Time Machine **from Back to the Future** *Installation Guide*

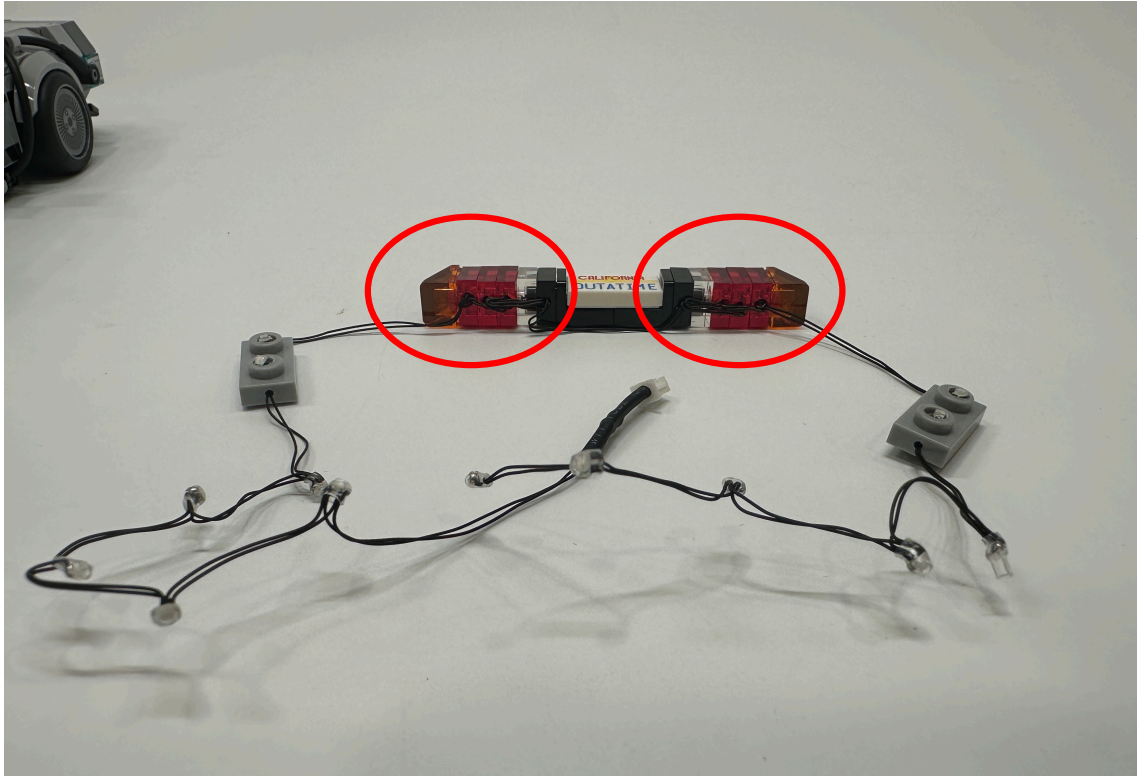

