

Lego 10350

Tudor Corner

Installation Guide

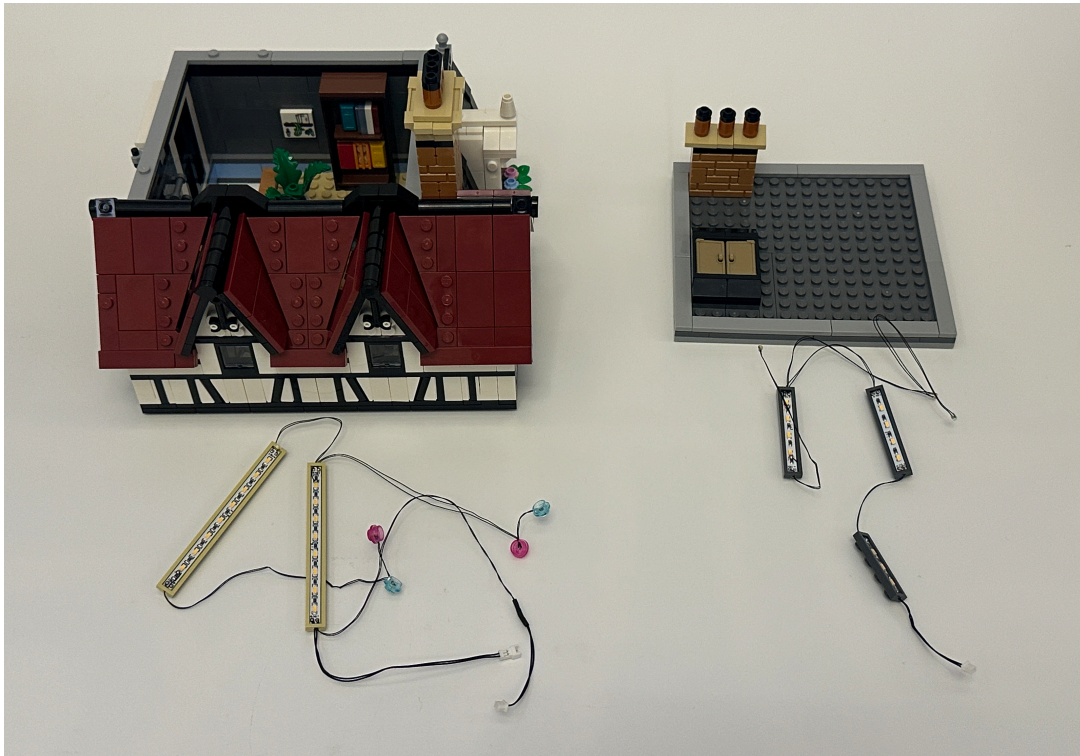

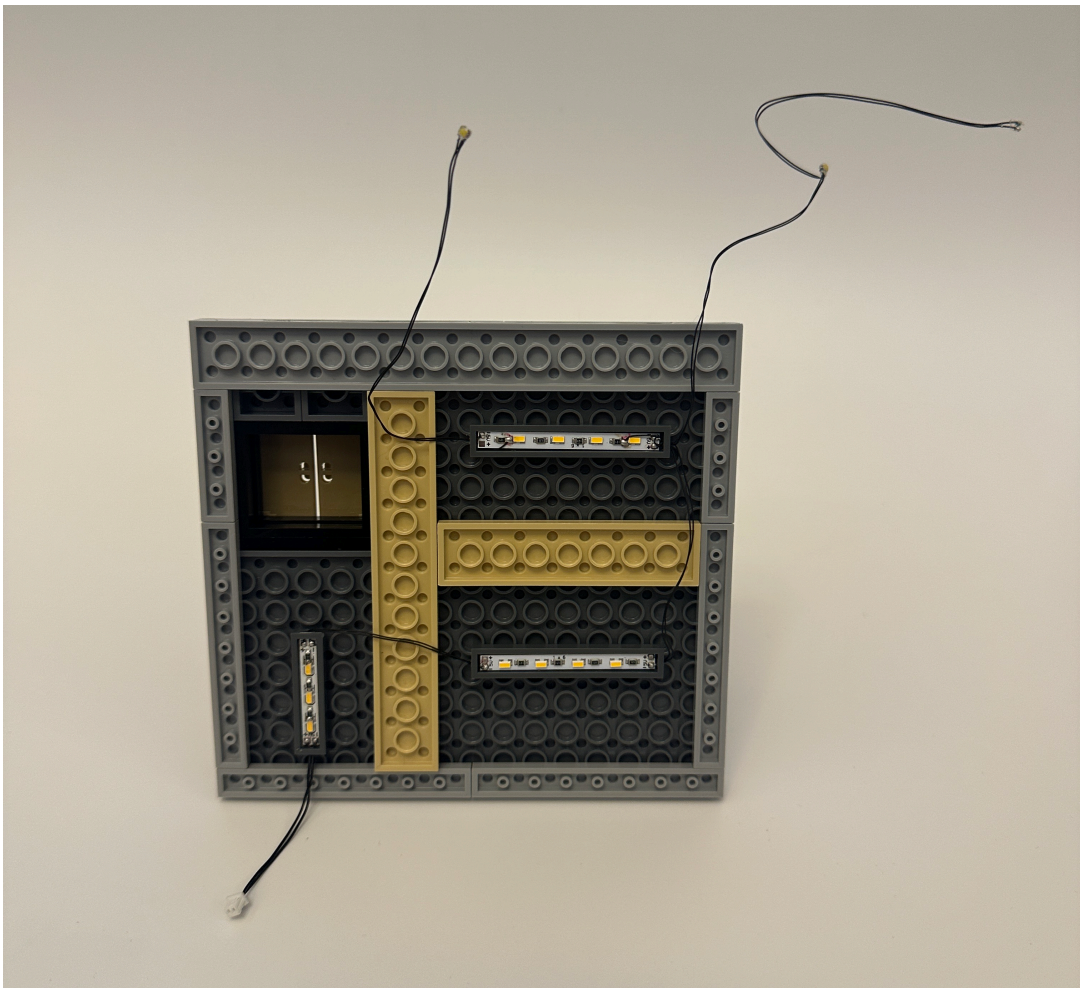

Split the house by floors before the installation

Take lighting parts A and B to assemble them on the top floor and the roof top

