

Lego 10299

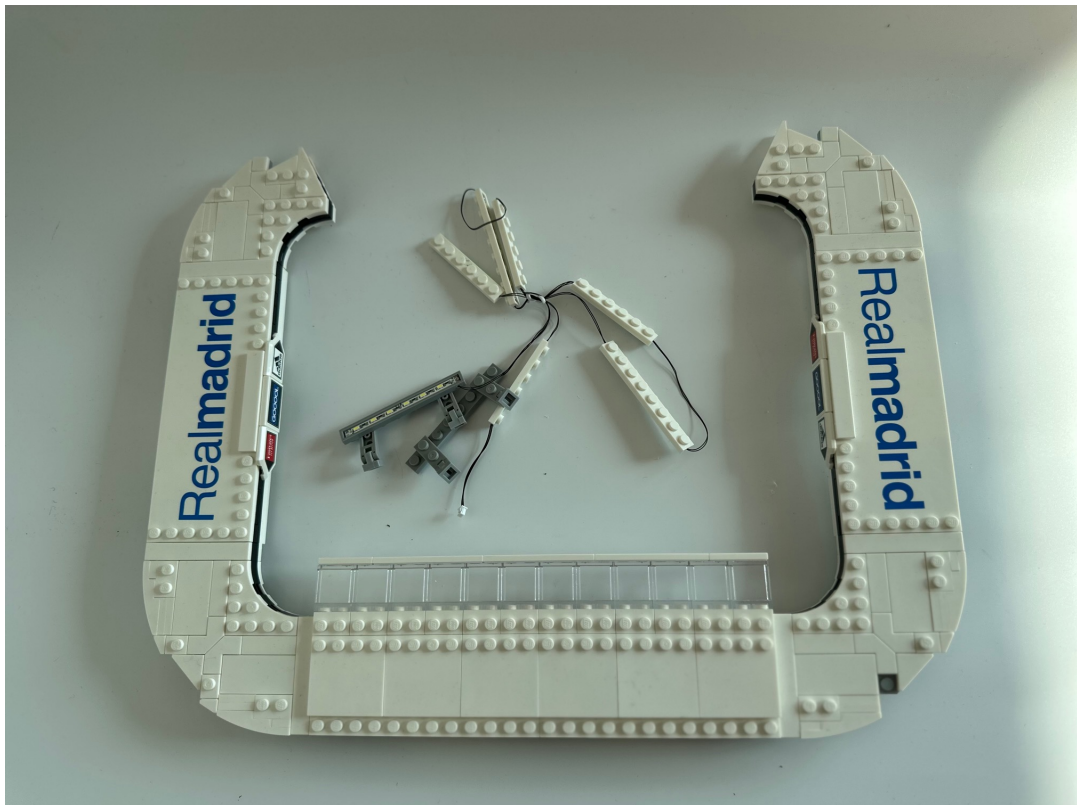

Santiago Bernabeu Stadium

Installation Guide

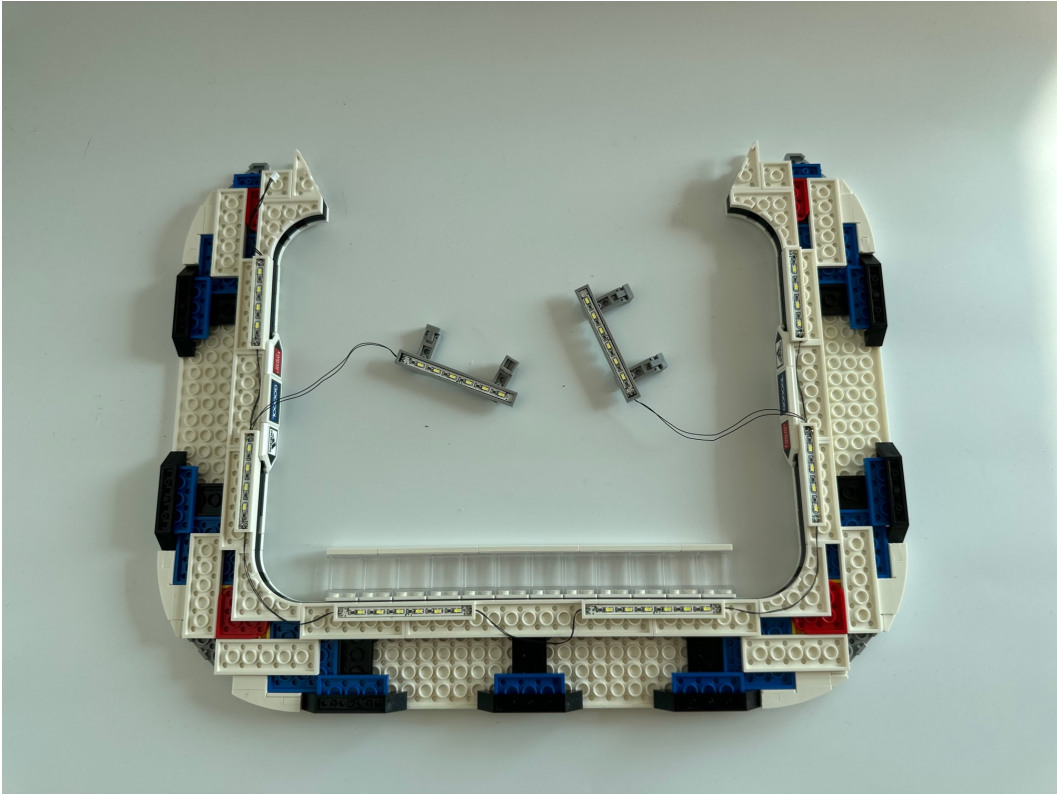

First, take away the shown part of the model and assemble by this lighting parts

