

LEGO 75356

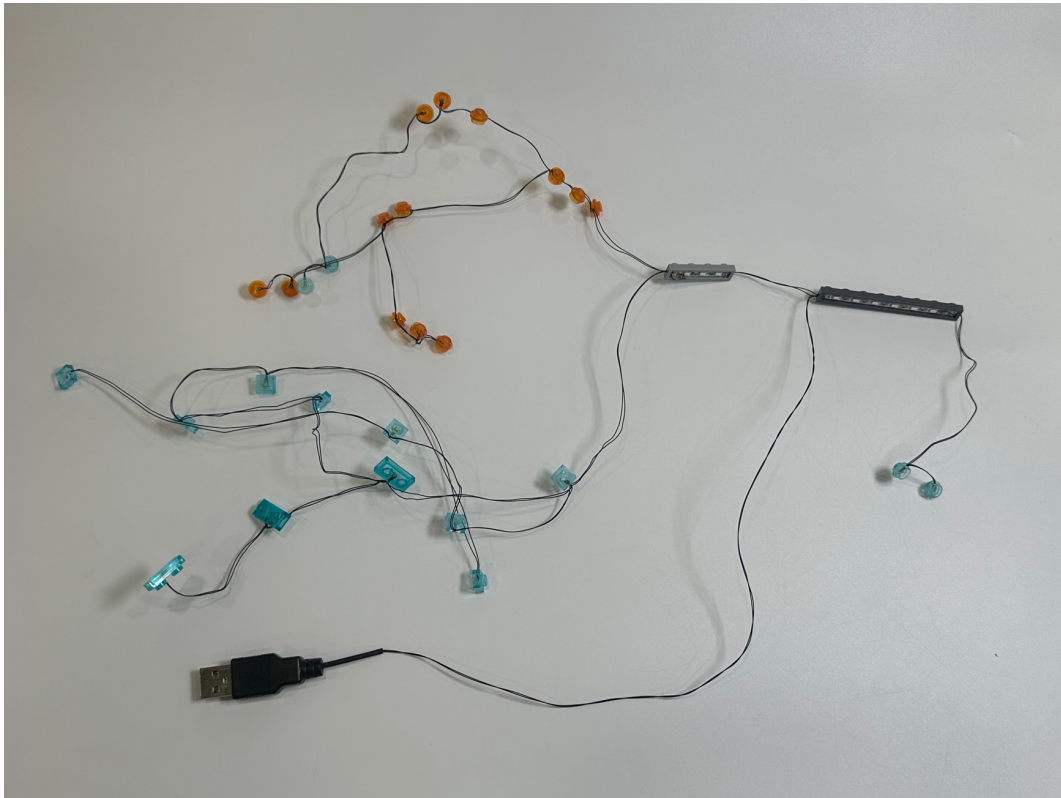

**STAR
WARS**

Executor Super Star Destroyer

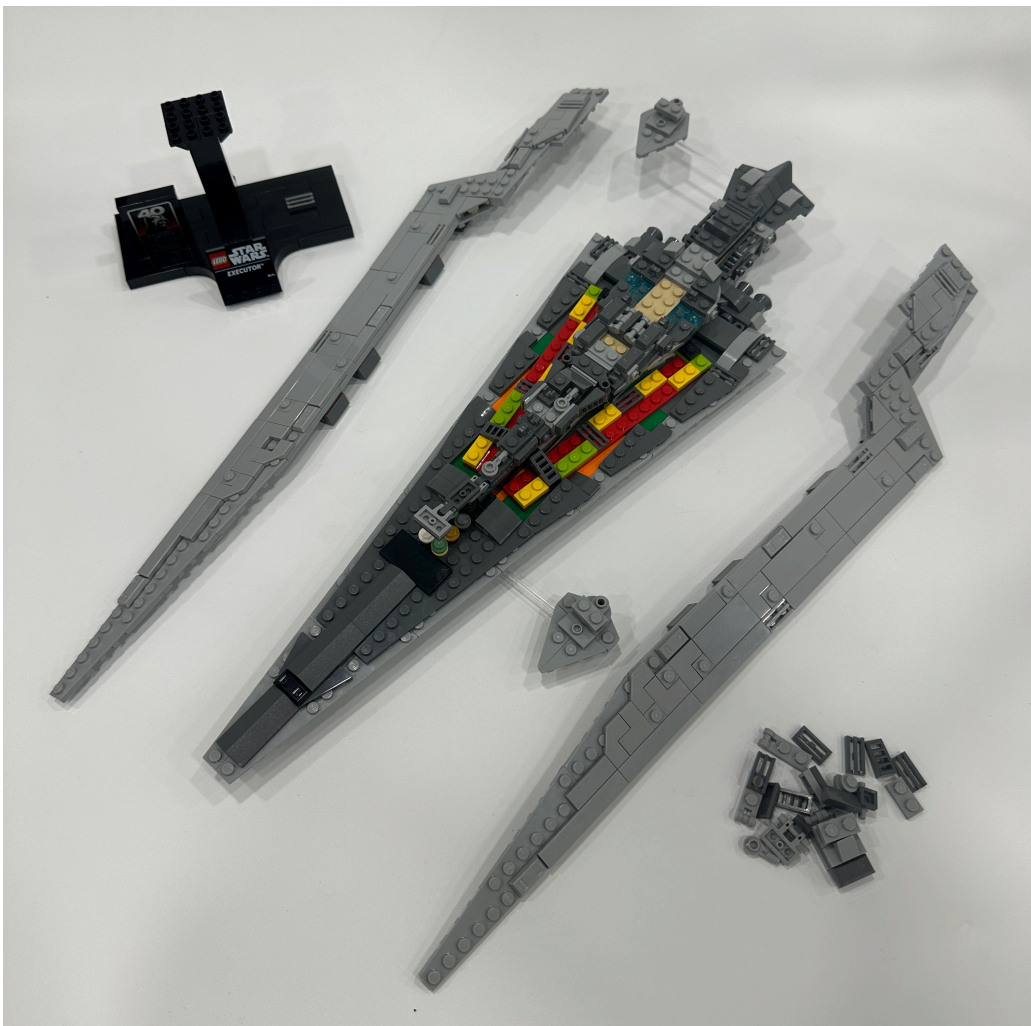