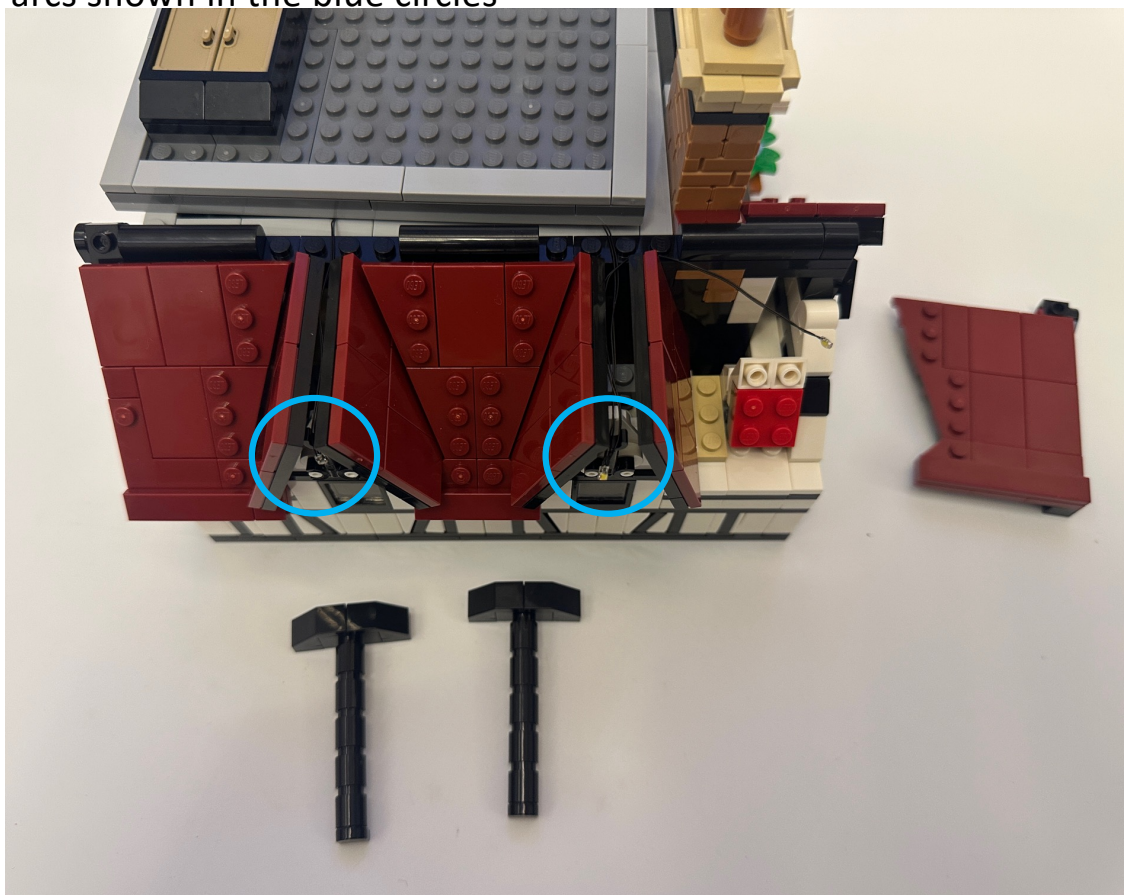

Assemble the lighting part A under the roof top as shown

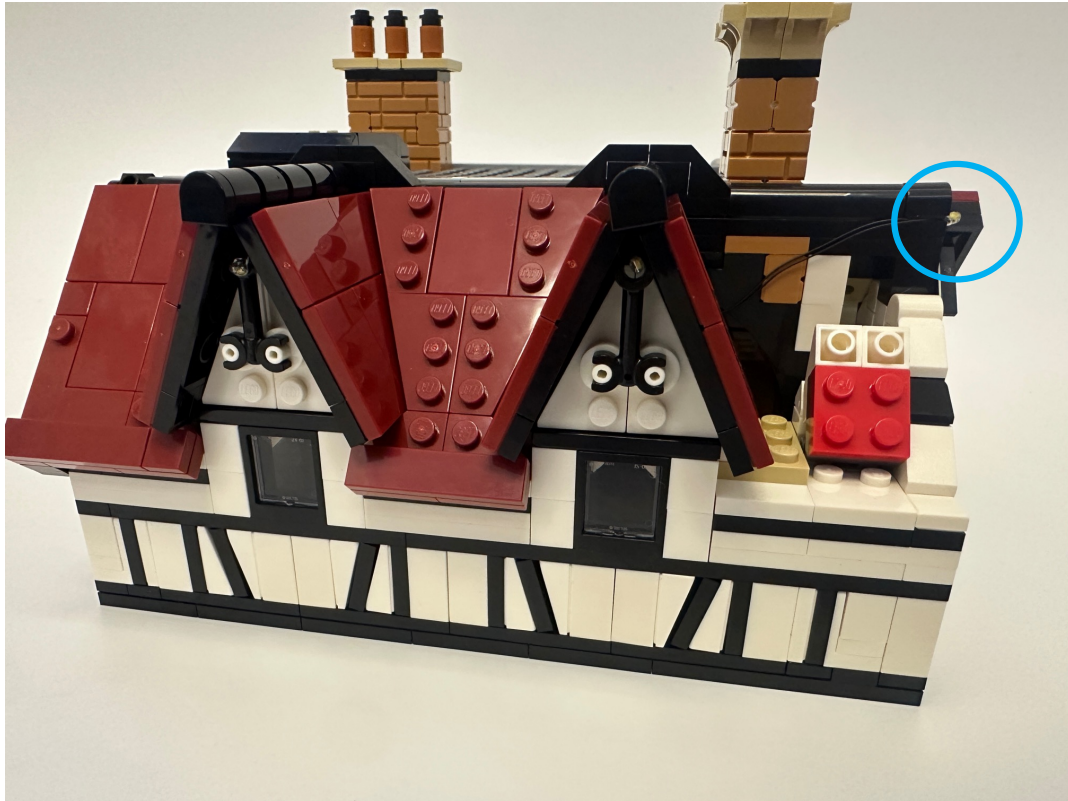

Detach the shown parts from the top floor

Put the roof top on the house, place the two led bulbs on the black arcs shown in the blue circles