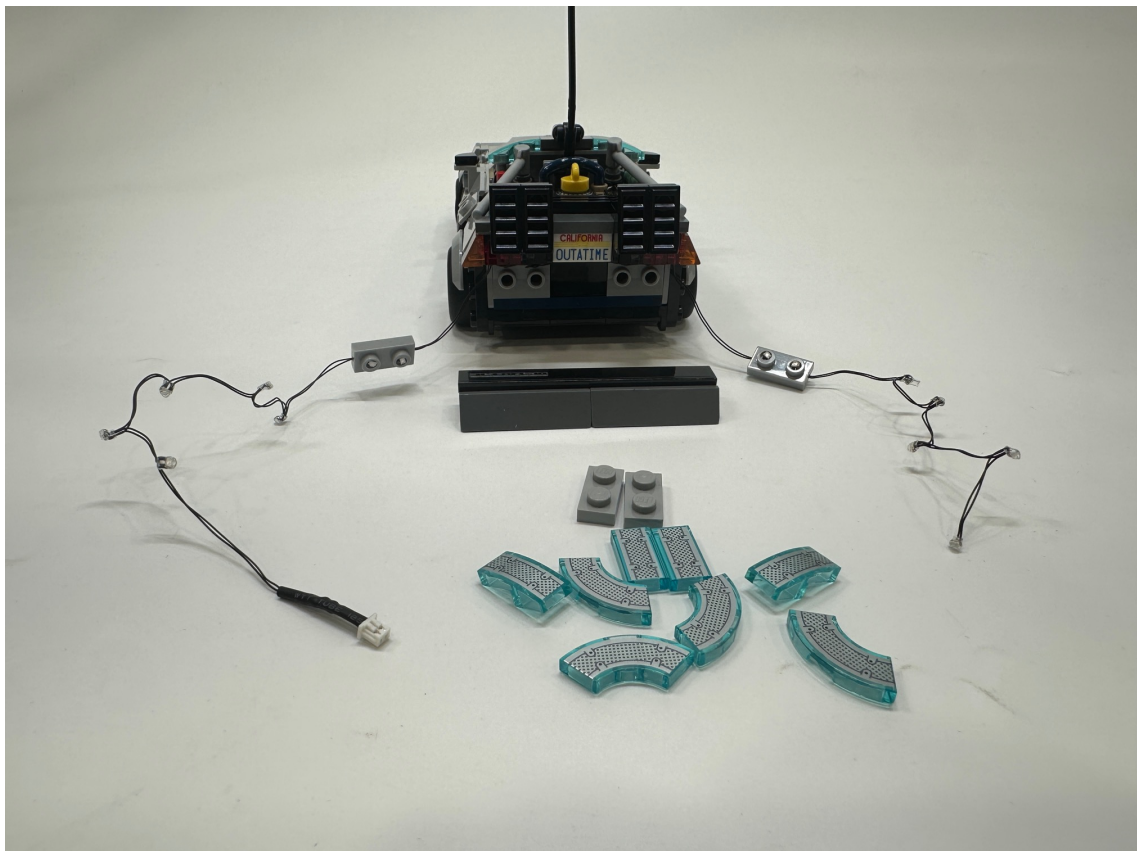

Detach the shown parts from the rear side, then take the lighting part A to assemble