Installation Guide

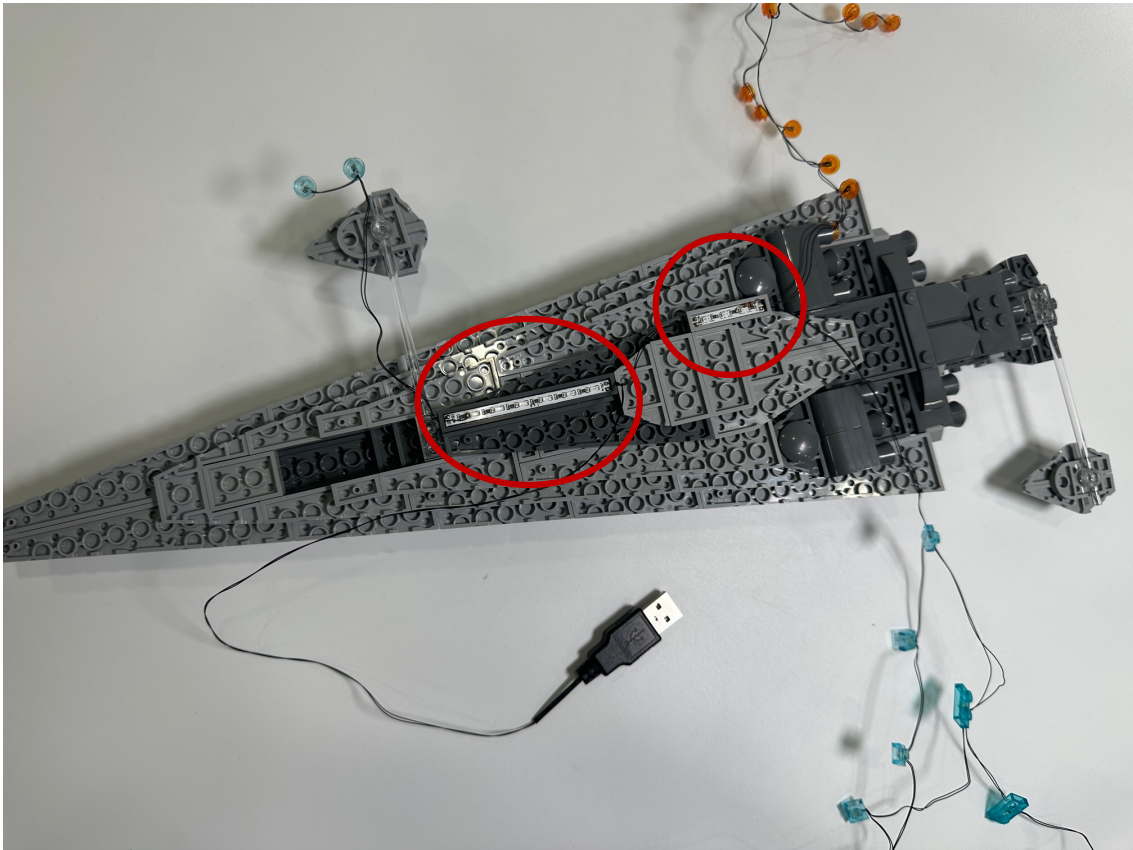

**GB GLOW
BRICKS**

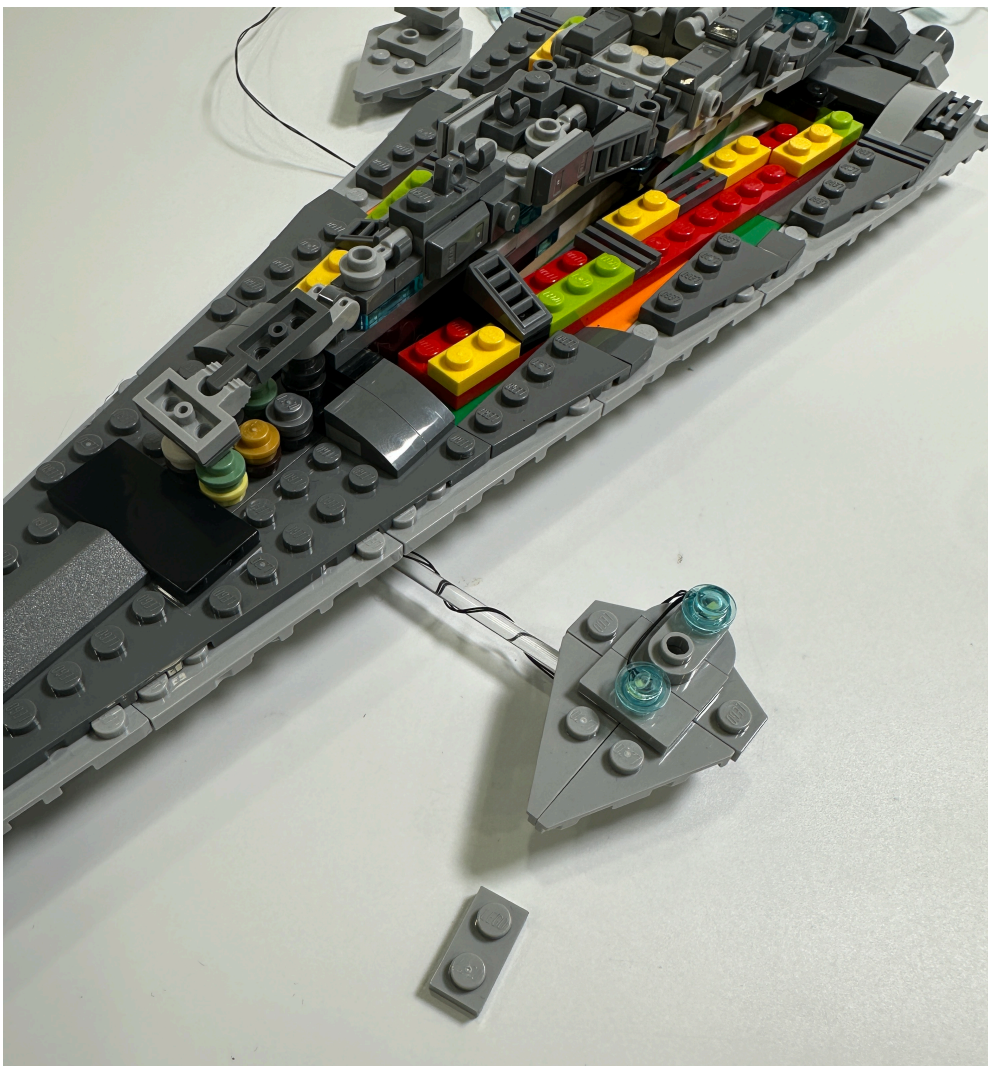

First of all, take the model out from the stand, detach two sides of the ship and the shown parts on the surface

