

Lego 21353

The Botanical Garden

Installation Guide

Take lighting part A to assemble at the entrance

Detach the shown parts from the entrance, assemble the lighting plate with round blocks attached (please follow the position and direction same as the picture below)

Assemble the other lighting plate with connector attached first

Restore the windows first and place the wire in between the studs

Restore the remain part and replace the clear round blocks on the lamps by the lighting parts

For the remain 1x4 lighting plate, assemble it under the platform at the end
Please assemble it exactly same as the one in picture otherwise it would be blocked by
the parts under of the platform

Place the wire at the ground and cover by the stairs

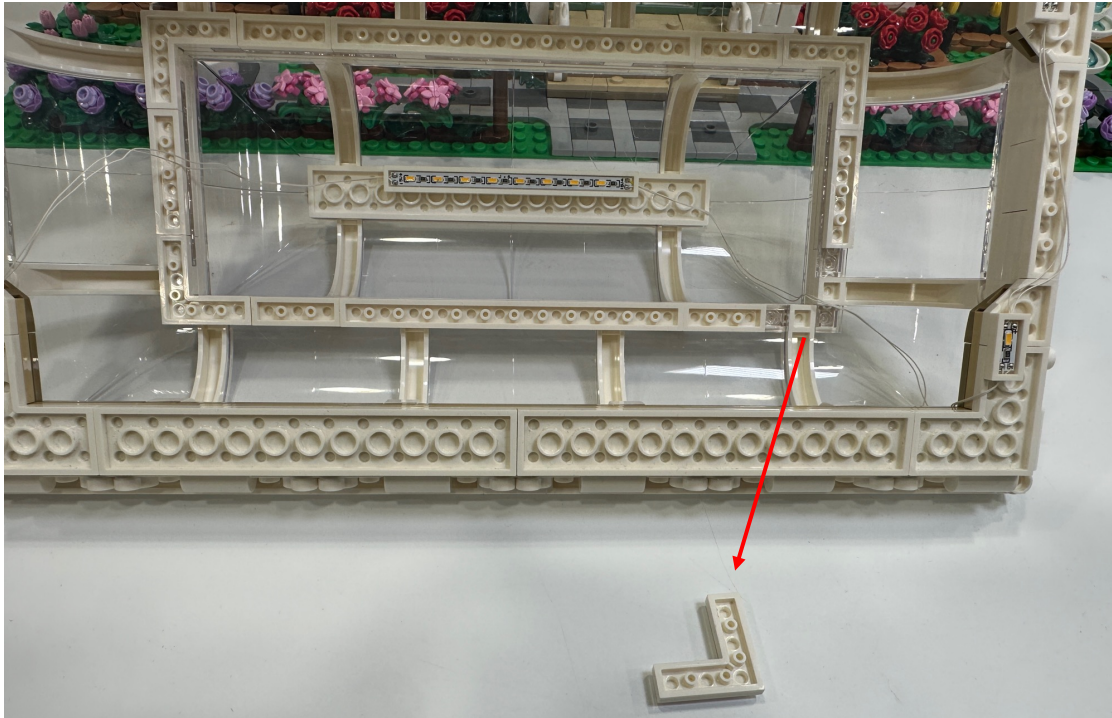

Leave the plug outside to connect with lighting part B later

Lift up the top and take the lighting part B, get the end with connector and 1x2 lighting plate attached to attach it on the corner then assemble the other 1x2 lighting plate

Remove the plate from the inner corner shown then assemble the 1x10 lighting plate in the middle and restore the plate to stable the wire

Then do the same procedure for the other side

Connect the plugs with lighting part A and place the other connector to the back then you can close the top

Assemble lighting part C to the side of the garden with the tree

Remove the flowers shown then assemble the lighting pink round plates on the leaves

Place the wire under the flowers in red circle then stick the brown lighting tiles under the windows, take away the parts to let the wires get through first

Replace the diamond by the lighting plates, then restore the flowers removed at the previous steps

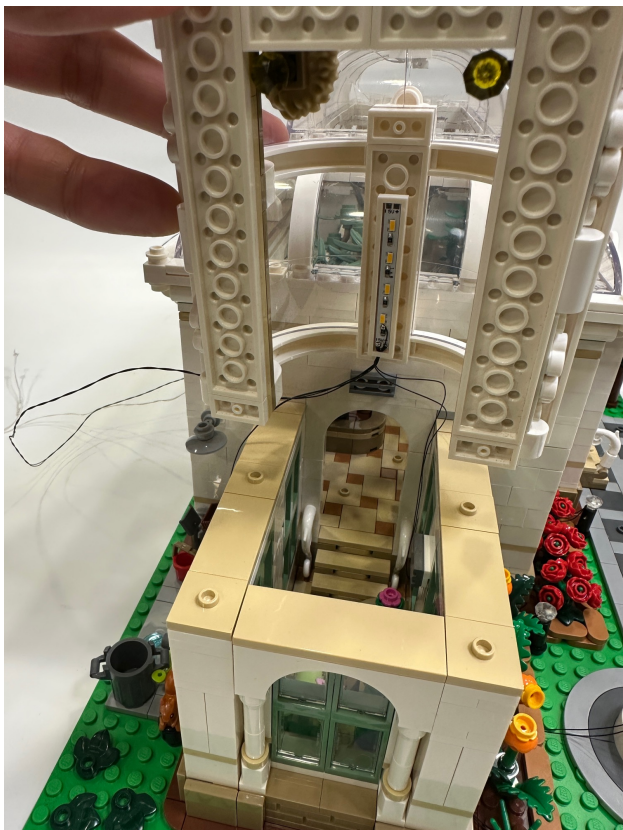

The 1x6 lighting plate would be assembled inside the house

To move the lighting plate inside, remove the window then place the wire under the plate

Restore the windows afterward and assemble the lighting plate

Replace the clear part by the lighting part and place the connector to the back

Assemble the remain lighting round plates on the tree

Spread the lighting round plates on the tree evenly and mostly facing at the front

The lighting part D would be assembled on the other side of the garden

Remove the flowers and assemble the pink lighting round plates

Stick the brown lighting tiles under the windows and replace the diamonds by the same way as the previous one

Open a gap at the clear blue dish at each level of the fountain and place the led bulbs inside of it

Then place the blue lighting round plate on top of the fountain

Assemble the 1x6 lighting plate inside the house

Replace the clear part of the lamp by the lighting part then place the connect at behind of the house

At last, connect all three connectors to the USB cable then you can light it up
