

Lego 43217

'Up' House

Installation Guide

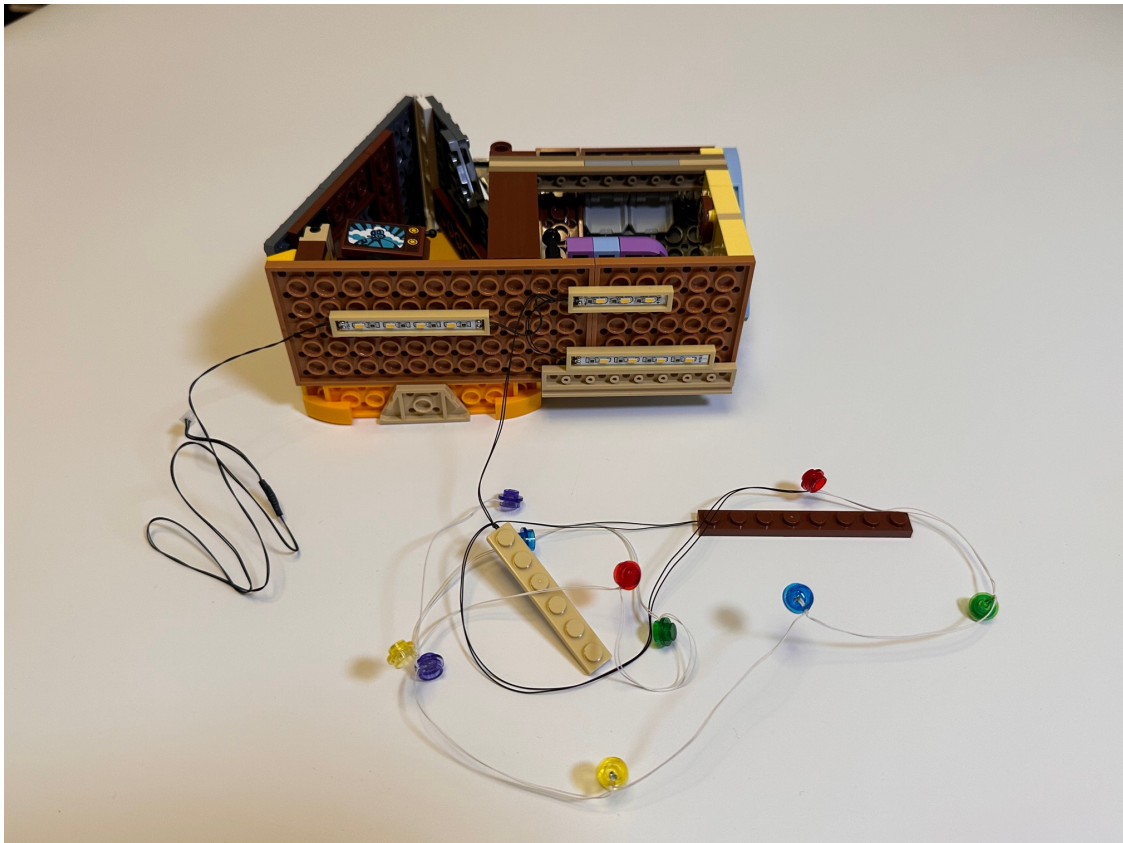

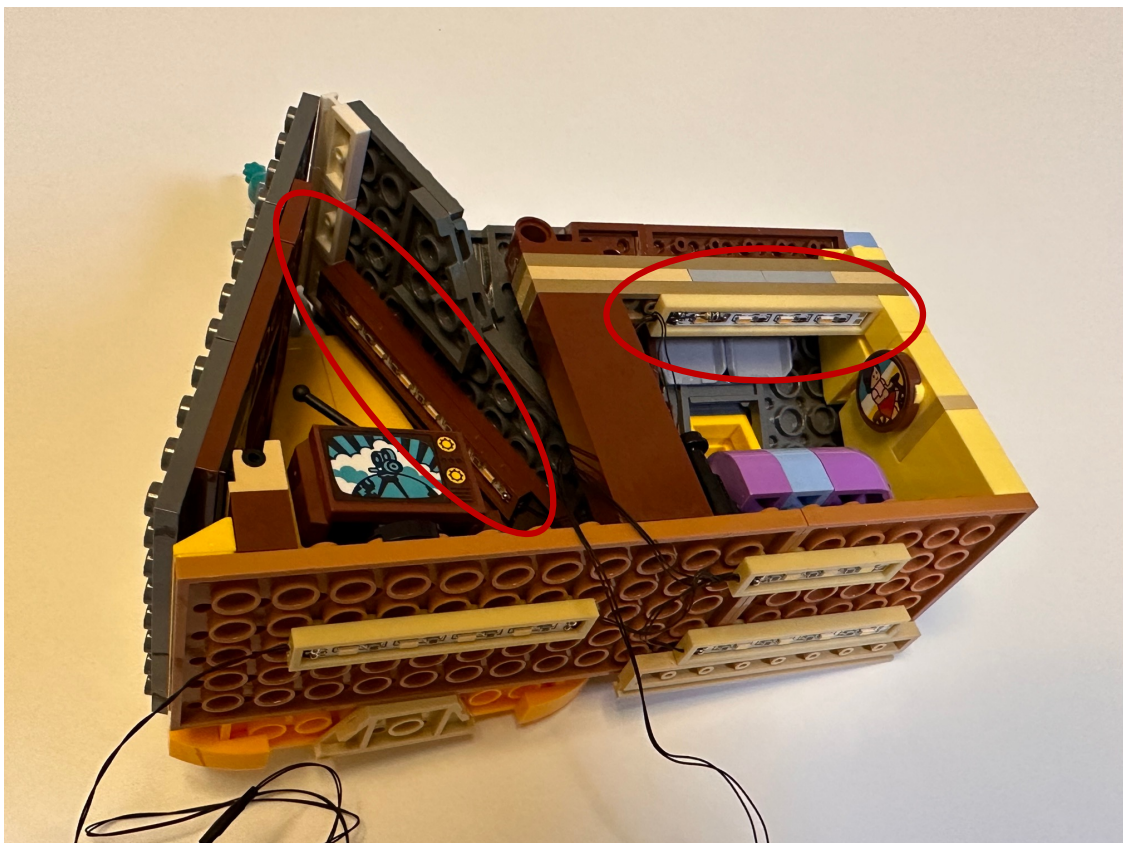

Firstly, split the house as shown

Assemble the tan lighting plates at the bottom of the 2nd floor exactly as the picture

Then move the remain two lighting plates to the 2nd floor and assemble them

For the remain lighting round plates, assemble them on the balloons at the top randomly as you like

The light installation for the main house is now done

For the other lighting parts, assemble them on the balloons aside, follow by their colors

At last, power up the lighting set by connecting the USB cable
