Captain Jack Sparrow's Pirate Ship *Installation Guide*

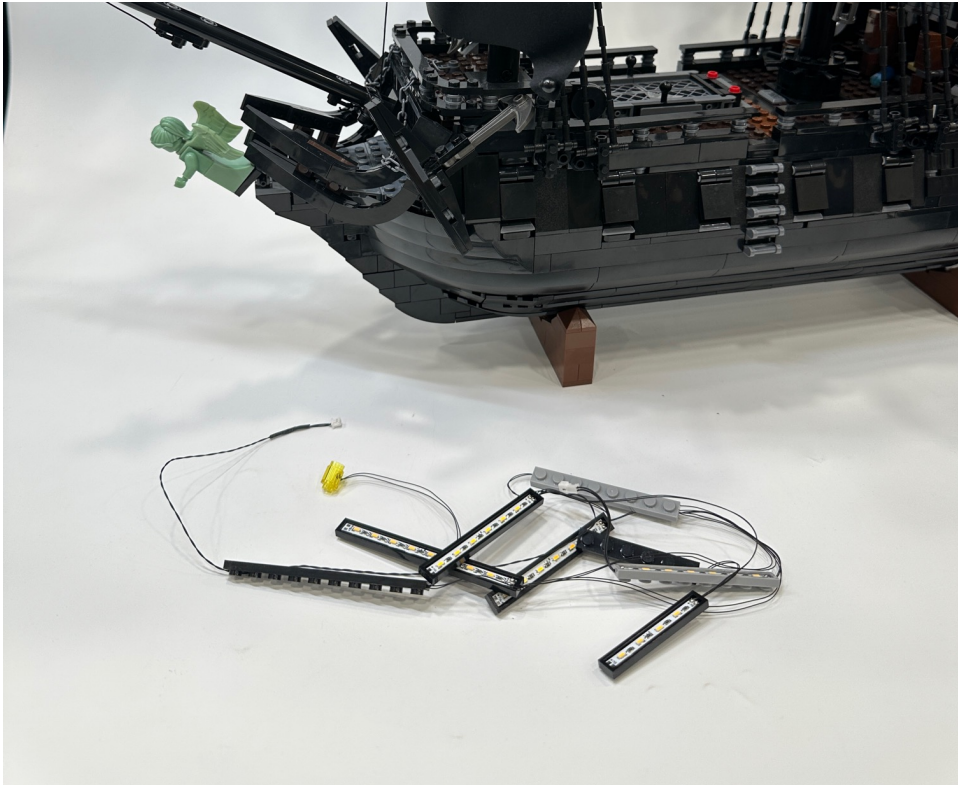

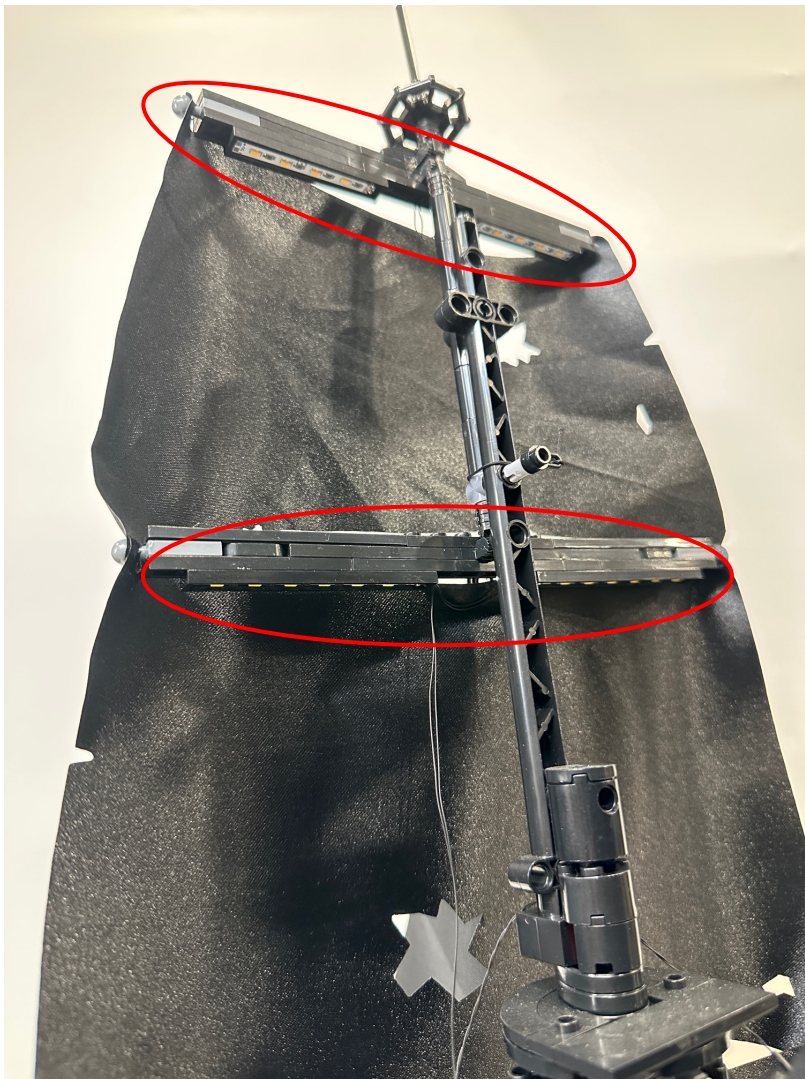

Stick the lighting part A to the bottom of the ship

