# Lego 76917

2FAST 2FURIOUS
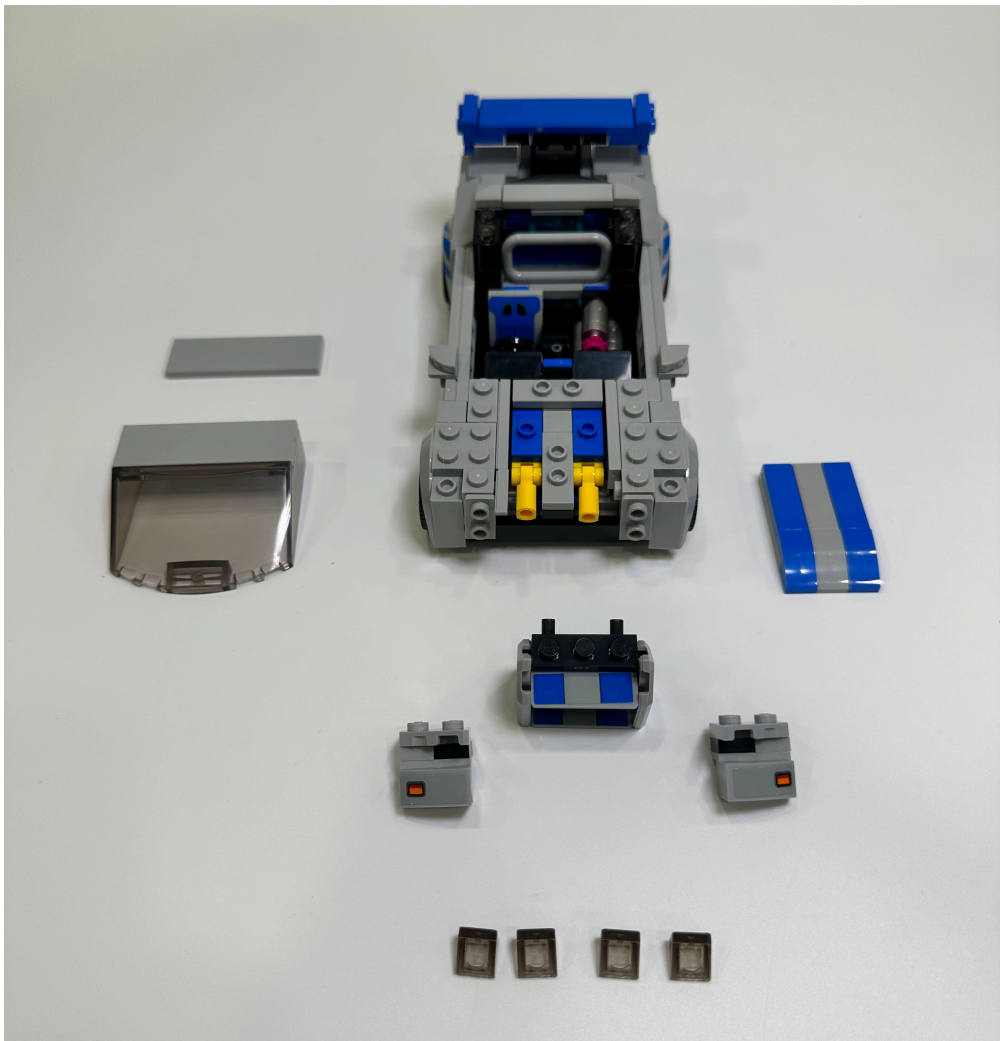

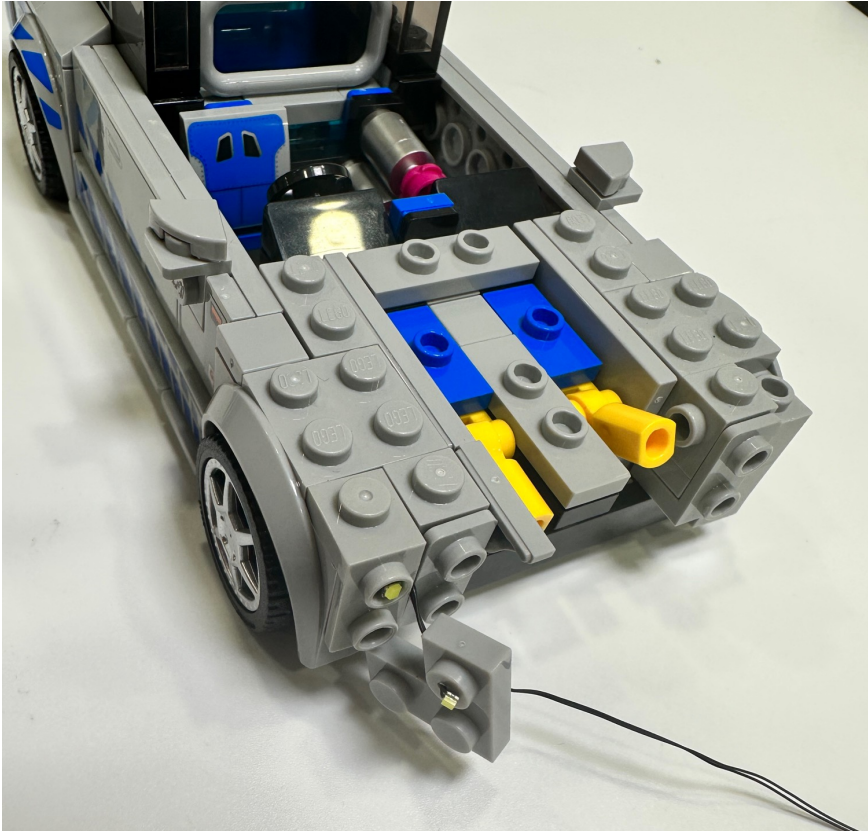

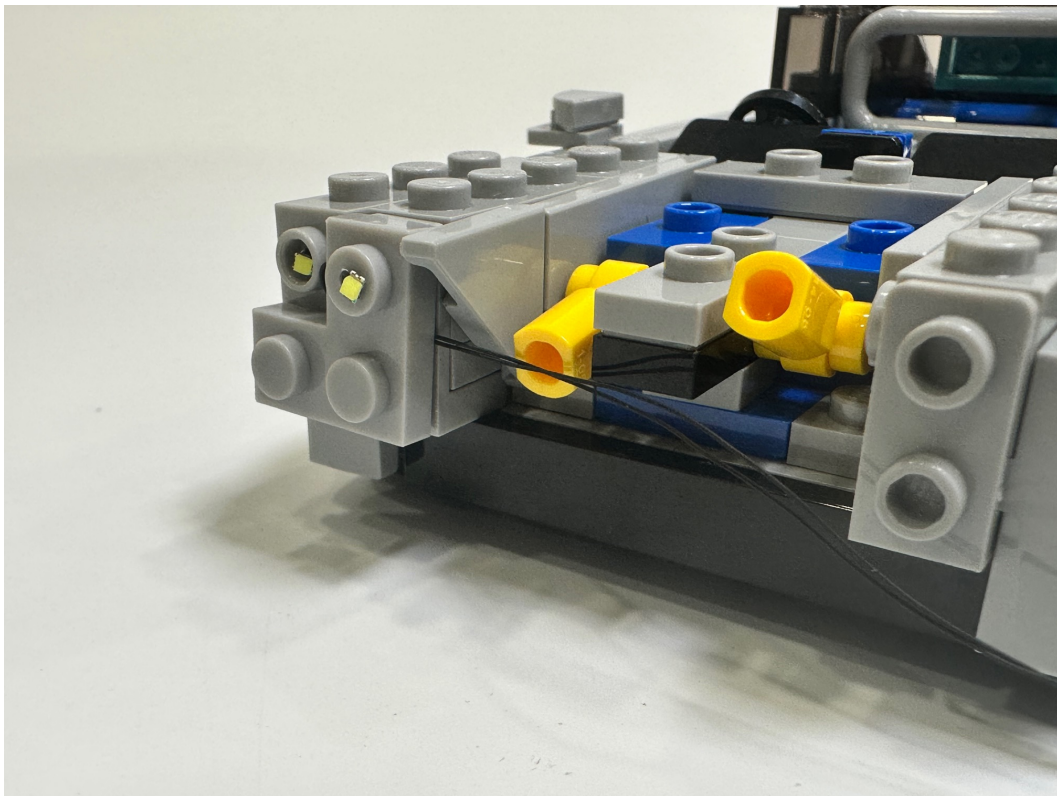

Nissan Skyline GT-R R34

Installation Guide

First of all, detach the front side of the car as shown

Start assembling the lighting kit from the end side of the kit
Replace the spot where the grey part was taken

Then put the L-shaped lighting plate on and the wire should be placed in between
the studs as shown

Then pull the other pairs to the other light and repeat the same procedure

The remain lighting parts would be move to the back, the wire would be hidden at the shown gap in between the tile