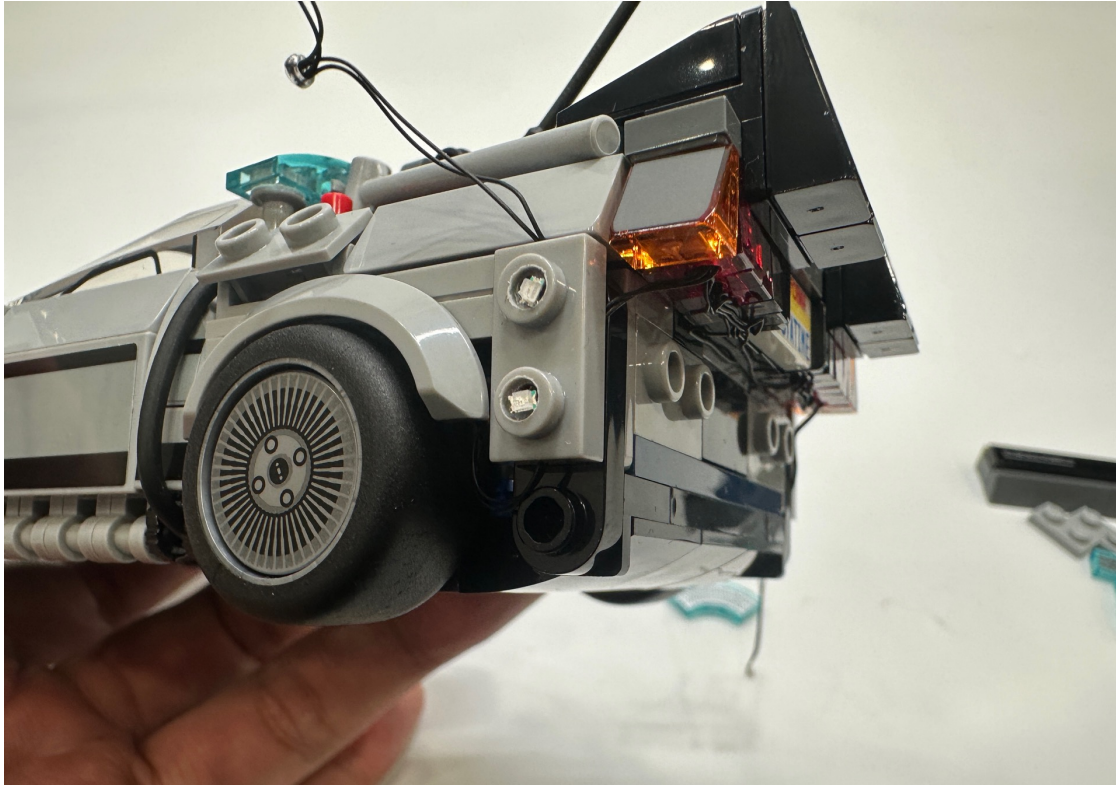

Replace the brake lights by the lighting parts

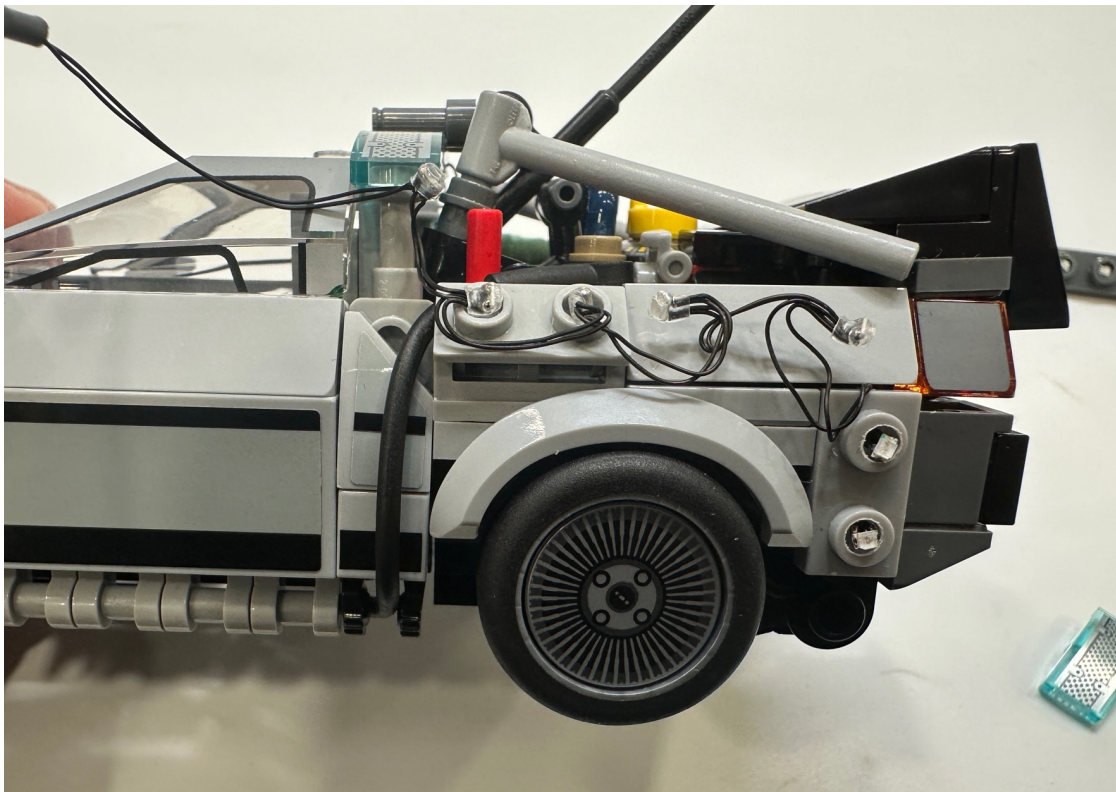

Put the brake lights back to the car
Then detach the shown plates and tiles from both sides