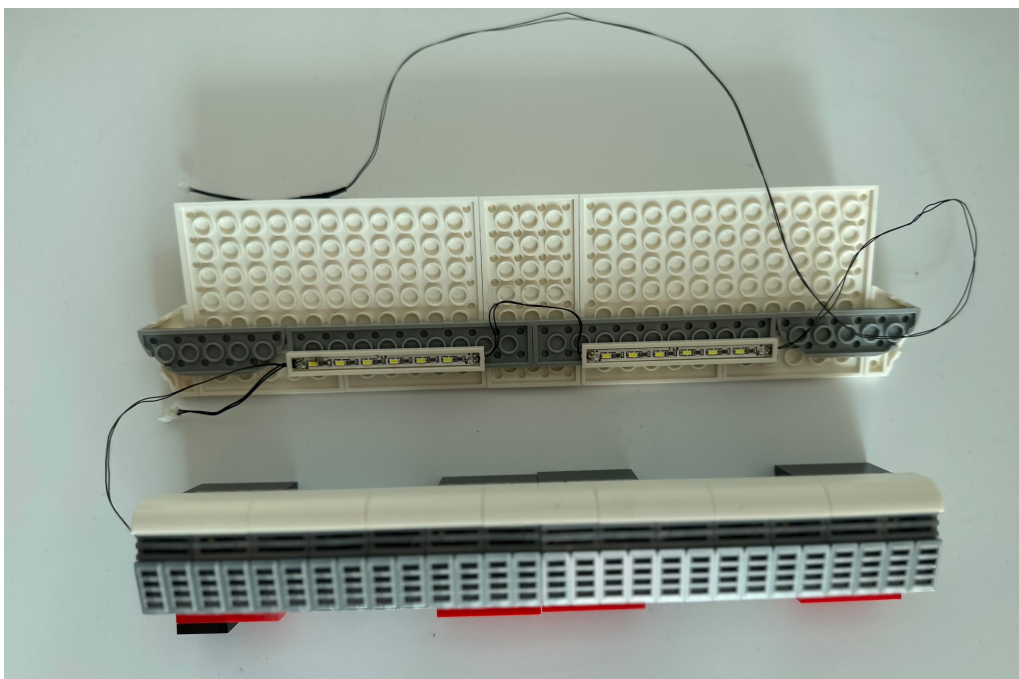

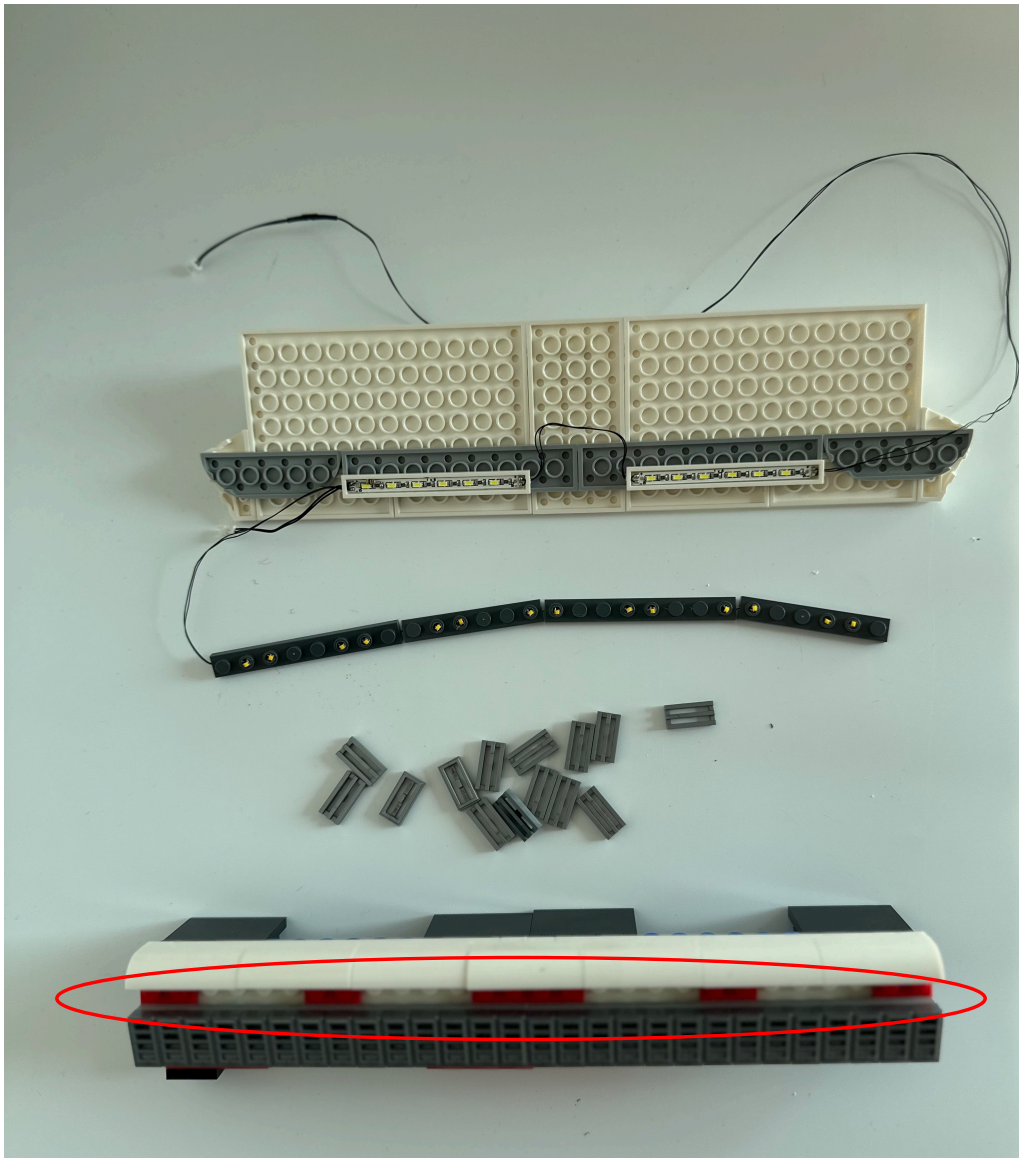

Assemble the white lighting plates as shown and leave the grey lights to install later