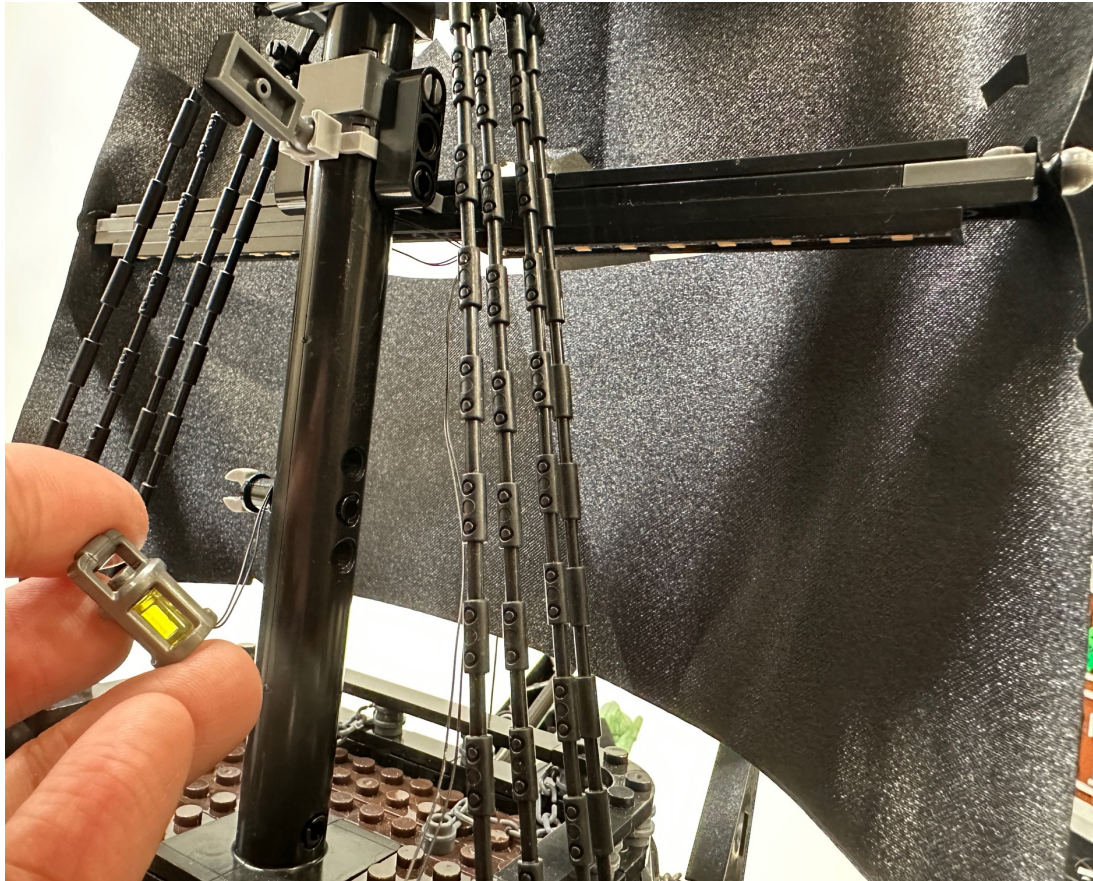

Assemble lighting part B to the front side of the ship

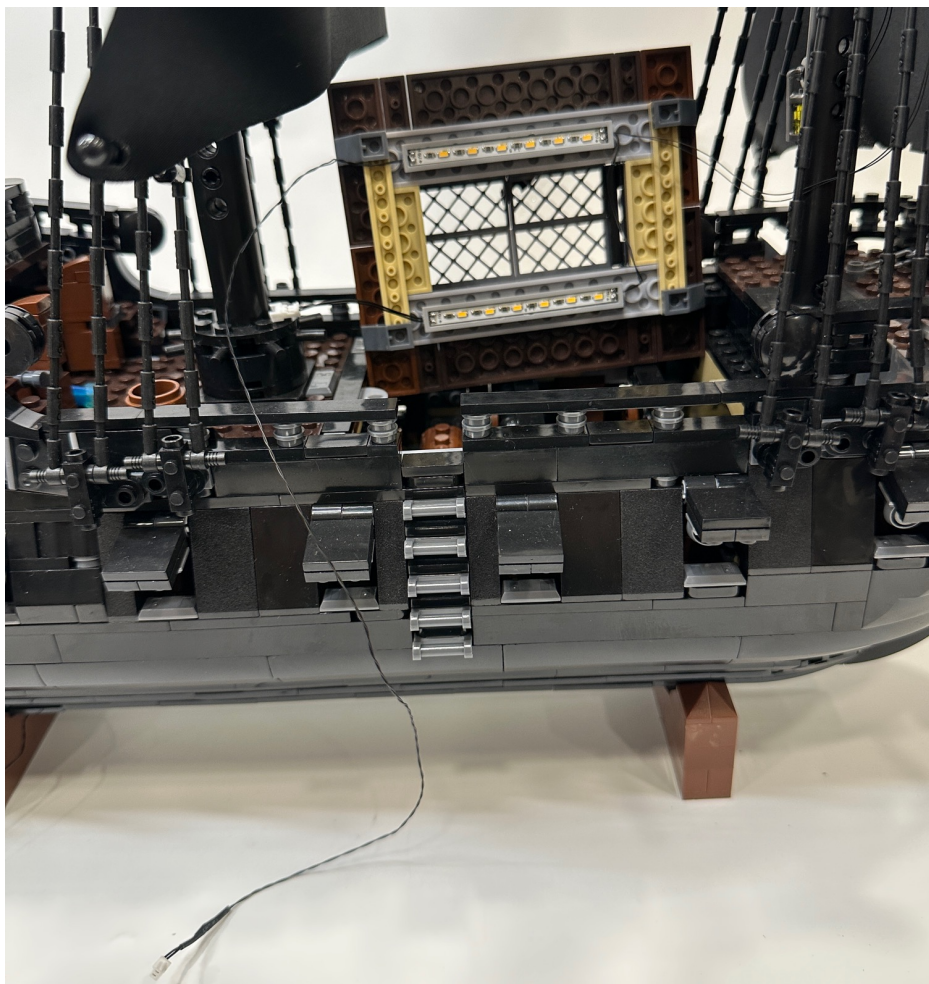

Take the 1x6 lighting plates at the end, assemble them under the top sail, then assemble the 1x8 