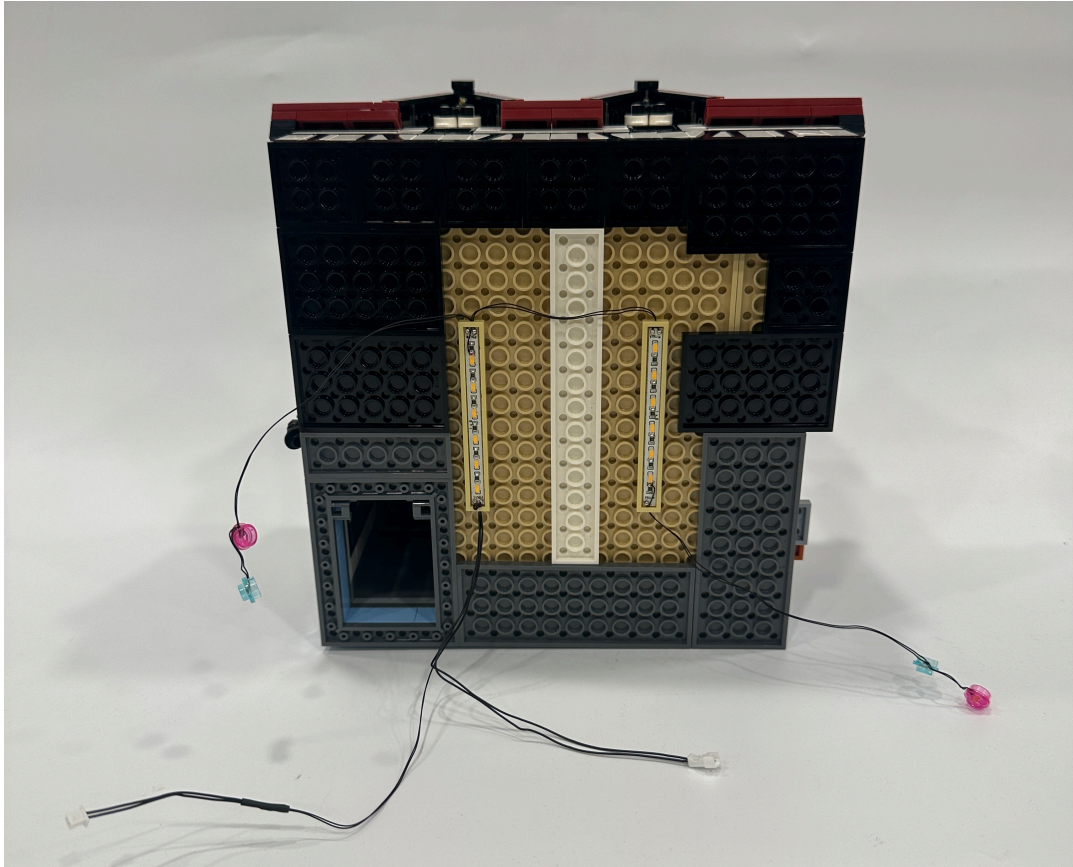

Restore the black parts, pull tight the wires for the bulbs then place the roof top properly and the bulb remain would be placed where the blue circle is and stabled by the gap of the black blocks