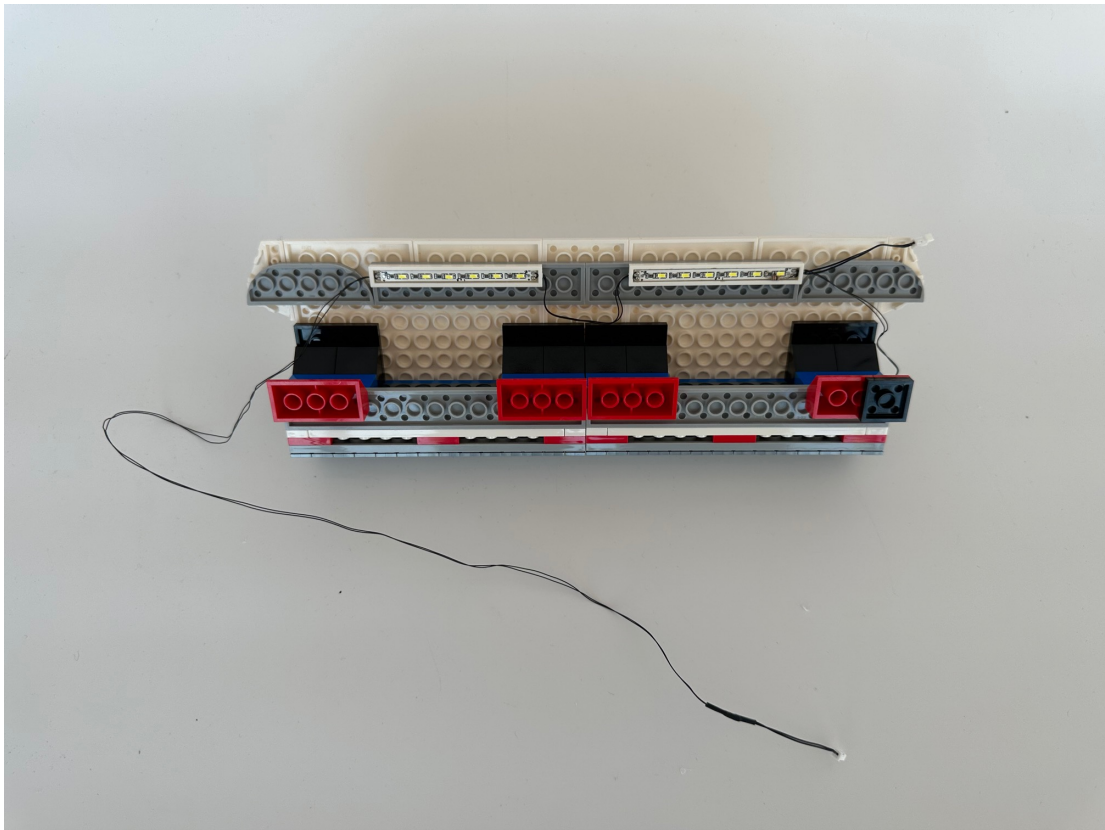

Then remove the shown parts and prepare this lighting parts

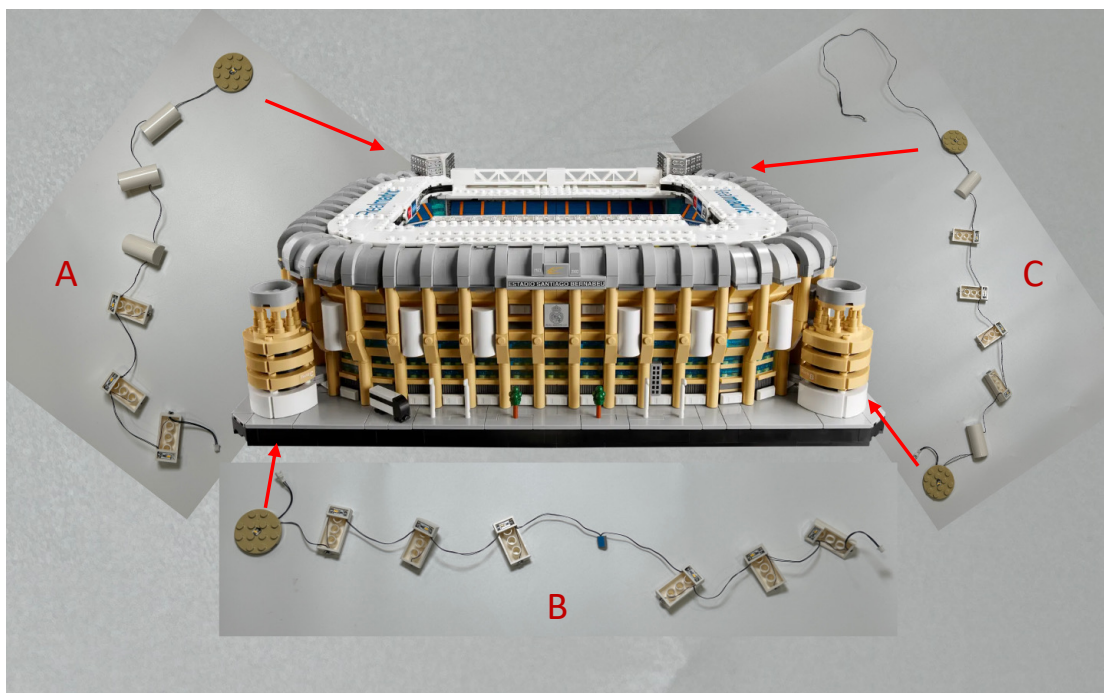

Assemble two white lighting plates, the remain lighting plate will be used to replace the plates from the red circle, remove the plates and the tiles attached, then assemble the tiles on the lighting plates