lighting plates to the lower sail

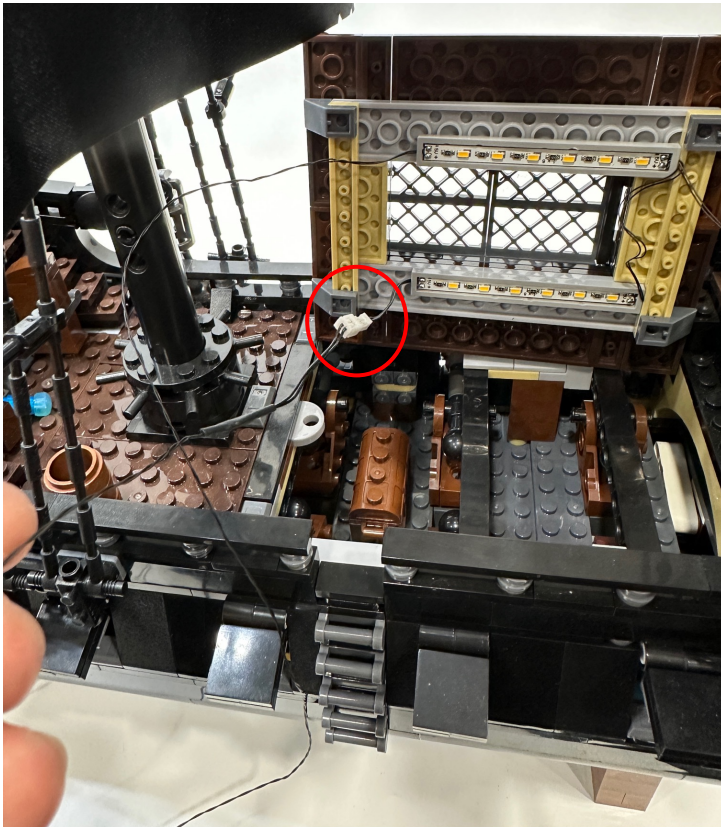

Assemble the 1x10 lighting plates to the bottom sail, then replace the clear yellow round brick inside the lantern by the lighting part