Restore the roof then this part is done

Assemble lighting part B on the bottom of the top floor as shown

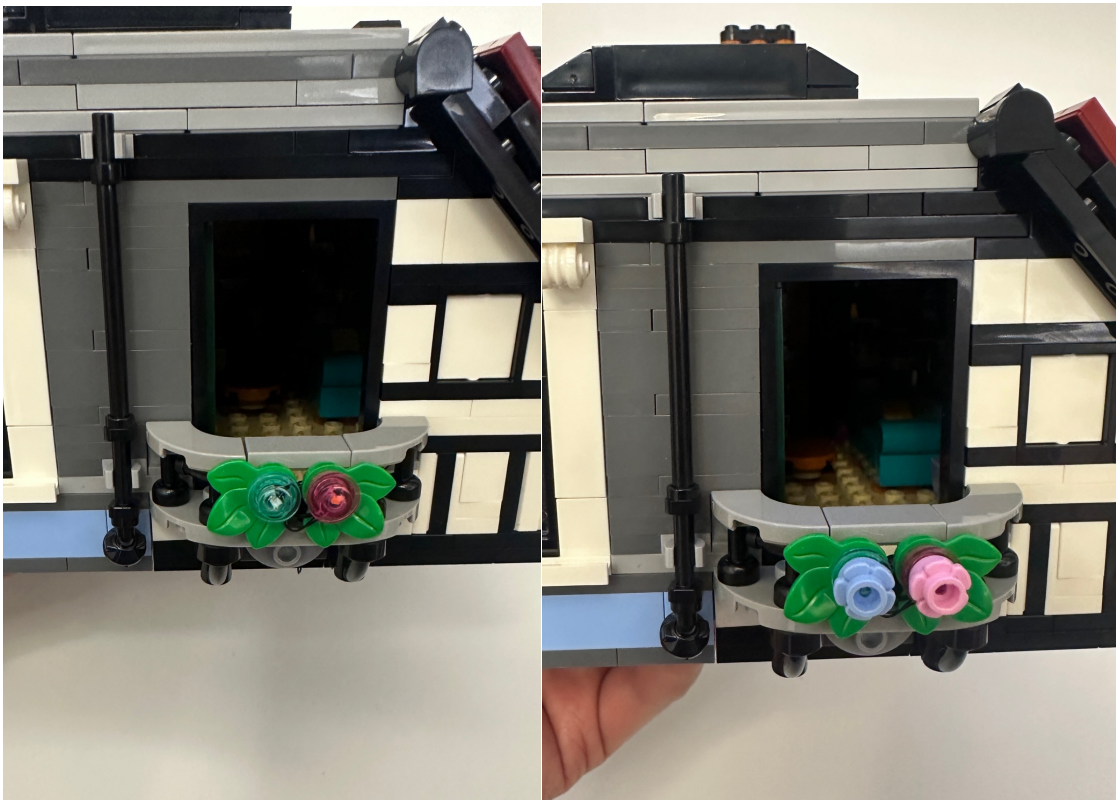

Remove the shown parts and take the pair of lighting round plates up to the door

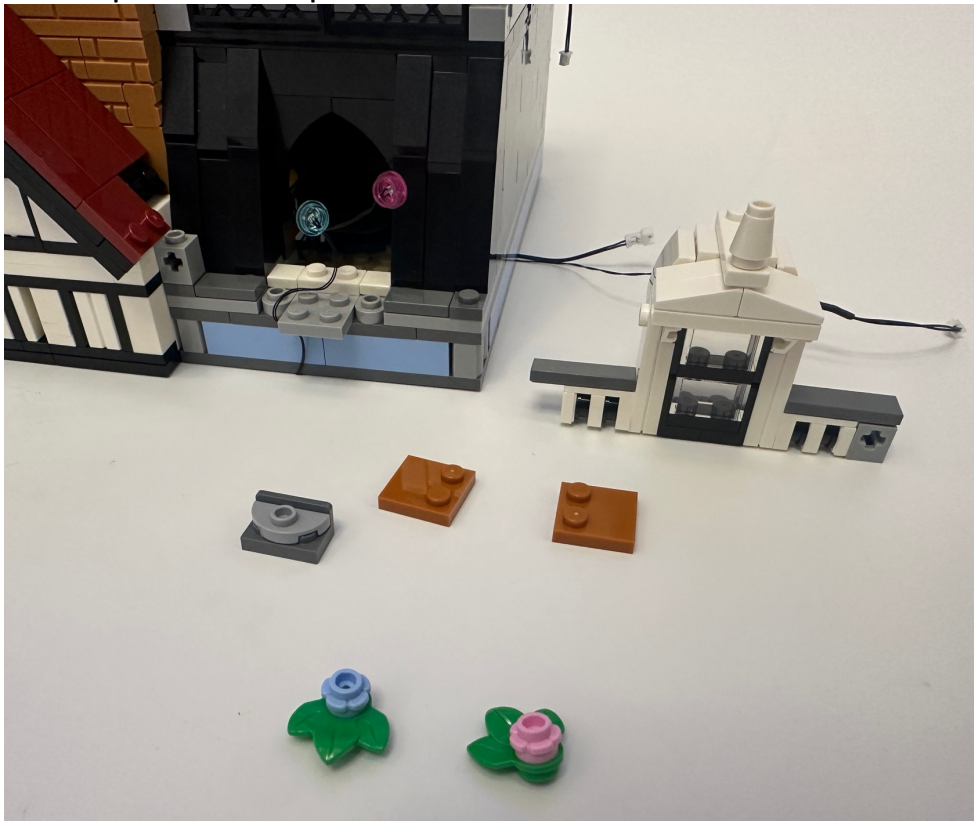

Then restore the balcony and leave the lighting round plates on top of it

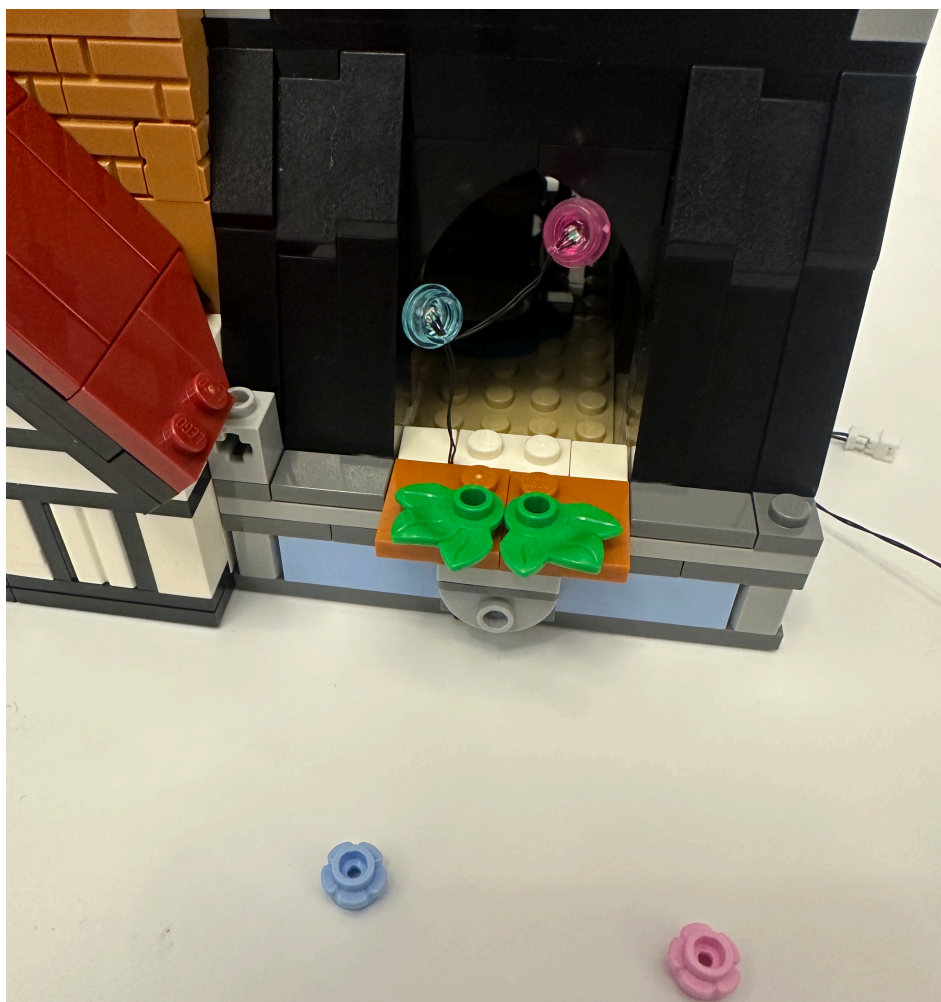

Assemble the lighting round plates on the leaves then restore the whole balcony then restore the flowers on top

On the other side, detach the shown parts and move the lighting round plates on top