Combine the components back to one piece then put it aside

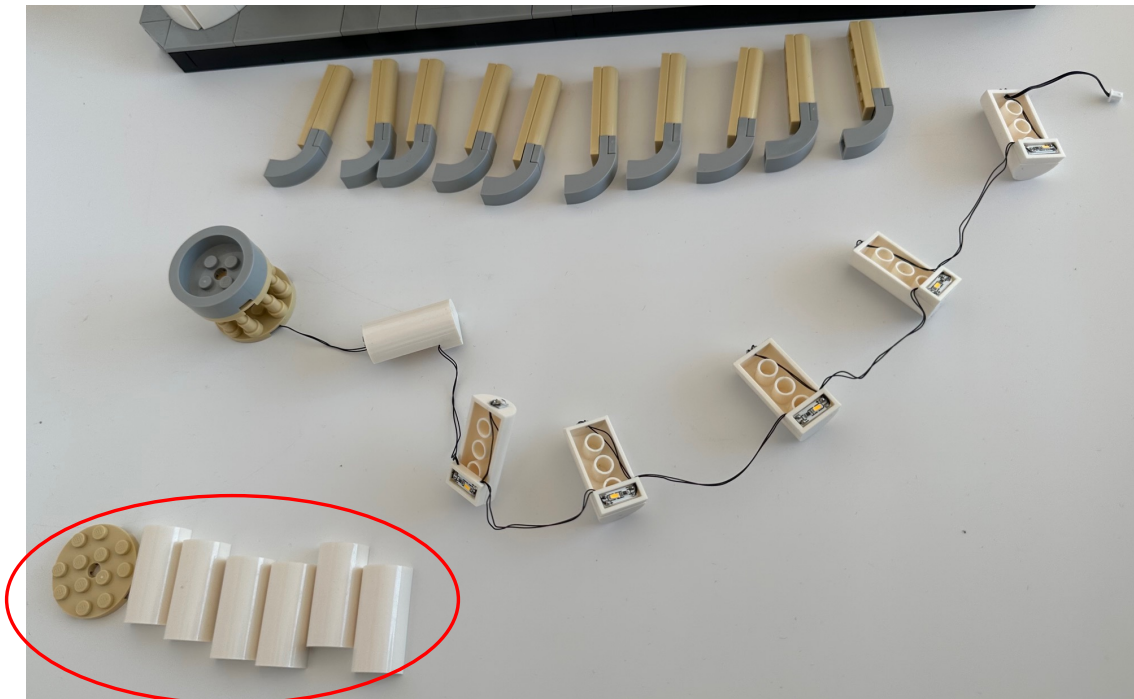

Turn the model to the entrance side, the lighting parts ABC would be assembled by the layout as below (The arrow shows the tan round plates would be installed to the pointed corners)

Detach the shown parts on the left side of the stadium, then take lighting part A be ready

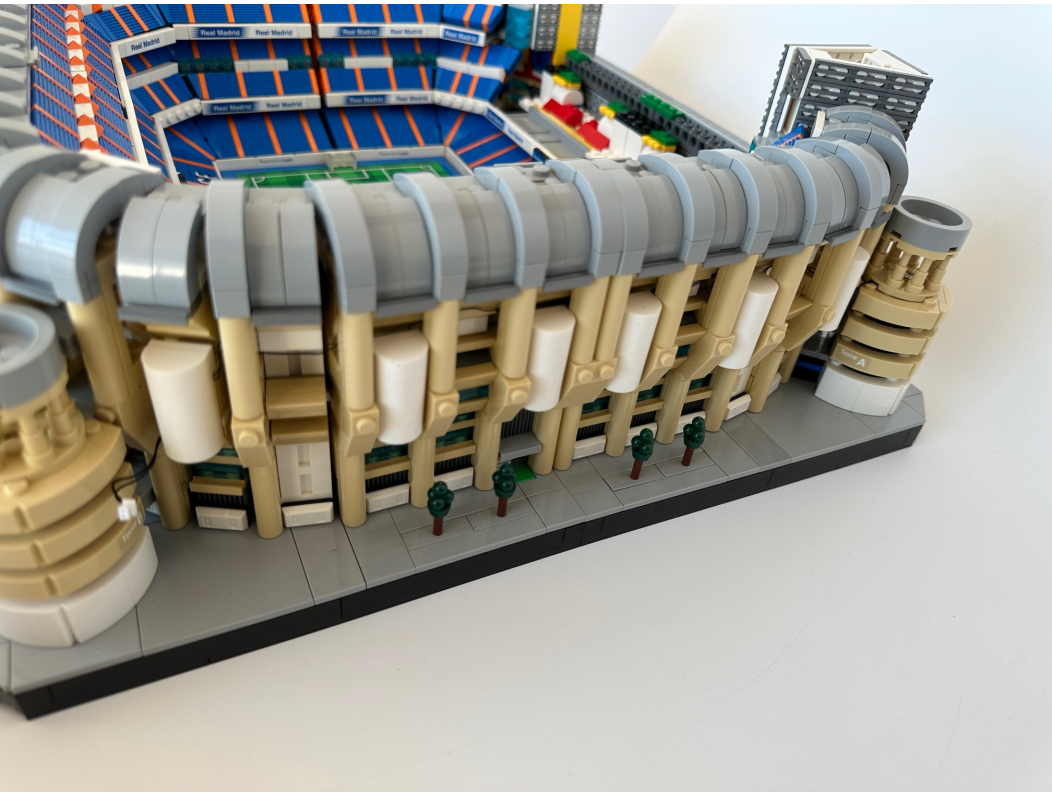

Replace the round plate at the corner by the lighting parts
And the parts in the red circle will no longer needed