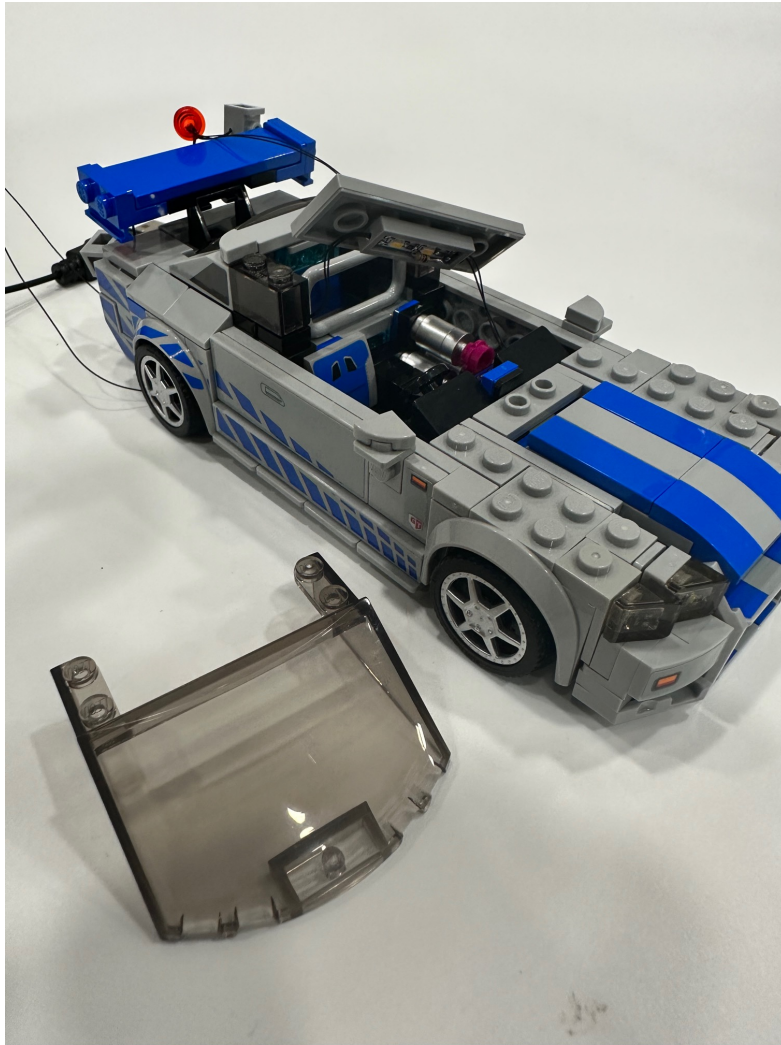

Before continue the assembling, you may restore the front of the car first
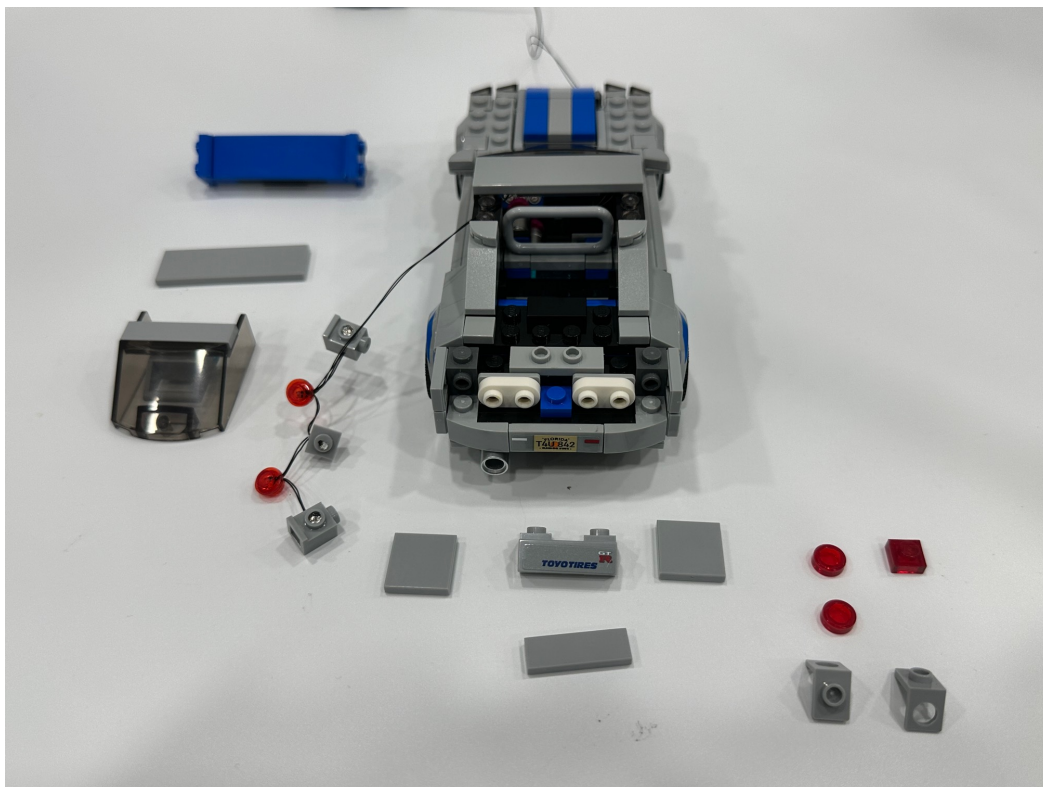