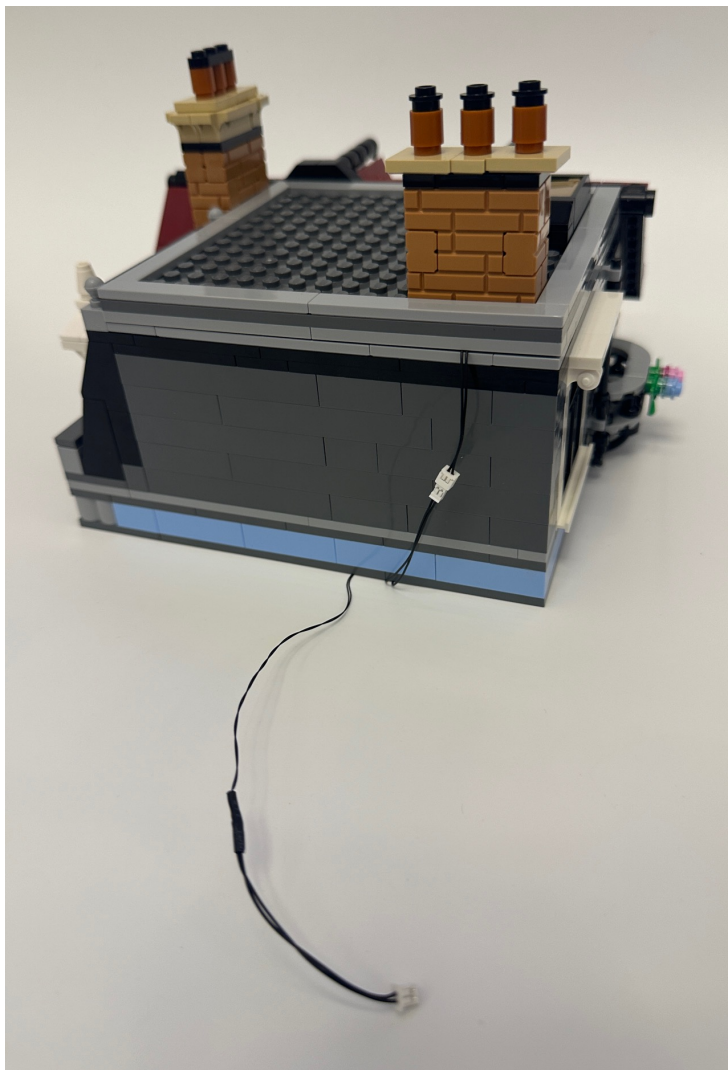

Restore the shown parts then assemble the lighting round plates on the leaves

Restore the flowers and the window at last

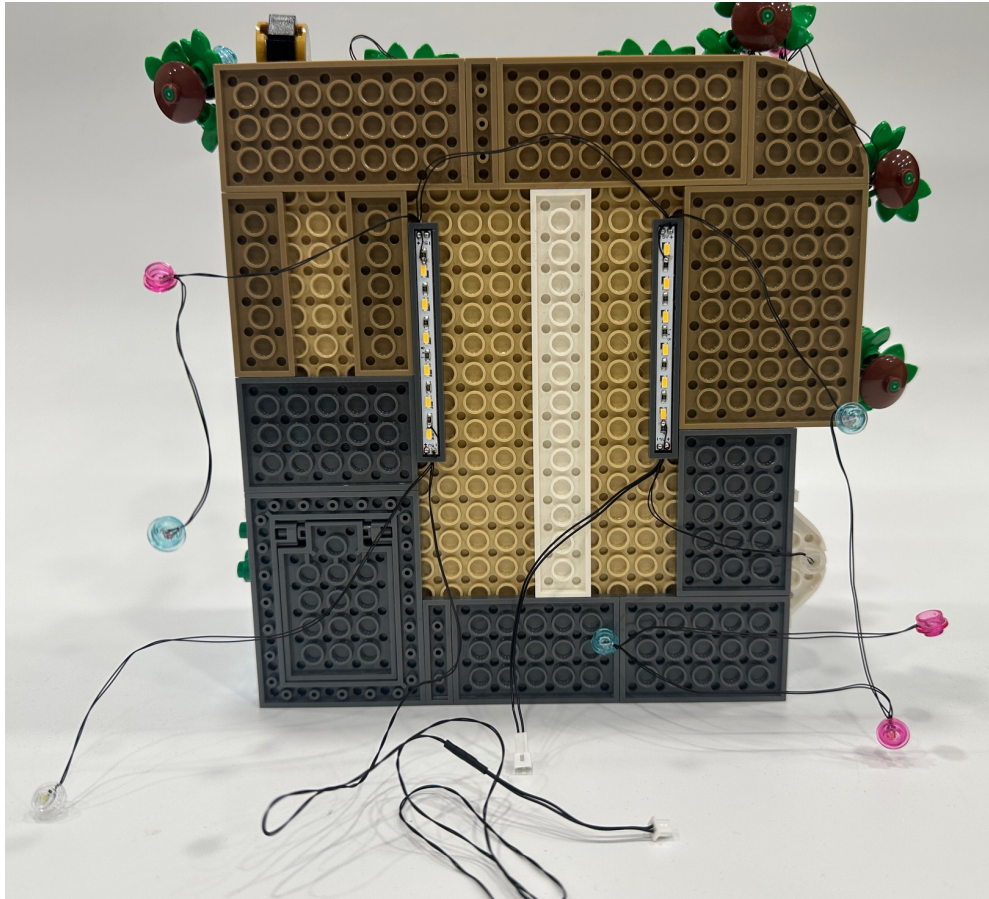

Connect the plugs with lighting part A

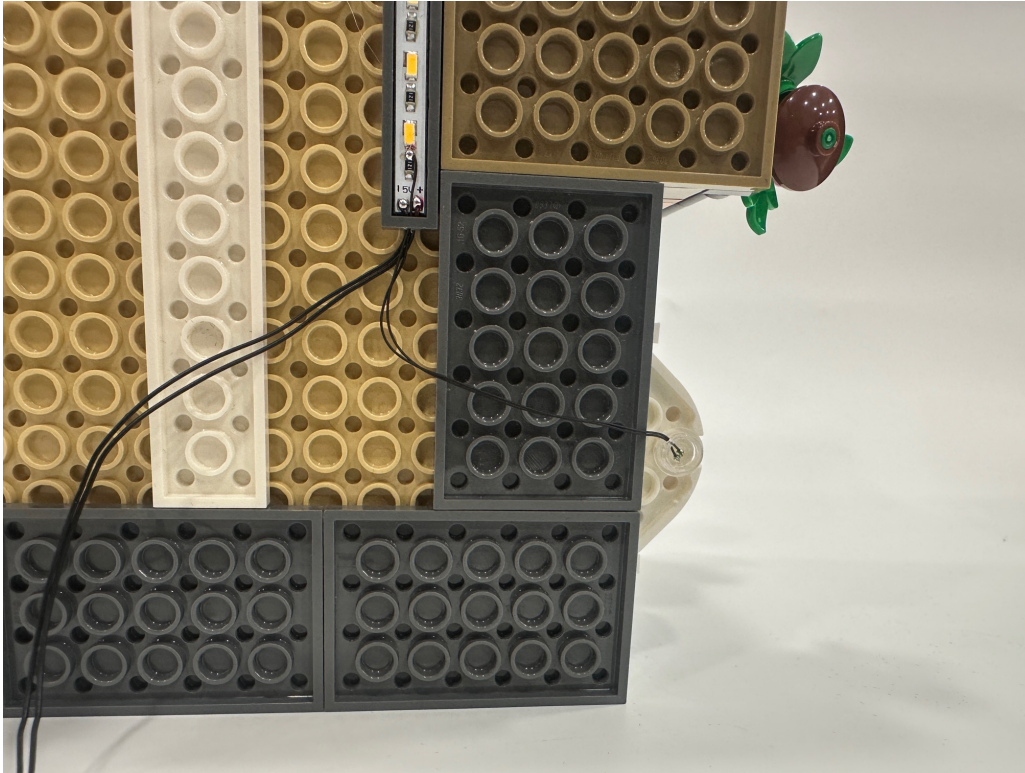

Take lighting part C to assemble on the middle floor

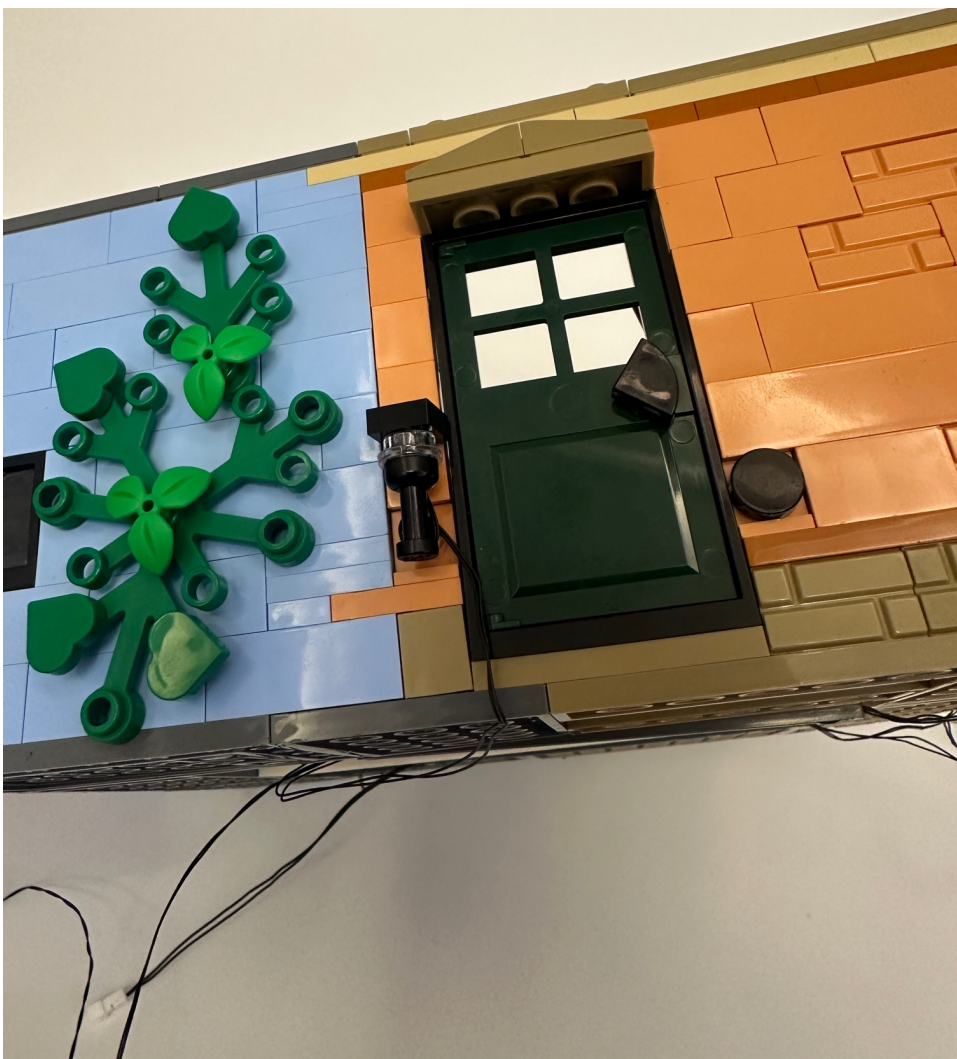

Assemble the lighting plates at the bottom exactly as shown

