

Lego 75461

**STAR
WARS**

Darth Vader

Installation Guide

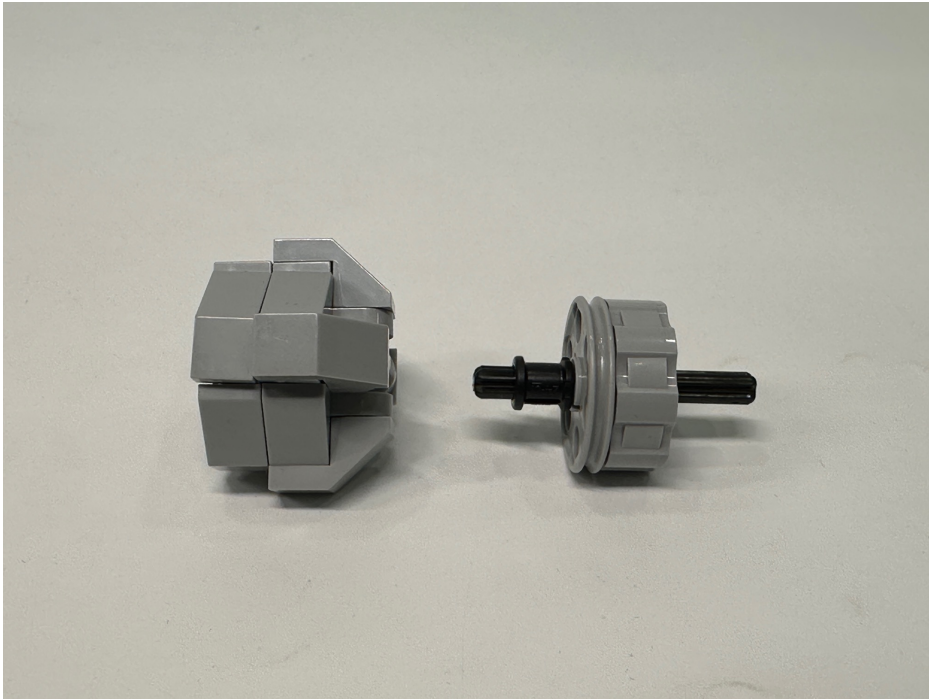

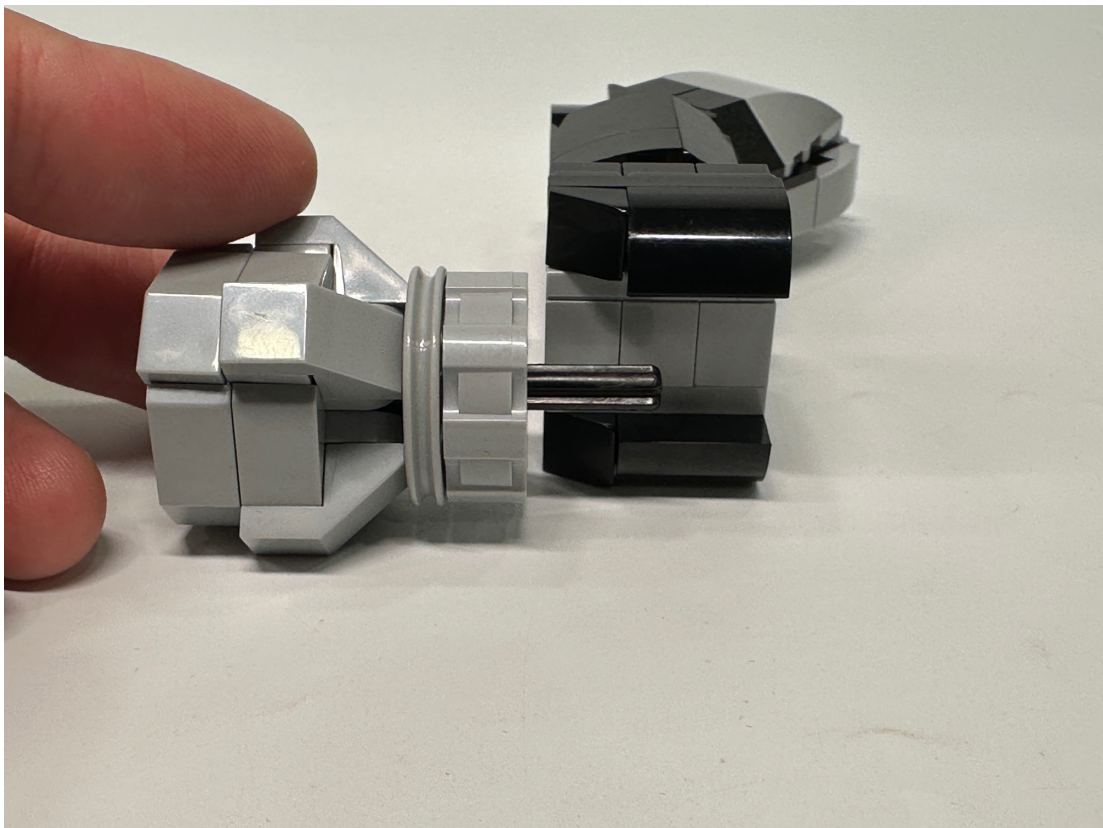

Firstly, detach the lightsaber as shown and just take the parts of the hilt