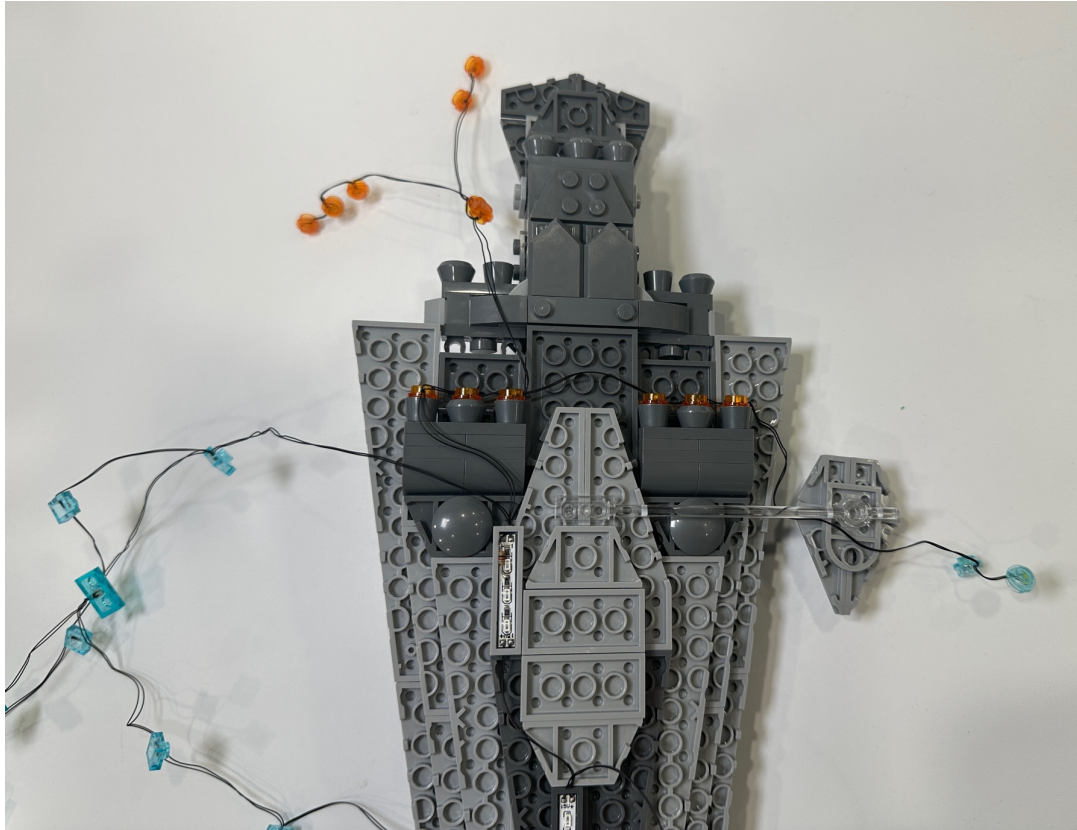

Assemble the lighting plates at the bottom of the ship as shown

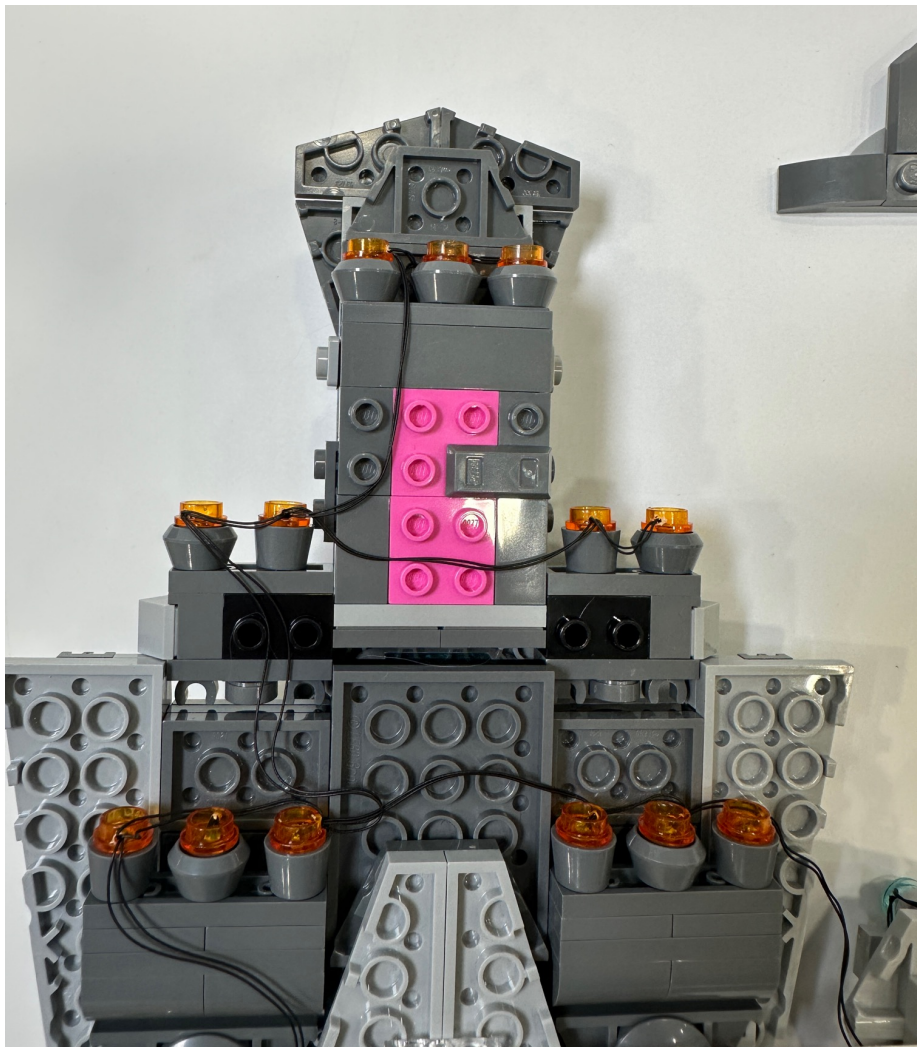

Assemble the blue round plates connected to the longer lighting plate in previous step on the small battle ship at front