Assemble the clear round plate on the right corner

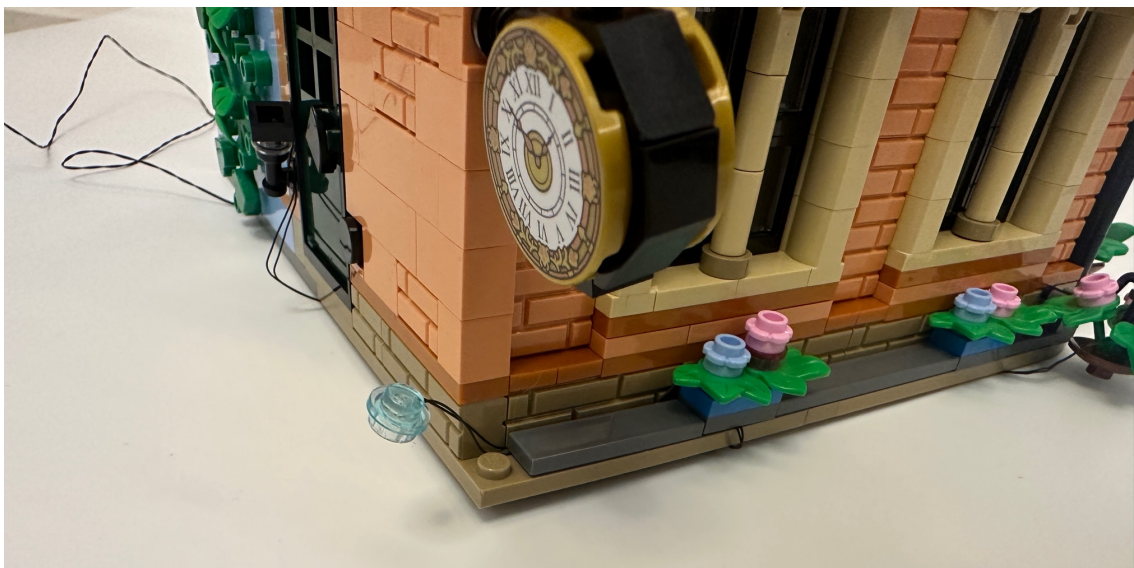

Replace the clear round plate besides the door by the other lighting round plate

Remove the shown parts, move the lighting round plates on top

Then restore the parts and assemble the pink lighting round plate, then move the blue lighting round plate to the corner and hide the wire under the tile

