

Lego 21367

Tintin Moon Rocket

Installation Guide

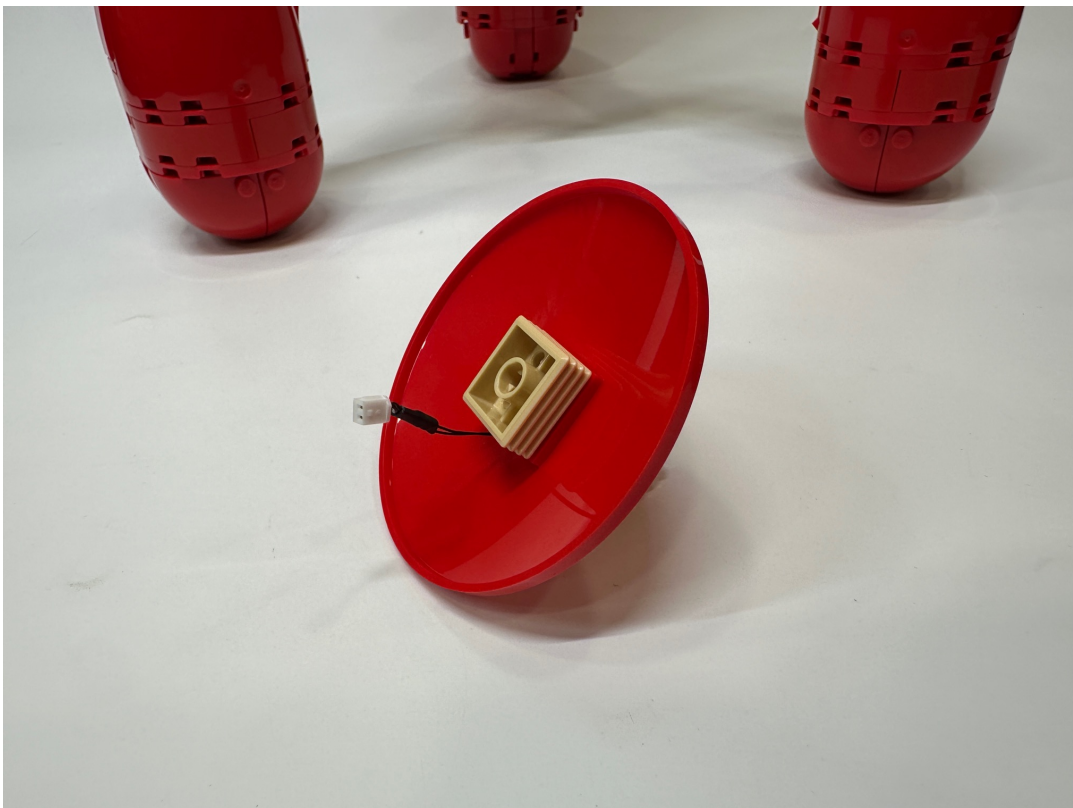