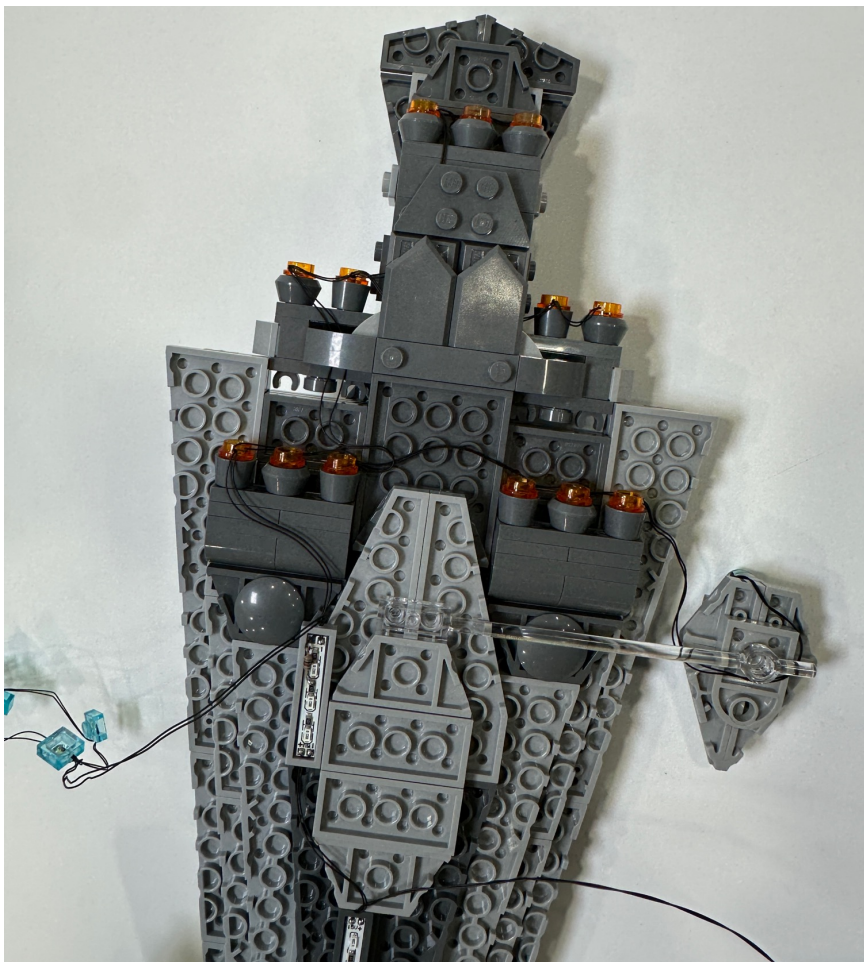

Then replace the orange round plates at the back by the lighting round plates

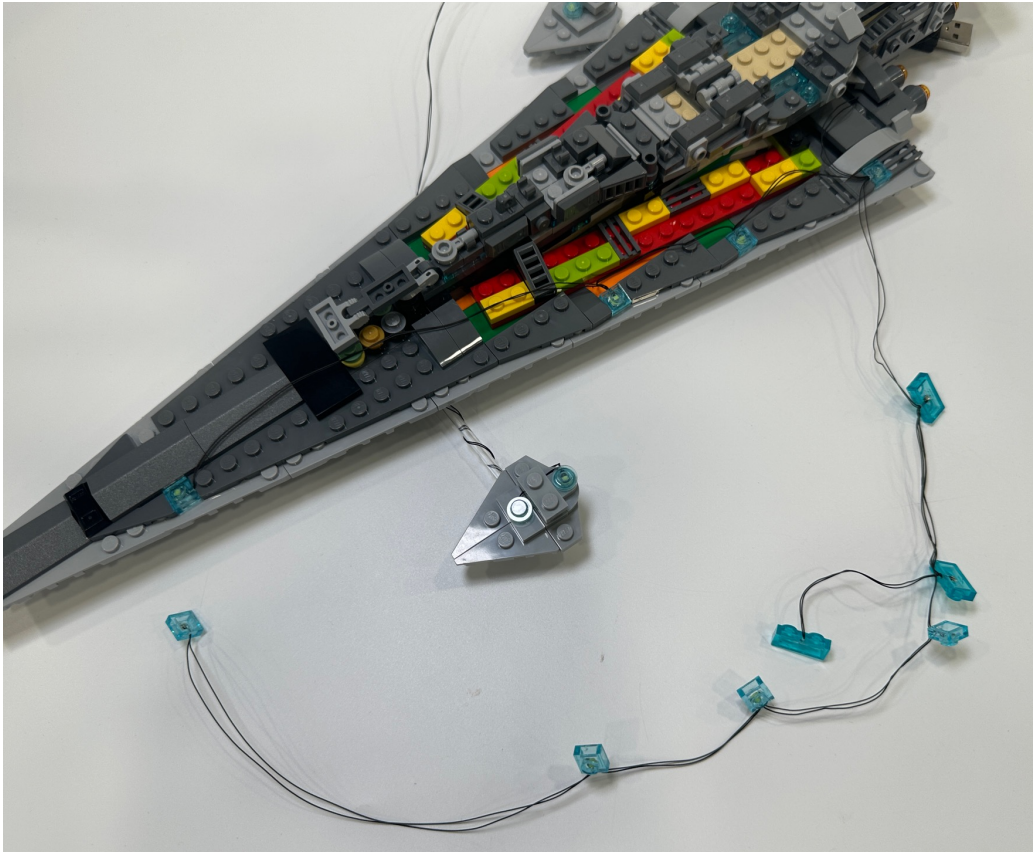

Place the wire under the removed parts shown to make them less visible

Assemble the blue lighting round plates on the small battle ship at the rear side