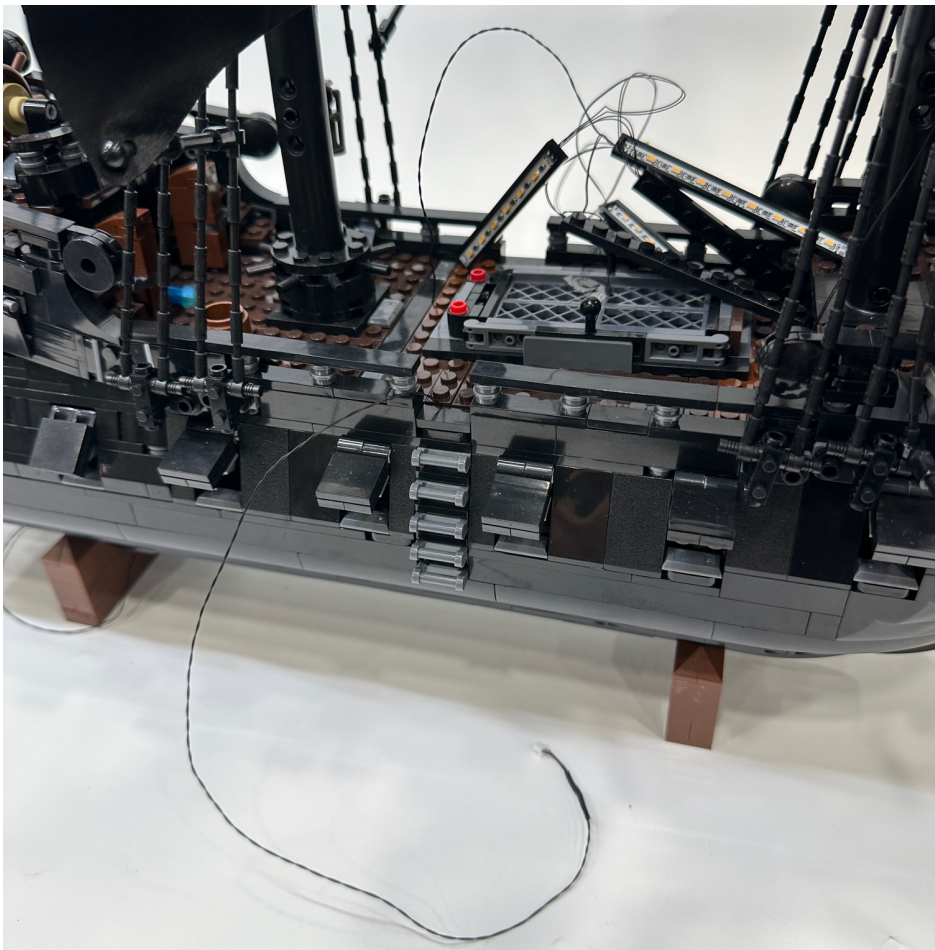

Lift up the deck and assemble the remain light grey lighting plates

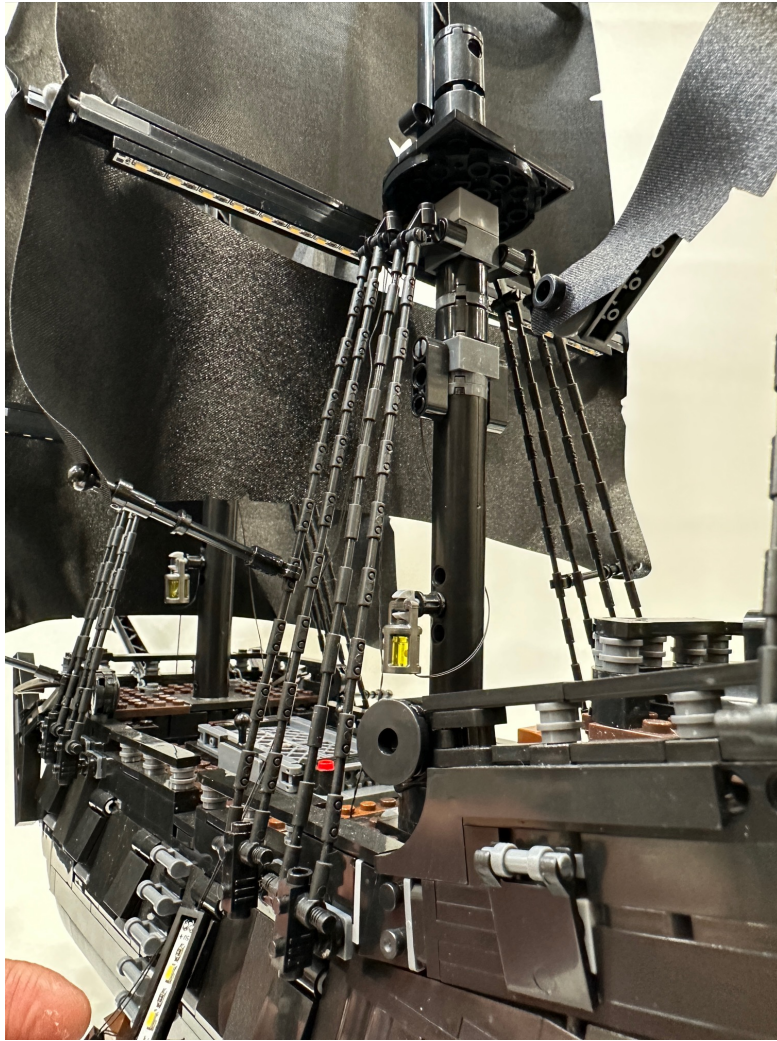

Take lighting part C and connect with part B first then place the connected plugs under the deck and close it up