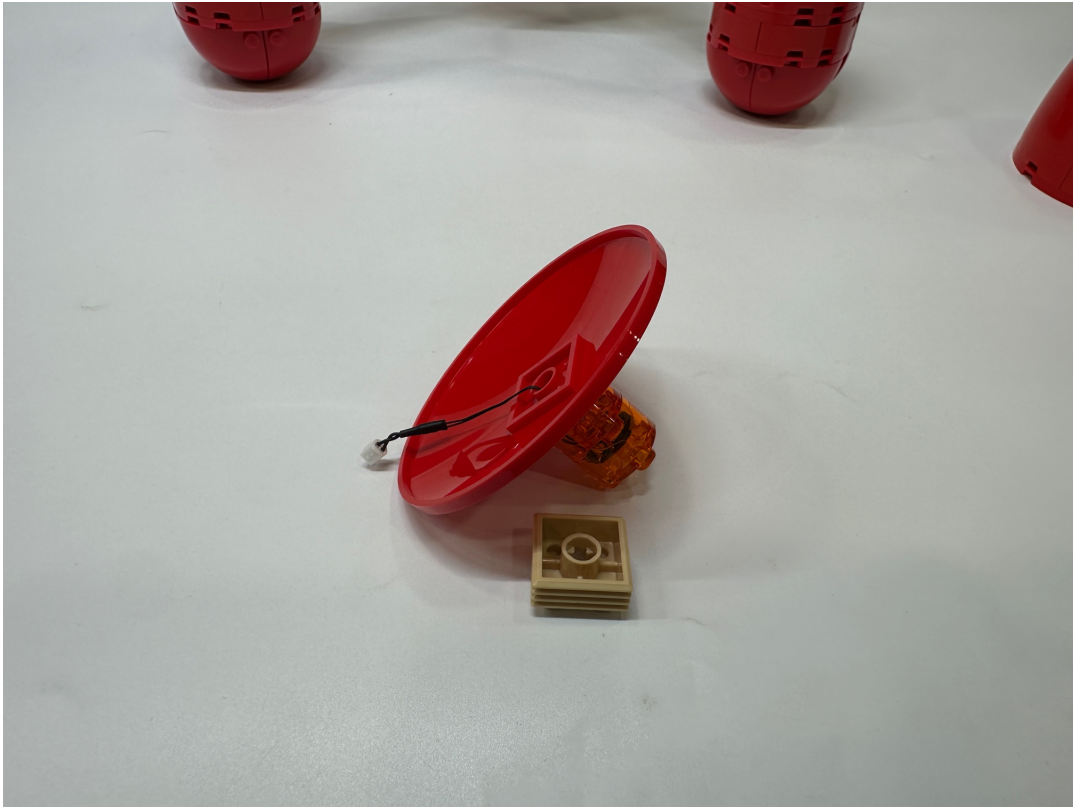

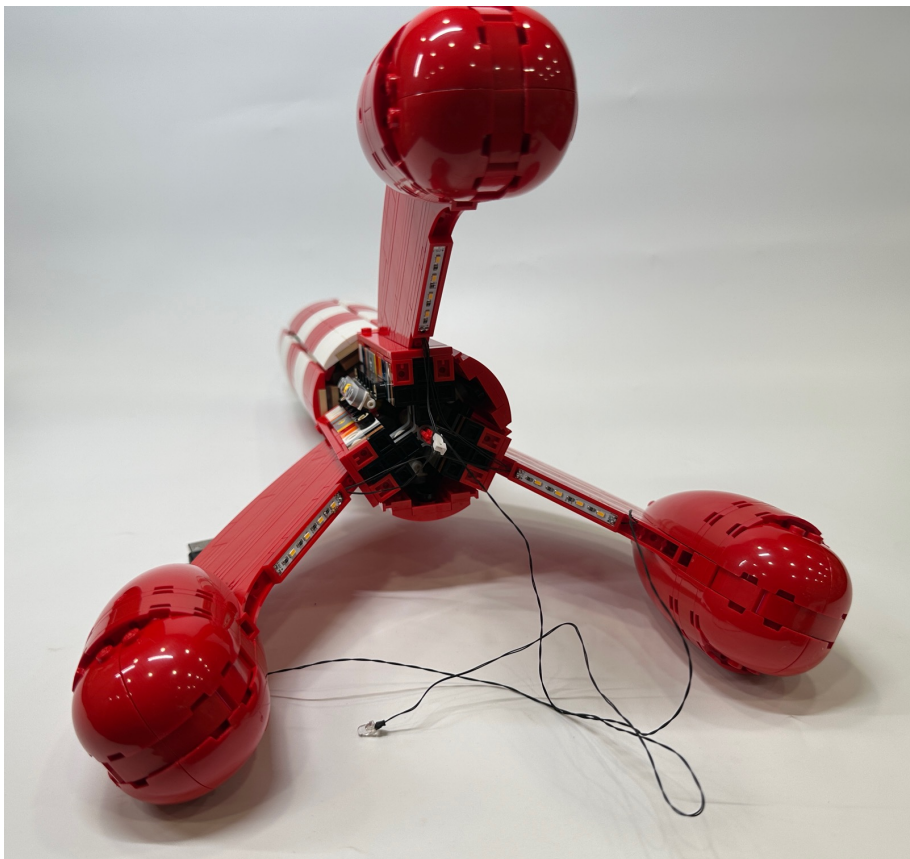

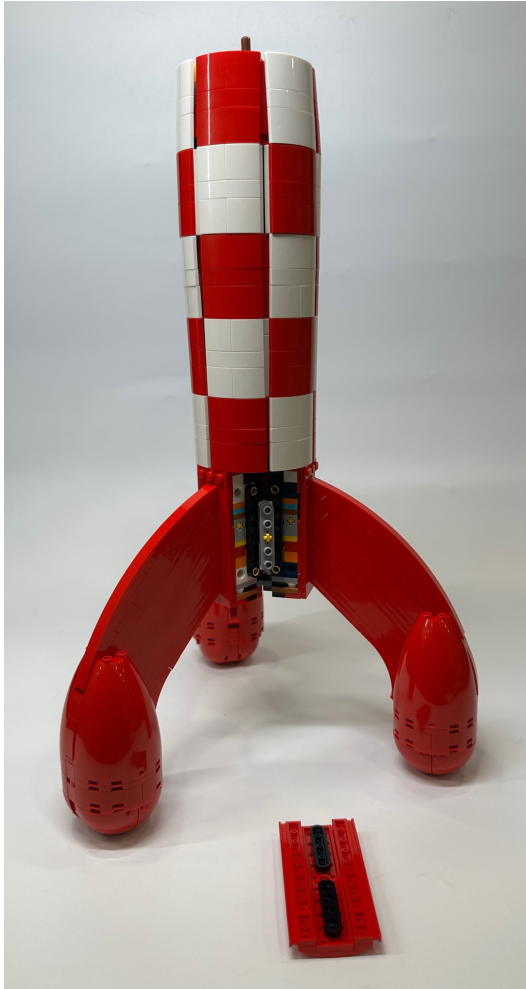

