  
It would be looks like this, the connector would be placed inside the head

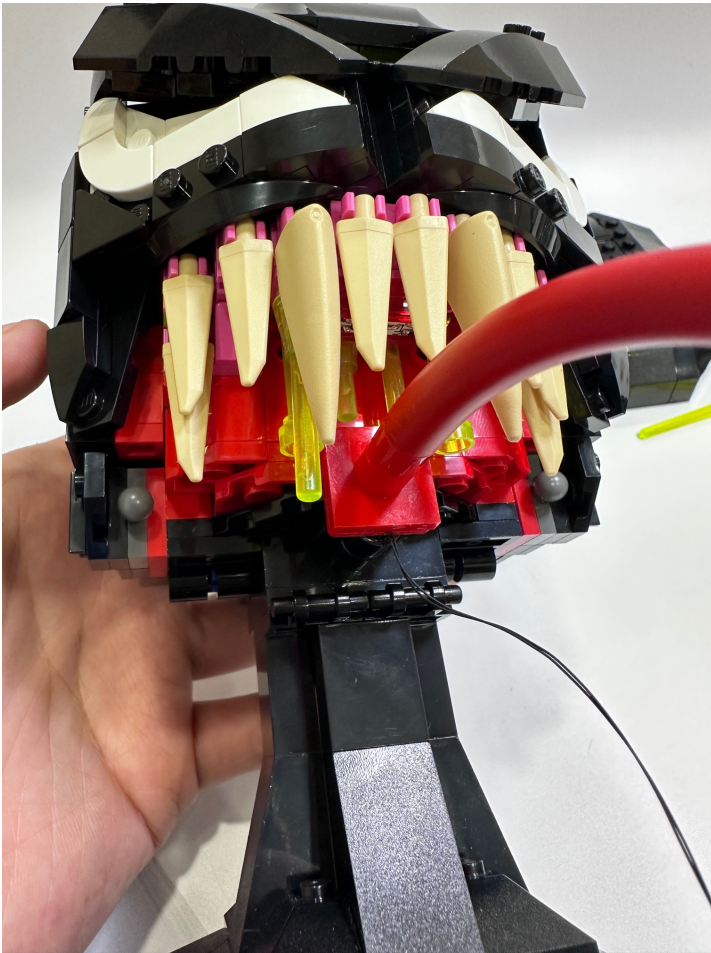

Now restore forehead and the eyebrows

Move the remain lighting parts to the base, the wire could be hidden under the tongue

Replace the cone and the round plate at the base by the remain 2 lighting parts  
Then you can restore the name tag

Now you may power it up by the USB cable or the battery case  
The case can be hidden inside the head

**\*Beware, if you powered by power bank with protection it might be turned off by itself due to the power consume is too little, then you need to power by AC adaptor or use the battery**