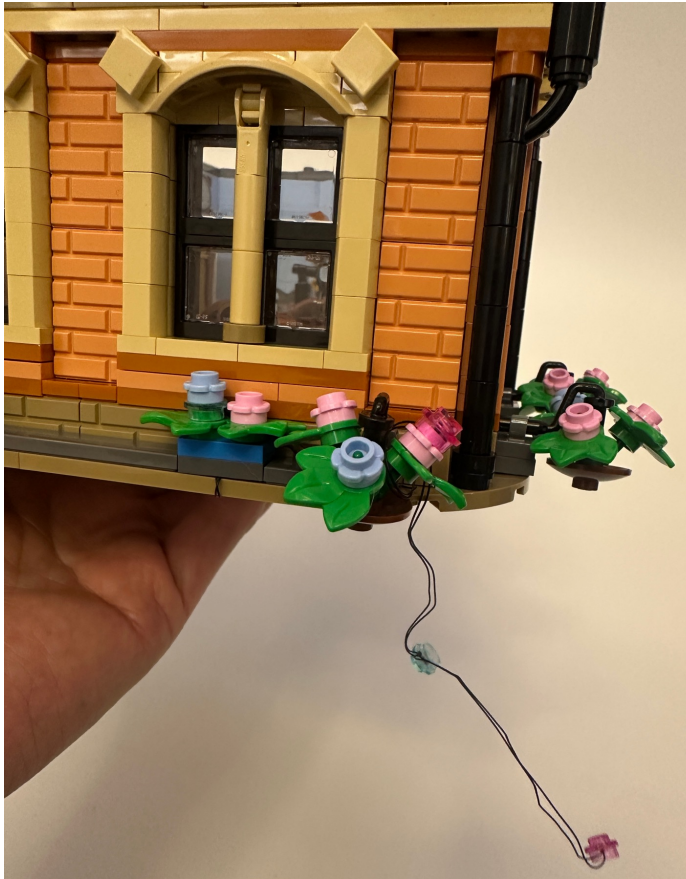

Then assemble the blue lighting round plate on the blue flower

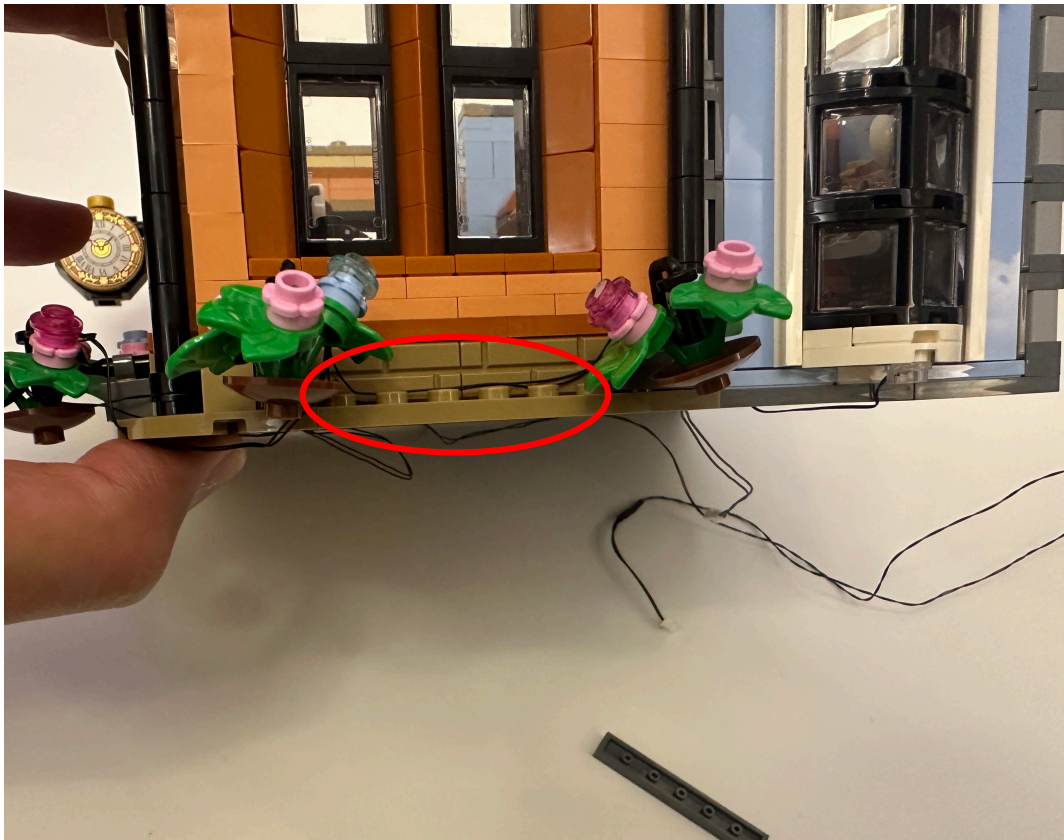

For the other sets of the lighting round plates, remove the shown parts then move them on top and assemble the blue one to the blue flower of the removed part