Detach the top and bottom of the rocket at first

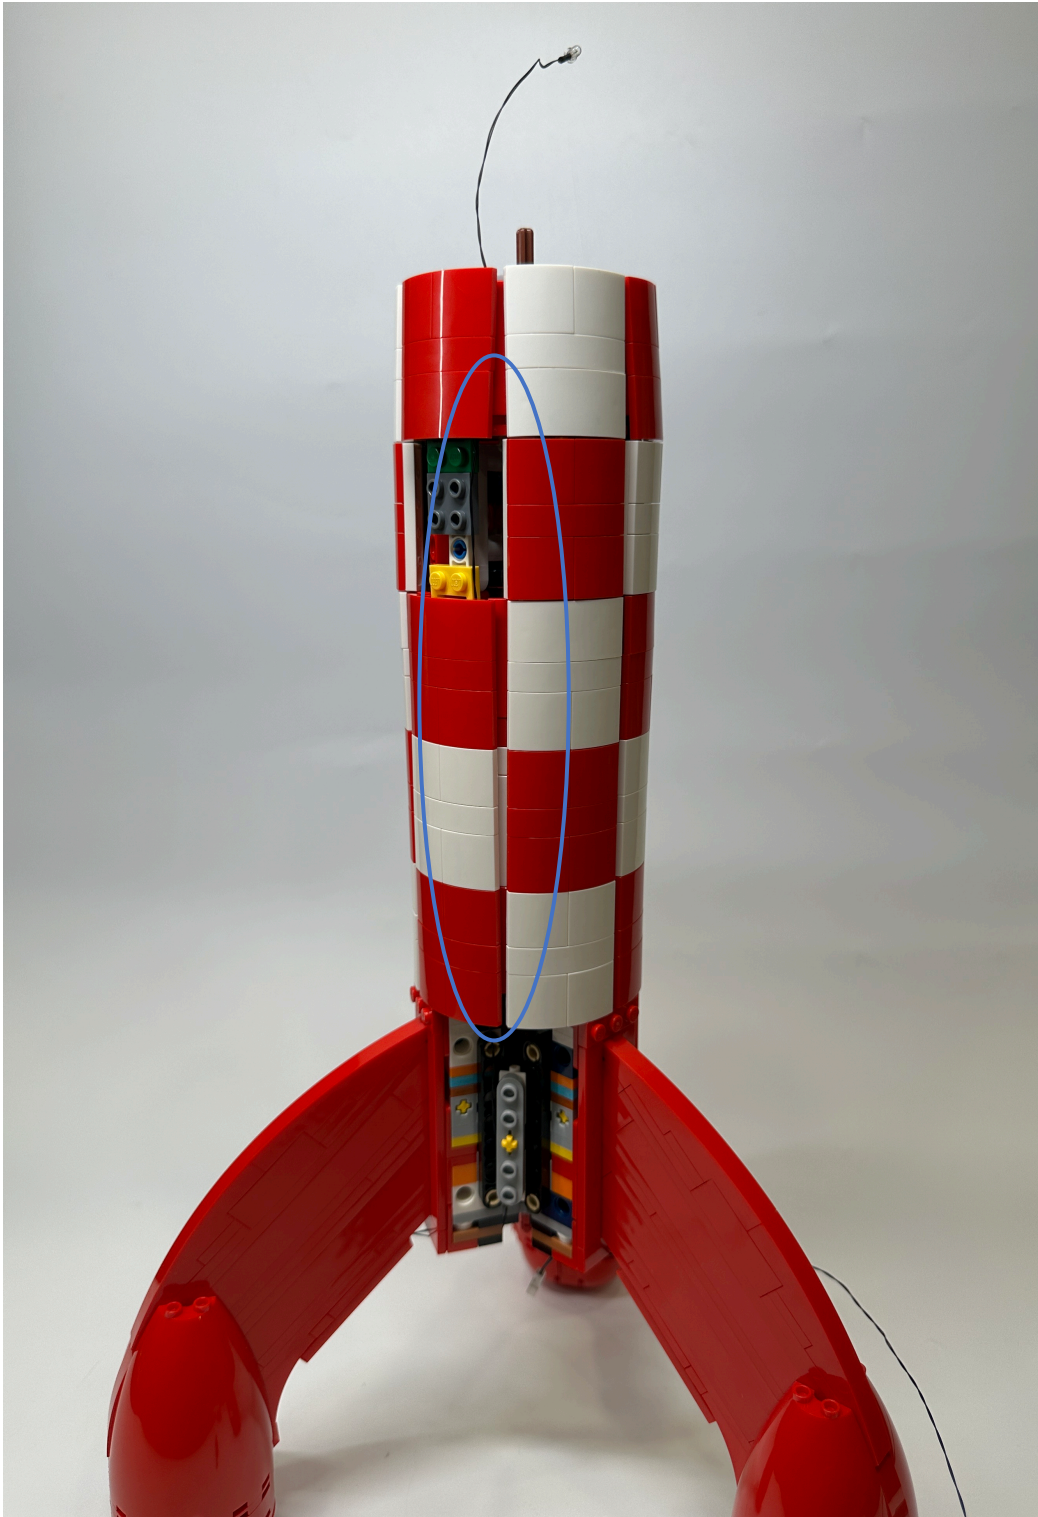

Replace one of the orange 2x2 round block by the lighting part A, get the wire pass through the hole then restore the tan brick