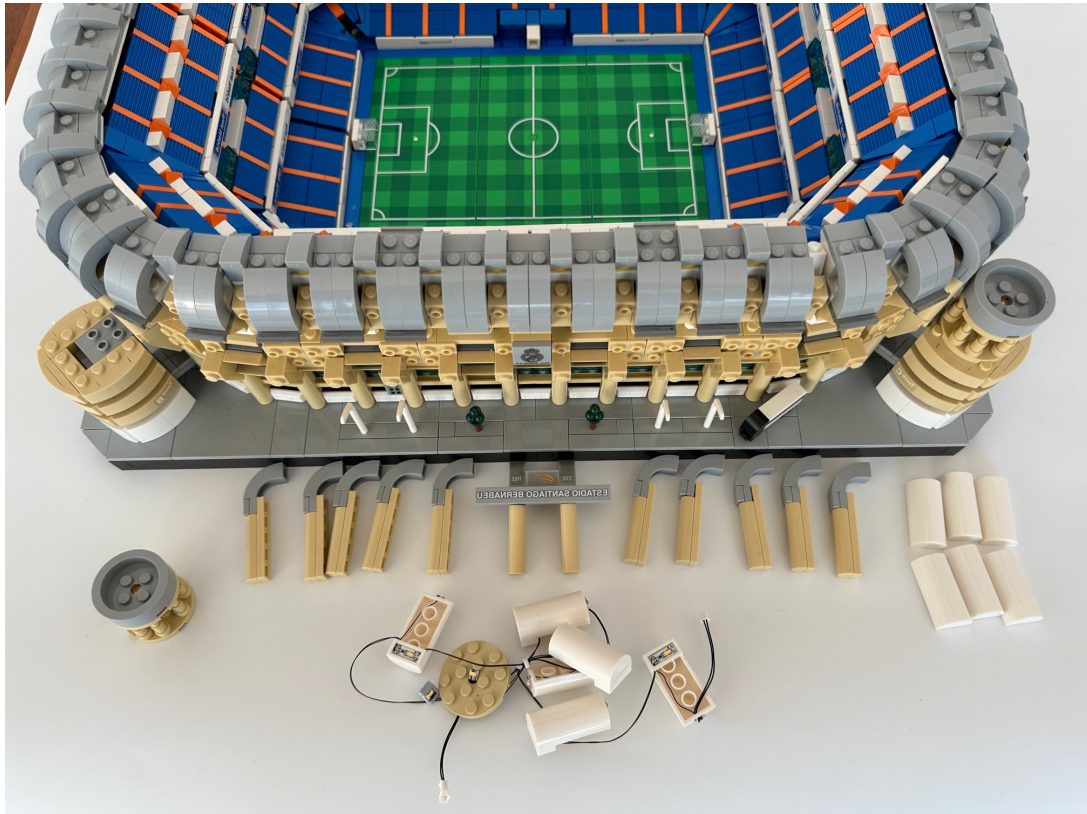

Assemble the lighting parts to replace the removed white bricks

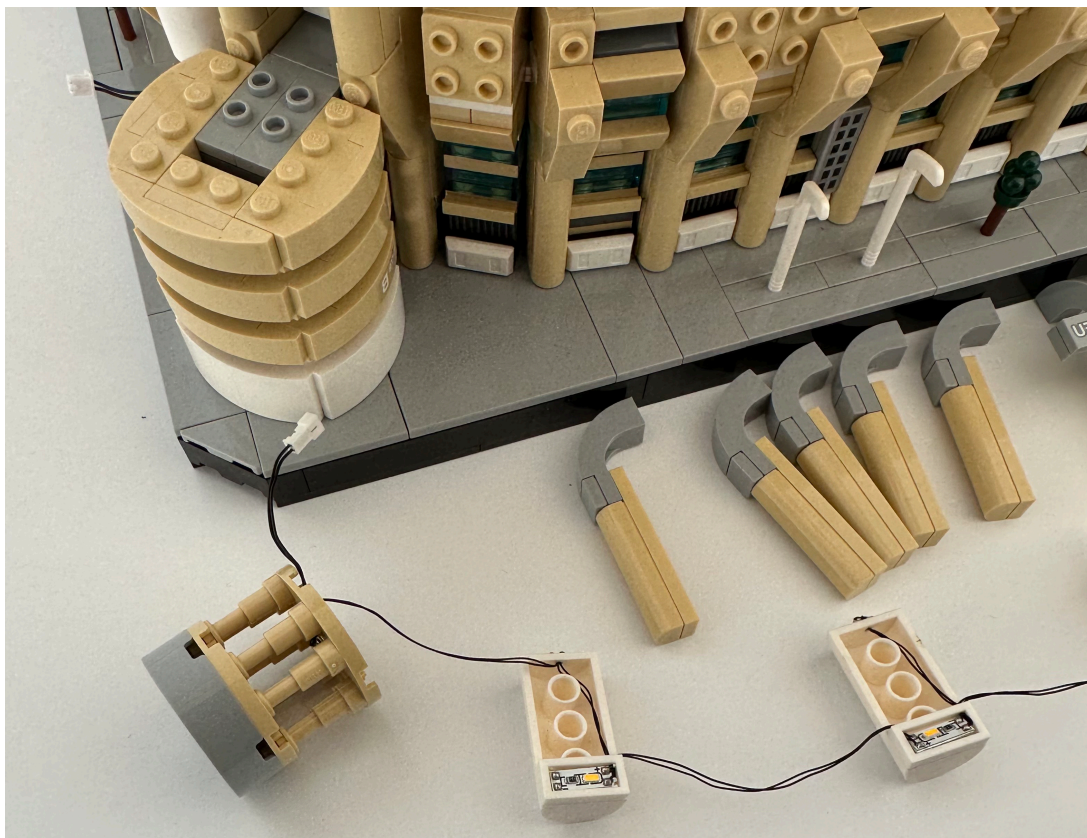

Then restore the remain parts