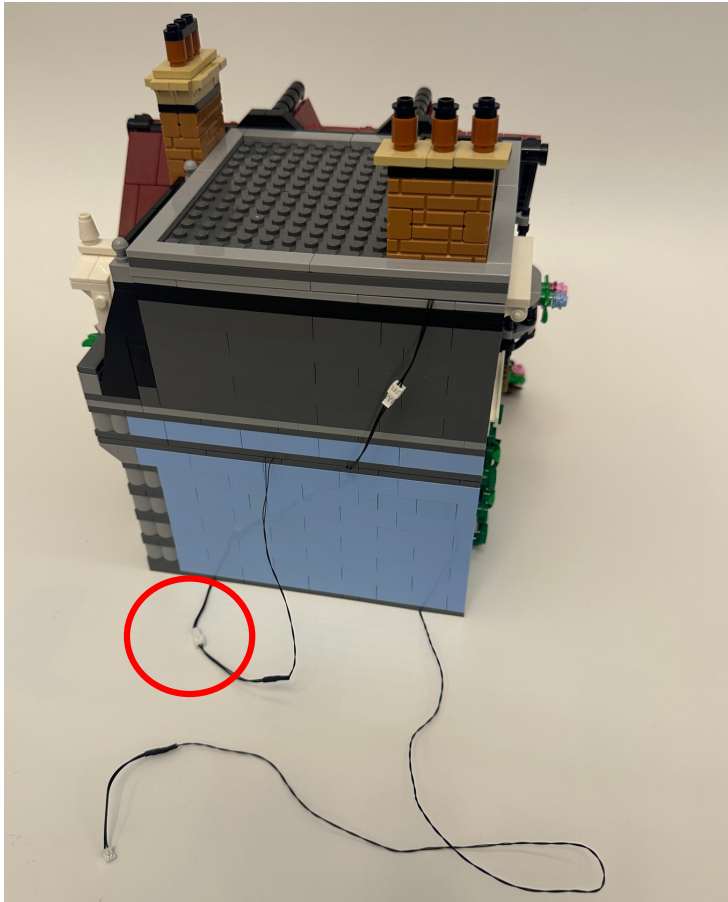

Assemble the pink lighting round plate on any pink flower

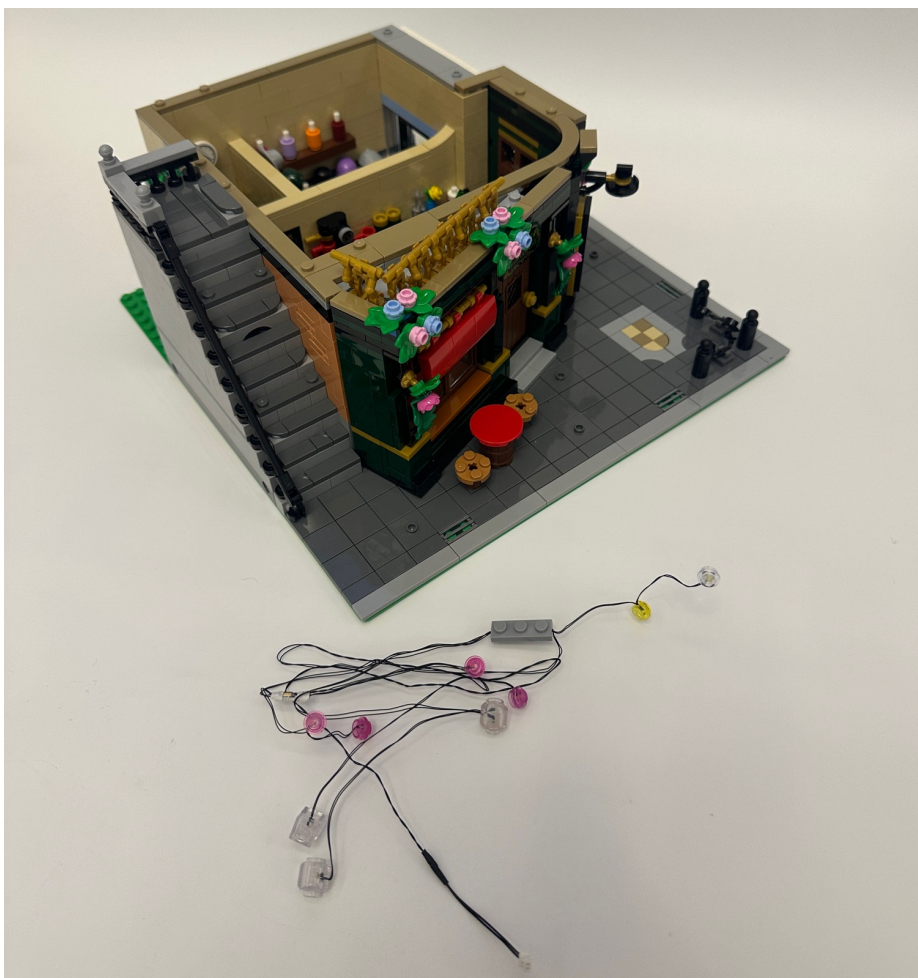

Move the remain two lighting round plates through the bottom and assemble them on the remain two flowers and hide the wire under the tile (red circle)

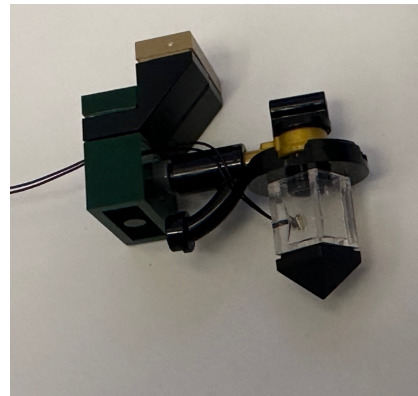

Combine with the floors above then connect the plugs

Take lighting part D to assemble on the first floor

Remove the shown parts and replace the clear 1x1 brick by the lighting part

Restore the lamp then stick the led strip as shown, remove some parts on the platform to place the wire in between the studs
Then move the lighting round plates to the flowers

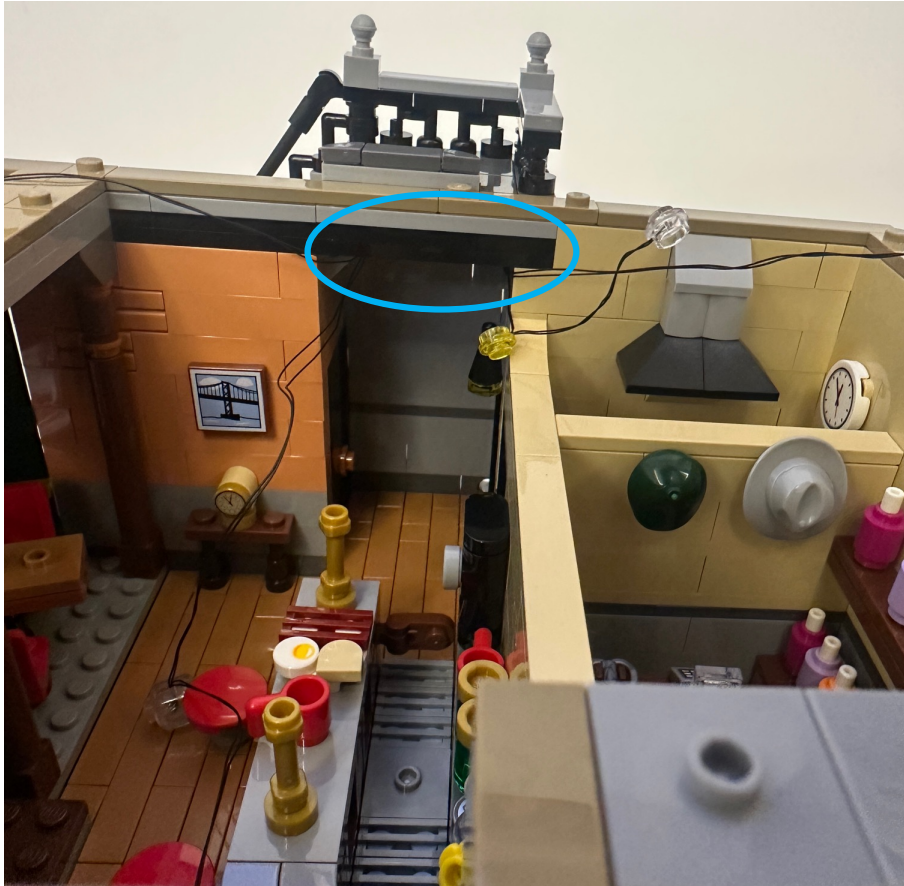

Restore the parts after the lighting parts and wires all settled

Assemble the lighting plate under the ceiling of back door

Assemble the yellow lighting round plate on the lamp

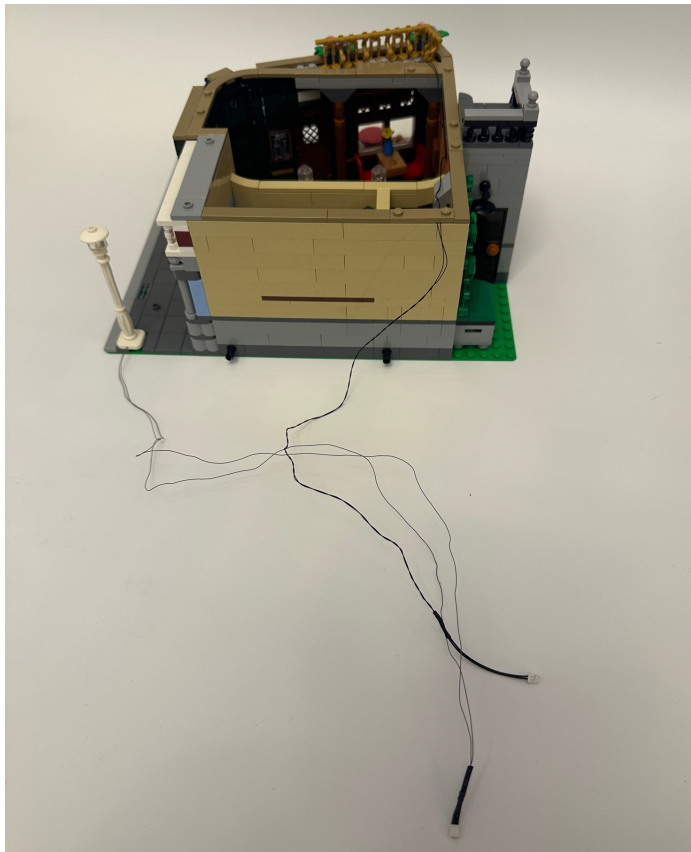

Then replace the clear round plate on the lamp on back door

Replace the clear bricks on the two lamps on the dinner table by the lighting parts

Move the connector out and replace the lamp post by the lighting part

Combine the whole building then connect all three connectors to the USB cable