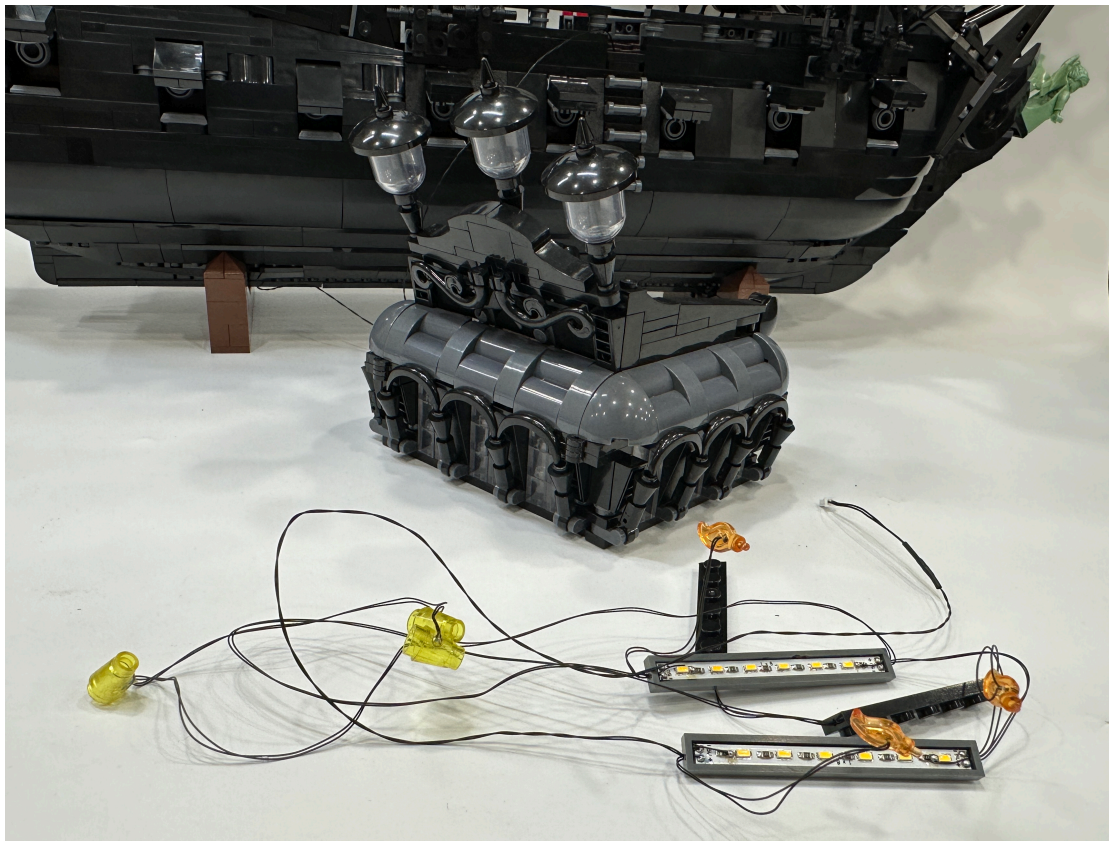

Place the connector out of the ship

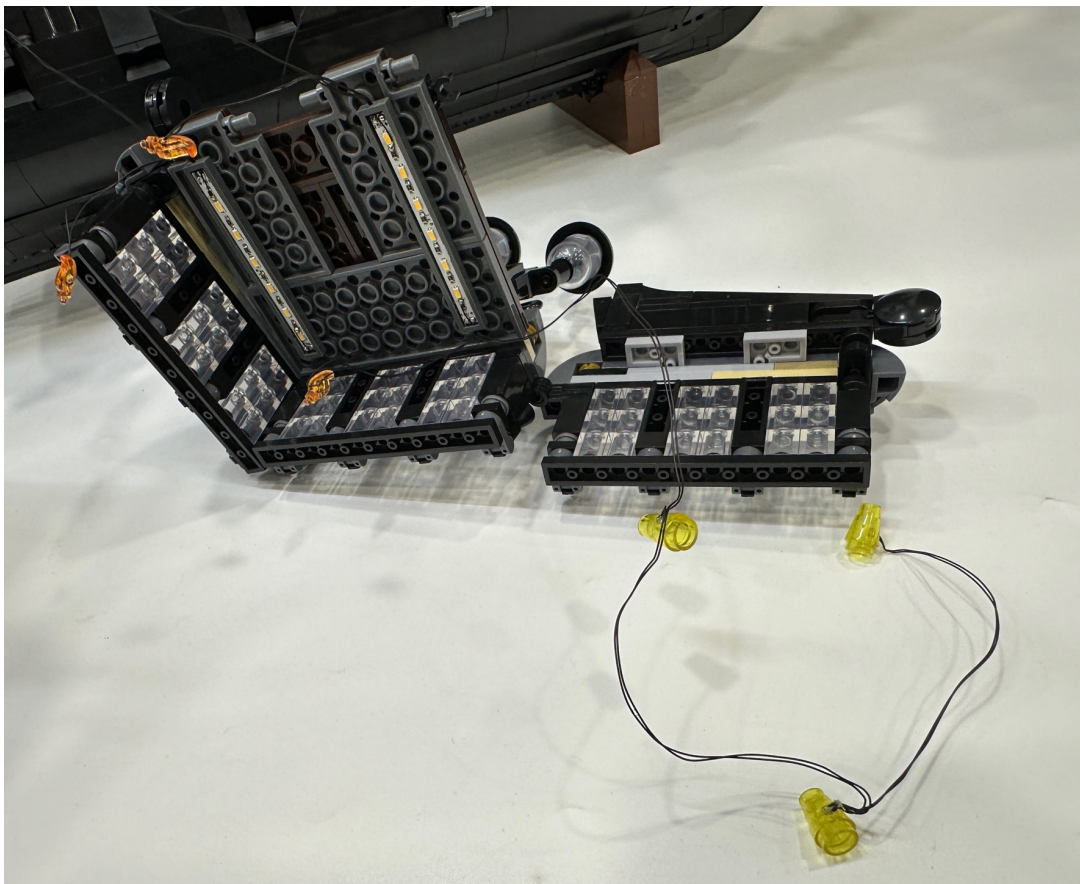

Same as lighting part B, assemble the lantern light and the lighting plates