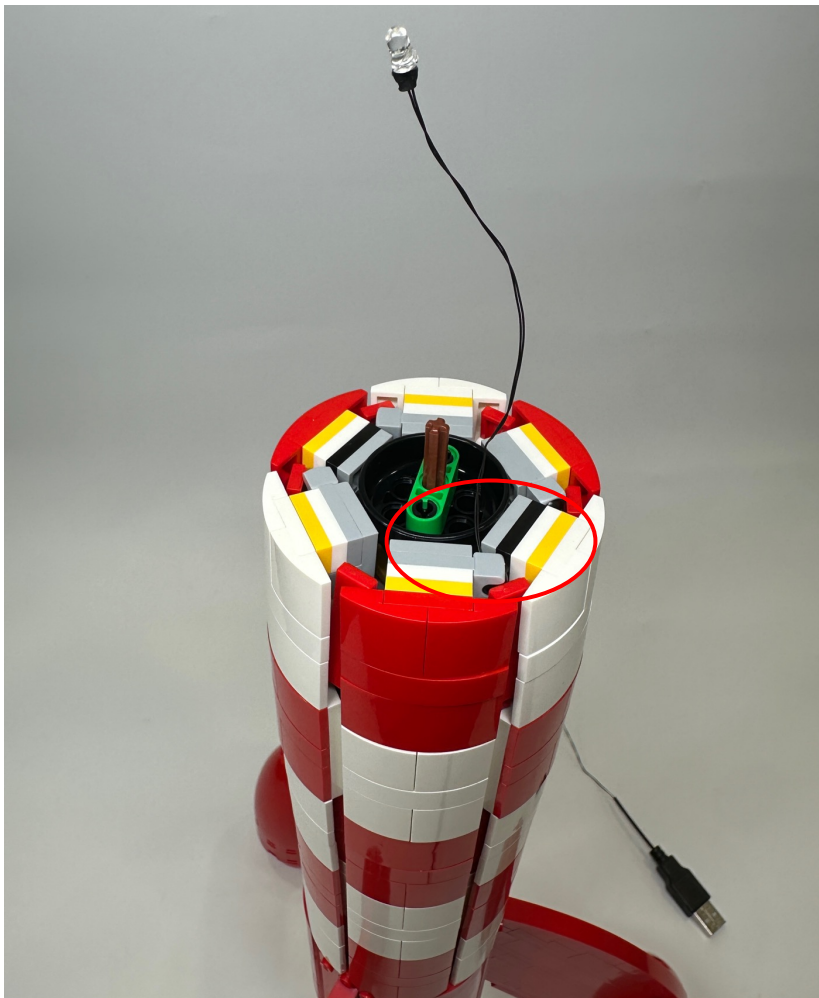

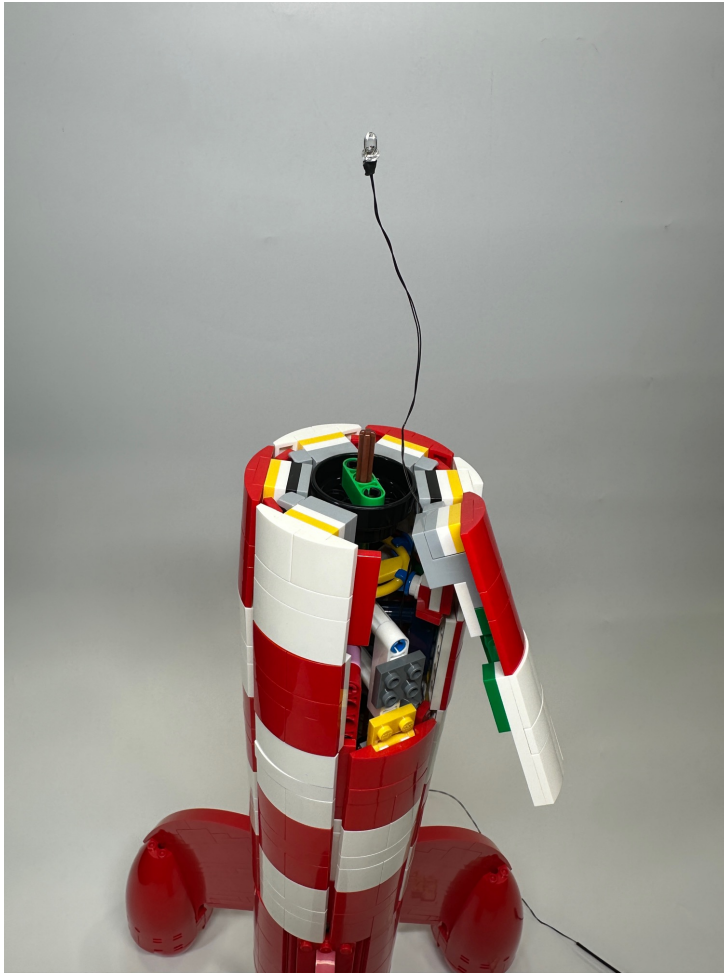

Before assembling part B, detach one side of the panel from the bottom then assemble the lighting plates at the bottom as shown