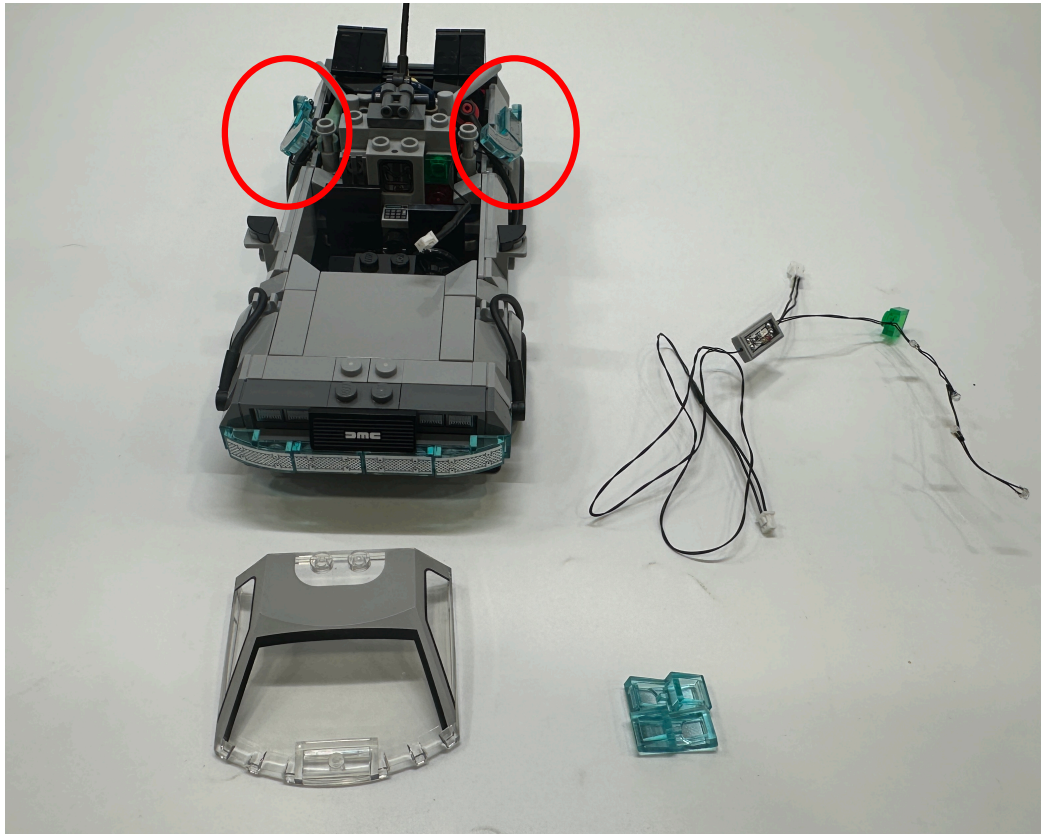

Replace the 1x2 plates on the side by the lighting parts

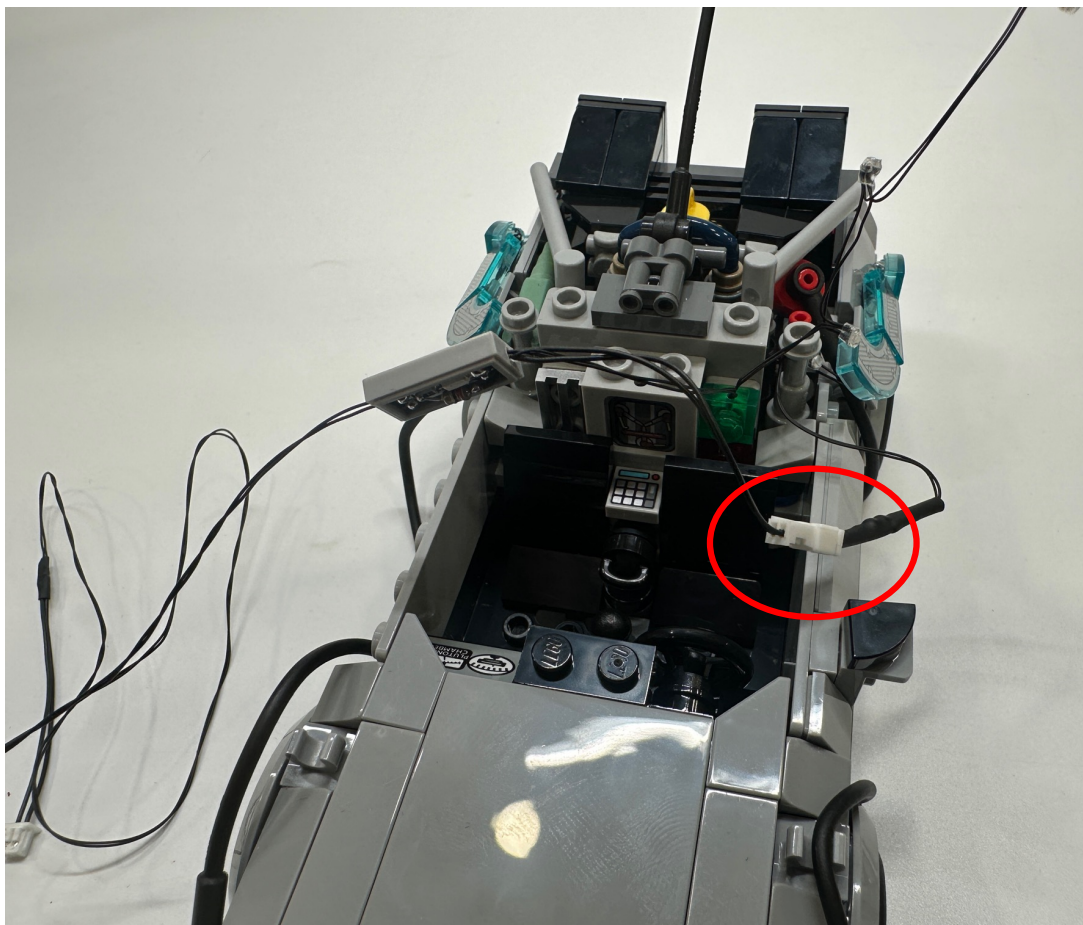

Place the lighting bulbs on the position where the tiles would be restored

