

F35BS Fighter – Installation Guide

M38-B1361

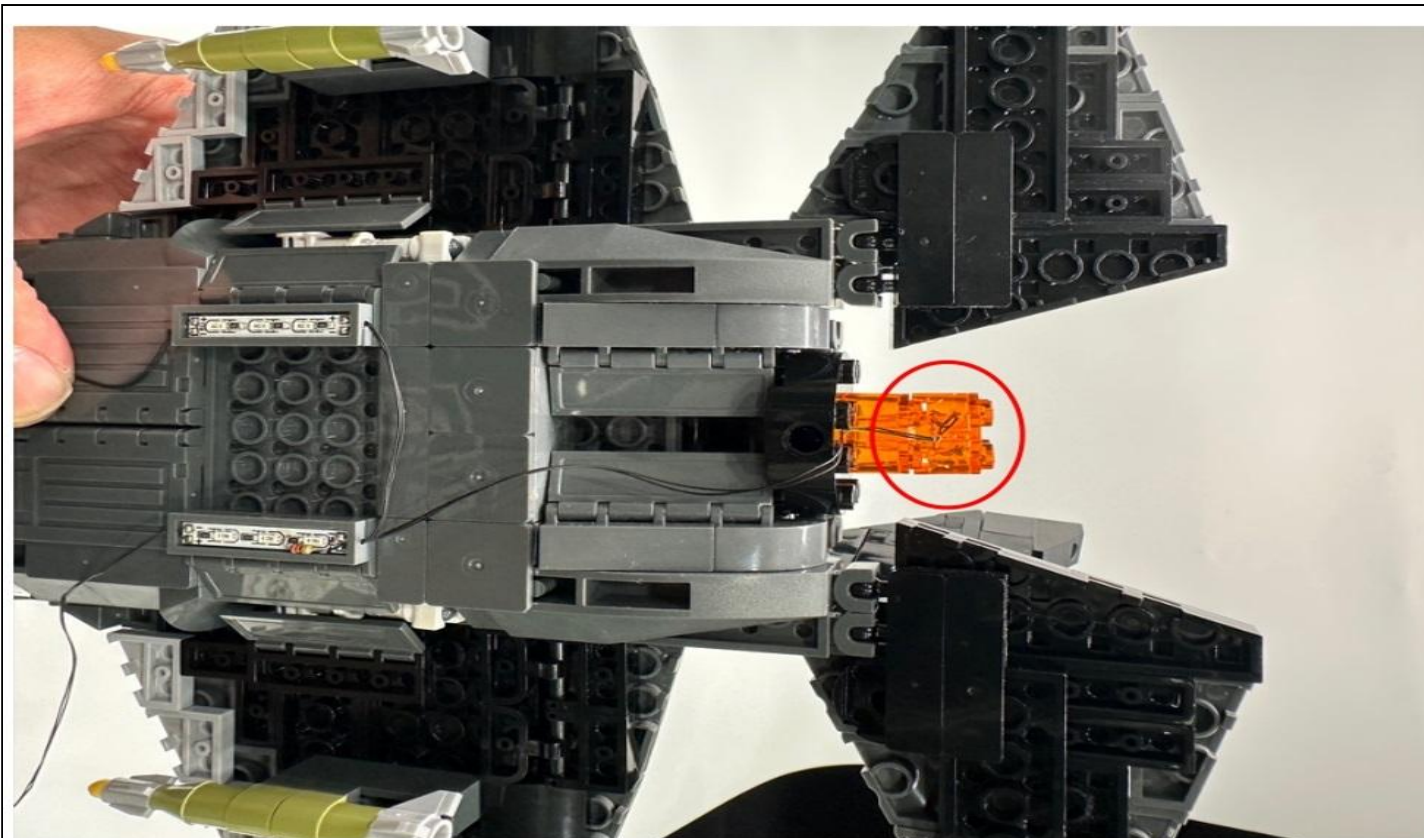

F35BS FIGHTER

Installation Guide

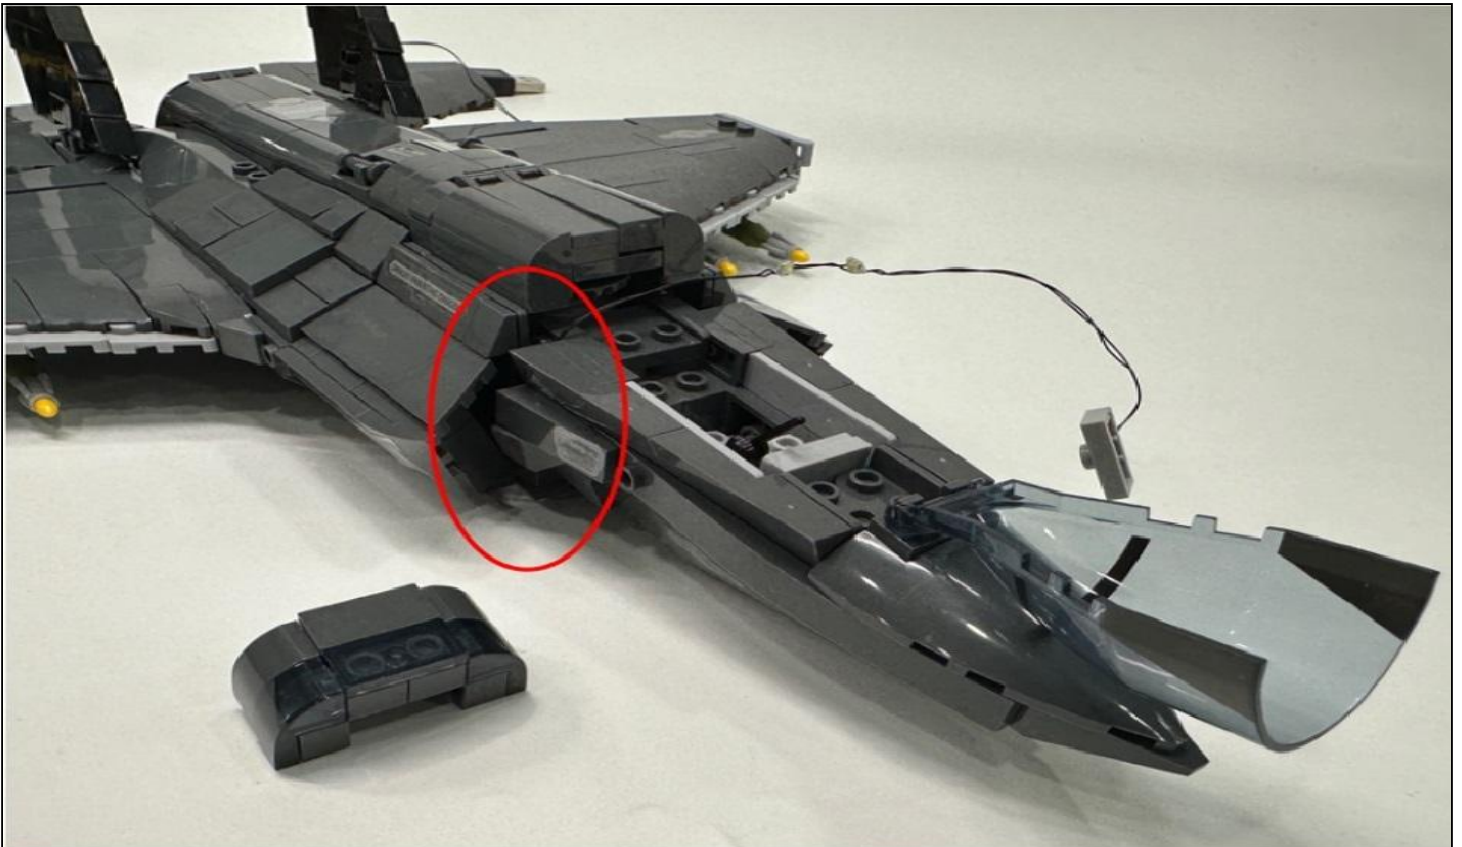

Step 1: First, assemble all of the lighting plates underneath the fighter, as shown in the red circles.

Step 2: Remove the black part and one of the 2x2 orange bricks from the nozzle, then replace it with the lighting component. Reattach the black part once the rear light installation is complete.

Step 3: Remove the shown part and route the remaining lighting components toward the front through the gap in the head section (shown in the red circle). Then reattach the removed part. Remove the clear 1x2 tile and place the two LED bulbs inside the opening.

Step 4: Reattach the tile and install the remaining lighting component at the front. Finally, reattach the green slope piece.