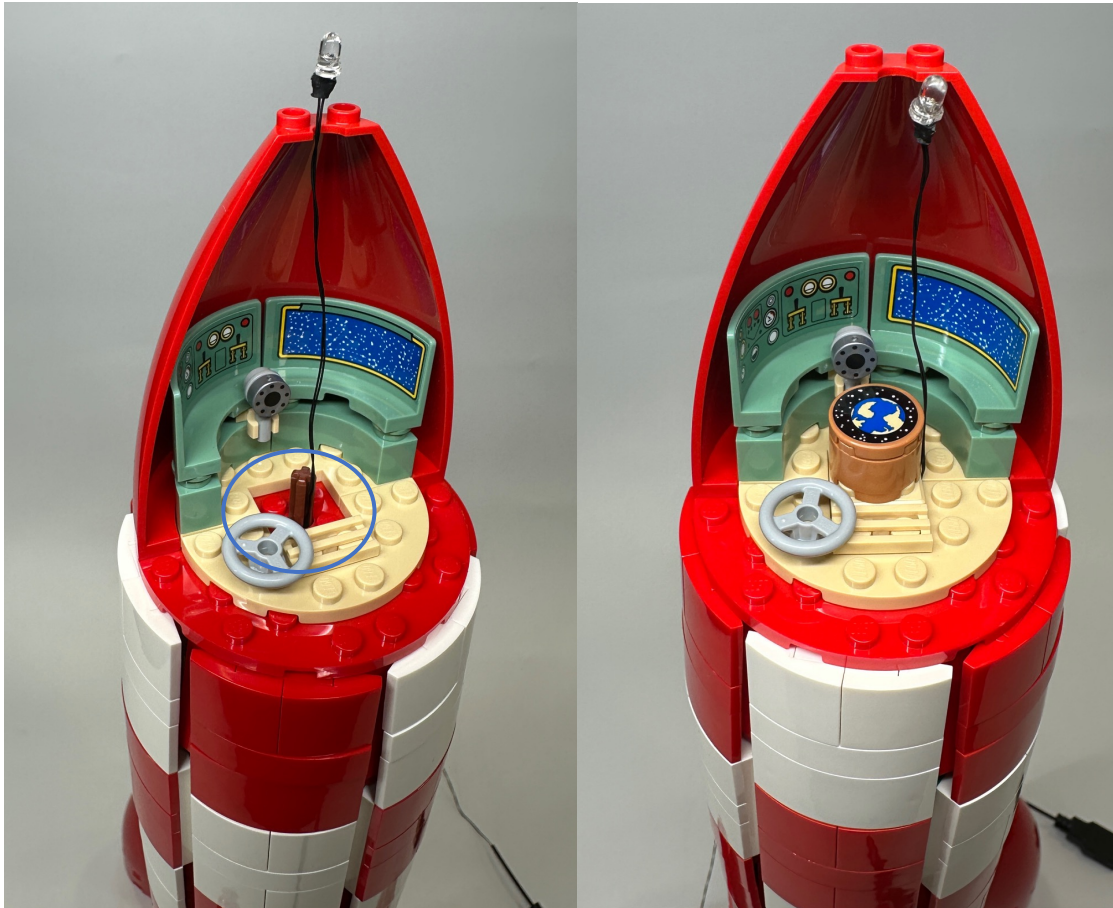

Move the remain led bulb to the top by placing the wire inside the gap of the blue circle shown

Detach one section of the top ring to place the wire to the inner circle

Get the wire through the hole of the big red round plate (blue circle)
then restore the round brick after

Restore the top of the rocket and assemble the clear round plate attached

At last connect the lighting parts at the bottom