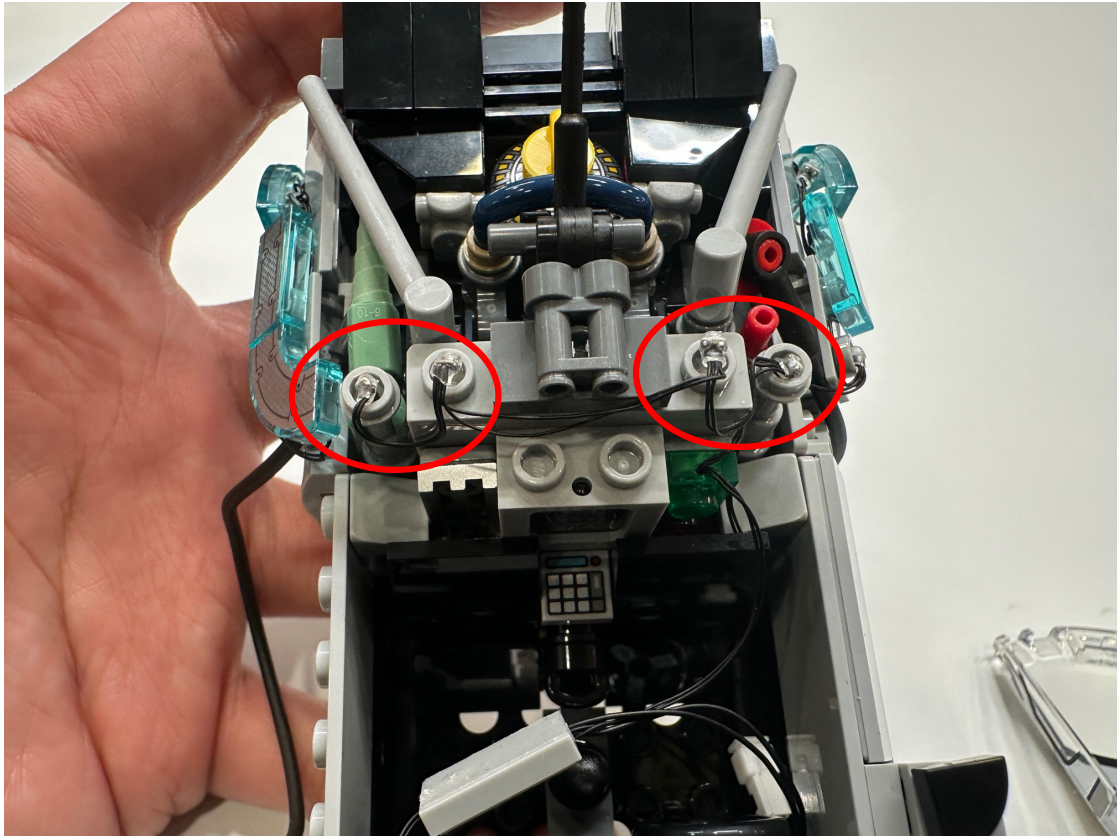

Restore the clear blue tiles (red circles), remove the cover of the car and place the connector inside the drivers seat