Remove the shown parts on the side, then put the wire with USB cable in between the studs
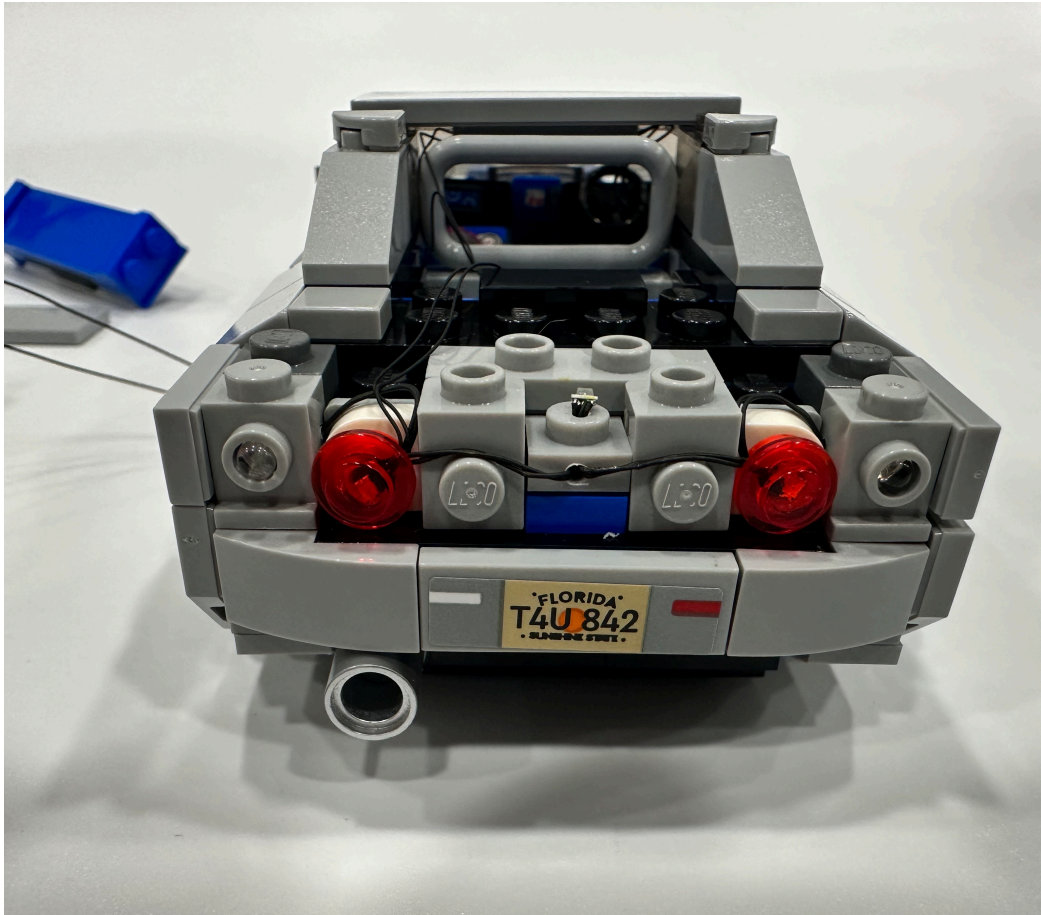

Split the tile from the windshield, then assemble the 1x3 lighting plate to the tile
And put the windshield back on the car with the tile after

Now detach the shown parts on the rear side

Replace the grey bricks, clear red round plates and the grey plate at middle by the lighting parts

Then restore the parts back to cover the lighting parts

Restore the spoiler, tiles and the top then the installation is finished

At last, connect the USB cable to power up the lights
