Succulents

Installation Guide

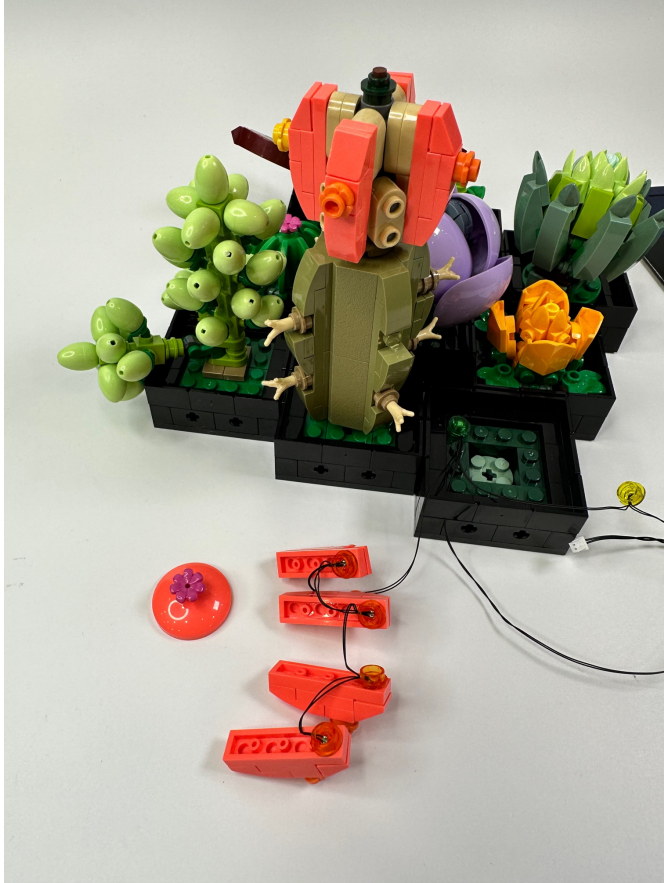

Begin the installation from the back of the model, take the lighting green round plate and the end next to the connector and assemble it as shown

There should be 4 orange lighting round plates besides the green one on previous step
Take the shown parts from the orange flower and assemble the round plates on them

Put the parts back to the flower to restore it

Take the yellow lighting round plate next to the green round plate at the other side, assemble it on the top of the yellow flower beside, you may choose to take the round plate off and put it on top of the lighting round plate or simply just replace it

Do the similar step as before, assemble the green lighting round plate on the green flower

Now the green lighting round plate on the small green flower besides

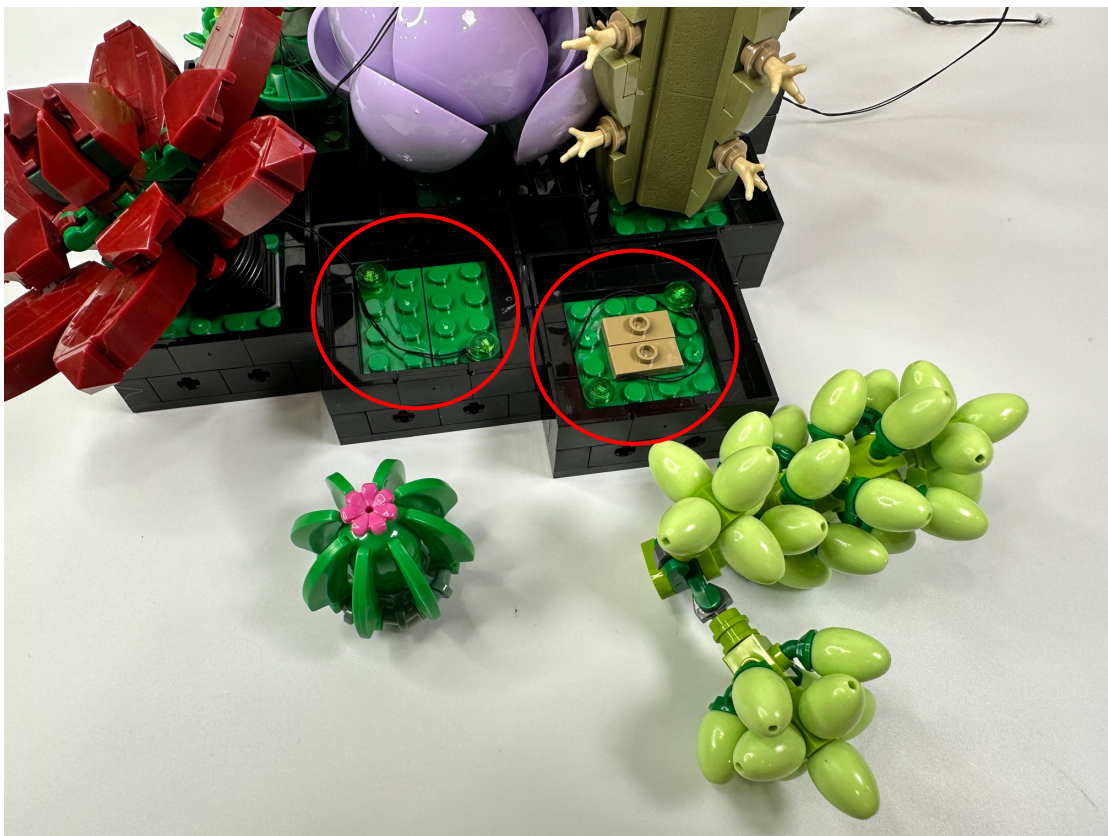

Move the purple lighting round plate to assemble it on the purple flower in the middle
Be sure to hide the cables in between the petals

Now the red lighting round plate on the red flower

The remain 4pcs of green lighting round plates would be assembled as shown

At last, you may choose to power up by either USB or battery