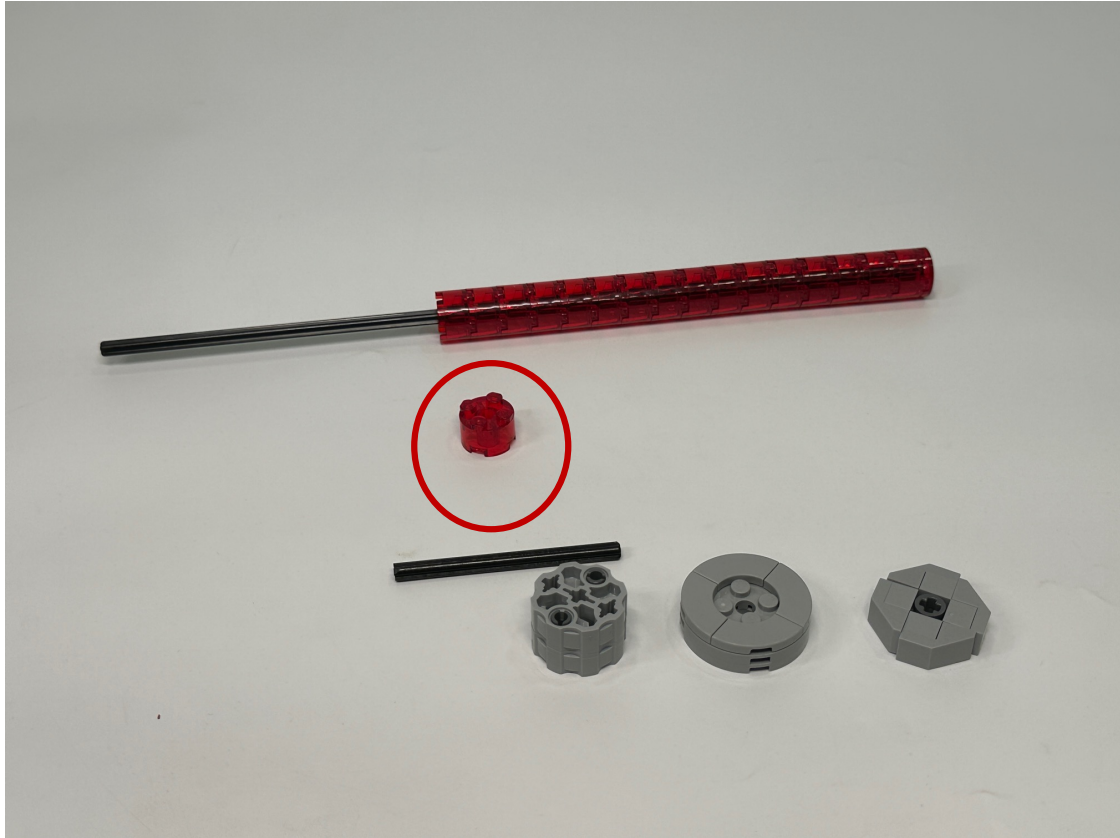

Take stick A which is the short one and reassemble with the bottom of the hilt, the depth of the stick must follow the picture below