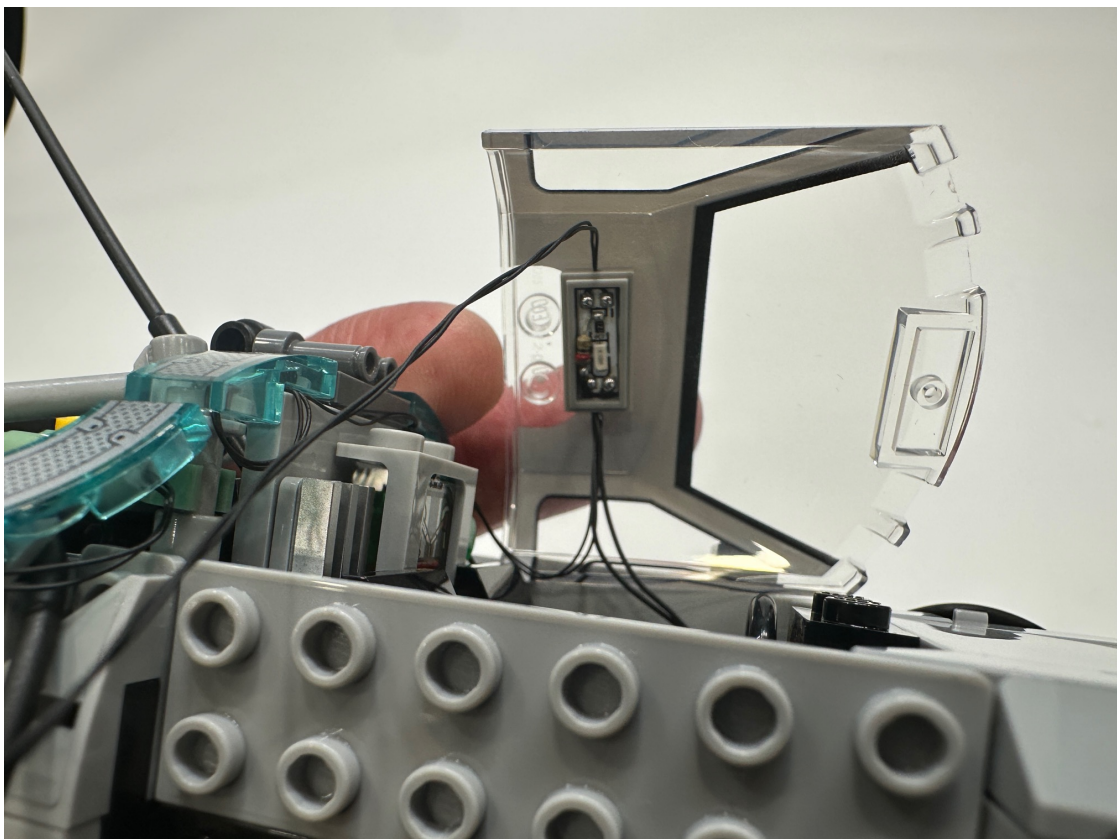

Connect the plugs with lighting part B

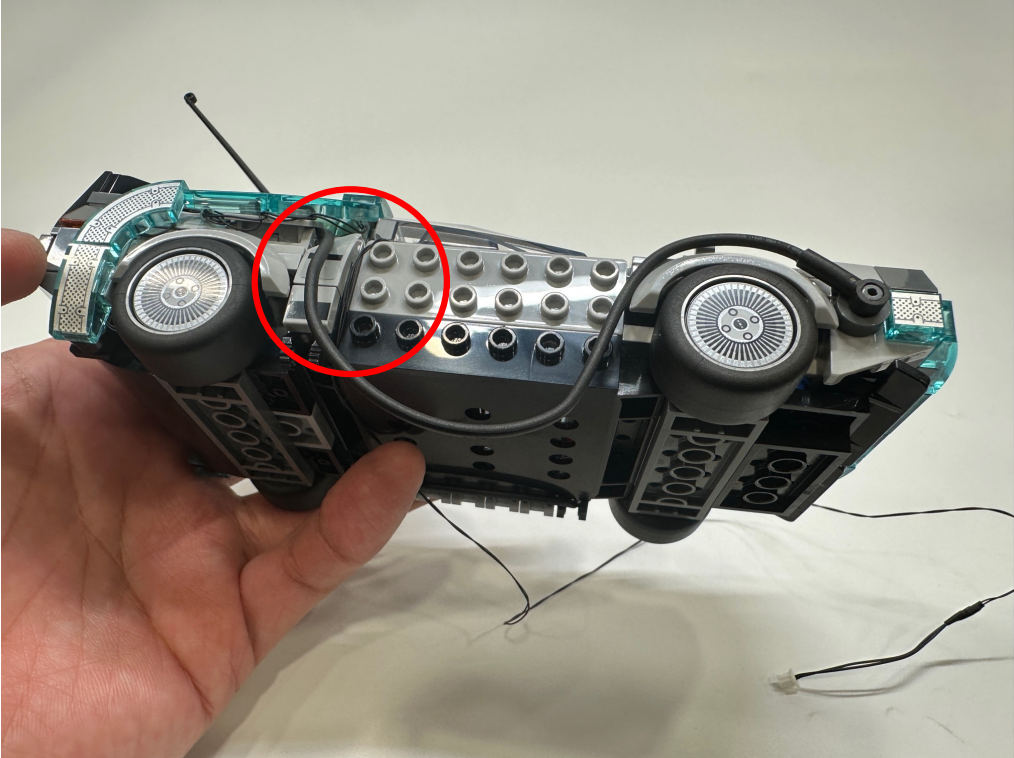

Take away the clear blue in red circles and place the lighting bulbs of lighting part B