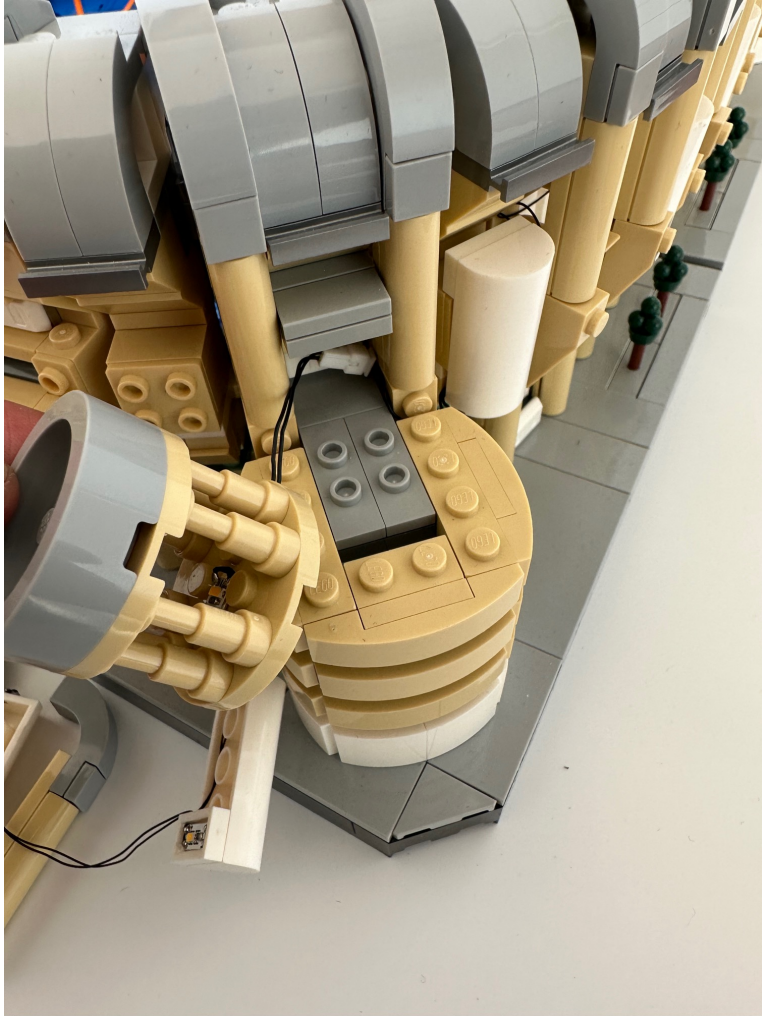

Turn to the front door side and remove the parts similar as the previous step
And take the lighting part B (the one with a single led piece)