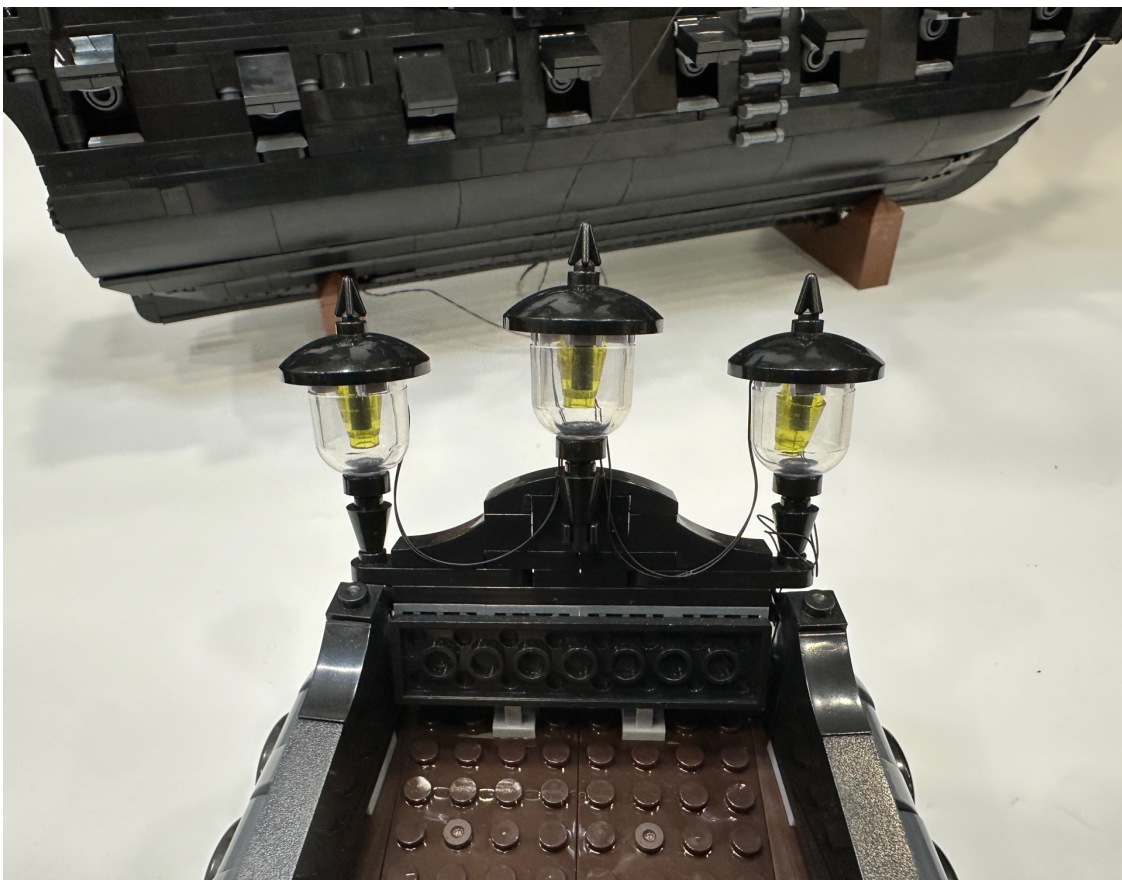

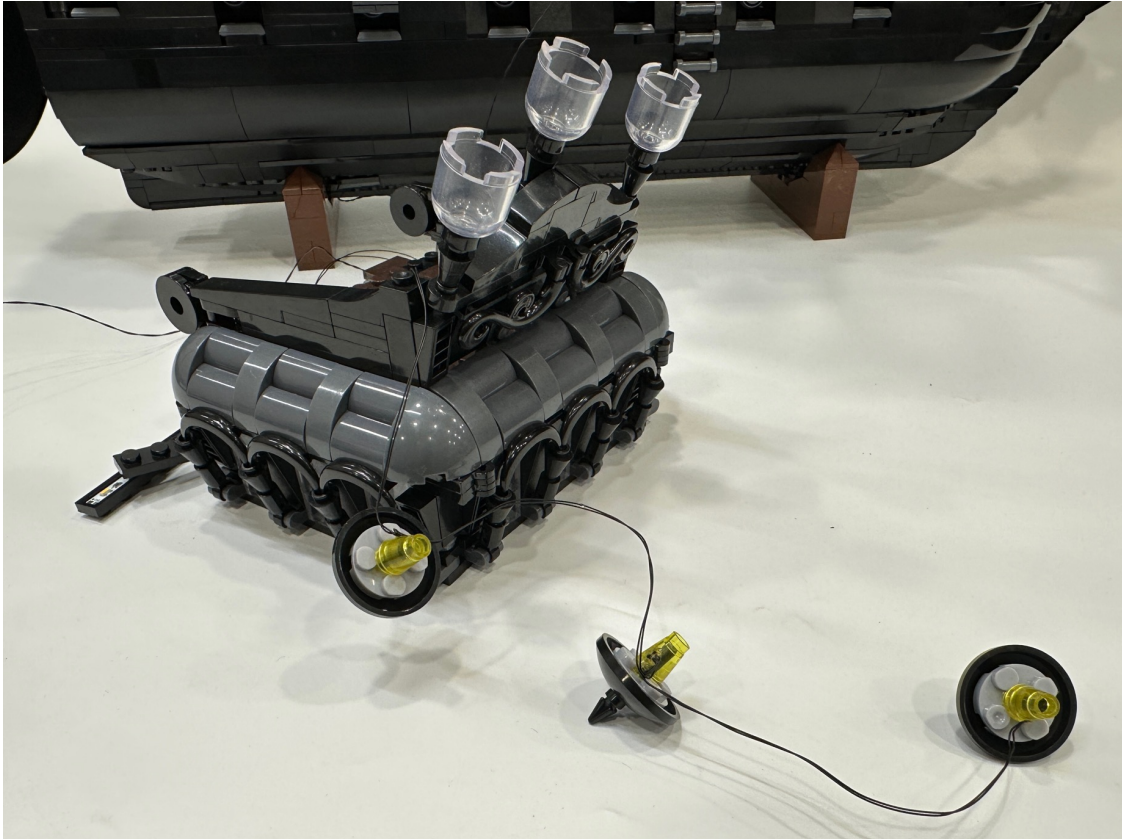

Now take lighting part D to assemble at the end side of the ship

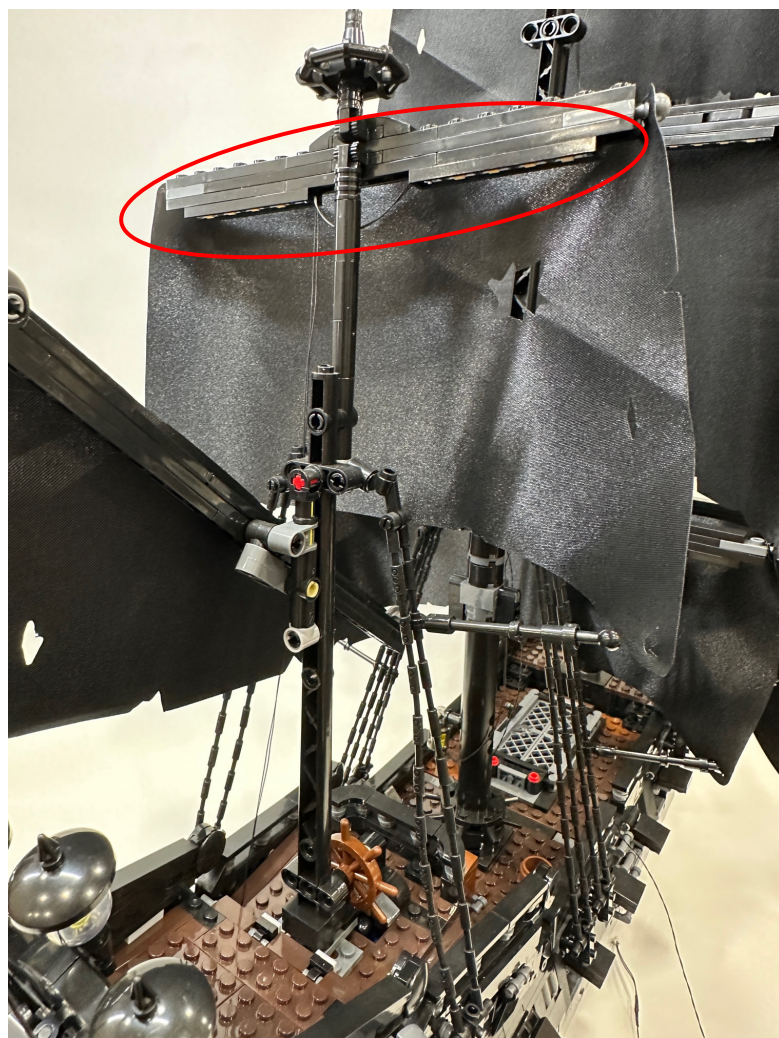

