

Lego 10370

Poinsettia

Installation Guide

Start from the very end of the lighting kit it's a yellow lighting round plate, assemble it on top of the model in between the yellow round plates

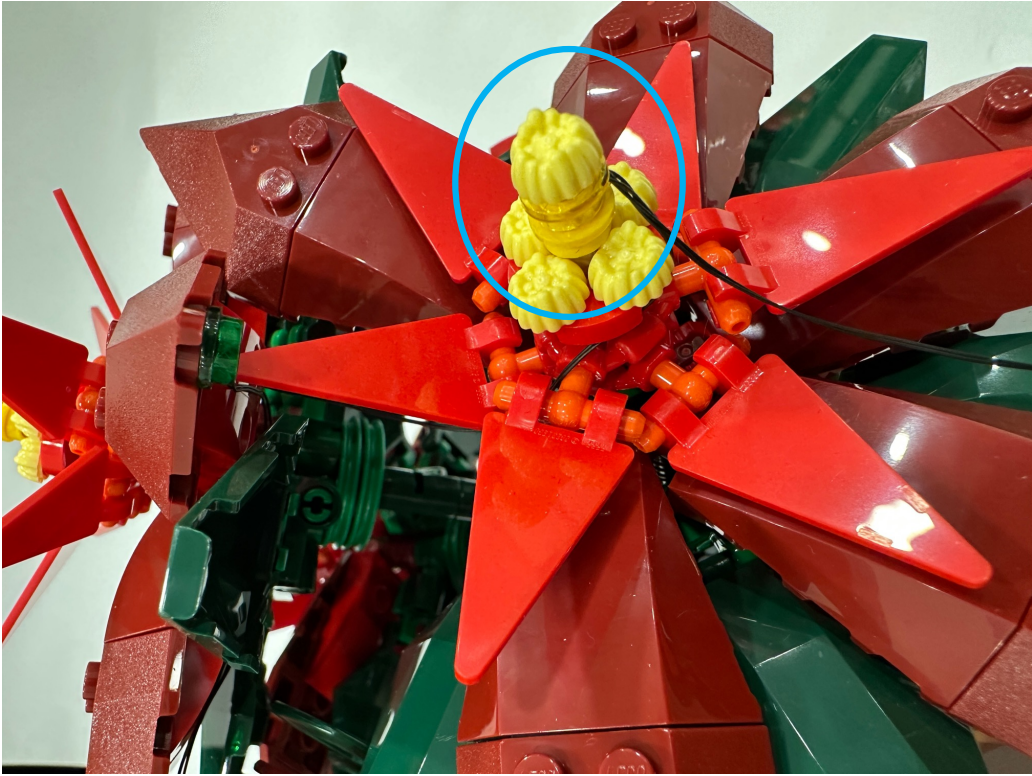

Assemble the green lighting round plate under the red parts in the layer below

Assemble all four green lighting round plates, place the wires at the center and cover by the red parts

Assemble the yellow lighting round plates followed by the green one in the previous step onto the closest yellow round plates then assemble the rest three of them and hide the wires inside the plant

At last, assemble the remain green lighting round plates at the bottom layer then you can light it up