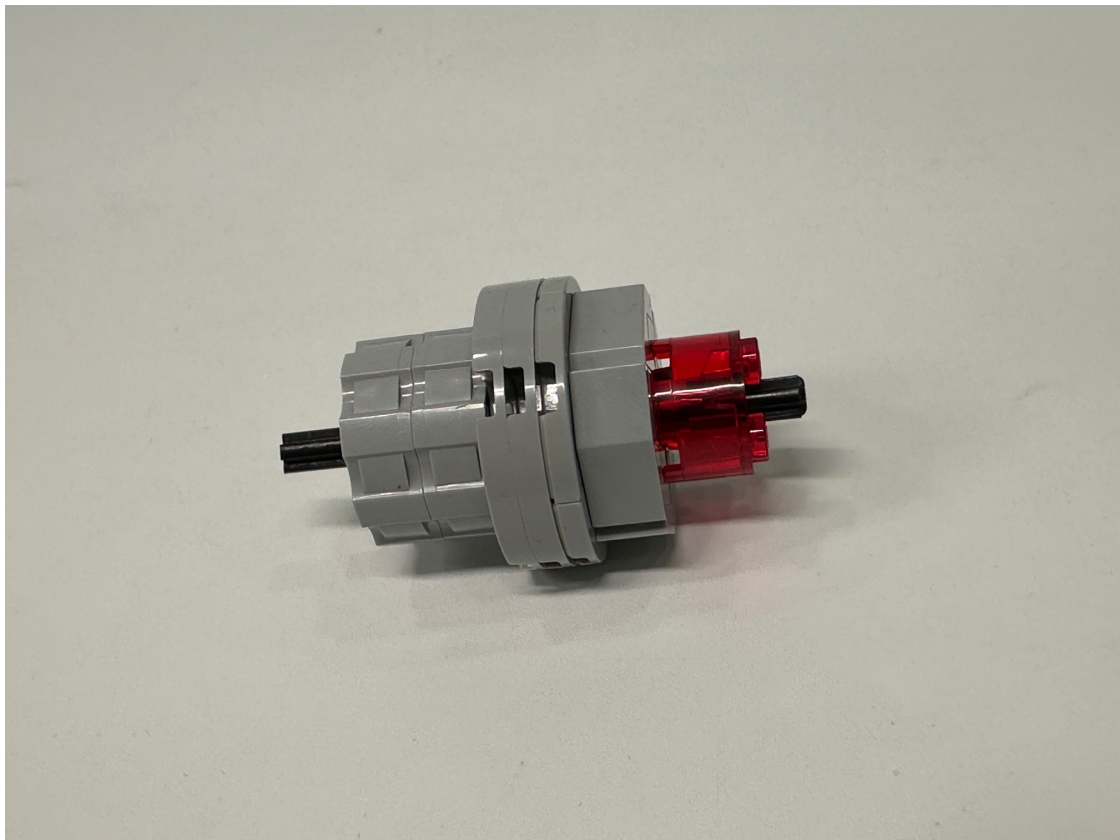

When recombine with the palm of Vader you can see the stick would stab into half of the palm

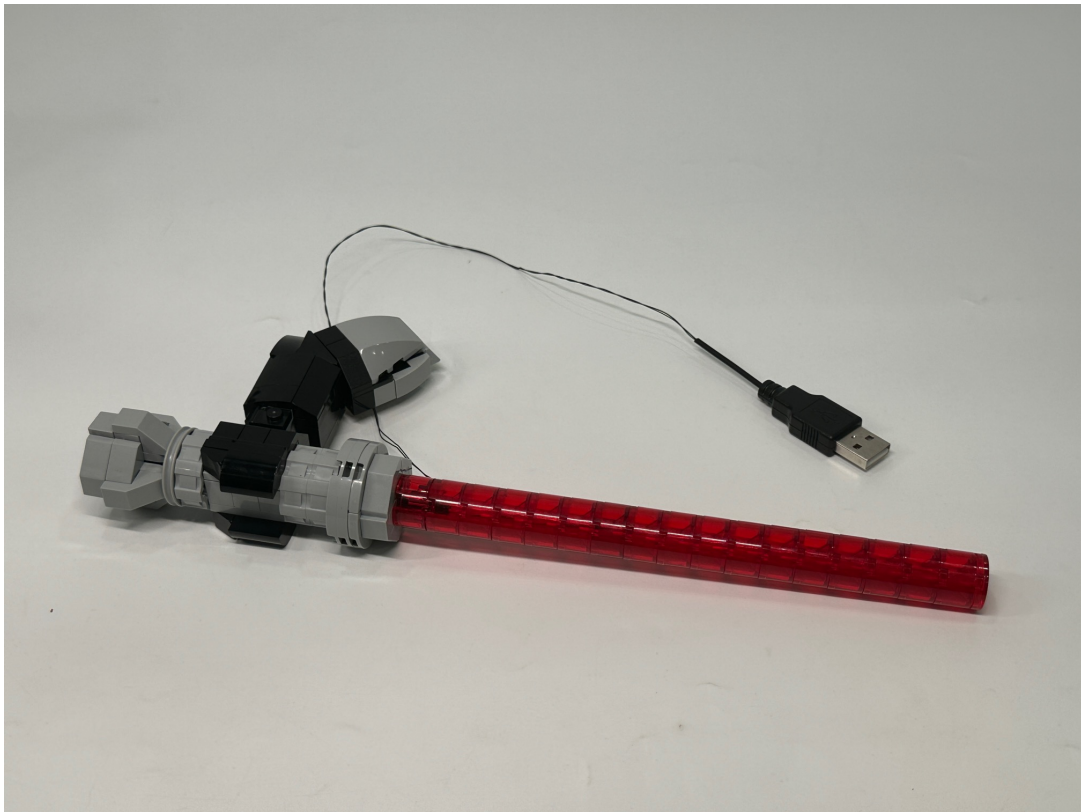

Take one piece of red 2x2 round brick from the original saber

Recombine stick B with the upper part of the hilt as shown

Then combine with lighting part C turn up as a whole saber

Put the arm back to Vader and would be able to light up now