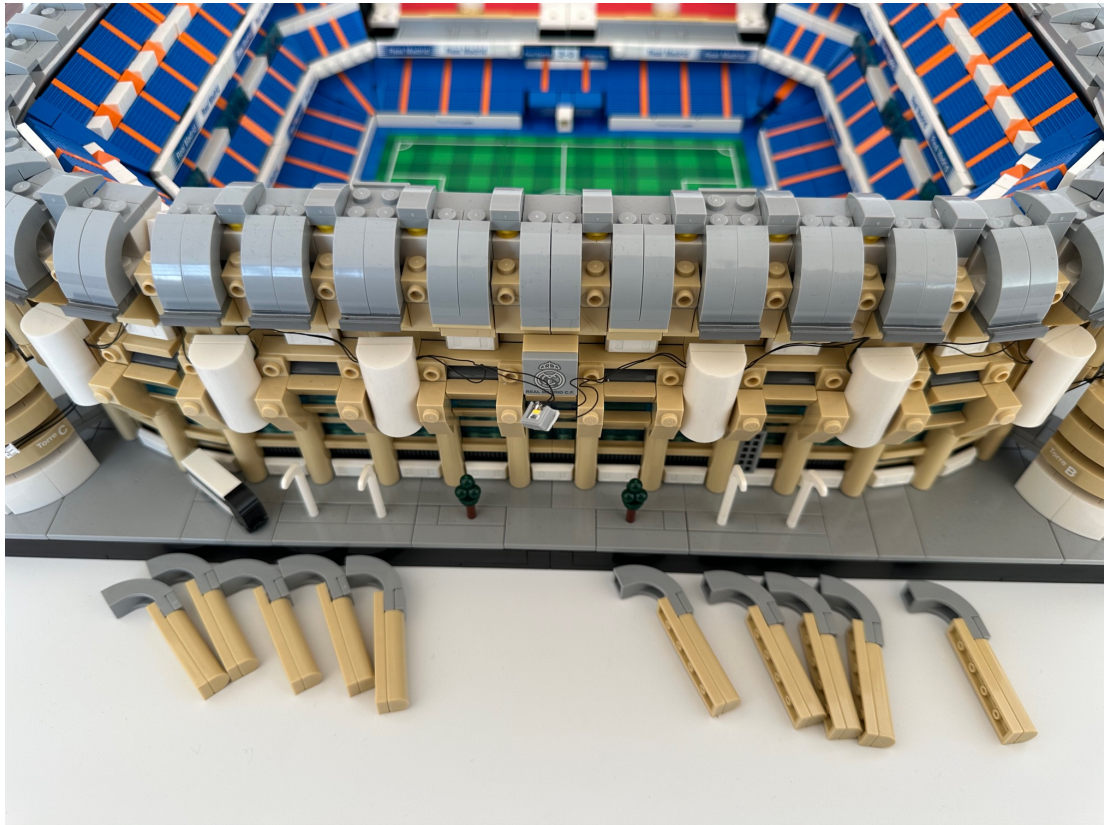

Replace the round plates by the lighting parts same as last step

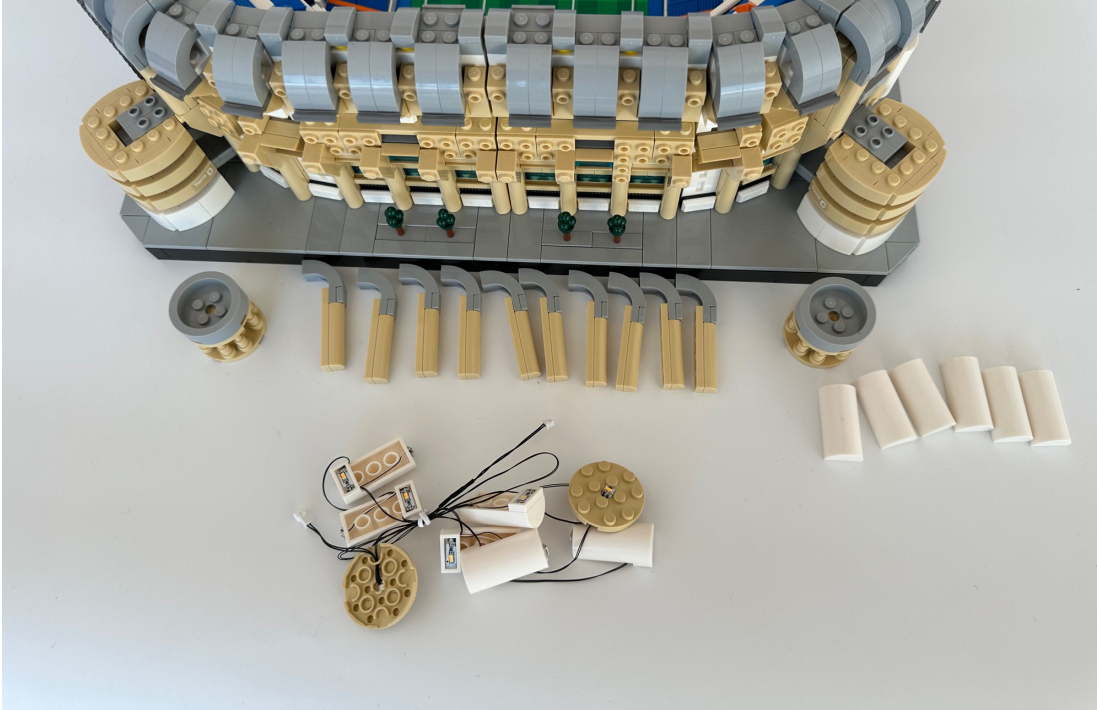

Before assembling, connect the plugs with the previous lighting part A first and hide the connector at the corner

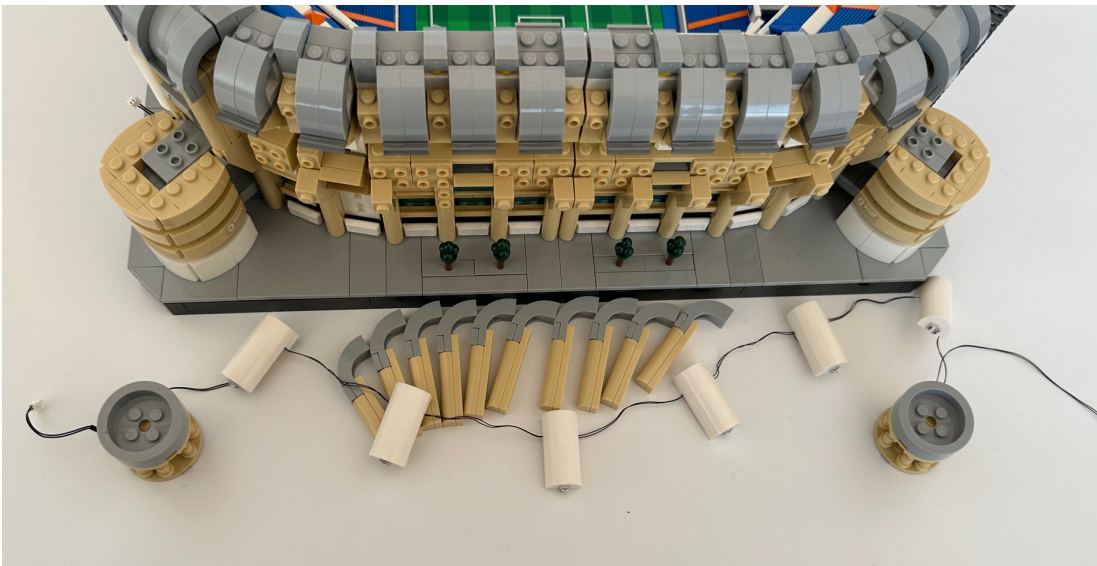

Do the same procedure as before, assemble the lighting parts then restore the removed parts. And stick the single led above the logo at the middle