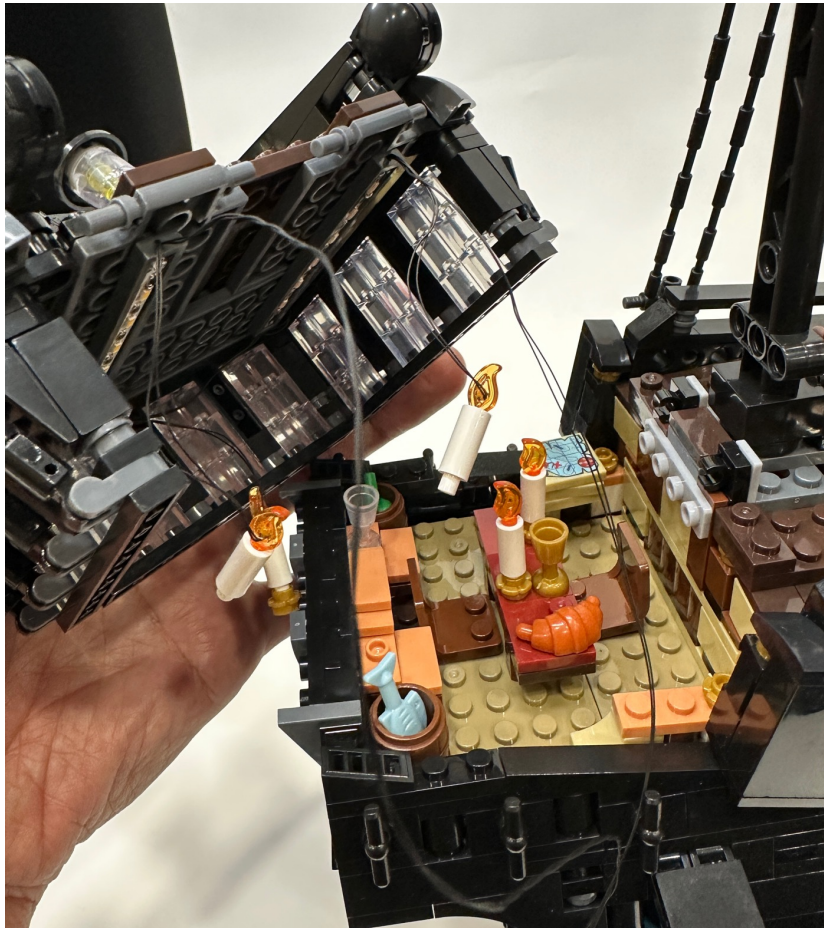

Open the side window, assemble the lighting plates as shown

Leave the lighting cones outside, close the side windows and replace them inside the lamps

Replace the candle fires by the lighting parts, restore the ship and assemble the lighting plates to the sail

At last connect the plugs with the USB cable then you can light it up