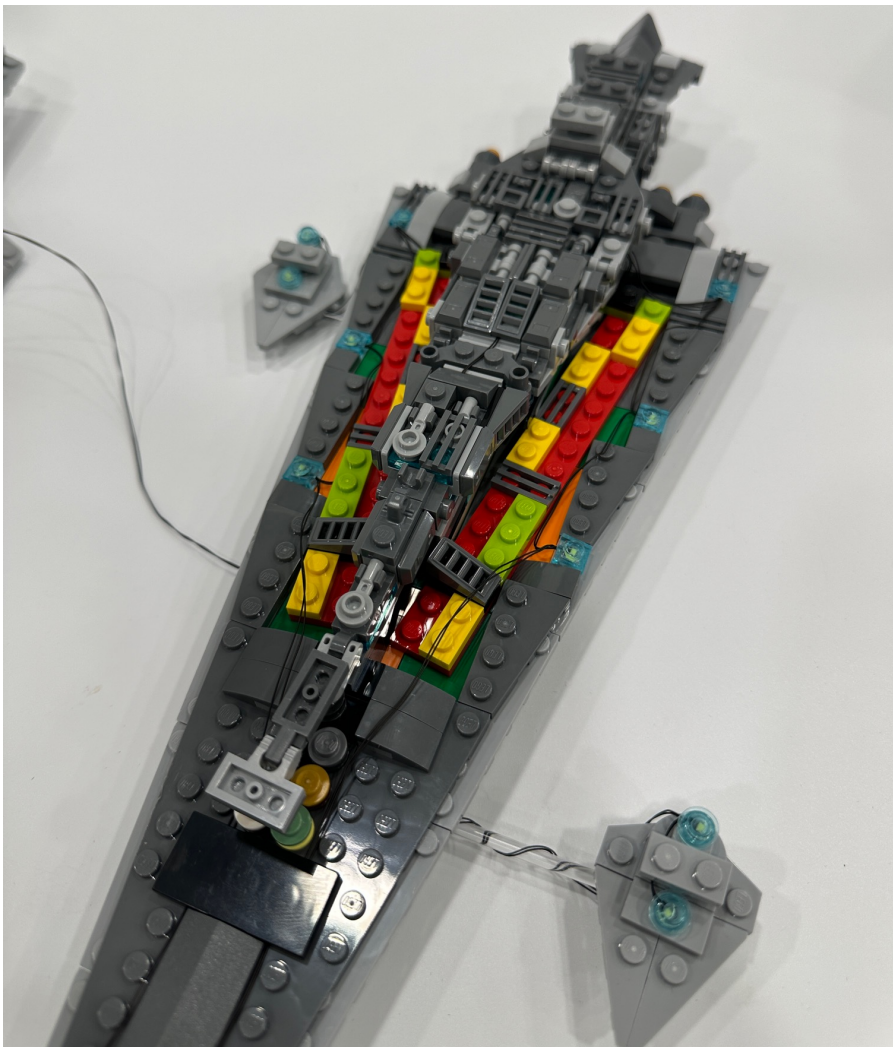

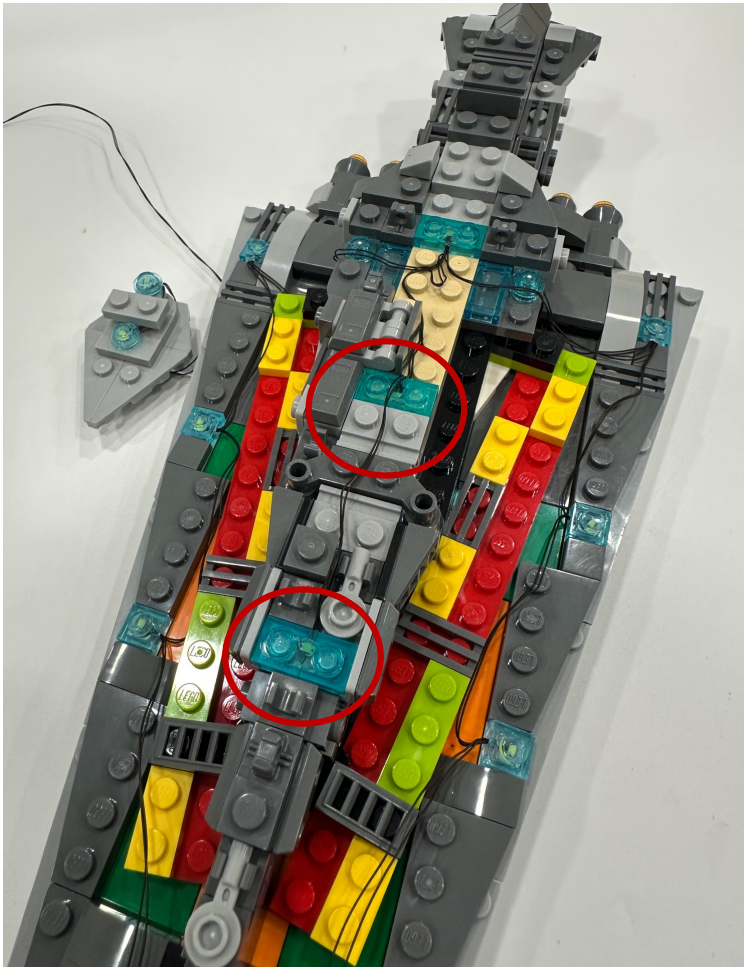

Get the 1x1 blue lighting plates followed by the lighting plate at the bottom, replace the 1x1 blue plates on the side of the ship

Assemble the 1x2 lighting plate in the middle of the ship (red circle) then replace the 1x1 plates on the other side by the lighting plates by the same way as the previous step

Assemble the remain 1x2 lighting plates, then restore all the removed parts from the first step

Put the ship back on the stand and you may now light it up