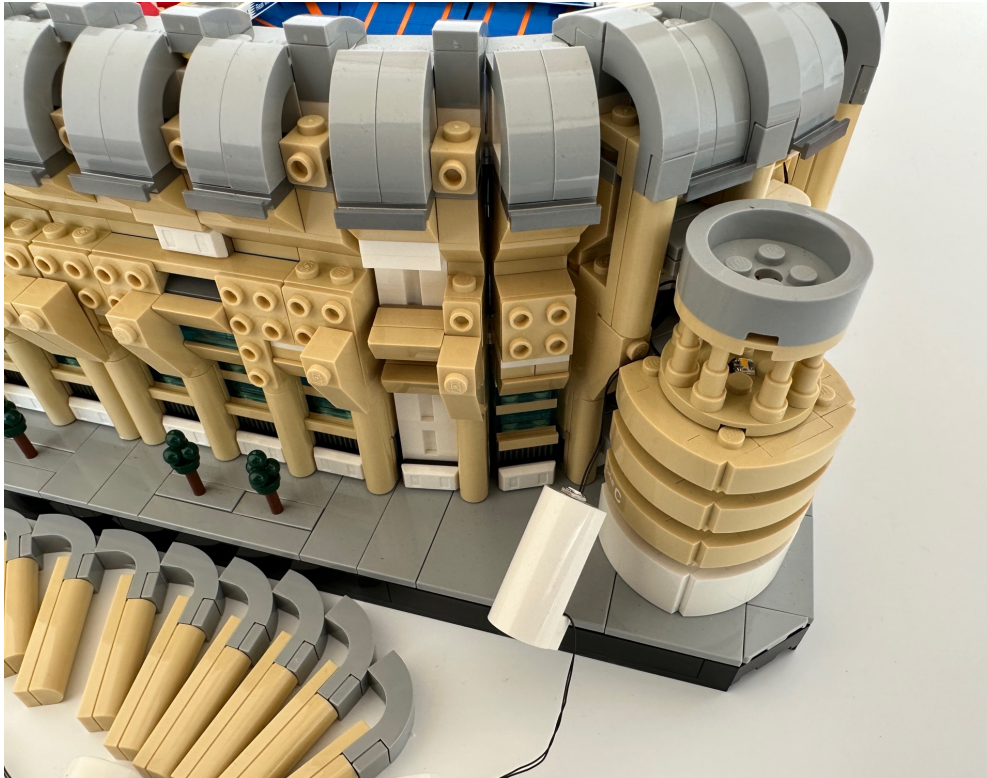

Do the same thing again with lighting part C which has a long cable with connector

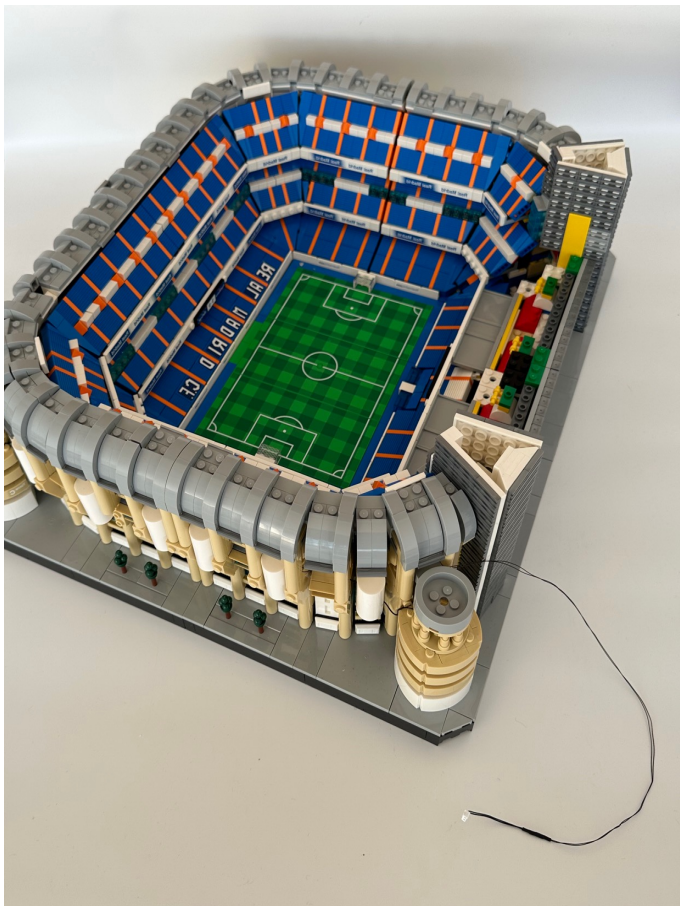

Basically just do the same thing as before, remove the tan round plates and replaced by the lighting parts and take away all the white bricks in the middle

Again, connect the plug with the previous lighting part before assembling and hide the plugs at the corner

Remove the parts and open the tops from both ends

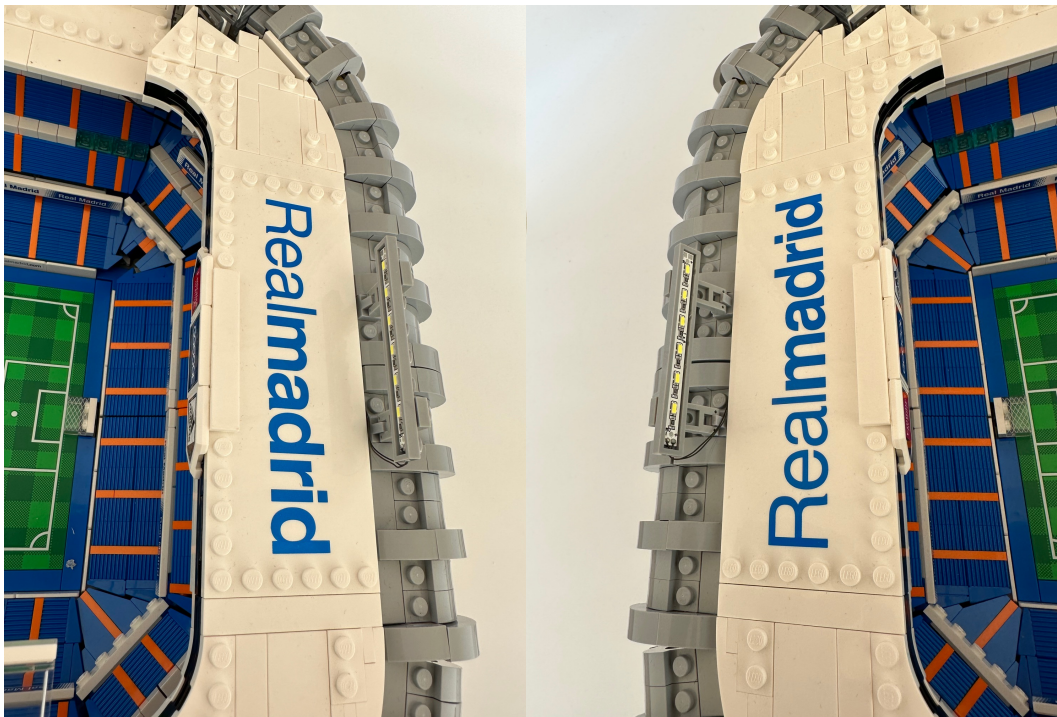

Then it's time to restore the model after all lights are assembled

When put the white top back, remember to connect the cable at the corn first

Move the grey spot lights on the top and assemble them besides the Real Madrid logos

Connect the USB cables then you can light it up