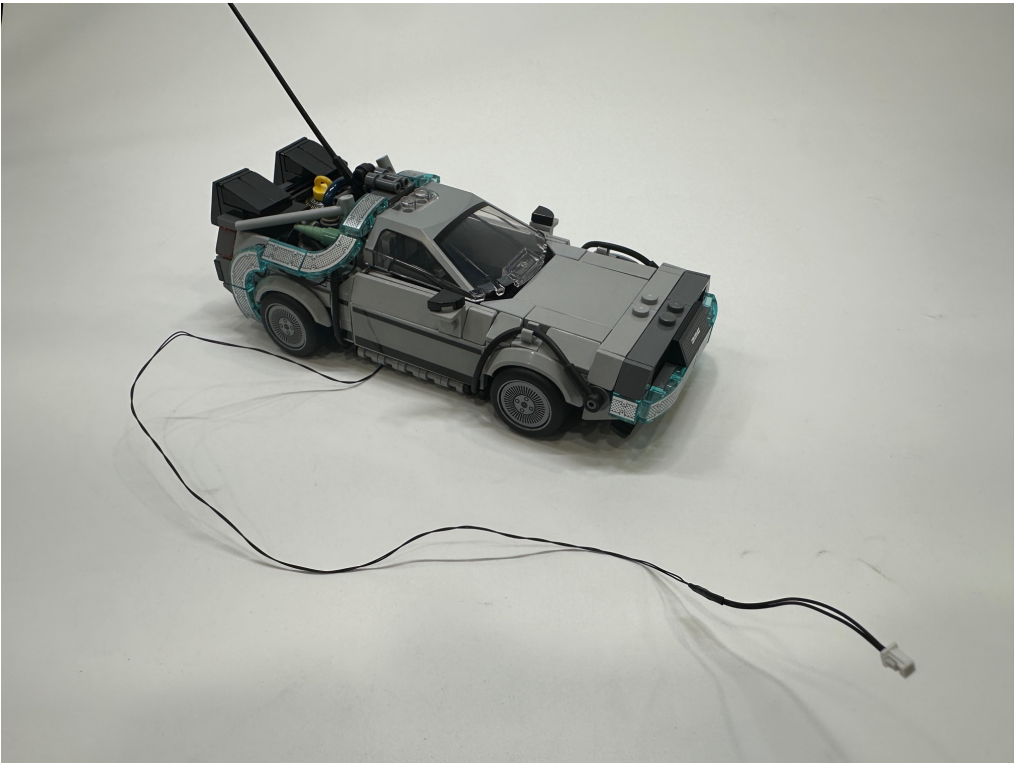

Then stick the 1x2 lighting tile underneath the top and restore the top

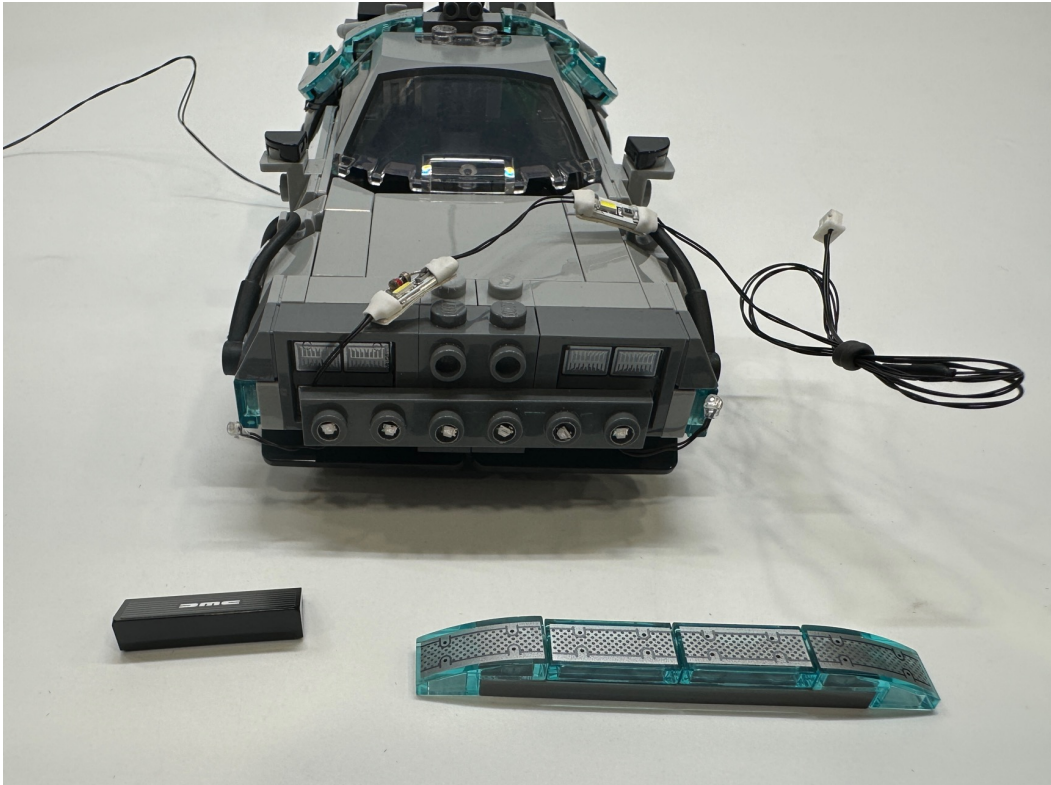

Remove the door and place the wire with connector in between the studs

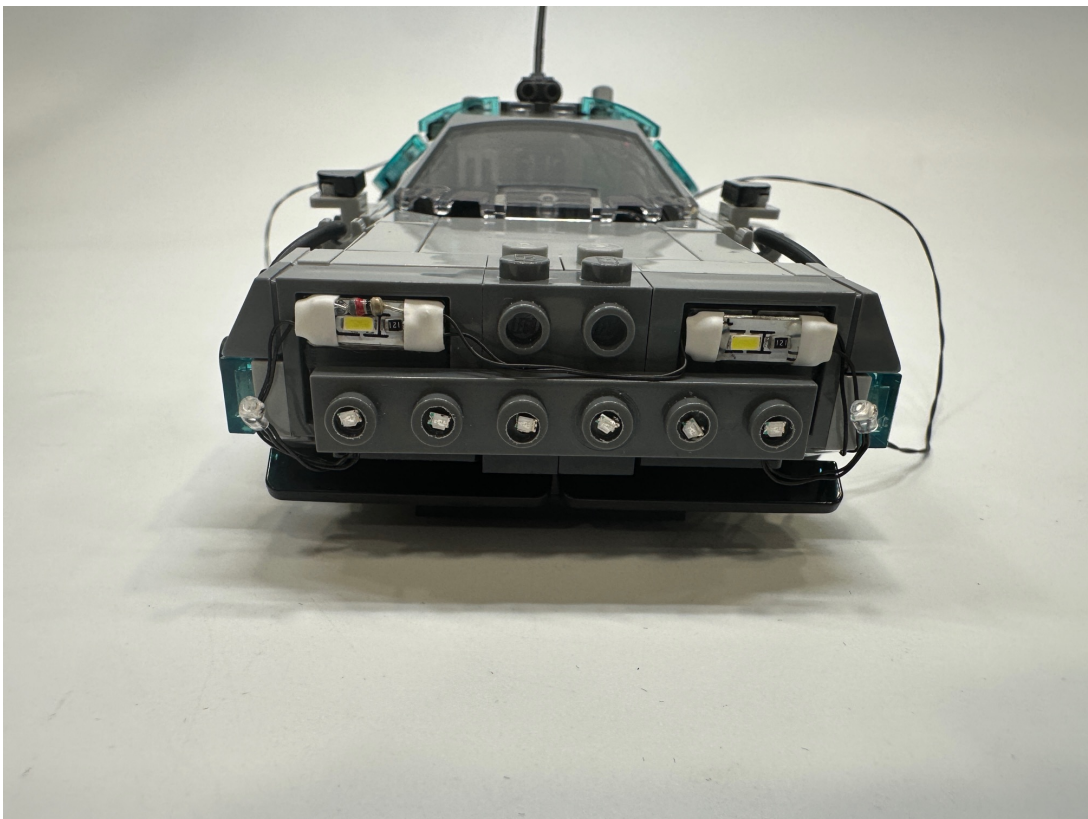

Restore the door and lighting part B is finished assemble

Remove the bumper and replace the dark plate by lighting part C

Stick the light plates on the headlights and place the lighting bulbs besides the grey plate then restore the clear blue parts

At last connect both plugs to the USB cable
